BILLING CODE 4310–25–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NV–940–02–4212–16; N–21720]

Termination of Desert Land Classification; Nevada

December 9, 1991.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This action terminates desert land classification N–21720.

EFFECTIVE DATE: Termination of the classification is effective with the publication of this document.

FOR FURTHER INFORMATION CONTACT: Vienna Wolder, BLM Nevada State Office, 850 Harvard Way, P.O. Box 12000, Reno, NV 89520, 702–785–6526.

SUPPLEMENTARY INFORMATION: Pursuant to section 7 of the Taylor Grazing Act (48 Stat. 1272), desert land classification N–21720 is hereby terminated in its entirety. The following described lands are affected by this action:

Mount Diablo Meridian, Nevada

T. 4 S., R. 36 E.,
Sec. 16, SW¼NE¼;
Sec. 21, N½NE¼.

The area described contains 120 acres in Esmeralda County.

The classification was accomplished pursuant to the Desert Land Act (43 U.S.C. 231, as amended) in response to an application. The application was subsequently relinquished. Since there is no longer any desert land application pending on the land, termination of the classification would allow disposal under the authorities. The land is identified in the Esmeralda-Southern Nye Resource Management Plan for disposal.

The land has been and continues to be open to the operation of the public land laws generally, including the mining laws.

Marla B. Bohl,

Acting Deputy State Director, Operations.

[UT–920–92–4120–10]

Utah: Public Meeting on Coal Tract Delineation

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of public meeting on a coal tract delineation.

SUMMARY: In accordance with the responsibility outlined in the Federal Coal Management Regulations (43 CFR part 3400), the BLM will hold a public meeting to discuss and receive comments on a coal tract delineation the BLM and other interested State and Federal agencies have been working on in the Utah portion of the Uinta Southwestern Utah Coal Region. Specifically, the tract being delineated is located in the Crandall Canyon Area on the Manti-LaSal National Forest of the Wasatch Plateau Coal Field in Central Utah.

SUPPLEMENTARY INFORMATION: BLM has received two coal lease applications under the Leasing by Application program in the area being considered for delineation. Any public comments on the proposed delineation before it is finalized will be useful to the Government in considering this area for possible leasing.

DATES: The public is invited to meet with the Government representatives to review the proposal on January 16, 1992, at anytime between 1 and 3:30 p.m.

ADDRESSES: The meeting will be held in the conference room of the BLM Price River Area Office, 900 North 700 East, Price, Utah.

FOR FURTHER INFORMATION CONTACT: Max Nielson, Uinta Southwestern Utah Coal Project Manager, Utah State Office, 324 South State Street, suite 301, P.O. Box 45155, Salt Lake City, Utah 84145–0155, Telephone 801–539–4038.

Dated: December 12, 1991.

James M. Parker,

State Director.

BILLING CODE 4310–DQ–M

[NV–940–02–4212–24; Nev–0889, Nev–012936, Nev–064866, Nev–065120]

Order Providing for Opening of Lands; Nevada

December 9, 1991.

AGENCY: Bureau of Land Management, Interior.

ACTION: Opening order.

SUMMARY: This order will open 3,125.92 acres of public land to the operation of the public land laws, including all or a portion of the mining laws, the mining leasing laws, and material sale laws. The lands were returned to the United States through private exchange, reconveyance of state selection land, or reconveyance of railroad land.

EFFECTIVE DATE: January 21, 1992.

FOR FURTHER INFORMATION CONTACT: Vienna Wolder, BLM, Nevada State Office, P.O. Box 1200, Reno, Nevada 89520, 702–785–6526.

SUPPLEMENTARY INFORMATION:

1. The following described lands were patented to the Central Pacific Railroad and were reconveyed to the United States on August 18, 1930.

Mount Diablo Merdian, Nevada

T. 32 N., R. 37 E.,
Sec. 17, Lot 5.

2. The following described lands were reconveyed to the United States on February 1, 1954, through an exchange with George and Margaret Gove:

Mount Diablo Meridian, Nevada

T. 37 N., R. 38 E.,
Sec. 22, SE¼SE¼.

3. The following described lands were patented to the Central Pacific Railroad company on October 5, 1928, and were reconveyed to the United States on May 8, 1964, through an exchange with John C. Carpenter Jr. and Andrew J. Magnuson:

Mount Diablo Meridian, Nevada

T. 31 N., R. 50 E.,
Secs. 13, 23, 25;
Sec. 27, NE¼, N½SE¼, SE¼SE¼;
Sec. 35.

4. The following described lands were reconveyed to the United States on March 25, 1957, through an exchange with John J. Reed:

Mount Diablo Meridian, Nevada

T. 31 N., R. 56 E.,
Sec. 27, NW¼.

The areas described aggregate 160.000 acres in Elko County, 2,923.35 acres in Eureka County, 40 acres in Humboldt County, and 2.57 acres in Pershing County.

5. All mineral interests in the above described lands were received by the United States with the following two exceptions: The United States received all minerals except oil and gas in T. 31 N., R. 50 E. and received no mineral interests in T. 31 N., R. 56 E., Sec. 27, NW¼.

6. At 10:00 a.m. on January 21, 1992, all the lands except those in T. 31 N., R. 50 E. will be open to the operation of the public land laws, subject to valid existing rights, existing classifications and withdrawals, and requirements of applicable law. All valid applications received prior to or at 10 a.m. on January 21, 1992, will be considered as simultaneously filed. All other applications received will be considered in order in filing. Publication of an order dated October 8, 1964, opened the lands in T. 31 N., R. 50 E. to surface entry effective November 13, 1964.

7. At 10 a.m. on January 21, 1992, the lands will also be open to the operation of the mining and mineral leasing laws as to minerals received as indicated by paragraph 5 above. Appropriation of lands under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

Billy R. Templeton,

State Director, Nevada.

BILLING CODE 4310–HC–M

[NV–930–02–4212–11; N–4157]

Decision To Divest Title to Land Patented to the White River Fish and Wildlife Improvement Association, Inc., and To Revest Said Title to the Land in the United States

Dated: December 11, 1991.

On December 11, 1991, the Bureau of Land Management, Nevada State Office, issued the following decision to divest title to a parcel of land from the White River Fish and Wildlife Improvement Association, Inc., and to revest said title in the United States. Because the corporation no longer exists and the trustees are either deceased or cannot be located, the decision is being published herein to give notice before this action becomes final.

Decision

White River Fish and Wildlife Improvement Association, Inc., 828 Kenny Way, Las Vegas, NV 89107

Recreation and Public Purposes Act Patent No. 27–70–0112

(N–4157)

Divestiture of White River Fish and Wildlife Improvement Association's Title—Revestiture of Title in the United States

Pursuant to the provisions of the Recreation and Public Purposes Act (43 U.S.C. 869, *et seq.*), the United States issued Patent No. 27–70–0112, dated May 22, 1970, to the White River Fish and Wildlife Improvement Association, Inc., (hereinafter referred to as the Association) for a 10-acre camp and recreation site on the following-described land:

Mount Diablo Meridian, Nevada

T. 6 N., R. 61 E.,
Sec. 27, S½NE¼SE¼NE¼, N½SE¼SE¼ NE¼.

Subsequent field examinations of the land revealed that the Association was not in compliance with the approved plans of management and development because many of the planned improvements had not been constructed and because the area was in a state of disrepair. Photographs taken of the area in 1991 indicate that the site continues to be in a state of disrepair. Attempts to contact the trustees of the Association revealed that four of the trustees are deceased, and the whereabouts of one trustee, Sherman E. Nugent, is unknown. On December 1, 1984, the Nevada Secretary of State's Office revoked the Association's corporate charter because a list of current officers was not filed.

VOL
56
ISS
245
DE
20
1991
UMI

One of the conditions of the patent is the reversion of title to the United States if the patentee or its successor does not comply with the provisions of the approved plans of development and management filed with the Bureau of Land Management on January 19, 1970. The patent further states that the Secretary of the Interior or his delegate, after due notice and opportunity for a hearing, may declare the terms of the grant (patent) terminated in whole or in part.

Therefore, on June 26, 1991, the Ely District Manager issued a Notice to the Association at its address of record informing the Association that its failure to comply constituted a violation of the terms of the patent and the Association to show cause why action should not be taken to revest title to the land in the United States. There was no response to the Notice. Therefore, title to the above-described land is hereby divested from the Association and revested in the United States because the Association no longer exists and because the Association has not been in compliance with the approved plans of management and development since 1979, as required by the patent terms.

Within 30 days of the date of receipt of this decision, you have the right of appeal to the Board of Land Appeals, Office of the Secretary, in accordance with the regulations at 43 CFR 4.400. If an appeal is taken, you must follow the procedures outlined in the enclosed Form 1842–1, Information on Taking Appeals to the Board of Land Appeals. Within 30 days after you appeal, you are required to provide a Statement of Reasons to the Board of Land Appeals and a copy to the Regional Solicitor's Office listed in Item 3 on the form. In addition, please provide this office with a copy of your Statement of Reasons. The appellant has the burden of showing that the decision appealed from is in error.

If no appeal is filed within the time specified, this decision will be deemed to have become final and the appropriate records, including the White Pine County records, will be noted regarding extinguishment of the Association's title to the land and revestiture thereof in the United States.

FOR FURTHER INFORMATION CONTACT: Joanna Buel, BLM, Nevada State Office, 850 Harvard Way, P.O. Box 12000, Reno, NV 89520, 702–785–6512.

Marla B. Bohl,

Acting Deputy State Director, Operations.

BILLING CODE 4310–HC–M

Minerals Management Service

Notice to Lessees and Operators and Pipeline Right-of-Way Holders

AGENCY: Minerals Management Service, Interior.

ACTION: Notice to lessees and operators of Federal oil, gas, sulphur, and salt leases and pipeline right-of-way holders (NTL) in the Outer Continental Shelf, Gulf of Mexico OCS Region.

SUMMARY: On May 2, 1991, the Minerals Management Service (MMS), Gulf of Mexico OCS Region (GOMR), published a proposed NTL clarifying historic shipwreck survey requirements and the areas on the Outer Continental Shelf (OCS) where such surveys will be required. A significant reduction was proposed (approximately 50 percent) in the area where historic shipwreck surveys will be required. A more concentrated survey interval was also proposed (i.e., from 150 meters to 50 meters) in high probability areas for historic shipwrecks to better locate, evaluate, and protect historic period wrecks that may occur in these high probability areas.

EFFECTIVE DATE: February 17, 1992.

FOR FURTHER INFORMATION CONTACT: Dr. Richard J. Anuskiewicz (504) 736–2796 or Mr. John R. Greene (504) 736–2865.

SUPPLEMENTARY INFORMATION: The purpose of this notice is to inform the public, pursuant to the National Historic Preservation Act of 1966 (Pub. L. 89–665), as amended, the National Environmental Policy Act of 1969 (Pub. L. 91–190), and the OCS Lands Act of 1978 (Pub. L. 95–372), as amended, that the MMS, Gulf of Mexico OCS Region, is amending its historic shipwreck survey requirements. On Thursday, May 23, 1991, a workshop was held at the Minerals Management Service Gulf of Mexico Regional Office in New Orleans, Louisiana. The workshop was attended by representatives from the oil and gas industry and geophysical survey companies, geophysicists, professional marine archaeologists, and archaeologists from Federal and State agencies. Some of the comments presented herein are from the archaeological workshop. Others are in response to formal, written comments sent to the MMS Gulf of Mexico OCS Region regarding the NTL. This final NTL supersedes all other NTL's and Letters to Lessees (LTL's) which relate to archaeological resources in the Gulf of Mexico OCS Region with the exception of the LTL dated November 30, 1990, which instituted the redefined high probability areas for historic period shipwrecks.

Public Comments and Agency Responses

General Comments

Comment: One commenter noted that while the elimination of some 50 percent of the total area, gulf-wide, to be surveyed is proper, the benefit is somewhat offset by tripling the required survey density from 150 meters to 50 meters. The commenter questioned whether the increase in survey density is actually needed unless some anomaly is discovered by a survey under the current survey requirements. Another commenter stated that an increase in survey density should be predicated upon the findings of an initial survey sweep under the currently required 150-meter survey density.

Response: It has been demonstrated that magnetometer survey at a 150-meter linespacing can completely miss a historic period shipwreck. The 1989 MMS-funded study on historic shipwrecks and the evaluation of magnetic anomalies in the northern Gulf of Mexico concluded that the 150-meter survey linespacing methodology cannot differentiate, at an acceptable confidence level, between modern ferromagnetic debris and potential archaeological resources. Given the study conclusions and refinement of the historic shipwreck high probability areas, an increase in the survey linespacing to 50 meters is warranted to better protect a potential resource. Basing an increase in survey density on an inadequate initial sweep would not serve to protect a potential resource.

Specific Comments

Comment: A commenter suggested that any archaeological resource survey requirements should be noted by MMS prior to a lease sale involving a lease with such requirements. The commenter stated that this would be important for both evaluating such leases and scheduling the exploitation of the respective leases.

Response: The MMS Gulf of Mexico OCS Region issued an LTL, dated November 30, 1990, redefining the high probability areas for historic period shipwrecks. The LTL was sent to active lease operators, survey companies, and archaeologists. Included in the package was a refined list of lease blocks having a high probability for the occurrence of historic period shipwrecks. The high probability areas for prehistoric archaeological resources did not change. Identification of these lease blocks may

be made from visuals previously issued by the MMS. In addition, an Information to Lessees (ITL) will be included in each Sale Notice which would direct lessees where to acquire information about which blocks would require an archaeological resource survey. Both the list of redefined high probability areas for historic period shipwrecks and the visuals delineating those areas with a high probability for prehistoric archaeological resources are available from the MMS by request. Under current policy, the MMS provides leaseholders with written notification of the type of archaeological survey needed (if necessary) shortly after awarding the leases. Lessees requiring information as to the type of archaeological survey necessary for specific lease blocks should request such information from the MMS Gulf of Mexico OCS Region.

Comment: A commenter suggested that only targets not considered to be associated with oil and gas activities, fishing activities, and natural phenomena be included in the listing of side-scan sonar targets.

Response: It is useful to have a listing of side scan sonar data associated with the natural and man-made activities addressed in the archaeological survey report. Specific examples would include well locations and geologic outcrops. It is the intent of the NTL not to require a listing of every side-scan sonar feature, but to require a listing of all side-scan sonar contacts which could be related to historic period shipwrecks. The determination of the significance of identified side-scan sonar targets (such as those mentioned in the comments) and their inclusion in the listing of side-scan sonar targets is the responsibility of the professional archaeologists and geophysicists that analyze the data and prepare reports.

Comment: A commenter stated that it would be an imposition from a commercial standpoint to require two adjacent survey lines to be run in different cardinal directions. Further, in certain weather conditions it would not be feasible to accomplish this requirement. It was also stated that unidentified magnetic anomalies which should be shown may not be on adjacent, opposite lines.

Response: The intent of this portion of the NTL is to provide the MMS analysts with data samples which are indicative of data quality taken under differing conditions encountered during the survey. The MMS' remote-sensing survey analysis experience indicates that nearly all surveys have survey lines which have been run in opposite cardinal directions. The MMS is aware that data quality may differ between survey lines that are run with a following sea, versus, those run into a head or quartering sea. Also, the logistics of remote-sensing marine survey suggests that two adjacent lines run in opposite cardinal directions would not be run consecutively. This allows for an interval of time between the running of the survey lines and a subsequent possible change in weather conditions. This would help maximize remote-sensing information and data quality and keep requirements for data submission minimal.

When weather conditions encountered in the survey prevent the acquisition of data on two adjacent survey lines run in different cardinal directions, the preparers of archaeological reports should follow guidelines under the Introduction of the NTL (1.4.). These guidelines state, "When any of the following requirements cannot be met for technical or logistical reasons, an explanation of the problem shall be provided in the archaeological resource report."

In response to the final portion of the comment, it should be noted that the NTL states that whenever possible the magnetometer strip-chart data samples should include unidentified magnetic anomalies. The MMS understands that in many instances two adjacent survey lines will not contain unidentified anomalies.

Comment: A commenter suggested that the section stating "* * * and line direction with Universal Transverse Mercator coordinates, x and y coordinates and latitude/longitude reference points from appropriate regional systems" be changed to read "* * * and line direction in the grid projection in which the lease is described, i.e., UTM, Lambert, TM, etc., that x, y grid coordinates, tics be placed every five inches thereon with geodetic graticules every 60 seconds; and * * * shall be oriented to grid north."

Response: The suggested change will be adopted with the exception that all maps will be oriented to true north.

Comment: A commenter requested that the NTL be specific in its definition of highlighting of sample geophysical survey data versus the annotation of such data. The commenter also requested that MMS state if an unannotated/unhighlighted copy is acceptable.

Response: The MMS understands that highlighting and/or annotating representative sample geophysical survey data as an illustration of the geophysical and/or archaeological analysis of the survey data serves a useful purpose. However, such annotation or highlighting directly on the data sample impedes and delays the interpretation of the few data samples provided in the archaeological survey report. The NTL will be changed to read "* * * any interpretive highlighting or annotation of the sample data shall be on either a separate overlay or a copy of the representative sample data. In no instance should original survey data be highlighted." In those cases where a separate overlay is not used for highlighting or annotation, a second copy of the data sample free of highlighting or annotation should be included in the report.

Comment: A commenter stated that waivers are sometimes granted for magnetometer and side scan sonar hazard survey requirements in deep waters. The commenter stated that these tools are incapable of resolving features which might be indicative of historic shipwrecks in areas of extreme water depths and steep slopes. The commenter requested exception to the requirement for preparation of archaeological reports for specific deep water blocks.

Response: The redefined high probability area for historic period shipwrecks includes deep water blocks which have a high probability for the location of specific shipwrecks. With this increased confidence in the location of these shipwrecks comes the responsibility for protecting these deep water wrecks from impact by oil, gas, sulfur, and salt activities. For this reason, it is necessary that an archaeological report be prepared based on the available geophysical data. The MMS recognizes that, in some cases, due to technical or logistical reasons, data acquisition requirements may not be met. In these few occasions, the MMS will review these instances on a case-by-case basis and make a decision on the probable utility of the data which can be acquired.

Comment: A commenter suggested that variances should be included to provide for use of equipment which may be developed in the future.

Response: The MMS has adopted a conservative approach in the selection of the requisite survey instrumentation to conduct shallow hazard and archaeological resource surveys in the Gulf of Mexico. The present survey instrumentation array, required by the MMS, was adopted as a result of an exhaustive research and testing program and a cooperative evaluation with geophysical survey companies. The new survey methodologies were also derived through an extensive research and testing program which provided a high confidence level for the detection of

VOL 56 ISS 245 DEC 20 1991 UMI

historic period shipwrecks and an examination of geomorphic features for prehistoric archaeological sites.

Provisions in the NTL to allow for equipment which might be developed in the future might encourage the use of undeveloped methodology or unproven instruments in remote-sensing surveys in the Gulf of Mexico. New technological developments and possible corresponding survey methodologies must undergo intensive review by MMS to determine if the new technology is suitable to the survey requirements for protection of archaeological resources.

Comment: A commenter stated that single drill site and platform surveys should be limited to those areas likely to be actually used and questioned whether a 3,000 foot area was excessive.

Response: MMS archaeological analysis experience indicates that a 914 meter (3,000 foot) square area centered on the drill site is a reasonable area to require archaeological resource survey within. Review of side-scan sonar records has indicated numerous examples of jack-up rig tripod and anchoring scars extending for several hundreds of feet from the final location. In addition, surveys on leases which have previous wellsites indicate that the radius of loss or toss of ferromagnetic debris from these sites is generally contained within 457 meters. It should also be noted that the new requirement for site specific surveys over a 914 m (3,000 feet) square area is a significant reduction from the previous requirements under NTL 75–3 (Revision No. 1), which required that an area approximately 1,850 meters square be surveyed.

Comment: A commenter suggested that the need for 50 meter parallel offset survey lines for pipelines within the historic high probability areas should be predicated upon such need as indicated by the centerline survey line.

Response: Pipeline survey parameters were configured as a center line with at least two parallel offsets in order to maximize the protection of archaeological resources. A single, center line survey for pipelines would provide, at best, sufficient magnetometer coverage for 25 to 30 meters (82 feet to 100 feet) on either side of the center line. The pipeline right-of-way corridor extends for 100 feet (or 30 meters) on either side of the center line. (i.e., a 200 feet/60 meter corridor). The proposed right-of-way pipeline may be laid anywhere within the corridor. The area of potential impact from the laying of the pipeline (as demonstrated by surveys over existing pipelines) is, in most cases, greater than 25 meters on either side of the center line. In the case of pipeline lay barges, the area of impact from the anchor array is significantly greater than 25 meters from the center line. A single, center line survey would, therefore, not provide sufficient coverage for protection of potential archaeological resources.

Comment: A commenter expressed concern about the protection of the lessee from liability for damage to a historic or prehistoric site when such lessee has taken all required precautions.

Response: The MMS is mandated by law to require protection of archaeological resources from impact due to mineral exploration and development on the Federal OCS. The required remote-sensing survey methodology and subsequent archaeological analysis and report serve to provide such protection for archaeological resources in the Gulf of Mexico OCS Region. The lessee or right-of-way holder are protected from liability for damage to a historic or prehistoric site when the remote-sensing surveys are performed in accordance with this archaeological NTL.

Comment: A commenter suggested that any data indicating a magnetic anomaly encountered in a pipeline survey should be submitted with the archaeological survey report.

Response: While examination of all unidentified magnetic anomalies encountered in a pipeline survey would be beneficial in analysis, it was felt that inclusion of all anomalies would both be unnecessary and present a long-term problem with storage of the reports. In some extreme cases, it is expected that a single pipeline route could contain several hundred unidentified magnetic anomalies. Pipelines with a hundred or more unidentified anomalies are not expected to be unusual under the new MMS archaeological NTL guidelines. MMS archaeological review of pipeline reports indicates that some pipeline route surveys cover a greater area than required for reasons determined by the operator. In these cases, examination of anomalies which occur on survey lines that could not be impacted would be unnecessary. For these reasons, a decision to require magnetometer data from the center line of the survey was made. This will provide MMS archaeological analysts with sufficient data to review data quality, and provide the analyst with the option to request submission of data for examination, if necessary.

Comment: A commenter contended that it is the responsibility of MMS to assure that the survey reports are adequate to locate any historic or prehistoric archaeological resource.

Response: The MMS agrees. The changes in the methodological procedures presented in the new NTL are designed to increase the ability of the remote-sensing survey to differentiate, at an acceptable level, between modern ferromagnetic debris and potential archaeological resources. By issuing these methodological procedures, the MMS is fulfilling its responsibilities to ensure protection of submerged archaeological resources in the Gulf of Mexico OCS Region.

Comment: A commenter expressed concern that the lessee should be held responsible for preventing damages to historic or prehistoric archaeological resources from its operations only, and not to provide particular protection for, nor monies to recover these resources.

Response: The MMS agrees. Enclosure No. 3 of the new NTL describes the procedures which should be taken should an archaeological resource be located in proximity to proposed operations. These procedures are designed to prevent damage to historic or prehistoric archaeological resources and do not require operators to fund recovery of the resources.

Comment: A commenter questioned why the nominal fix-spacing under navigation requirements was to be no more than 150 meters and the shot points on the postplot map were to be at 152 meter (500 feet) intervals.

Response: We thank the commenter for pointing out this inconsistency. The NTL will be made consistent. Nominal fix-spacing will be no more than 152 meters and shot points will be mapped at 152-meter intervals.

Comment: A commenter questioned whether each of the four copies of an archaeological survey report needed to have the required magnetometer data samples.

Response: The Gulf of Mexico OCS Region has determined that only 3 of the 4 required archaeological survey reports shall include the copies of magnetometer data samples. Accordingly, the NTL will be changed to reflect this comment.

Comment: A commenter asked if the new survey methodology would result in an increased cost for new instrumentation.

Response: The new methodology does not require different instrumentation than was previously required.

Date: November 25, 1991.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico Region.

Outer Continental Shelf Archaeological Resource Requirements for the Gulf of Mexico OCS Region

The Federal Government's responsibilities in archaeological resource management and protection on the Outer Continental Shelf (OCS) are based on the requirements of the National Historic Preservation Act of 1966, as amended, and on other applicable laws and regulations. The Minerals Management Service (MMS) has issued regulations at 30 CFR 250.33(b)(15), 250.33(o), 250.34(b)(8)(v)(A), 250.34(s), 250.157(a)(5), as well as lease stipulations which, if invoked, require OCS operators to conduct surveys and prepare reports designed to fulfill these archaeological resource legal responsibilities. Notices to Lessees and Operators (NTL) Nos. 74–10 and 75–3 were issued by the Gulf of Mexico OCS Region (GOMR) to implement the provisions of the lease stipulations. On October 1, 1982, NTL No. 75–3 was revised and issued by the GOMR to provide guidance on uniformity and consistency of archaeological resource field surveys and reports.

In June 1987, the MMS contracted with Texas A & M University to update and improve a 1977 historic resources study and to broaden the historic shipwreck database. This study was specifically designed to reevaluate the zone of historic shipwreck high probability. In November 1989, the study was completed. Based on the study results, the MMS has redefined the high probability areas for the occurrence of historic shipwrecks. This has resulted in a substantial reduction in the number of lease blocks in the Gulf of Mexico (i.e., approximately 50%) requiring a magnetometer survey. The study also demonstrated a compelling need to increase magnetometer data density in the high probability areas in order that historic shipwreck magnetometer patterns may be recognized. This shall be accomplished by reducing the survey linespacing interval, in the historic shipwreck high probability areas, from 150 meters (m) to 50 m. The NTL is presented as a series of enclosures. Enclosure No. 1. is titled Requirements for Archaeological Field Surveys. Enclosure No. 2. is titled Standards for Archaeological Resource Reports. Enclosure No. 3. is titled Requirements for Mitigation and Operational Restrictions.

The provisions of this NTL shall become effective as of February 17, 1992.

J. Rogers Pearcy,

Regional Director.

Enclosures

Enclosure No 1.

Requirements for Archaeological Resource Field Surveys

I. Introduction

After a lease is issued the GOMR will:

(1) Notify the operator, in writing, if the decision is made to invoke the archaeological resource report requirement portion of the stipulation.

(2) Identify to the operator the type of report (historic shipwreck, historic shipwreck/prehistoric site, or prehistoric site) and the standards that shall be required for compliance.

After notification from the GOMR of the decision to invoke the report requirement of the stipulation, the operator shall conduct the appropriate high-resolution remote sensing survey to determine the potential existence of archaeological resources that may be affected by future lease operations. In most cases, the archaeological resource field survey requirements will be similar to those for surveys conducted for shallow hazards or other purposes. The operator is encouraged to conduct the surveys concurrently. Pipeline right-of-way holders are directed to contact the Regional Supervisor, Leasing and Environment, GOMR, for determination of the type of archaeological resource field survey and report that will be required.

In the letter of invocation, the GOMR may request to be notified at least 72 hours prior to commencement of the survey so that arrangements can be made for observation of field procedures. An archaeologist and geophysicist need not be present while the archaeological resource field survey is being conducted, but they should be involved in survey planning. The survey shall be conducted prior to submitting an Exploration Plan, Development Operations Coordination Document, or pipeline application which proposes bottom disturbing operations.

When any of the following requirements cannot be met for technical or logistical reasons, an explanation of the problem shall be provided in the archaeological resource report.

II. Data Acquisition Instrumentation

Geophysical instrumentation for archaeological resource field surveys shall be representative of the state-of-the-art in technological development and shall be deployed in a manner which minimizes interference among the instrumentation systems. All data recorders shall be interfaced into the navigation system to assure proper integration of information. The equipment operator shall ensure that all instrumentation is adequately tuned and that all recorded data are readable, accurate, and properly annotated.

The following instrumentation shall be utilized in conducting archaeological resource field surveys:

A. Magnetometer. A magnetometer need be used only for historic shipwreck (HS) and historic shipwreck/prehistoric site (HS/PS) surveys. Total field intensity instruments shall be used to determine the possible presence of historic shipwrecks. Data obtained shall be of such quality so as to permit detection and evaluation of magnetic anomalies within the survey area.

The sensor of the magnetometer shall be towed as near as possible to the seafloor; a distance of six meters or less is required. A mechanical or digital depth sensor shall be attached to the magnetometer sensor, and each survey line shall be annotated with tow sensor depth and with the start of the line (SOL) and end of the line (EOL) times.

Magnetometer sensitivity shall be one gamma or less, with the data sampling rate not to exceed one-second intervals. The use of the "zero-mode" setting during magnetometer surveying is prohibited. This surveying mode does not measure the ambient magnetic field as required. Background noise level shall not exceed three gammas peak to peak. Analog strip chart recorders shall be equipped with dual trace pens. Recording scales shall include both 1,000-gamma and 100-gamma full scale, respectively. Shot points and recorder speed must be annotated on the strip charts for each survey line. The GOMR recommends that the strip chart recorder speed be approximately two inches per minute. Whenever possible, the magnetometer should be towed a minimum distance of two and one-half vessel lengths behind the vessel to eliminate the magnetic influence and effect of the vessel.

B. Dual channel side-scan sonar. A dual channel side-scan sonar system shall be used to record continuous planimetric images of the seafloor. The system shall be operated in a manner that provides 100 percent coverage of the seafloor in the survey area. Data obtained should be of such quality so as to permit detection and evaluation of seafloor objects and features within the survey area.

VOL 56 ISS 245 DE 20 1991 UMI

Whenever possible, the side-scan sonar sensor shall be towed above the seafloor at a distance of 10 to 20 percent of the range of the instrument. The vertical sound beam width shall be appropriate to the water depth, and the horizontal sound beam width shall provide optimum resolution. Tuning should be accomplished in a manner that enhances the echo returns from small nearby objects and features without sacrificing the quality of echo returns from more distant objects and features.

C. Subbottom profiler. A subbottom profiler system shall be used to determine the character of near-surface geological features. Data obtained should be of such quality so as to permit evaluation of these features for determining any possible prehistoric archaeological significance. The system used shall be capable of providing at least one to two meters of resolution within the upper 15 meters of sediment.

D. Depth sounder. Continuous water depth measurements shall be made using a high-frequency narrow-beam sounder. Bathymetric data shall be recorded with a recording sweep appropriate to topography and water depth.

E. Additional investigation. Under certain conditions, MMS may require additional instrumentation and methods such as underwater television; still, video, or movie cameras; divers; remote or manned submersibles; coring; and additional geophysical survey lines. The operator will be notified, by letter, of such requirements at the time of stipulation invocation. Right-of-Way Pipeline holders are directed to contact the Regional Supervisor, Leasing and Environment, to ascertain whether additional instrumentation and methods are required.

III. **Survey Parameters**

The following navigation and survey pattern requirements shall be adhered to when conducting archaeological resource field surveys:

A. Navigation. Navigation for the survey shall be accomplished by using a state-of-the-art continuous positioning system correlated to annotated geophysical records. The system shall have an accuracy of 5 meters or less. The nominal fix spacing shall be no more than 152 meters.

B. Survey Pattern. 1. Lease Surveys—When multuple operations on the lease are planned or probable, it may be advantageous to conduct a lease survey. This survey shall cover the entire area of the lease, as well as that portion external to the lease within which operational activities may cause physical and/or long-term magnetic disturbances. The area of physical disturbances includes, but is not limited to, the area within which drilling vessel anchors may be placed, but does not include the area within which work boat anchors may be placed or the area within which similar minimal disturbances may occur. The survey shall be run along parallel primary lines spaced at a maximum of 50 meters for HS or HS/PS surveys and at a maximum of 300 meters for prehistoric site (PS) surveys with cross-tie lines spaced at a maximum of 900 meters for each type of survey. Tighter line spacing may be required by the GOMR in areas of known significant or potentially significant archaeological resources. The operator will be notified by letter of such requirements at the time of stipulation invocation.

Lease HS and HS/PS surveys which are conducted on lease blocks that have been identified by the letter of invocation as being in water depths greater than 60 m shall have the same survey pattern as lease PS surveys.

2. Single Drill Site/Platform Surveys (Site Specific Surveys)—These surveys shall be run in an area approximately 914 meters (3,000 feet) square centered upon the proposed drill site with primary lines spaced at a maximum of 50 meters for HS or HS/PS surveys or at a maximum of 300 meters for PS surveys with three equidistant cross-tie lines. Additional survey lines may be necessary so that the area surveyed includes the area within which operations may cause physical and/or long-term magnetic disturbances. Tighter line spacing may be required by the GOMR in areas of known significant or potentially significant archaeological resources. The area of physical disturbances includes, but is not limited to, the area within which drilling vessel anchors may be placed, but does not include the area within which work boat anchors may be placed or the area within which similar minimal disturbances may occur. Single drill site/platform surveys are not required in areas where lease surveys have already provided sufficient archaeological coverage of the area.

Site-specific HS and HS/PS surveys which are conducted on lease blocks that have been identified by the letter of invocation as being in water depths greater than 60 m shall have the same survey pattern as site-specific PS surveys.

3. Pipeline surveys. (a) *Right-of-Way Pipelines*—The survey pattern for all right-of-way pipelines shall include a line along the proposed pipeline route (center line) and offset parallel lines (on either side of the center line) spaced at a maximum of 50 meters for HS and HS/PS surveys. For PS surveys, the survey shall include a line along the proposed centerline with offset parallel lines spaced at a maximum of 300 meters. The number of offset parallel lines must be sufficient to provide adequate survey coverage of the area within which operations may cause physical and/or long-term magnetic disturbances. A minimum of two offset parallel lines shall be required. The area of physical disturbances includes, but is not limited to, the area where pipeline lay barge anchors will be placed.

A survey for a right-of-way pipeline which will be laid in an area where an HS or HS/PS survey is required and will be in water depths greater than 60 meters shall include a center line with offset parallel lines spaced at a maximum of 300 meters. The number of offset parallel lines must be sufficient to provide adequate survey coverage of the area within which operations may cause physical and/or long-term magnetic disturbances. A minimum of two offset parallel lines shall be required.

(b) *Lease-Term Pipelines*—Archaeological resource surveys for lease-term pipelines which will be laid within leases that have been previously surveyed at 50 m line spacing interval (i.e., HS, or HS/PS) are not required. Surveys for lease-term pipelines which will be laid within block(s) that have been previously surveyed and are exclusively considered to have a high potential for prehistoric archaeological resources (i.e., PS) are also not required.

In water depths shallower than 60 meters, surveys for lease-term pipelines on leases designated to have a high probability for historic period shipwrecks (i.e., HS, HS/PS) shall be conducted using the survey pattern discussed in paragraph 3(a) for right-of-way pipelines. Previous surveys of these leases at 150 or 300 meter linespacing will not be adequate.

Surveys for lease-term pipelines which will be laid within leases in water depths greater than 60 meters are not required. However, for these pipelines, an archaeological resource report based on data obtained from a previous shallow hazard survey shall be required.

Enclosure No. 2

Standards for Archaeological Resource Reports

I. Introduction

An evaluation and synthesis of data gathered during an archaeological resource survey shall be included in a report prepared and signed by an archaeologist and a geophysicist. Professional personnel in these fields should have credentials and experience sufficient to ensure that they are able to adequately perform the necessary work. As needed, specialists in other fields may participate in data analysis and report preparation.

All original data used to prepare the archaeological resource report shall be maintained by the lessee or permittee and be made available to the GOMR upon request at any time prior to lease termination or pipeline right-of-way relinquishment.

Prior to commencing any drilling, production, or construction operations, the operator/applicant/permittee shall submit to the Regional Supervisor, Field Operations, an original report and three (3) copies to determine the potential existence of any archaeological resource that may be affected by the operations. In the case of historic shipwreck reports, the required representative magnetometer data samples must be included in the original report and two (2) of the three (3) copies. The report shall be based on an assessment of the data from remote-sensing surveys in accordance with the specifications of this NTL, subsequent appropriate LTL's, and other pertinent archaeological and environmental information. Data required for shallow hazard surveys and platform foundation analyses shall generally be sufficient for PS resource reports.

II. Contents of Archaeological Resource Reports

Archaeological resource reports shall include the following information:

A. A description of the area surveyed including lease number(s), block numbers(s), OCS lease area(s), and water depths.

B. A listing of personnel and duties for individuals involved in survey planning, survey conduct, and report preparation.

C. A discussion of the archaeological resource field survey including the following:

(1) A brief description of the navigation system with a statement of its estimated accuracy for the area surveyed.

(2) A brief description of survey instrumentation including scale, sensitivity settings, sampling rate per second, and tow depths where required.

(3) A description of the survey vessel including vessel size, sensor configuration, navigation antenna locations, and cable lengths.

(4) Vessel speed and course changes.

(5) Sea state and weather conditions.

(6) A copy of the original daily survey operations log.

(7) A description of survey procedures including a statement of survey and record quality, a comparison of survey line crossings, and a discussion of any problems which may affect the ability of the report preparation personnel to determine the potential for archaeological resources in the survey area.

D. A navigation postplot map of the survey area at a scale of 1:12,000 showing survey lines, shot points at 152 meter (500 feet) intervals, line direction in the grid projection in which the lease is described, e.g., UTM, Lambert, TM, etc., and x, y grid coordinates and tics placed every five inches thereon with geodetic graticules every 60 seconds. This map, or separate maps at the same scale which also show survey lines, shot points, and line direction, shall be oriented to true north and shall delineate the following, as appropriate:

(1) The horizational and vertical extent of all relict geomorphic features having potential for associated prehistoric sites. Such areas includes, but are not limited to, tidal estuaries, embayments, barrier islands, beach ridge sequences, spits, alluvial terraces, and stream channels. When relict fluvial systems are recorded, the map shall:

(a) Differentiate between generations of channeling when more than one generation is present;

(b) Show any internal channel features such as point bar deposits and terraces;

(c) Delineate any channel margin features such as natural levee ridges; and

(d) Indicate all depths of channel banks and channel axes.

Note: An isopach map of channel fill sediments is often the most efficient means of conveying the above information, but this method alone will not allow differentiation between more than one generation of channeling.

(2) Bathymetry.

(3) All magnetic anomalies and seafloor side-scan sonar contacts of unknown source (i.e., magnetic anomaly, map symbol = ; side-scan sonar contact, map symbol = (SSS). The duration of all magnetic anomalies shall be plotted on the survey map at a scale of 1:12,000.

(4) Sites of proposed oil and gas operations (i.e., proposed well locations, platform sites, and/or pipelines), when available at the time of report preparation.

(5) Sites of former oil and gas operations (i.e., abandoned well locations, platform sites, and/or pipelines).

E. If an analysis of the potential for prehistoric sites within the survey area is required, the report shall include:

(1) A review of current existing literature on the late Pleistocene and Holocene geology, paleogeography and sea level change in the area, marine and coastal prehistory, and previous archaeological resource reports in the area, when available. A list of suggested references will be made available upon request.

(2) A discussion of relict geomorphic features and their archaeological potential to include the following:

(a) The type, age, and association of the features mapped;

(b) The acoustic characteristics of channels and their fill material;

(c) Evidence for preservation or erosion of channel margins;

(d) Evidence for more than one generation of fluvial downcutting; and

(e) The sea level curves used in the assessment.

(3) A discussion of the potential for identification and evaluation of buried prehistoric sites based on the capabilities of current technology in relation to the thickness and composition of sediments overlying the area of a potential site.

F. If an analysis of the potential for historic shipwrecks within the survey area is required, the report shall include, as appropriate, the following:

(1) A current review of existing records for reported shipwreck locations in the survey area and adjacent areas;

(2) A list of the magnetic anomalies with the lease block and survey line location (corrected for sensor offset), gamma intensity, lateral extent (duration), whether the anomaly is characterized by a dipolar or monopolar signature, and magnetometer sensor tow depth of each;

(3) A list of side-scan sonor contacts with the lease block and survey line location (corrected for sensor offset), size, shape, and height of protrusion above the seafloor of each;

(4) A discussion of any magnetic anomalies and side-scan sonar contacts of unknown source in terms of their potential as historic shipwrecks;

(5) A discussion of any correlation between magnetic anomalies or side-scan sonar contacts and known or probable sources;

(6) A discussion of the potential for shipwreck preservation in terms of the effects of past and present marine processes; and

(7) A discussion of the potential for identification and evaluation of potential shipwrecks based on the capabilities of current technology in

VOL 56 ISS 245 DEC 20 1991 UMI

relation to the water depth, probable thickness and composition of sediments overlying the potential shipwreck location, and the preservation potential.

G. Representative data samples, as appropriate, shall be submitted for the following:

(1) A representative sample of subbottom profiler data for each type of relict landform identified. When more than one generation of fluvial channeling is evident, a sample depicting each shall be submitted. Each sample must be readable and include horizontal and vertical scales. Any interpretive highlighting or annotation of the sample data shall be on either a separate overlay or a copy of the representative same data. In no instance should original survey data be highlighted. If relict channel features are referenced in the text of the archaeological report, representative copies of the subbottom profiler record of these geologic features shall be included in the report.

(2) A copy of the side-scan sonar data where contacts representing unidentified objects are recorded. The copies must be readable and shall include the scale. Any highlighting or annotation of the sample data shall be on either a separate overlay or a copy of the representative sample data. In *no* instance should original survey data be highlighted.

(3) Magnetometer data as follows:

(a) for lease surveys and site specific surveys, a clear copy of three complete lines of magnetometer data. Two of these lines shall be representative data samples of primary survey lines and the third survey line shall be a cross-tie line. The primary survey lines shall be adjacent lines and run in two different cardinal directions (e.g., one survey line heading north and the other heading south). Whenever possible these survey lines shall include unidentified magnetic anomalies.

(b) for pipeline surveys (i.e., lease term or right-of-way) that are three miles or longer in length, a clear copy of approximately one-quarter (25%) of the magnetometer data (analog strip chart) for the center line of the survey. For pipeline surveys less than three miles in length, the entire center line magnetometer survey shall be submitted. These data shall include representative samples of unidentified magnetic anomalies (if any) that were recorded on the center line. Sample data may be reduced in size for report reproduction. Data quality must be sufficient to clearly depict both the 1000-gamma and 100-gamma scale traces of the analog strip chart recorder.

H. A summary of conclusions and recommendations supported by the archaeological resource field survey data and archaeological analyses including:

(1) A discussion of known or potential archaeological resources;

(2) Recommendations for avoidance or for further archaeological investigations; and/or

(3) Recommendation that operations be permitted because data recovery negates adverse effects to archaeological resources.

I. A discussion of the data and results from any additional investigations that may be required by the GOMR shall be appended to the archaeological resource report.

III. Review of Archaeological Resource Reports

A. The GOMR will determine whether a report meets the requirements contained in the invocation notification and/or this NTL. The review will be conducted by personnel with archaeological, geophysical, and other appropriate expertise. The GOMR will determine if the survey was performed properly and will evaluate the geophysical interpretations and archaeological conclusions.

B. If the report is not adequate or complete, the GOMR will notify the operator or right-of-way holder, in writing, of the problems and identify the data or information necessary to correct or complete the report.

C. Based on the GOMR review of the report findings, the GOMR will notify the operator or right-of-way holder, in writing, of any mitigating measures or operational restrictions which may be required.

D. A previously submitted archaeological resource report may be acceptable for satisfying the archaeological resource report requirements under a new lease agreement, particularly if the lease falls exclusively within the area of high probability for the occurrence of prehistoric archaeological resources. Prior to submittal of an Exploration Plan or Development Operations Coordination Document, the operator shall submit to the Regional Supervisor, Leasing and Environment, a written request for review of an archaeological report prepared for an expired lease to determine its compliance with current MMS requirements. A clean copy of the report to be reviewed shall be included with the operator's request.

Enclosure No. 3

Requirements for Mitigation and Operational Restrictions

A. When an archaeological resource field survey and report indicate that a potential archaeological resource may be present and lease operations or pipeline right-of-way operations are proposed within its immediate area, the GOMR will require the operator or right-of-way holder to either:

1. Locate the operation so as not to adversely affect the area of the archaeological resource; or

2. Establish to the satisfaction of the GOMR that an archaeological resource does not exist or will not be adversely affected by operations. This shall be done by further archaeological investigation, conducted by an archaeologist and a geophysicist, using survey equipment and techniques deemed necessary by the GOMR. A report on the investigation shall be submitted to the GOMR for review.

B. If the GOMR determines that an archaeological resource is present in the area and may be adversely affected by operations, the operator or right-of-way holder will be notified immediately. Under these circumstances, the GOMR is required to engage in additional consultations in accordance with 36 CFR 800.4. The operator or right-of-way holder shall take no action that may adversely affect the archaeological resource until the GOMR has concluded these consultations and has provided the operator with instructions on how to protect the resource.

C. If the operator or right-of-way holder discovers any archaeological resource while conducting operations, a report of the discovery shall be immediately made to the GOMR. The operator or right-of-way holder shall make every reasonable effort to preserve the archaeological resource until the GOMR has issued instructions on how to protect it.

BILLING CODE 4310-MR-M

INTERNATIONAL BOUNDARY AND WATER COMMISSION

United States and Mexico; United States Section; International Agreement for Permanent Solution of the Safety Problem at the International Bridge of the Americas at El Paso, TX and Ciudad Juarez, Chihuahua; Finding of No Significant Impact

AGENCY: United States Section, International Boundary and Water Commission, United States and Mexico.

ACTION: Notice of finding of no significant impact.

SUMMARY: Based on an Environmental Assessment, the U.S. Section finds that the proposed action that the United States Government enter into an agreement with the Government of Mexico through the International Boundary and Water Commission (Commission) for a permanent solution to the safety problem at the International Bridge of the Americas (BOTA) at El Paso, Texas, and Ciudad Juarez, Chihuahua, is not a major federal action that would have a significant adverse effect on the quality of the human environment. Therefore, pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Council on Environmental Quality Final Regulations (40 CFR parts 1500 through 1508); and the U.S. Section's Operational Procedures for Implementing Section 102 of NEPA, published in the **Federal Register** September 2, 1981 (46 FR 44083); the U.S. Section hereby gives notice that an environmental impact statement will not be prepared for the proposed project.

FOR FURTHER INFORMATION CONTACT: Mr. M.R. Ybarra, U.S. Section Secretary, International Boundary and Water Commission, United States and Mexico, U.S. Section 4171 North Mesa Street, C-310, El Paso, Texas 79902-1422. Telephone: (915) 534-6698.

Proposed Action

An international agreement between the United States and Mexico is proposed through a Minute of the International Boundary and Water Commission, United States and Mexico, (IBWC) to replace the international Bridge of the Americas at El Paso, Texas—Ciudad Juarez, Chihuahua, in as early a manner as possible, in essentially the same place and configuration as the existing bridge under the terms existing in international treaties and agreements in force. The urgency is due to the structurally deficient condition of the existing bridge.

Alternatives Considered

Four Alternatives were considered:

1. IBWC Rehabilitation of Existing Bridge

The existing bridge would be strengthened by replacing the existing concrete slab, strengthening the piers, and making miscellaneous repairs. While this alternative had merit early in 1991, the present structural condition of the bridge is such that it would not be prudent to give further consideration to this alternative.

2. IBWC Replacement of Existing Bridge

A new Bridge of the Americas (BOTA) would be constructed in the approximately the same place, size, and configuration as the existing bridge. Improvements to lane vehicle widths, commercial lanes and ingress and egress would be undertaken. The bridge would not involve large scale modifications to inspection facilities and associated roadways. Replacement would be in application of the 1963 Chamizal Convention, such that the bridge would continue to be toll-free. The United States and Mexican Governments would equally share in the cost of the part of the bridge that spans the Rio Grande levee to levee, approximately 40 percent of the bridge's length, and the U.S. Government would pay for the cost of replacing the elevated section (the remaining 60 percent of the bridge) that facilitates access to the existing facilities. The United States Section has budget authority to seek appropriations for a replacement bridge and request annual operation and maintenance funding. This alternative, if acceptable to the U.S. Congress for appropriation purposes, and to Mexico, would permit as fast as possible replacement of the bridge, an important factor due to its condition. This alternative is considered as the preferred alternative.

3. Non-IBWC Replacement of Existing Bridge

The IBWC make arrangements for agencies or entities in each country, other than the IBWC, to assume the responsibility for replacing the existing bridge in the configuration, location, and size that such agencies or entities may determine. Tolls, which are contrary to the provisions of the Chamizal Convention, would be necessary to recover the cost of financing a replacement bridge. Tolls would work an economic hardship upon individuals that for years traveled freely back and forth to work and shop in either country. Authorization to construct a replacement bridge in this manner would take considerable time as it would involve a need to arrange financing in both countries and additional lengthy and uncertain bilateral understandings. The structural deficiency of the bridge requires as rapid replacement as possible, and thus this alternative was not preferred.

4. No Action Alternative

This would be a status quo arrangement which is not acceptable. The safety of millions of people who use this bridge would be in continued peril. Without remedial action, the distressed condition of the 24-year old BOTA will continue to deteriorate due to questionable construction materials and the constant and heavy traffic. These factors, among others, precluded giving this alternative further consideration.

Finding of the Environmental Assessment

The Environmental Assessment finds that the preferred alternative does not constitute a major federal action which would cause a significant local, regional or national impact on the environment since it:

(a) Removes the danger of life and property on or under this bridge which a structurally deficient bridge subject to further deterioration represents.

(b) Provides a structurally sound bridge that would serve the commercial and noncommercial needs of an international community.

(c) Effects common to construction alternatives would be short-term. Fugitive dust and equipment emissions would be minimized through implementation of standardized construction practices.

(d) There would not be a significant impact to air quality and all local, state and federal air quality regulations would be followed.

(e) There would not be any impacts to surface water, nor would the construction alternatives impact upon the capabilities of the international Rio Grande Rectification Project to carry flood flows should the need arise during construction.

(f) Construction related impacts on traffic would be short lived.

(g) A replacement bridge would permit continued use of existing and additional inspection facilities now under construction, which include commercial inspection docks capable of handling more than four times the present loaded trucks presently inspected in the El Paso area.

(h) The United States and Mexico would be complying with pertinent provisions of the 1963 Chamizal Convention, including that the bridge would continue to be toll-free and that the cost of the part of the bridge that

VOL 56 ISS 245 DEC 20 1991 UMI

spans the Rio Grande levee to levee be equally shared by the two countries.

(i) A replacement bridge would be constructed in as timely as possible manner.

(j) Would not affect fish and wildlife, including endangered and threatened species in the immediate area of the proposed project.

(k) Would not affect cultural resources listed on or determined to be eligible for listing on the National Register of Historic Places.

On the basis of the Environmental Assessment, a finding of no significant impact is adopted, and unless additional information which may effect this decision is brought to our attention within thirty (30) days of the date of this notice, an environment impact statement will not be prepared.

Dated: December 9, 1991.

Suzette Zaboroski,

Staff Counsel.

[FR Doc. 91-30384 Filed 12-19-91; 8:45 am]

BILLING CODE 4710-03-M

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 31919]

Exemption; Norfolk & Western Railway Co.—Trackage Rights Exemption—Consolidated Rail Corp.

Consolidated Rail Corporation (Conrail) has agreed to grant overhead trackage rights to Norfolk and Western Railway Company (NW) over approximately 2.3 miles of rail line at Fort Wayne, IN. The trackage rights involve: (1) 1.9 miles of Conrail's Fort Wayne Line between milepost 319.1±, via "Mike" Interlocking, and milepost 321.0±, near "Junction" Interlocking; and (2) 0.4 mile of Conrail's GR&I Branch between the connection with Conrail's Fort Wayne Line at milepost 93.3± and the property line between Conrail and NW at and including the connection with NW in the vicinity of "Park" Interlocking at milepost 93.7±.[1]

[1] The trackage rights agreement confers upon NW the right to operate its trains, locomotives, cars, and equipment, including but not limited to equipment in the account of TCS, with its own crews, in overhead service over Conrail between the termini of the involved trackage, with the right to enter or exit also at "Mike" Interlocking. In a proceeding related to this proposed service NW has filed an offer of financial assistance to purchase approximately 0.8 miles of Conrail's Fourth Street Industrial Track in Fort Wayne. See Docket No. AB-167 (Sub-No. 756N), Consolidated Rail Corporation—Abandonment—In Fort Wayne, Allen County, IN.

The trackage rights were to become effective on or soon after December 9, 1991.

This notice is filed under 49 CFR 1180.2(d)(7). Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: R. Allan Wimbish, Norfolk Southern Corporation, Three Commercial Place, Norfolk, VA 23510-2191.

As a condition to the use of the exemption, any employees affected by the trackage rights will be protected pursuant to Norfolk and Western Ry. Co.—Trackage Rights—BN, 354 I.C.C. 605 (1978), as modified in Mendocino Coast Ry.—Lease and Operate, 360 I.C.C. 653 (1980).

Dated: December 16, 1991.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF LABOR

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR part 1, appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedes decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon and Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., room S-3014, Washington, DC 20210.

Modifications to General Wage Determination Decisions

The numbers of the decisions listed in the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" being modified are listed by Volume, State, and page number(s). Dates of publication in the **Federal Register** are in parentheses following the decisions being modified.

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783-3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC this 13th day of December 1991.

Alan L. Moss,

Director, Division of Wage Determinations.

BILLING CODE 4510-27-M

Employment and Training Administration

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221 (a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221 (a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under title II, chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than December 30, 1991.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than December 30, 1991.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210.

Signed at Washington, DC this 9th day of December 1991.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period of November 1991.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-26,333; Motion Control Industries, Inc., Ridgway, PA

TA-W-26,409; Genicom Corp., Herkimer, NY

TA-W-26,422; Unisys Corp., Roseville, MN

TA-W-26,425; United Coulson Heel Co., Hanover, PA

TA-W-26,404; Chickasha Manufacturing Co., Inc., Chickasha, OK

In the following cases, the investigation revealed that the criteria for eligibility has not been met for the reasons specified.

TA-W-26,369; Teledyne Wisconsin Motor, West Allis, WI

Increased imports did not contribute importantly to worker separations at the firm.

TA-W-26,411; JE Merit Constructors, Inc., Addy, WY

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-26,421; Uinat Oil and Gas, Inc., Roosevelt, UT

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

TA-W-26,398; The Timkin Co., Canton, OH

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

Affirmative Determinations

TA-W-26,408; General Automotive Specialty Co., North Burnswick, NJ

A certification was issued covering all workers separated on or after December 5, 1991.

TA-W-26,331; Keller Furniture of Indiana, Linton, IN

A certification was issued covering all workers separated on or after September 4, 1990.

TA-W-26,413; Quinn Audio Products, Lake Worth, FL

A certification was issued covering all workers separated on or after September 23, 1990.

TA-W-26,415; Schlumberger, Larose Offshore Office, Cutoff, LA

A certification was issued covering all workers separated on or after January 1, 1991.

TA-W-26,416; Schlumberger, Well Service Office, Belle Chase, LA

A certification was issued covering all workers separated on or after January 1, 1991.

TA-W-26,416A; Schlumberger, Special Service Office, Belle Chase, LA

A certification was issued covering all workers separated on or after January 1, 1991.

TA-W-26,417; Schlumberger, Renovation Center, Belle Chase, LA

A certification was issued covering all workers separated on or after January 1, 1991.

TA-W-26,382; General Electric Aerospace Aircraft Control Systems Dept, Evendale, OH

A certification was issued covering all workers separated on or after October 18, 1990.

TA-W-26,383; General Electric Aerospace Aircraft Control Systems Dept, Bellevue, WA

A certification was issued covering all workers separated on or after October 18, 1990.

TA-W-26,449; The Western Co. of North America, Kilgore, TX

A certification was issued covering all workers separated on or after January 1, 1991.

TA-W-26,400; Adonis Apparel, Inc., Albron, IL

A certification was issued covering all workers separated on or after September 26, 1990.

TA-W-26,384; General Electric Aerospace Aircraft Control Systems Dept, Ft. Wayne, IN

A certification was issued covering all workers separated on or after October 18, 1990.

I hereby certify that the aforementioned determinations were issued during the month of November, 1991. Copies of these determinations are available for inspection in Room C-4318, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210 during normal business hours or will be mailed to persons to write to the above address.

Dated: December 11, 1991.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

Tonka Corporation et al.; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In the matter of TA-W-26,130, St. Louis Park, MN, Tonka Products Division TA-W-26,133, St. Louis Park, MN, TA-W-26,134, El Paso, TX, and Sales Personnel Operating in the Following States TA-W-26,133A, Ohio, TA-W-26,133B, Illinois, TA-W-26,133C, California, TA-W-26,133D, Washington, TA-W-26,133E, New Jersey, TA-W-26,133F, New York, TA-W-26,133G, Texas.

Parker Brothers Division TA-W-26,143, Beverly, MA, TA-W-26,144, Salem, MA, and Sales Personnel Operating in the Following States TA-W-26,143A, Maine, TA-W-26,143B, New Hampshire, TA-W-26,143C, Nevada, TA-W-26,143D, Florida.

Kenner Products Division TA-W-26,145, Cincinnati, OH, and Sales Personnel Operating in the Following States TA-W-26,145A, Texas, TA-W-26,145B, Missouri, TA-W-26,145C, Michigan.

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) The Department of Labor issued a Certification of Eligibility to apply for worker adjustment assistance on October 23, 1991, applicable to all workers of Tonka Corporation, St. Louis Park, Minnesota (TA-W-26,130); Tonka Products Division, St. Louis Park, Minnesota (TA-W-26,133) and El Paso, Texas (TA-W-26,134; Parker Brothers Division, Beverly, Massachusetts (TA-W-26,143) and Salem, Massachusetts (TA-W-26,144); and the Kenner Products Division, Cincinnati, Ohio (TA-W-26,145). The notice was published in the **Federal Register** on November 5, 1991 (56 FR 56530).

New information obtained from the company shows that several sales workers who worked for the Parker Brothers Division and the Kenner Products Division were not included in the certifications. The new information shows that the sales workers for the Parker Brothers Division and the Kenner Products Division worked primarily out of their homes in other States. The intent of the certification is to include all workers who were adversely affected by increased imports of articles like or directly competitive with toys and games. Therefore, the certifications are amended to include the sales workers for the Parker Brothers Division and the Kenner Products Division.

The amended notice applicable to TA-W-26,130; TA-W-26,133; TA-W-26,134; TA-W-26,143; TA-W-26,144 and TA-W-26,145 is hereby issued as follows:

All workers of the following firms of Tonka Corporation: (1) Tonka Corporation, St. Louis Park, Minnesota (TA-W-26,130); (2) Tonka Products Division, St. Louis Park, Minnesota (TA-W-26,133) and (3) El Paso, Texas (TA-W-26,134); (4) Parker Brothers Division, Beverly, Massachusetts (TA-W-26,143) and (5) Salem, Massachusetts (TA-W-26,144; and (6) Kenner Products Division, Cincinnati, Ohio (TA-W-26,145) who became totally or partially separated from employment on or after July 17, 1990, and all Tonka Products Division's sales personnel operating in the following States: Ohio, Illinois, California, Washington, New Jersey, New York and Texas (TA-W-26,133A-G); all Parker Brothers Division's sales personnel operating in the following States: Maine, New Hampshire, Nevada, and Florida (TA-W-26,143A-D); and all Kenner Products Division's sales personnel operating in the following States: Texas, Missouri, and Michigan (TA-W-26,145A-C) who became totally or partially separated from employment on or January 1, 1991 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed in Washington, DC, this 6th day of December 1991.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

Pension and Welfare Benefits Administration

[Exemption Application No. D-8674]

Withdrawal of Notice of Proposed Exemption Involving the PKF-Mark III, Inc. Profit Sharing Plan (the Plan) Located in Newtown, PA

In the **Federal Register** dated October 11, 1991 (56 FR 51410), the Department of Labor published a notice of proposed exemption from the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 and from certain taxes imposed by the Internal Revenue Code of 1986. The notice of proposed exemption concerned the prospective sale for cash of an interest in Kings Woods Associates from the Plan to PKF-Mark III, Inc., a party in interest with respect to the Plan.

By letter dated November 15, 1991, the applicant has requested that the exemption application be withdrawn.

Accordingly, the notice of proposed exemption is hereby withdrawn.

Signed at Washington, DC, this 9th day of December, 1991.

Ivan Strasfeld,

Director of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission (NRC) has recently submitted to the Office of Management and Budget (OMB) for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

1. Type of Submission, new, revision, or extension: Revision.

2. Titles of the information collection: 10 CFR part 25—Access Authorization for Licensee Personnel; and 10 CFR part 95—Security Facility Approval and Safeguarding of National Security Information and Restricted Data.

3. The form number if applicable: Not applicable.

4. How often the collection is required: On occasion.

5. Who will be required or asked to report: Nuclear facility licensees and other organizations requiring access to NRC classified information.

6. An estimate of the number of responses: 10 CFR part 25—169. 10 CFR part 95—25.

7. An estimate of the total number of hours needed to complete the requirement or request: 10 CFR part 25—.7 per response; 215. 10 CFR part 95—7.8 per response; 513.

8. An indication of whether section 3504(h), Public Law 96-511 applies: Not applicable.

9. Abstract: 10 CFR parts 25 and 95—Licensees and other organizations are required to provide information and maintain records to ensure that an adequate level of protection is provided NRC classified information and material.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 2120 L Street, NW. (Lower Level), Washington, DC.

Comments and questions can be directed by mail to the OMB reviewer: Ronald Minsk, Office of Information and Regulatory Affairs, (3150-0046) (3150-0047), NEOB-3019, Office of Management and Budget, Washington, DC 20503.

Comments can also be submitted by telephone at (202) 395-3084. The NRC Clearance Officer is Brenda Jo Shelton, (301) 492-8132.

Dated at Bethesda, Maryland, this 10th day of December 1991.

For the Nuclear Regulatory Commission.
Gerald F. Cranford,
Designated Senior Official for Information Resources Management.

Aging Research Information Conference; Meeting

ACTION: Notice of meeting.

SUMMARY: The study of nuclear power plant aging is an important part of the NRC's current research program for understanding aging degradation of structures, components, and systems to assure continued safe operation of nuclear power plants for 40 years or more. The nuclear community worldwide has entered a period when such information on age-related degradation in nuclear power plants is bound to play a vital role in decisions involving plant shut-down or continued operation. The NRC Aging Research Information Conference will provide a forum for exchanging information on age-related degradation of components, systems, and structures. The main objective of this conference is to discuss the results of NRC aging research with industry.

The conference is being organized for NRC by Brookhaven National Laboratory. A panel discussion session will be held on March 27, 1992, to solicit directions for future research work and for utilization of the research results to enhance reliability. Topics to be discussed include effectiveness of maintenance to manage aging, aging degradation, risk evaluation of aging, aging assessment of major reactor coolant pressure boundary components, such as reactor vessels and piping, category I structures, electrical and mechanical components (EDGs, valves, pumps, CB/relays, batteries, battery chargers/inverters, transformers, cables, penetrations, snubbers, heat exchangers, and pressure transmitters), fluid-mechanical and electrical systems (AFW, CRD, SW, RHR, HP-ECC, CCW, RPS, and Class 1E distribution), recordkeeping, residual life evaluation, and codes and standards.

DATES: March 24-27, 1992.

ADDRESS OF CONFERENCE: Holiday Inn Crowne Plaza, 1750 Rockville Pike, Rockville, MD.

ADMISSION: Prior registration is required. A registration fee of $125 is being charged to defray the cost of the meeting. Only the first 500 registrants are assured participation. To register, contact Dr. Mano Subudhi, Brookhaven National Laboratory, Building 130, Upton, New York 11973.

FOR FURTHER INFORMATION CONTACT: Mr. Satish K. Aggarwal, Program Manager, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Phone 301-492-3823. (5 U.S.C. 552(a)).

Dated at Rockville, Maryland, this 12th day of December, 1991.

For the Nuclear Regulatory Commission.
Lawrence C. Shao,
Director, Division of Engineering, Office of Nuclear Regulatory Research.

Notice of Intent To Amend License Approving Change to a Reclamation Plan for an Inactive Uranium Recovery Facility—Bear Creek

AGENCY: Nuclear Regulatory Commission.

ACTION: Approval of revision to reclamation plan for an inactive uranium recovery facility.

1. Description of Federal Action:
In accordance with a memorandum of understanding (MOU) between the Environmental Protection Agency (EPA) and the Nuclear Regulatory Commission (NRC) published in the **Federal Register** on October 25, 1991, (volume 56, No. 207, pp. 55432-55435), NRC hereby notices the intent to approve a request for revisions of a reclamation plan from Bear Creek Uranium Company, a subsidiary of Union Pacific, for their Bear Creek Uranium Mill, Docket No. 40-8452, Source Material License No. SUA-1310.

This request, dated September 30, 1986, and subsequent submittals justifies modification of the reclamation and closure plan approved by the NRC as part of the license renewal on September 28, 1984. The basis for this change is the decrease in the volume of tailings due to premature shut down of the mill.

The NRC staff has reviewed the proposed reclamation plan against current design guidance and has determined that it meets or exceeds the requirements of 10 CFR 40, appendix A. In accordance with the above referenced MOU, a 45-day period will be provided for receipt of comments regarding NRC's intent to amend the Bear Creek Uranium Company license.

As stipulated in the MOU, the NRC is noticing the intent to amend the license. Comments on the proposed action or a request for hearing should be submitted within 45 days of the date of publication of this notice.

2. Contact: Copies of the license amendment request and the staff analysis which is the basis for revision to the license are available for inspection at the Uranium Recovery Field Office, 730 Simms, suite 100, Lakewood, Colorado, and at the Public Document Room, 2120 L Street, NW., Washington, DC. Comments or questions regarding the intended licensing action may be directed to the Director, Uranium Recovery Field Office, P.O. Box 25325, Denver, CO 80225.

Subject: Bear Creek Facility Reclamation Plan.

Dated at Denver, Colorado this 12th day of December, 1991.

For the Nuclear Regulatory Commission.
Edward F. Hawkins,
Deputy Director, Uranium Recovery Field Office, Division of Radiation Safety and Safeguards, Region IV.

OFFICE OF MANAGEMENT AND BUDGET

Rescission of OMB Circular No. A-120, Guidelines for the Use of Advisory and Assistance Services

AGENCY: Office of Management and Budget, Executive Office of the President.

ACTION: Notice of rescission of OMB Circular No. A-120.

SUMMARY: Notice is hereby given that the Office of Management and Budget (OMB) intends to rescind Circular No. A-120, Guidelines for the Use of Advisory and Assistance Services, upon the issuance in final version of an Office of Federal Procurement Policy (OFPP) Policy Letter on "Management Oversight of Service Contracting". The Policy Letter is being proposed for public comment concurrently with this notice of OMB's intent to rescind Circular No. A-120. The text of the proposed Policy Letter, and a statement of the reasons for replacing Circular No. A-120 with a Policy Letter, is set forth in the separate notice seeking comment on the proposed Policy Letter. The provisions of Circular No. A-120 will remain in effect until publication of a final version of the replacement Policy Letter.

DATES: Comments on the proposed rescission of Circular No. A-120 and its replacement by the proposed Policy Letter on "Management Oversight of Service Contracting" must be received on or before February 18, 1992.

ADDRESSES: Comments should be sent to Dr. Allan V. Burman, Administrator, Office of Federal Procurement Policy, Office of Management and Budget, 725 17th Street, NW., room 9001, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Linda G. Williams, Deputy Associate Administrator, (202) 395-3300. Copies of Circular No. A-120 are available at the address above.

Dated: December 10, 1991.
Allan V. Burman,
Administrator.

BILLING CODE 3110-01-M

List of Designated Federal Entities and Federal Entities

AGENCY: Office of Management and Budget.

ACTION: Notice.

SUMMARY: This Notice provides a list of designated Federal entities and Federal entities, as required by the Inspector General Act Amendments of 1988.

FOR FURTHER INFORMATION CONTACT: Suzanne Murrin (telephone: 202-395-6911), Office of Federal Financial Management.

SUPPLEMENTARY INFORMATION: This Notice provides a copy of the 1991 List of Designated Federal Entities and Federal Entities, which the Office of Management and Budget is required to publish annually under the Inspector General Act Amendments of 1988 (Public Law 100-504).

The List is divided into two groups: Designated Federal Entities and Federal Entities. The Designated Federal Entities are required to establish and maintain an Office of Inspector General. The 33 Designated Federal Entities are as listed in the amendments. Hence, the 1991 list of them is unchanged from the 1990 list.

Federal Entities are required to report annually to each House of the Congress and the Office of Management and Budget on audit and investigative activities in their organizations. The amendments define Federal Entities as "any Government controlled corporation (within the meaning of section 103(1) of title 5, United States Code), any Government controlled corporation (within the meaning of section 103(2) of such title), or any other entity in the Executive branch of the Government, or any independent regulatory agency" other than the Executive Office of the President and agencies with statutory Inspectors General. There are four changes in the 1991 list from the 1990 list.

The List was prepared in consultation with the U.S. General Accounting Office.

Harold Steinberg,
Deputy Controller, Office of Federal Financial Management.

Herein follows the text of the 1991 List of Designated Federal Entities and Federal Entities:

1991 List of Designated Federal Entities and Federal Entities

Public Law 100-504, "The Inspector General Act Amendments of 1988", requires the Office of Management and Budget to publish a list of "Designated Federal Entities" and "Federal Entities" and the heads of such entities. Designated Federal Entities were required to establish an Office of Inspector General before April 17, 1989. Federal Entities are required to report annually to each House of the Congress and the Office of Management and Budget on audit and investigative activities in their organizations.

Designated Federal Entities

1. ACTION—Director
2. Amtrak—Chairman
3. Appalachian Regional Commission—Federal Co-Chairman
4. The Board of Governors, Federal Reserve System—Chairman
5. Board for International Broadcasting—Chairman
6. Commodity Futures Trading Commission—Chairman
7. Consumer Product Safety Commission—Chairman
8. Corporation for Public Broadcasting—Board of Directors
9. Equal Employment Opportunity Commission—Chairman
10. Farm Credit Administration—Chairman
11. Federal Communications Commission—Chairman
12. Federal Deposit Insurance Corporation—Chairman
13. Federal Election Commission—Chairman
14. Federal Housing Finance Board—Chairman
15. Federal Labor Relations Authority—Chairman
16. Federal Maritime Commission—Chairman
17. Federal Trade Commission—Chairman
18. Interstate Commerce Commission—Chairman
19. Legal Services Corporation—Board of Directors
20. National Archives and Records Administration—Archivist of the United States
21. National Credit Union Administration—Board of Directors
22. National Endowment for the Arts—Chairman
23. National Endowment for the Humanities—Chairman
24. National Labor Relations Board—Chairman
25. National Science Foundation—National Science Board
26. Panama Canal Commission—Chairman
27. Peace Corps—Director
28. Pension Benefit Guaranty Corporation—Chairman
29. Securities and Exchange Commission—Chairman
30. Smithsonian Institution—Secretary
31. Tennessee Valley Authority—Board of Directors
32. United States International Trade Commission—Chairman
33. United States Postal Service—Postmaster General

Federal Entities

1. Administrative Conference of the United States—Chairman
2. Advisory Commission on Conferences in Ocean Shipping—Chairman
3. Advisory Commission on Intergovernmental Relations—Chairman
4. Advisory Committee on Federal Pay—Chairman
5. Advisory Council on Historic Preservation—Chairman
6. African Development Foundation—Chairman
7. American Battle Monuments Commission—Chairman
8. Architectural and Transportation Barriers Compliance Board—Chairman
9. Barry Goldwater Scholarship and Excellence in Education Foundation—Chairman
10. Christopher Columbus Quincentenary Jubilee Commission—Chairman
11. Commission for the Preservation of America's Heritage Abroad—Chairman
12. Commission of Fine Arts—Chairman
13. Commission on Agricultural Workers—Chairman
14. Commission on the Bicentennial of the United States Constitution—Chairman
15. Commission on Civil Rights—Chairman
16. Committee for Purchase from the Blind and other Severely Handicapped—Chairman
17. Competitiveness Policy Council—Chairman
18. Defense Nuclear Facilities Safety Board—Chairman
19. Delaware River Basin Commission—U.S. Commissioner
20. Export-Import Bank—President and Chairman
21. Farm Credit System Assistance Board—Chairman
22. Farm Credit System Insurance Corporation—Board of Directors
23. Federal Mediation and Conciliation Service—Director
24. Federal Mine Safety and Health Review Commission—Chairman
25. Federal Retirement Thrift Investment Board—Chairman
26. Franklin Delano Roosevelt Memorial Commission—Chairman
27. Harry S Truman Scholarship Foundation—Chairman
28. Illinois and Michigan Canal National Heritage Corridor Commission—Chairman
29. Institute of Museum Services—Director
30. Inter-American Foundation—Chairman
31. Interagency Council on the Homeless—Chairman
32. International Cultural and Trade Center Commission President
33. Interstate Commission on the Potomac River Basin—Chairman
34. James Madison Memorial Fellowship Foundation—Chairman
35. Japan-U.S. Friendship Commission—Chairman
36. Marine Mammal Commission—Chairman
37. Martin Luther King, Jr. Federal Holiday Commission—Chairman
38. Merit Systems Protection Board—Chairman
39. National Capital Planning Commission—Chairman
40. National Commission on Libraries and Information Science—Chairman
41. National Commission on Migrant Education—Chairman
42. National Commission on Responsibilities for Financing Postsecondary Education—Chairman
43. National Commission to Prevent Infant Mortality—Chairman
44. National Council on Disability—Chairman
45. National Endowment for Democracy—President
46. National Gallery of Art—Board of Trustees
47. National Mediation Board—Chairman
48. National Transportation Safety Board—Chairman
49. Neighborhood Reinvestment Corporation—Chairman
50. Occupational Safety and Health Review Commission—Chairman
51. Office of Government Ethics—Director
52. Offices of Independent Counsels—Independent Counsels
53. Office of Navajo and Hopi Indian Relocation—Chairman
54. Office of Special Counsel—Special Counsel
55. Office of the Nuclear Waste Negotiator—Negotiator
56. Overseas Private Investment Corporation—President
57. Pennsylvania Avenue Development Corporation—Chairman
58. Postal Rate Commission—Chairman
59. Resolution Trust Corporation Oversight Board—Chairperson
60. Selective Service System—Director
61. State Justice Institute—Director
62. Susquehanna River Basin Commission—U. S. Commissioner
63. U.S. Holocaust Memorial Council—Chairman
64. U.S. Institute of Peace—Chairman
65. U.S. Soldiers' and Airmen's Home—Governor
66. Woodrow Wilson International Center for Scholars—Board of Trustees

BILLING CODE 3110-01-M

Office of Federal Procurement Policy

Policy Letter on Management Oversight of Service Contracting

AGENCY: Executive Office of the President, Office of Management and Budget (OMB), Office of Federal Procurement Policy.

ACTION: The Office of Federal Procurement Policy (OFPP) is requesting comments on a proposed Policy Letter on the "Management Oversight of Service Contracting" to replace OMB Circular No. A-120, "Guidelines for the Use of Advisory and Assistance Services".

SUMMARY: The Federal Government contracts for a wide variety of services from housekeeping and grounds maintenance to highly specialized technical and managerial advice. Such services provide essential support for an agency to successfully accomplish its mission. Accordingly, it is important that the government effectively plans for and manages the use of these contracts.

Over the years, however, both real and perceived problems have been identified with the use of service contracting. The major problem areas—associated primarily with the use of contracts for consulting services—include the lack of competition in the award of these contracts, the potential for conflicts of interest on the part of nonpersonal services contractors, and the failure of the government to exercise adequate control over these contractors.

Although guidance in OMB Circular No. A-120 focuses on defining, controlling, and reporting contracts for advisory and assistance services, discrepancies in reporting and applying effective management controls have continued due to the difficulty in developing a clear definition of the types of services that need more management scrutiny. These definitional and reporting problems have caused the Executive branch to take a new, more comprehensive approach to applying good management practices to the use of service contracting in general.

This proposed Policy Letter focuses on specific types of service contracting problems, encourages better management practices and greater management emphasis to ensure that effective controls are in place, and requires management reports on agencies' compliance. The Policy Letter sets out a series of questions as guidelines for agencies to use in improving controls in the five areas that require increased management scrutiny: Contracting out inherently governmental functions; competition; cost effectiveness; control; and conflicts of interests.

The proposed Policy Letter is applicable to services obtained under service contracts above the small purchase threshold. Requirements for construction are excluded.

Services obtained by personnel appointments and advisory committees are not covered by this Policy Letter as guidance is contained in chapter 304 of the Federal Personnel Manual, the General Services Administration regulations, 41 CFR, part 101-6, and OMB Bulletin No. 89-08, Improved Management of Federal Advisory Committee Operations, issued December 23, 1988.

The proposed Policy Letter requires each agency to designate a senior management official, at the Senior Executive Service level, to be responsible and accountable for ensuring compliance with the provision contained therein. Each agency is also required to establish written management control procedures which outline the senior management official's responsibilities as it relates to the review and approval of requirements for these services, and the process to follow to correct and document any noncompliance with established management controls.

The proposed Policy Letter also gives the senior management official the flexibility of designating certain types of services for a class rather than individual review if it can be justified to the agency head that those services are not subject to abuse in the above problem areas. Guidelines are provided on the types of services that may be reviewed on a class basis.

The reporting requirements in the proposed Policy Letter are designed to ensure that the management controls are implemented properly, that potential abuses and their corrective action are documented, and that any class reviews are justified and documented in agencies' management control procedures. Agencies will be required to continue reporting data on contract actions for services in the Federal Procurement Data System. However, the requirement to separately categorize contracted advisory and assistance services will be eliminated.

COMMENT DATE: Comments must be received on or before February 18, 1992.

ADDRESSES: Comments should be sent to Dr. Allan V. Burman, Administrator, Office of Federal Procurement Policy, Office of Management and Budget, 725 17th Street, NW., room 9001, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Linda G. Williams, Deputy Associate Administrator, (202) 395-3300.

Dated: December 10, 1991.

Allan V. Burman,

Administrator.

Policy Letter 92—to the Heads of Executive Departments and Establishments

Subject: Management Oversight of Service Contracting

1. Purpose. This Policy Letter establishes Government-wide policy, assigns responsibilities, and provides guidance for Executive Departments and agencies in managing the acquisition and use of services.

2. Authority. This Policy Letter is issued pursuant to section 6(a) of the Office of Federal Procurement Policy (OFPP) Act, as amended, codified at 41 U.S.C. 405.

3. Rescission. This Policy Letter supersedes the Office of Management and Budget (OMB) Circular No. A-120, "Guidelines for the Use of Advisory and Assistance Services", dated January 4, 1988.

4. Background. The Federal Government contracts for a wide variety of services, from highly specialized technical, scientific and managerial advice to routine support functions, such as grounds maintenance. Such services provide essential support to agencies in accomplishing their missions. This Policy Letter has been developed to provide a new, more comprehensive approach to managing and using service contracts, and to provide specific guidance on what constitutes good management practices in the use of such contracts.

5. Definition. Services are identifiable tasks to be performed, rather than the delivery of an end item of supply. The term "services" also includes tasks that are delivered under a contract where the

VOL 56 ISS 245 DEC 20 1991 UMI

primary purpose of the contract is to provide supplies.

6. Exclusions. Services that are (1) obtained by personnel appointments and advisory committees, (2) obtained under nonpersonal services contracts that are below the small purchase threshold or (3) are for construction, as defined in part 36 of the Federal Acquisition Regulation, are excluded from coverage under this Policy Letter.

7. Policy. When contracting for services, it is the policy of the Federal Government that:

(1) Services are to be obtained and used in ways that assure that the Government retains control of decision-making authority; and

(2) Effective management practices and controls are applied to prevent abuses of the policies and guidelines contained herein.

8. Good Management Practices. While effective management oversight is required for all types of service contracts, some require less oversight than others, as, for example, such routine services as lawn mowing and food preparation. Conversely, services that tend to affect government decision-making, support or influence policy development, or affect program management are more susceptible to abuse. These, therefore, require a greater level of scrutiny.

The following sections offer guidance to assure that good management practices are being followed. Agencies must review requirements for services contracts either on an individual or a class basis to see if any of the following guidelines apply. If they do apply, and if the response to any of the questions listed below is affirmative, the responsible management official must ensure that procedures are in place to eliminate the potential for abuse. If necessary, the requirement should be returned to the requesting organization for appropriate corrective action.

a. Inherently Governmental Functions. When contracting for services, agencies must:

(1) Not use such contracts to perform inherently governmental functions,

(2) Provide an enhanced degree of management controls and oversight when contracting for functions that directly support the performance of inherently governmental functions, and

(3) Ensure that any final agency action reflects the ideas, analyses, and conclusions of agency officials and the laws and policies of the United States.

If the response to any of the following questions is affirmative, the contract requirement may be for an inherently governmental function:

(1) Will the contract require the contractor to exercise substantial discretion in applying government authority, or use substantial value judgments in making decisions for the government?

(2) Will the contract require the contractor to be involved in monetary transactions and entitlements such as tax collection and revenue disbursements, control of treasury accounts, or the administration of public trusts?

b. Cost Effectiveness. When a valid service requirement exists, agency officials must develop means to satisfy the requirement in the most cost effective manner. If the response to any of the following questions is affirmative, the agency may not be obtaining the requirement in the most cost effective manner:

(1) Is the statement of need so broadly written that it does not validate the need for a specific service?

(2) Is the statement of need so broadly written that it does not permit adequate evaluation of contractor versus in-house performance?

(3) Does the acquisition plan adequately prescribe the choice of contract type, quality assurance plan, competition requirements, and other related requirements to ensure that contractors will have the incentive to control costs under the contract?

(4) Does the acquisition plan adequately address the cost effectiveness of using contractor support (either long term or short term) versus in-house performance?

c. Control. When contracting for highly specialized or technical services, agencies should ensure that sufficient technical expertise is available within the agency. Agency officials need to be able to make sound judgments on what the requirements should be, the estimated costs, and whether the contractor is performing according to the contract terms and conditions. Agency officials must retain control over and remain accountable for policy decisions that may be based, in part, on a contractor's performance and work products. If the response to any of the following questions is affirmative, there may be a control problem:

(1) Will the contractor provide advice, analysis and evaluation, opinions, alternatives, or recommendations that could significantly influence agency policy development or decision-making?

(2) Will the contract result in a long term effort to fulfill some critical agency function?

(3) Is the quality assurance plan overly general, making it difficult to adequately monitor contractor performance?

(4) Is the statement of work so broadly written that it does not specify a contract deliverable or require progress reporting on contractor performance?

(5) Is the cost estimate so general that the contracting office will have difficulty in effectively determining cost reasonableness?

(6) Does the Government have the expertise to evaluate independently the contractor's approach, methodology, results, options, conclusions, or recommendations?

d. Conflicts of Interest. Agency officials must ensure that any potential conflicts of interest are identified and appropriate steps taken to avoid or mitigate them. Service contracts are not to be awarded to any individual or organization which may have an unfair competitive advantage over competing contractors unless every effort is first taken to mitigate such conflict.

If the response to any of the following questions is affirmative, there may be a potential for a conflict of interest:

(1) Will the work under this contract create a significant conflict of interest on a future acquisition?

(2) Is the requirement for support services (such as system engineering or technical direction) such that the potential offerors could have developed the system design specifications or been involved in the production of the system?

(3) Have potential offerors participated in work involving the same program or activity?

(4) Will the contractor be evaluating a competitor's work?

(5) Does the requirement for services require the contractor to evaluate its own products or activities?

(6) Will the work place the contractor in a position to influence broad government decision-making, e.g. developing regulations, that will affect the contractor's current and/or future business?

(7) Will the work under this contract affect the interests of the contractor's other clients?

(8) Are any of the potential offerors former agency officials that were substantially involved in developing the requirement for these services within the past two years?

e. Competition. Full and open competition is one way to reduce the potential for favoritism and conflicts of interest. To maximize competition, the Competition in Contracting Act requires thorough acquisition planning and limits exceptions. The Act provides that lack of advance planning is not adequate justification for sole source contracting. Any justification for a noncompetitive contract should provide a detailed explanation as to why competition can not be achieved. Plans should be made to minimize the number of subsequent noncompetitive awards.

If the response to any of the following questions is affirmative, competition may be unnecessarily limited:

(1) Is the statement of work narrowly defined with unnecessarily restrictive specifications or performance standards?

(2) Is the requirement likely to create a continuous and dependent arrangement with the same contractor?

(3) Is the use of an indefinite quantity or term contract arrangement appropriate to obtain the required services?

(4) Will the requirement be obtained through the use of other than full and open competition?

9. Responsibilities.

a. Heads of Agencies. Agency heads (or their designees) shall:

(1) Designate a Senior Management Official, at the Senior Executive Service level, to be responsible and accountable for assuring that management controls are implemented and monitored to comply with the provisions of this Policy Letter. Consideration should be given to inclusion of this function as a critical element in the Senior Management Official's performance appraisal.

(2) Establish written procedures that outline the Senior Management Official's oversight responsibilities as they relate to the review and approval of requests for services, and the process to follow to correct and document any noncompliance with these good management practices. At a minimum, the procedures should ensure that:

(a) Requirements for services above the small purchase threshold are fully justified in writing, including a statement of need and a certification that the services do not duplicate previously performed work or services and are being obtained in the most cost effective manner;

(b) In-house technical expertise is sufficient to monitor and assess contractor performance, and to retain control over policy decisions and other governmental functions that may be based on the contractor's work products;

(c) Requirements are reviewed to ensure that no inherently governmental functions are being performed by contractors (See OFPP Policy Letter 92-X, "Inherently Governmental Functions");

(d) The agency does not rely on contractors to the point where noncompetitive environments are created;

(e) Organizational and individual conflicts of interests, as defined in OFPP Policy Letter 89-1 "Conflicts of Interest Policies Applicable to Consultants," 54 FR 51805 (1989) are avoided or mitigated;

(f) Contracts are properly administered and monitored to evaluate contractor compliance with contract requirements and performance standards. (See: OFPP Policy Letter 91-2, Service Contracting, 56 FR 15110 (1991), and OFPP's "Government-Wide Guideline on Contract Administration"); and

(g) Data on each contract action for services is reported to the Federal Procurement Data System (FPDS) in accordance with the FPDS Reporting Manual

(3) Ensure that the agency's program for compliance with the Federal Managers' Financial Integrity Act (FMFIA) covers service contracting, and that any disclosed material control weaknesses are reported in agency annual statements of assurance (FMFIA Reports).

(4) Assure that the Agency Procurement Executive, in establishing criteria and performance standards for evaluating the agency's procurement systems in accordance with Executive Order 12352, takes into account the requirements of this Policy letter. The Agency Procurement Executive shall confer with the Senior Management Official regarding compliance with this Policy Letter prior to certifying that the procurement system meets required standards of performance. A copy of the resulting certification shall be provided to the Office of Federal Procurement Policy.

(5) Develop implementation strategies and initiate staff training necessary to assure effective implementation of these policies upon the effective date of this Policy Letter.

b. Agency Senior Management Officials. The Agency Senior Management Official, as designated above, shall:

(1) Prepare and submit an annual report to the Agency Head, with a copy of the Office of Federal Procurement Policy, on agency implementation of the policies and procedures in this Policy Letter. The report shall include:

(a) A description of the agency's management control procedures;

(b) Identification of the types of services, including justification statements and review levels, that are being reviewed on a class basis;

(c) The number and estimated dollar value of requirements for services that were reviewed individually (excluding requirements for class reviews) to ensure compliance with this Policy Letter;

(d) Any changes made in the control process to avoid problems of non-compliance; and

(e) A summary of the findings that relate to the sample of contracts reviewed after contract completion to ensure that contractor performance met contract requirements, and accurate and complete data were reported to the FPDS.

(2) Establish, as necessary, specific review levels to approve requirements for services. At a minimum, approvals should be provided at least one level above the requesting organization and, for fourth quarter requirements, at least two levels above the requesting organization.

(3) Designate, as appropriate, certain types of services for a class review rather than review each requirement individually, as long as that decision is justified, documented, and reported to the Agency Head.

Note: Services that could be reviewed on a class basis are not normally subject to abuse in the five areas of concern set forth in section 8 of this Policy Letter. Such blue collar services as lawn mowing, landscaping, janitorial functions, food preparation, messenger services, building maintenance, reproduction and printing, trash collection, and snow removal are examples of services that may be appropriate for class review.

(4) Define the review levels and class designations in the agency's management control procedures, and assure that any such class reviews or delegations of authority are performed in a manner that will ensure compliance with this Policy Letter.

(5) Conduct periodic and systematic reviews or audits of purchases for services below the small purchase threshold to ensure that abuses are not occurring regarding these acquisitions.

c. Federal Acquisition Regulatory Council. The Federal Acquisition Regulatory Council shall ensure that Government-wide regulations to conform to the policies establishes herein are promulgated in the first Federal Acquisition Circular issued 210 days after the effective date of this Policy Letter.

d. Office of Management and Budget (OMB). OMB, through the President's Council on Integrity and Efficiency, will request that the Inspectors General periodically review established management control procedures to ensure their compliance with this Policy Letter.

BILLING CODE 3110–01–M

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

National Advisory Committee on Semiconductors

The purpose of the National Advisory Committee on Semiconductors (NACS) is to devise and promulgate a national semiconductor strategy, including research and development. The implementation of this strategy should assure the continued leadership of the United States in semiconductor technology. The Committee will meet on Tuesday, January 7, 1991 at the Office of Science and Technology Policy, Old Executive Office Building, 17th and Pennsylvania Avenue, NW., Washington, DC. The proposed agenda is:

1. Briefing of the Committee on its organization and administration.

2. Discussion by the Committee of a national semiconductor strategy and supporting studies regarding semiconductors.

3. Discussion of the annual report of the Committee.

The meeting will be closed to the public.

A portion of the discussion of Committee organization will necessitate the disclosure of information of a personal nature, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. Accordingly, this portion of the meeting will be closed to the public, pursuant to 5 U.S.C. 552b. (c)(6). The discussion of supporting studies related to semiconductor technology and the semiconductor industry will require discussion of confidential commercial information. This portion of the meeting will be closed to the public pursuant to 5 U.S.C. 552b. (c)(4).

Dated: December 17, 1991.

Damar W. Hawkins,

Executive Assistant to D. Allan Bromley, Office of Science and Technology Policy.

BILLING CODE 3170–02–M

PENSION BENEFIT GUARANTY CORPORATION

Approval of a Collection of Information Under the Paperwork Reduction Act; Procedure for Complying With Statutory Notification Requirement

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of OMB approval.

SUMMARY: The Office of Management and Budget ("OMB") has approved a new collection of information, PBGC Form 200, under the Paperwork Reduction Act. This collection of information implements a statutory requirement to notify the Pension Benefit Guaranty Corporation ("PGBC") of a failure to make a required payment to a single-employer plan covered by title IV of the Employee Retirement Income Security Act of 1974 when the total of unpaid balances of required payments not made when due (including interest) exceeds $1 million. The PBGC needs this information to make decisions regarding enforcement of the statutory lien imposed in favor of the plan for failure to make required contributions. A copy of Form 200 together with the related instructions is appended to this notice.

FOR FURTHER INFORMATION CONTACT: Judith A. Neibrief, Attorney, Office of the General Counsel (Code 22500, Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006, 202–778–8850 (202–778–8859 for TTY and TDD). (These are not toll-free numbers.) For copies of Form 200 or assistance with the form or instructions, see the contacts listed in the instructions).

SUPPLEMENTARY INFORMATION:

Background

The Pension Benefit Guaranty Corporation ("PBGC") administers the pension plan termination insurance program under title IV of the Employee Retirement Income Security Act of 1974 ("PPA"), Congress amended the minimum funding standards of section 412 of the Internal Revenue Code of 1986 ("Code") (26 U.S.C. 412) and section 302 of ERISA (29 U.S.C. 1082) by, among other things, adding identical lien provisions as new subsection (n) and new subsection (f), respectively (section 9304(e)(2) of the Omnibus Budget Reconciliation Act of 1986 (Pub. L. 100–203)). These provisions apply for any post-1987 plan year for which the funded current liability percentage (as defined in Code section 412(1)(8)(B) and ERISA section 302(d)(8)(B)) of a defined benefit plan other than a multiemployer plan (*i.e.*, a single-employer plan) is less than 100 percent.

Section 412(n)(1) of the Code and section 302(f)(1) of ERISA impose a lien in favor of a plan that is subject to the minimum funding standards if (1) any person fails to make a required installment or any other payment required under section 412 of the Code and section 302 of ERISA when due, and (2) the unpaid balance of the required installment or other payment (including interest), when added to the aggregate unpaid balance of all preceding such installments or other payments for which payment was not made when due (including interest), exceeds $1 million. The lien is upon all property and rights to property (whether real or personal) belonging to the person or persons that are liable for required contributions (*i.e.*, a contributing sponsor and each member of the controlled group of which that contributing sponsor is a member).

Any such lien may be perfected and enforced only by the PBGC or, at its direction, by the plan's contributing sponsor or any member of the contributing sponsor's controlled group (Code section 412(n)(5) and ERISA section 302(f)(5)). Therefore, section 412(n)(4) of the Code and section 302(f)(e) of ERISA require persons committing payment failures to notify the PBGC, within 10 days of the due date for the required installment or other required payment, whenever there is a failure to make a required payment and the total of the unpaid balances (including interest) exceeds $1 million.

PBGC Form 200

The PBGC developed PBGC Form 200, Notice of Failure to Make Required Contributions, and related filing instructions, to implement the statutory notification requirement with respect to single-employer plans that are covered by Title IV of ERISA and, on November 15, 1991, notified the public that it had requested Office of Management and Budget ("OMB") approval of this new collection of information (56 FR 58090). The PBGC requested that OMB conduct its review of Form 200 on an expedited schedule of 30 days and published a copy of Form 200, together with the related instructions, as an appendix to the notice. In the notice of request for OMB approval, the PBGC also anticipated publication of today's notice of the collection of information approved by OMB before January 1, 1992, the effective date of the interim final, procedural rule requiring use of Form 200 (56 FR 57977, November 15, 1991).

OMB received no comments that warrant modification of the form and approved Form 200, as submitted by the PBGC, under control number 1212–0041 (expiration date: November 30, 1994). Therefore, Form 200, a facsimile of which is appended to this notice together with filing instructions, must be used for any notice of failure to make required contributions for which the 10-day filing period ends on or after January 1, 1992. (The PBGC will accept photocopies of the appended facsimile form. (See the filing instructions, which also include information on how to request copies of Form 200.))

As explained in the PBGC's prior notice, Form 200 must be filed by a contributing sponsor and, if a contributing sponsor is a member of a parent-subsidiary controlled group of corporations or group of trades or businesses under common control, the parent of such group. (Where there is more than one parent, "parent" refers to the parent at the highest level in the chain of corporations and/or other organizations comprising the group.) Since each member of a controlled group of which a contributing sponsor is a member is liable for payment of all required contributions and installments (Code section 412(c)(11) and ERISA section 302(c)(11)), all members of the controlled group commit a failure described in paragraph (f)(1) and, hence, are subject to the statutory notification requirement. Nevertheless, to minimize the reporting burden, the PBGC (at this time) considers compliance with a requirement to file Form 200 by either a contributing sponsor or a parent to satisfy the notification requirement for all members of the same controlled group as the person who files Form 200. (The PBGC emphasizes that the scope of the filing requirement does not in any way limit the joint and several liability for required payments of each controlled group member, the imposition of the statutory lien on all assets of each controlled group member, or the ability of the PBGC to take all appropriate steps to perfect and enforce the lien.)

In Part I of Form 200, the filer must identify the plan, its administrator, the contributing sponsor or parent filing the form, all members of a controlled group of which the filer is a member (along with a description of the structure of that group), any other contributing sponsor(s), and an authorized contact. In parts II and III, the filer must provide information that the PBGC needs (1) to determine the amount of the statutory lien, (2) to evaluate the funding status of the plan, and (3) to evaluate the financial condition of the filer and members of the same controlled group (if any). Finally, in part IV, an officer (or individual of comparable authority) of the filer must certify the information provided to the enrolled actuary and other information (including documentation) in the filing, and an enrolled actuary would certify the payment failure-related information.

Issued at Washington, DC, this 17th day of December, 1991.

James B. Lockhart III,

Executive Director, Pension Benefit Guaranty Corporation.

FILING INSTRUCTIONS FOR NOTICE OF FAILURE TO MAKE REQUIRED CONTRIBUTIONS

PBGC FORM 200

PAPERWORK REDUCTION ACT NOTICE

The PBGC needs this information to make decisions regarding enforcement of a lien imposed by ERISA section 302(f)(1) and Code section 412(n)(1). You are required to provide this notification pursuant to ERISA section 302(f)(4) and Code section 412(n)(4). Confidentiality is limited to that provided under the Freedom of Information Act and the Privacy Act.

The estimated time needed to complete this form is 5.75 hours when a payment failure first results in a total of unpaid balances that exceeds $1 million and 2.75 hours when there is a subsequent payment failure and the total of unpaid balances continues to exceed $1 million. These times are estimated averages that will vary depending on the nature and organizational structure of persons liable for plan contributions (in particular, whether the plan's contributing sponsor is a member of a controlled group and, if so, the size of that group) and on the funding history of the plan.

If you have any comments concerning the accuracy of these time estimates or suggestions for improving the form or these instructions, please send your comments to the Pension Benefit Guaranty Corporation, Office of the General Counsel, (Code 22500), 2020 K Street, N.W., Washington, D.C. 20006-1860 and Office of Management and Budget, OIRA, Attention Desk Officer - PBGC, Room 3001, New Executive Office Building, Washington, D.C. 20503.

INTRODUCTION

ERISA section 302(f) and Code section 412(n) include the same lien provisions relating to a failure to make required contributions to a single-employer plan subject to the minimum funding standards (ERISA section 302/Code section 412) for any post-1987 plan year for which the plan's funded current liability percentage (as defined in ERISA section 302(d)(8)(B)/Code section 412(l)(8)(B)) is less than 100 percent.

There is a lien in favor of the plan if:

(1) any person fails to make a required installment or any other payment required under ERISA section 302 and Code section 412 when due, and

(2) the unpaid balance of the required installment or other payment (including interest), when added to the aggregate unpaid balance of all preceding such installments or other payments for which payment was not made when due (including interest), exceeds $1 million.

The amount of the lien is equal to the lesser of (1) the amount by which the unpaid balances (including interest) described above exceed $1 million or (2) the aggregate unpaid balance of required installments and other payments (including interest) for plan years beginning after 1987 for which payment has not been made when due. This amount is treated as taxes due and owing the United States.

The lien is upon all property and rights to property (whether real or personal) belonging to the person or persons who are liable for required contributions (i.e., a contributing sponsor and each member of the controlled group of which that contributing sponsor is a member). It arises on the 60th day following the due date for the required payment and continues until the last day of the first plan year in which the total of unpaid balances described above no longer exceeds $1 million.

Any lien imposed for failure to make required contributions may be perfected and enforced only by the PBGC or, at its direction, by the plan's contributing sponsor or any member of the contributing sponsor's controlled group. Therefore, ERISA section 302(f)(4)(A) and Code section 412(n)(4)(A) require that the PBGC be notified whenever there is a failure to make a required payment and the total of unpaid balances (including interest) exceeds $1 million. Notice must be provided within 10 days of the due date for the required payment.

To comply with this notification requirement with respect to a single-employer plan that is covered by Title IV of ERISA, the PBGC requires that a contributing sponsor and, if that contributing sponsor is a member of a parent-subsidiary controlled group, the parent, file Form 200 whenever such a failure occurs.

Note: The PBGC's decision not to require (at this time) controlled group members other than contributing sponsors and parents to file Form 200 does not in any way limit the joint and several liability of each controlled group member for required payments (whether the controlled group of which a contributing sponsor is a member is a "parent-subsidiary", "brother-sister", or "combined" group), the imposition of the lien on all assets of each controlled group member, or the ability of the PBGC to take all appropriate steps to perfect and enforce the lien.

The PBGC has restricted Form 200 to information generally needed in its decisionmaking regarding enforcement of a lien imposed by ERISA section 302(f) and Code section 412(n). If the PBGC concludes that it needs additional information in a particular case, it will notify (in writing) the person required to supplement the Form 200 and specify the date by which the additional information must be submitted.

Note: Pursuant to ERISA section 4071, the PBGC may assess a penalty against any person who fails to provide a notice or other material information required under ERISA section 302(f)(4), or any regulations thereunder, within the applicable time limit. The penalty is payable to the PBGC and may not exceed $1000 for each day that the failure continues.

3

DEFINITIONS

As used in PBGC Form 200 and these instructions--

"Code" means the Internal Revenue Code of 1986, as amended.

"Contributing sponsor" means the person entitled to receive a deduction under Code section 404(a)(1) for contributions required to be made to the plan under ERISA section 302 and Code section 412.

"Controlled group", for purposes of ERISA section 302(f) and Code section 412(n), means any group treated as a single employer under subsection (b), (c), (m), or (o) of Code section 414.

"Covered by Title IV of ERISA" means that a plan so described is covered by ERISA section 4021(a) and not excluded under ERISA section 4021(b).

"DOL" means the Department of Labor.

"Due date" means the date set forth in ERISA section 302(e) and Code section 412(m) for payment of a required installment and, in the case of a payment other than a required installment, the date such payment is required to be made under ERISA section 302 and Code section 412.

"ERISA" means the Employee Retirement Income Security Act of 1974, as amended.

"IRS" means the Internal Revenue Service.

"Parent" means the parent of a "parent-subsidiary" controlled group of corporations or group of trades or businesses under common control (within the meaning of subsection (b) or (c) of Code section 414 and the regulations thereunder). Where there is more than one parent in a "parent-subsidiary" group, the term "parent" refers to the parent at the highest level in the chain of corporations and/or other organizations comprising the group. (For example, if Corporation A owns all of the stock of Corporation B and Corporation C, and Corporation B owns all of the stock of Corporation X, the contributing sponsor, then the "parent" of Corporation X is Corporation A.)

"PBGC" means the Pension Benefit Guaranty Corporation.

"Required installment" means any of the four quarterly contribution payments required for each plan year by ERISA section 302(e) and Code section 412(m).

"Required payment" means a required installment or other payment required under ERISA section 302 and Code section 412.

"SEC" means the Securities and Exchange Commission.

"Single-employer plan" means a defined benefit plan (as defined in ERISA section 3(35)) that is not a multiemployer plan (as defined in ERISA section 4001(a)(3)).

4

GENERAL INSTRUCTIONS

The filer should assure that an appropriate response is provided for each item, as follows:

1. If an item requests a date, enter two digits in each box, e.g., enter "07" for July.

2. If responding to an item requires the attachment of documentation or information, mark the attachment to identify the item to which it responds.

No additions or deletions may be made to the certifications.

Who Must File

Form 200 must be filed by (1) a contributing sponsor and (2) if a contributing sponsor is a member of a "parent-subsidiary" controlled group, the parent of such group. However, if a timely and complete Form 200 is properly filed by either a contributing sponsor or the parent, the PBGC will deem the other to have so filed. (As noted above (see "Introduction"), each other member of any controlled group of which a contributing sponsor is a member also is jointly and severally liable for required payments and the PBGC may enforce the statutory lien imposed on its assets.)

When to File

Form 200, including all required documentation and information, must be filed with the PBGC no later than 10 days after the due date for the required payment.

> **Note:** Form 200 must be filed each time there is a failure described in ERISA section 302(f)(1) and Code section 412(n)(1) and the total of unpaid balances of required payments (including interest) exceeds $1 million.

The filing date for Form 200 is the date on which it is received by the PBGC office specified below (see "Where to File"), if it is received no later than 4 p.m. on a weekday other than a Federal holiday. If it is received after 4 p.m. or on a weekend or a Federal holiday, the Form 200 is deemed to be filed on the next regular business day.

In computing the 10-day period, the due date of the payment that resulted in the requirement to notify the PBGC is not included. Form 200 is due 10 days thereafter unless that day is a Saturday, Sunday, or Federal holiday, in which case the 10-day period runs until 4 p.m. on the next day that is not a Saturday, Sunday, or Federal holiday.

Where to File

Form 200 may be delivered by mail or by hand to:

Pension Benefit Guaranty Corporation
Case Operations and Compliance Department
Room 5500 (Code 45000)
2020 K Street, N.W.
Washington, D.C. 20006-1860

For Copies of PBGC Form 200, Questions, Problems

To request copies of Form 200, contact the PBGC's Control Division (Code 45200) at the address or telephone number shown below.

Those who have questions or problems regarding Form 200 or these instructions may contact:

Pension Benefit Guaranty Corporation
Case Operations and Compliance Department
Administrative Review and Technical Assistance Division
(Code 45400)
2020 K Street, N.W.
Washington D.C. 20006-1860
Telephone: (202) 778-8800

Hearing impaired persons may telephone (202) 778-8859.

These phone numbers are not toll-free numbers, and the PBGC cannot accept collect calls.

Use of Facsimile Forms

The PBGC will accept a reproduction or other facsimile of Form 200 if it presents the same items in the same location. However, any required signature must be an original.

Failure to Timely File

Pursuant to ERISA section 4071, the PBGC may assess a penalty for failure to timely file a complete Form 200. This penalty is payable to the PBGC and may not exceed $1000 a day for each day that the failure continues.

Previously Submitted Information

Because ERISA section 302(f)(4)(A) and Code section 412(n)(4)(A) require that the PBGC be notified each time there is a failure to make a required payment and the total of unpaid balances of required payments (including interest) exceeds $1 million, more than one filing may be required regarding the same plan, and at least some of the information included in a previous Form 200 may continue to be accurate and responsive at the time that a subsequent Form 200 must be filed. It also is possible that information submitted to the PBGC in another context (e.g., in a distress termination filing pursuant to ERISA section 4041(c) or in a notice of a reportable event required by 29 CFR Part 2615) is responsive. Therefore, a filer may respond to an item that calls for previously submitted documentation or other information by identifying the previous submission in which the response was provided.

6

SPECIFIC INSTRUCTIONS

Part I. General Plan Information

1a Enter the complete name of the plan as it appears on the plan document.

b Enter the first day of the plan year for which the payment described in item 7a was required.

2 Enter the name, address, and telephone number of the individual or the board or other entity, if any, specifically designated as plan administrator by the terms of the plan or trust agreement. If none is so designated or if a contributing sponsor is so designated, enter the name, address, and telephone number of that contributing sponsor.

3a Enter the name, address, and telephone number of (1) the contributing sponsor that is filing this form or (2) if the parent is filing this form, the controlled group member that is the contributing sponsor. (If the parent is filing and the plan covers the employees of more than one controlled group member, provide information with respect to the controlled group member with the greatest number of participants.)

b Enter the 9-digit employer identification number (EIN) assigned to the contributing sponsor in item 3a by the IRS for income tax purposes and the 3-digit plan number (PN) assigned by the contributing sponsor.

c If the EIN/PN in item 3b is different from that used in earlier filings with the PBGC (including premium and reportable event filings), the DOL, or the IRS, enter the EIN/PN previously reported. (If a different EIN or PN has not been used for this contributing sponsor/plan in previous filings, enter "NA" (not applicable).)

4b If you checked "Yes" to item 4a, enter the name, address, telephone number, and EIN (or "none" if there is no EIN) of the parent (i.e., the filer or the parent of the filer's controlled group). (If the controlled group is a "brother-sister" group, enter "none".)

d If you checked "Yes" to item 4c, attach a statement with (1) the name, address, telephone number, and EIN (or state that there is no EIN) of each other controlled group member and (2) a description of the structure of the controlled group. (The description must include the relationship of each member of the parent-subsidiary, brother-sister, or combined group, as applicable, to the controlled group. For example: "Corporation A, the parent of a parent-subsidiary group of trades or businesses under common control, has three wholly-owned subsidiaries, Corporation B, Corporation C, and Partnership D. Corporation B and Corporation C each owns 50 percent of the stock of Corporation X, the contributing sponsor. Partnership D owns all of the stock of Corporation Y.")

5a Check "Yes" if the plan is maintained by two or more contributing sponsors and all plan assets are available to pay benefits to all plan participants and beneficiaries.

b If you checked "Yes" to item 5a, attach a statement with (1) the name of each contributing sponsor and (2) the address, telephone number, and EIN (or state that there is no EIN) of any contributing sponsor(s) for which this information is not provided in response to previous items.

VOL 56 ISS 245 DE 20 1991 UMI

7

6 Enter the name, address, and telephone number of an individual who is an authorized representative of the contributing sponsor or the parent filing this form if this is not the individual signing the certification in item 12.

Part II. Plan Funding Information

Note: An enrolled actuary must certify that the information in items 7 and 8, among other things, conforms to applicable Code and IRS requirements (see item 11).

7a Describe the required payment that was not made when due, resulting in the requirement to notify the PBGC (e.g., "the second quarterly installment for the plan year beginning on July 1, 1991").

8a Enter the total amount, as of the due date in item 7b, of the unpaid balance of the required payment described in item 7a and the aggregate unpaid balance of all preceding required payments for which payment was not made when due (i.e., include in this amount the unpaid balances, including interest, of all required payments for which payment was not made when due).

b Describe how the amount in item 8a was determined, including the actuarial assumptions and methods used if different from the actuarial assumptions and methods used in the plan actuarial valuation report submitted in response to item 9a.

9c Attach a copy of any IRS letter(s) granting or modifying a funding waiver (under ERISA section 303/Code section 412(d)) or an extension of the amortization period (under ERISA section 304/Code section 412(e)) for any plan year, except a letter relating to (1) a waived funding deficiency that has been fully amortized (pursuant to ERISA section 302(b)(2)(C)/Code section 412(b)(2)(C)) or (2) an extended amortization period that has ended if all contributions required pursuant thereto have been made.

d Attach a statement describing any pending request(s) for a funding waiver (under ERISA section 303/Code section 412(d)) and/or for an extension of the amortization period (under ERISA section 304/Code section 412(e)), including the relief requested.

Part III. Contributing Sponsor and Controlled Group Financial Information

10a Attach copies of audited or, if not available, unaudited financial statements that were prepared for the contributing sponsor and each other controlled group member individually, including balance sheets, income statements, statements of cash flows, and notes to financial statements and annual reports. However, if financial statements were only prepared on a consolidated basis for more than one controlled group member, consolidated financial statements and consolidating financial statements or, if not available, consolidating trial balances that identify each controlled group member individually may be attached instead.

Part IV. Certification

11 This certification must be made by an enrolled actuary.

12 This certification must be made by an officer (or an individual of comparable authority in an unincorporated organization) of the contributing sponsor or parent that is filing the Form 200.

PBGC Form 200

Approved OMB 1212-0041
Expires 11/30/94

Notice of Failure to Make Required Contributions

FOR PBGC USE ONLY

File this form to notify the Pension Benefit Guaranty Corporation of a failure to make required contributions (see ERISA section 302(f)(4)(A) and Code section 412(n)(4)(A)) to a single-employer plan that is covered by Title IV of ERISA.

- Do NOT file this form for any other employee benefit plan.
- Do NOT file this form with the Internal Revenue Service.
- Do NOT file this form UNLESS the plan's funded current liability percentage is less than 100 percent.
- Do NOT file this form UNLESS the total of unpaid balances of required payments exceeds $1 million.

POSTAL RATE COMMISSION

[Docket No. A92-4]

Notice and Order Accepting Appeal and Establishing Procedural Schedule Under 39 U.S.C. 404(b)(5)

Issued December 17, 1991.

Before Commissioners: George W. Haley, Chairman; Henry R. Folsom, Vice-Chairman; John W. Crutcher; W. H. "Trey" LeBlanc III; H. Edward Quick, Jr.

In the Matter of: Carrothers, Ohio 44823, Christine Sizemore, et al., Petitioners

Docket Number: A92-4.
Name of Affected Post Office: Carrothers, Ohio 44823.
Name(s) of Petitioner(s): Christine Sizemore, et al.
Type of Determination: Closing.
Date of Filing of Appeal Papers: December 11, 1991.
Categories of Issues Apparently Raised:

1. Effect on the community [39 U.S.C. 404(b)(2)(A)];
2. Effect on postal services [39 U.S.C. 404(b)(2)(C)].

Other legal issues may be disclosed by the record when it is filed; or, conversely, the determination made by the Postal Service may be found to dispose of one or more of these issues.

In the interest of expedition, in light of the 120-day decision schedule [39 U.S.C. 404(b)(5)], the Commission reserves the right to request of the Postal Service memoranda of law on any appropriate issue. If requested, such memoranda will be due 20 days from the issuance of the request; a copy shall be served on the petitioner. In a brief or motion to dismiss or affirm, the Postal Service may incorporate by reference any such memoranda previously filed.

The Commission orders:

(A) The record in this appeal shall be filed on or before December 26, 1991.

(B) The Secretary shall publish this Notice and Order and Procedural Schedule in the **Federal Register**.

By the Commission.
Charles L. Clapp,
Secretary.

December 11, 1991: Filing of Petition.
December 17, 1991: Notice and Order of Filing of Appeal.
January 6, 1992: Last day for filing of petitions to intervene [see 39 CFR 3001.111(b)].
January 21, 1992: Petitioner's Participant Statement or Initial Brief [see 39 CFR 3001.115(a) and (b)].
February 10, 1992: Postal Service Answering Brief [see 39 CFR 3001.115(c)].
February 25, 1992: Petitioner's Reply Brief should petitioner choose to file one [see 39 CFR 3001.115(d)].
March 3, 1992: Deadline for motions by any party requesting oral argument. The Commission will schedule oral argument only when it is a necessary addition to the written filings [see 39 CFR 3001.116].
April 8, 1992: Expiration of 120-day decisional schedule [see 39 CFR 404(b)(5)].

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-30078; File No. SR-GSCC-91-03]

Self-Regulatory Organizations; Government Securities Clearing Corporation; Order Temporarily Approving a Proposed Rule Change Relating to Comparison and Netting of Non-Member Trades

December 13, 1991.

On July 23, 1991, pursuant to section 19(b) of the Securities Exchange Act of 1934 ("Act"),[1] the Government Securities Clearing Corporation ("GSCC") filed with the Securities and Exchange Commission ("Commission") a proposed rule change (File No. SR-GSCC-91-03) concerning enhancements to its comparison and netting systems. Notice of the proposal was published in the **Federal Register** on September 5, 1991.[2] No comments were received. This order approves the proposal on a temporary basis until December 31, 1992.

I. Description

The proposed rule change would allow GSCC netting members to submit

[1] 15 U.S.C. 73s(b).
[2] Securities Exchange Act Release No. 29627 (August 29, 1991), 56 FR 43950.

to GSCC trading activity of non-members. The proposal effectively would expand the scope of trades eligible for GSCC's comparison and netting systems by allowing GSCC to identify, compare and net trades where one or both sides to the transaction are non-members that have entered into clearing or correspondent arrangements with a GSCC member. The proposal, however, would not result in GSCC's interacting directly with non-members.[3]

The proposal would require that a member, who intends to submit non-member trading activity to GSCC, provide advance notice of its intent to act on behalf of a non-member.[4] Members would be required to provide separate notices listing the non-member correspondents whose trading activity the member will introduce for comparison only, and correspondents whose trading activity the member will introduce into GSCC's system for both comparison and netting. To submit trades to GSCC's netting system, GSCC members must guarantee performance by the non-member and must complete delivery, receipt and payment on netted trades. If the submitting member determines not to guarantee non-member's trades, GSCC will not include those trades in the trade netting system.[5]

In order to identify non-member trades in GSCC's comparison system, the proposal would add two "executing firm" information fields to GSCC's trade data format, allowing the netting member to indicate: (1) The identity of the executing party associated with the submitting member, and (2) the identity of the executing party associated with the contra-party member.[6] Members would continue to submit proprietary trades as usual (*i.e.*, leaving the executing firm fields blank).

In addition to the currently required data, executing firm information would be required to be matched in order for the trade to be compared. GSCC believes that the addition of the new information fields initially may adversely affect successful comparison of trade data.[7] In an effort to avoid any increase in uncompared trades, GSCC would make the following exceptions: (1) If GSCC comparison yields an uncompared trade because of unmatched executing firm information but the trade data agrees in all other respects, GSCC would assume that the executing firm information was incorrectly submitted by one side of the trade, and would compare the trade based on a match between the submitting members; (2) if the identity of the executing firm on one side of a trade is not provided, GSCC would compare the trade assuming that there is no executing firm on that side of the trade; (3) if a trade submitted to GSCC does not identify the contra-party submitting member, but the contra-party executing firm information is provided, and the contra-party submitting member has submitted standing instructions [8] designating that member as the submitting member for the identified contra-party executing firm, GSCC would compare the trade assuming that the GSCC member providing the standing instruction is the contra-party submitting member for the trade. GSCC will designate separately all trades successfully compared that involve an executing firm.

To facilitate comparison of trades submitted against the affiliate [9] of the true executing firm, the proposal would allow GSCC to compare the trade as if it originally had been submitted against the true executing firm. GSCC would resolve the trade provided the submitting member and the affiliated firms have given GSCC a written authorization to make such a substitution.[10]

For example, assume that member *A* submits one side of a trade naming as the contra-party, *B*, (an affiliate of member *C*) and the trade does not compare as submitted. Assume further that the matching side is submitted by member *C*. GSCC will assume that member *A* intended to name member *C* as the contra-party, and GSCC will substitute *C* as the contra-party in the trade data submitted by *A*, and compare the trade as if member *A* had originally submitted against member *C*.

Non-member trades, like member trades, must be submitted by 10:00 p.m. in order to be included in GSCC regular nightly comparison cycle. GSCC will include the status of non-member trades in daily comparison reports provided to members.

To assist members in submitting accurate trade data to GSCC, GSCC would maintain a "translation table" containing GSCC members' internal identifiers for contra-participants and the corresponding GSCC member identifying numbers. Upon the request of a member, GSCC would translate the member's internal contra-participant identifier to a GSCC identifying number to assist members in identifying the contra-party to the trade.

If the submitting member has provided notice to GSCC that it wishes to guarantee the trades of the non-member, trades so submitted and guaranteed would be included in the calculation of the submitting member's clearing fund contribution and other money and securities obligations. The submitting member will be responsible for, among other things, the funds-only and securities settlement portions of its net settlement position attributable to the trades submitted on behalf of the non-member to the same extent as if the submitting member had executed the trade.[11] In addition, the assessment of the risk posed by the submitting member's trading activity would include trading activity with a non-member executing firm if that executing firm's trades are submitted to GSCC for comparison and netting. Finally, GSCC rules regarding the allocation of loss, the assessment of an additional clearing fund deposit, and placing members on surveillance status would include such trading activity. Of course, if a member chooses not to guarantee a trade submitted on behalf of an executing

[3] *See* n. 6, *infra*.
[4] Specifically, GSCC would require that notice of the member's intent to act on behalf of a non-member be given at least three days prior to the initial submission of trade data on behalf of the non-member.
[5] See discussion, *infra* concerning obligations of the submitting member with respect to the netting of non-member trades.
[6] With regard to this part of the proposal, GSCC has represented to the Division of Market Regulation staff that the proposal would not result in GSCC's direct interaction with non-members. Comparisons generated by GSCC would not address the nature of the relationship between an executing firm and the firm submitting trades on its behalf.
[7] On average 22.288 sides (a side is either the purchase or sell piece of a trade) are submitted daily to GSCC for comparison, of which 20.924 sides, with a dollar value of $153.31 billion, are successfully compared. GSCC's average daily comparison rate thus is about 94%. This average is based on data submitted through August, 1991.
[8] As discussed above, GSCC would require a comparison or netting member to provide a standing instruction that the member is to be deemed the submitting member on all trades involving a designated executing firm. If the member has not provided a standing instruction, GSCC will follow its usual reconciliation procedure advising the member that the trade was not successfully compared. GSCC will not undertake to determine the identity of the parties to the trade unless the member has provided a standing instruction.
[9] The term "affiliate" as used in this release and in GSCC's rules means "a person that directly, or indirectly through one or more intermediaries, controls or is controlled by, or is under common control with, the person specified". 17 CFR 230.405 (1985).
[10] Prior to making any such substitution, GSCC must have on record a standing instruction authorizing GSCC to resolve the trade internally.
[11] In this connection, GSCC will no longer require that trades submitted for comparison and netting be trades that are executed "between members". Accordingly, GSCC is revising its rules to reflect that trades may be netted and novated by GSCC as long as those trades are submitted by a GSCC netting member. GSCC Rules and Procedures, R. 1.

VOL 56 ISS 245 DEC 20 1991 UMI

firm, the trade submitted on behalf of the executing firm would be eligible for GSCC's comparison system but would not be netted or novated by GSCC nor included in the calculation of the submitting member's clearing fund contribution and daily mark requirements.

II. Discussion

The Commission believes that GSCC's proposal will promote the prompt and accurate clearance and settlement of securities transactions consistent with section 17A(b)(3)(A) of the Act.[13] The proposal will enhance GSCC's ability to compare and net U.S. Government securities transactions. The Commission believes that GSCC's proposal facilitates the purposes of the Act, and in particular, the safeguarding of securities and funds which are under GSCC's control, custody, or for which GSCC is responsible by requiring netting members who guarantee the trades of an executing firm to assume financial responsibility for the trading activity.

GSCC has included in the proposed rule change certain exceptions to the requirements for a matched trade that will allow a matched trade to occur when both sides of the trade do not agree as to the executing firm information. GSCC has structured the proposal in this manner to facilitate the successful comparison of trades while avoiding additional uncompared trades because not all GSCC members' internal systems are equipped to accommodate additional information fields.[13]

The Commission believes that GSCC's approach is a reasonable first step in the process of incorporating correspondent activity into a centralized comparison and netting system. Nevertheless, GSCC should encourage its members to be more accurate in the data they submit in order to reduce, and eventually eliminate, the need for GSCC to substitute or supplement data on behalf of members.

Currently, GSCC issues a monthly report to members listing, among other things, the member's compared and uncompared trades and the percentage of trades that entered the net. Under the proposal, the report would reflect the effect of non-member trading activity submitted by the member on the member's comparison rate. The Commission urges GSCC to supplement the currently reported information by tracking the identity of the submitting member and the executing firm and identifying by type of match each trade involving a non-member. This data would provide a basis for GSCC to test the accuracy of member input and to monitor for unusual trading pattern. The information GSCC gathers regarding the comparison activity of members on behalf of non-member firms will be provided to the Commission on a quarterly basis during the temporary approval period.[14]

III. Conclusion

For the reasons stated above, the Commission preliminarily finds that GSCC's proposal is consistent with section 17A of the Act.[15]

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[16] that GSCC's proposed rule change (File No. SR–GSCC–91–03) be, and hereby is, approved on a temporary basis through December 31, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[17]

Jonathan G. Katz,

Secretary.

Self-Regulatory Organizations; National Association of Securities Dealers, Inc.; Order Approving Proposed Rule Change Relating to Amendments to Schedule C to the NASD's By-Laws

December 13, 1991.

The National Association of Securities Dealers, Inc. ("NASD") submitted on August 23, 1991, [1] a proposed rule change pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [2] and Rule 19b–4 [3] thereunder to amend Schedule C to the NASD's By-Laws, which sets forth the application review process for new member applications ("the premembership interview process" or "PMI process"), to adopt deadlines for the consideration of applications for membership and to extend the effectiveness of membership restrictions to successors to the ownership or control of the applicant. The proposal amends section 1(a) to provide that the NASD can reject an application after sixty days where the applicant has failed to respond to a request from the NASD for information, or where the applicant has failed to amend a materially inadequate response pursuant to a request from the NASD.[4] In addition, the proposal amends section 1(b) to allow the NASD to reject an application if the applicant does not complete the review process within twelve months of the filing of the application.[5] The proposed rule change also amends section 1(e) to state that all restrictions placed on an applicant's business will remain in effect until modified pursuant to section 3 of part I, and will bind all successors to the applicant.[6] The NASD has requested that the rule go into effect on February 1, 1992, allowing time for the NASD to inform members of the rule's approval in a Notice to Members.

Notice of the filing and the terms of substance of the proposed rule change as modified by amendments 1, 2 and 3, was given by the issuance of a Commission release (Securities Exchange Act Release No. 29701, September 18, 1991) and by publication in the **Federal Register** (56 FR 48258, September 24, 1991).

The Commission received one comment letter on the proposed rule change raising three concerns.[7] First, while the commentator concurs that there is a need to adopt deadlines for consideration of applications for membership, she indicated that 60 days may be insufficient to respond to a request for further information. The commentator suggested that 90 days or longer should be provided for some delays and that an applicant should be able to submit to the NASD District, in writing, a request for an extension for good cause to avoid having its application deemed "materially inadequate" under this rule change. Second, the commentator suggested the NASD District be obligated to schedule the PMI within a specific time frame after the receipt of all information, instead of within a "reasonable" time frame. Third, the commentator requested that pending applications, nearing the 12 month rejection deadline when this rule change goes into effect, be given an extension. The commentator also indicated support for the restrictions/successor provision of this proposal.

In response to the comment letter, the NASD filed Amendment No. 4, addressing the commentator's concerns. The NASD indicated that applicants will be given notice of the deadlines imposed by the proposed amendments and the consequences of the failure to meet the deadlines. Furthermore, the NASD indicated it does not intend to terminate pending applications where the applicant has responded to a request for information by stating that it is in the process of preparing a full response or has indicated it is taking steps to complete all examinations, agreements and other requirements necessary for NASD approval of the membership application. The NASD indicated it intends to terminate applications only if there is no response or if there is clear evidence of dilatory conduct on the part of the applicant.

In response to the commentator's request that the NASD be required to schedule a PMI within a specific time frame, the NASD indicated it does not believe that imposing a strict schedule for processing of applications is appropriate due to the changing regulatory and disciplinary demands on the volunteer committee members on which the NASD relies. The NASD agreed, in response to the commentator's concern regarding pending applications, not to terminate any application which is in process at the time this rule change becomes effective for 6 months following the effective date.[8]

The Commission believes that the NASD has responded adequately to the comment letter. The NASD expressly responded to each concern raised by the commentator and provided a reasonable explanation for the necessity of this rule change. The Commission believes this rule will streamline the application review process, while preserving the fundamental fairness of the PMI process.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the NASD and, in particular, the requirements of section 15A and the rules and regulations thereunder. Specifically, the Commission believes that the proposed rule change is consistent with section 15A(g)(3)(A) of the Act, which allows the NASD to deny or condition membership in the NASD on the member's ability to demonstrate financial responsibility and operational capability pursuant to standards established by the NASD.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved and will go into effect on February 1, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3 (a)(12).

Jonathan G. Katz,

Secretary.

[FR Doc. 91–30453 Filed 12–19–91; 8:45 am]

BILLING CODE 8010–01–M

[1] The NASD filed five amendments to this proposed rule change, three were filed prior to noticing the proposal. The fourth amendment was filed in response to a comment letter and the fifth amendment was filed to indicate the date this rule will go into effect. These amendments are technical in nature and available for inspection and copying in the Public Reference room.

[2] 15 U.S.C. 78s(b)(1) (1988).

[3] 17 CFR 240.19b–4 (1991).

[4] If an application is materially inadequate the applicant will be notified in writing of the inadequacy and of the information which is required to remedy the inadequacy.

[5] The NASD indicated rejection will not occur if the delay in approval of the application is caused by the NASD.

[6] This amendment codifies the NASD's view that a restrictive agreement is binding on the member firm, not just the principals, and the changes in ownership or control of the member do not operate to remove or reduce the limitations in the restrictive agreement. This amendment emphasizes the NASD's requirement that restrictive agreements can be amended only after the approval of a written application submitted to the District in which the member has its principal place of business.

[7] See letter to Jonathan G. Katz, Secretary, SEC, from Jacqueline H. Halliban, President, National Regulatory Services, Inc., dated October 6, 1991.

[8] The NASD indicated it does not intend to terminate applications simply because they have not been processed to completion within 12 months. As with requests for information, a complete failure to proceed with an application, or obvious dilatory conduct will be necessary before the NASD terminates an application.

[Release No. 34–30080; File No. SR–NASD–91–39]

Self-Regulatory Organizations; Proposed Rule Change by National Association of Securities Dealers, Inc. Relating To Release of Certain Information Regarding Disciplinary History of Members and Their Associated Persons Via Toll-Free Telephone Listing

December 13, 1991.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on August 12, 1991, the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission ("Commission" or "SEC") a proposed rule change as described in Items I, II, and III below, which Items have been prepared by the NASD.[1] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change amends the Resolution of the Board of Governors concerning "Notice to Membership and Press of Suspensions, Expulsions, Revocations and Monetary Sanctions," ("Resolution") at article V, section 1 of the NASD Rules of Fair Practice, by adding language to the effect that the NASD may release certain information contained in the Central Registration Depository ("CRD") System about the employment and disciplinary history of its members and their associated persons in response to telephonic inquiries from the general public via a toll-free telephone listing. The information released may include past and present employment history with NASD members, final disciplinary actions taken by federal or state securities agencies or self-regulatory organizations that relate to securities or commodities transactions and criminal convictions reported on Form U–4 (the Uniform Application for Securities Industry Registration or transfer).

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the amendment to the Resolution is to implement the

[1] The NASD subsequently filed Amendment No. 1 and Amendment No. 2 on September 10, 1991 and December 6, 1991 respectively. The terms of substance of which amendments are contained herein.

VOL
56
ISS
245
DE
20
1991
UMI

provisions of new section 15A(i) of the Act which was enacted by Congress in October 1990. This amendment will permit the NASD to release certain information contained in the CRD System regarding the employment and disciplinary history of its members and their associated persons in response to telephonic inquiries from the general public via a toll-free telephone listing. The NASD will respond to such requests for this information in writing. The NASD will report final disciplinary actions taken by federal or state securities agencies or self-regulatory organizations which relate to securities or commodities transactions and criminal convictions reported on Form BD or Form U–4, and if requested past and present employment history with NASD members. Final disciplinary actions also include civil injunctive orders entered as a result of actions initiated by federal or state regulatory authorities. The NASD procedures will call for a copy of this information to be sent to the person requesting it. The NASD intends to name this program the 800 Number Service Plan (the "Plan"). The information disclosed as disciplinary history reflects the view of the NASD that disciplinary history means final action taken by regulatory authorities. The view is also consistent with the matters that are disclosed under the NASD's Public Disclosure Policy.

The NASD intends that the Plan will operate during normal weekday business hours which will be from approximately 9 a.m. to 5 p.m. Eastern Time. The NASD plans to install 15 to 20 phone lines to handle the incoming calls. If a call comes in after 5 p.m., the caller will hear a tape recording which describes the system's operating hours and offers the caller the option of leaving his name and address and the NASD will send him a request form which can be completed and returned to the NASD for processing. Calls received during operating hours will be sorted by whether the requestor is an individual investor or a commercial requestor. The commercial requestors will be charged a $30 fee for each request made. No fee will be imposed on requests by individual investors. Once the NASD operator has identified the associated person who is the subject of the request, the caller will be advised if this associated person has any disclosable disciplinary history. If there is no disclosable history, the caller will be so advised and will be given the option of receiving a written response from the NASD to that effect. If there is disclosable history, the caller will be so advised; however, the details of such history will not be provided over the phone. The caller will receive a written response which describes the particular events involved. The NASD will disclose the identity of the requestor to the associated person who is the subject of the request and his employer-member. The NASD does not disclose the identity of the requestor if there is no disclosable history for the associated person or if the information request only concerns the member itself. The NASD Board of Governors determined that it was appropriate under these circumstances to disclose the identity of the requestor so that the associated person could have the opportunity to explain or address the disciplinary actions or convictions which are disclosed.

The NASD already has in place a Public Disclosure Program. This program was filed for immediate effectiveness with the SEC in April 1988 (File No. SR–NASD–88–14). Notice of that filing was provided by issuance of a Commission release (Securities Exchange Act Release No. 25604, April 20, 1988) and by publication in the **Federal Register**, (53 FR 14878, April 26, 1988). Under this program the NASD, pursuant to written inquiries, discloses all final disciplinary actions taken by any regulatory authority and criminal convictions disclosed on Form U–4. The identity of the person making such an inquiry is disclosed to the employer member, if applicable.

The NASD believes the proposed rule change is consistent with section 15A(i) under the Act, as amended. In pertinent part, section 15A(i) mandates that a national securities association shall, (1) establish and maintain a toll-free telephone listing to receive inquiries regarding disciplinary actions involving its members and their associated persons, and (2) promptly respond to such inquiries in writing. The NASD believes the proposed amendment is consistent with this section and constitutes good faith compliance with the requirements of this section.

B. Self-Regulatory Organization's Statement on Burden on Competition

The NASD does not believe that the proposed rule change imposes any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the filing. The Commission specifically requests comment on whether, as the instant rule change proposes, it is appropriate for the associated person who is the subject of the request and his employer-member to receive notice that an investor has made an inquiry, and further for the associated person and employer-member to be provided with the name, address and telephone number of the investor requesting the disciplinary history.

Additionally, the Commission notes that the NASD has proposed to disclose final disciplinary actions taken by federal or state securities agencies or self-regulatory organizations which relate to securities or commodities transactions and criminal convictions reported on Form BD or Form U–4. Final disciplinary actions reported will also include civil injunctive orders entered as a result of actions initiated by federal or state regulatory authorities. In addition to the information proposed for disclosure under the 800 number service, Form U–4 and BD also require that applicants report foreign court or SRO equivalent findings regarding civil litigation in connection with investment related activity, whether initiated by federal or state regulatory authorities or otherwise; and criminal convictions unrelated to securities or commodities. The Commission requests comments on whether the disciplinary information proposed for disclosure is sufficiently inclusive.

Further, the Commission requests that interested persons comment on whether or not the term "commercial requestor," as designated by the NASD for purposes of assessing fees for calls received on the 800 number, need be defined in the proposed rule change.

Finally, the proposed hours of operation for the 800 number are 9 a.m. to 5 p.m. Eastern Time. The Commission requests comments as to whether or not these hours are appropriate or should be modified for West Coast users of the 800 number.

Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of the filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by January 10, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3(a)(12).

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Release No. 35–25430]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

December 13, 1991.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by January 6, 1992 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

The Southern Company, et al. (70–7919)

The Southern Company ("Southern"), 64 Perimeter Center East, Atlanta, Georgia 30346, a registered holding company, and its wholly owned nonutility subsidiary, Southern Electric International, Inc. ("SEI"), 100 Ashford Center North, suite 400, Atlanta, Georgia 30338, have filed an application-declaration under section 6(a), 7, 9(a), 10, and 12(b) of the Act and rules 43 and 45 thereunder.

SEI proposes to issue and sell unsecured notes ("Notes") from time to time prior to March 31, 1992, in an aggregate principal amount not to exceed $20 million at any one time outstanding. It is proposed that the Notes may be issued and sold either to Southern or to a lender or lenders other than Southern. The Notes will have maturities of no later than December 31, 2000. It is anticipated that any Notes sold to a lender or lenders other than Southern may be guaranteed by Southern as to principal, premium, if any, and interest.

Notes sold to Southern will bear interest at a rate not to exceed the prime rate in effect on the date of issuance at a bank designated by Southern.

Notes sold to a lender or lenders other than Southern will bear interest at a rate not to exceed 2% over the prime rate at a bank designated by Southern. In connection with any sale to a lender or lenders other than Southern, a commitment fee may be paid not to exceed ½ of 1% of the principal amount of such Note.

It is further proposed that up to $20 million of the Notes issued to Southern may, at Southern's option, be converted to capital contributions to SEI through Southern's forgiveness of the debt represented thereby.

Proceeds from the issuance and sale of the Notes will be used by SEI to meet working capital requirements for SEI's consulting contracts related to its utility and technical services business consulting line, as defined, and certain administrative and general activities associated therewith. In addition, SEI requires working capital to pay SEI's associate companies for services they have provided through SEI to SEI's customers.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Announcement of Receipt of Proposed Restriction on Operations of Stage 2 Aircraft at Minneapolis-St. Paul International Airport in Minneapolis, MN

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) has been notified by the Metropolitan Airports Commission (MAC) that it proposes to cap and then prohibit nighttime operations by Stage 2 aircraft weighing over 75,000 pounds at Minneapolis-St. Paul International Airport (MSP). The proposed restriction would cap and then eliminate operations by Stage 2 aircraft between 11 p.m. and 6 a.m. CST or CDT at MSP. MAC has provided notice of the proposed restriction and an opportunity to comment to the public pursuant to the Airport Noise and Capacity Act of 1990 and 14 CFR 161.203.

EFFECTIVE DATE: In its notice, published on December 9, 1991, in the Star Tribune in Minneapolis, Minnesota and Pioneer Press in St. Paul, Minnesota, the Metropolitan Airports Commission indicated that the initial phase of the ordinance restricting operations to their Stage 2 baseline would take effect not earlier than 180 days from the date of publication of MAC's Notice. This date is June 6, 1992. The second phase, a ban on nighttime Stage 2 operations, would take effect on or after that date, as determined by the Commission.

FOR FURTHER INFORMATION CONTACT: Ms. Jennifer Unruh, Committee Secretary at:

Metropolitan Airports Commission, General Offices, 6040 28th Avenue South, Minneapolis, Minnesota 55450, (612) 726–8100.

Copies of the complete text of the proposed restriction and the supporting analysis may be obtained by phoning or

UMI

writing MAC. These documents are also available for public inspection at MAC's General Offices. Comments to MAC on the proposed restriction should be received by January 23, 1992, 45 days after the MAC publication date.

Issued in Des Plaines, Illinois, December 13, 1991.

W. Robert Billingsley,

Manager, Airports Division, Great Lakes Region.

BILLING CODE 4910-13-M

FEDERAL AVIATION ADMINISTRATION

Aviation Security Advisory Committee; Meetings

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of Aviation Security Advisory Subcommittee Meeting.

SUMMARY: Notice is hereby given of a meeting of the Security Operations Subcommittee of the Aviation Security Advisory Committee..

DATES: The meeting will be held January 7, 1992, from 9 a.m. to 4 p.m..

ADDRESSES: The meeting will be held in the MacCracken Room, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: The Office of the Assistant Administrator for Civil Aviation Security, ACS, 800 Independence Avenue, SW., Washington, DC 20591, telephone 202-267-9863.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. app. II), notice is hereby given of a meeting of the Security Operations Subcommittee of the Aviation Security Advisory Committee to be held January 7, 1992, in the MacCracken Room, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC..

The agenda for the meeting is a discussion on the carriage of weapons aboard aircraft. Attendance at the January 7, 1992 meeting is open to the public but limited to space available. Members of the public may address the committee only with the written permission of the chair, which should be arranged in advance. The chair may entertain public comment if, in its judgment, doing so will not disrupt the orderly progress of the meeting and will not be unfair to any other person. Members of the public are welcome to present written material to the committee at anytime.

Persons wishing to present statements or obtain information should contact the Office of the Assistant Administrator for Civil Aviation Security, 800 Independence Avenue, SW., Washington, DC 20591, telephone 202-267-9863.

Issued in Washington, DC on December 13, 1991.

O.K. Steele,

Assistant Administrator for Civil Aviation Security.

[FR Doc. 91-30433 Filed 12-19-91; 8:45 am]

BILLING CODE 4910-13-M

Federal Railroad Administration

Petition for a Waiver of Compliance

In accordance with 49 CFR 211.9 and 211.41, notice is hereby given that the Federal Railroad Administration (FRA) has received from South Branch Valley Railroad a request for waiver of complaince with a requirement of Federal power brake standards. The petition is described below, including the regulatory provisions involved, and the nature of the relief being requested.

South Branch Valley Railroad

(Waiver Petition Docket Number PB-91-5)

South Branch Valley Railroad (SBVR) seeks a permanent waiver of compliance with certain provisions of the Railroad Power Brakes and Drawbars Regulations (49 CFR part 232). SBVR is requesting that it be permitted to operate a non self-propelled crane without air brakes. The crane was build in 1952 with a straight air brake system only. There is no automatic air brake system on the crane but it does have a brake pipe extending from one end to the other. The carrier proposes to operate the crane in trains under the following conditions:

1. The crane would be operated with a locomotive at one end and an idler car with operating air brakes at the other end.
2. Maximum speed would be 10 mph.
3. The crane would not be interchanged to any other railroad.

The waiver would exclude the crane from the requirements of §§ 232.12 and 232.13 that each car have an operating air brake during the initial terminal road train air brake test and intermediate terminal train air brake test.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number (e.g., Waiver Petition Docket Number PB-91-5) and must be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590. Communications received before January 27, 1992, will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9 a.m.-5 p.m.) in room 8201, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590.

Issued in Washington, DC on December 12, 1991.

Grady C. Cothen, Jr.,

Associate Administrator for Safety.

BILLING CODE 4910-06-M

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

[Docket No. 91-1]

Exemptions Potentially Affected by Docket No. HM-181 on Performance Oriented Packaging Standards

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Notice to exemption holders.

SUMMARY: This notice advises DOT exemption holders to review their exemptions from specific requirements of the Hazardous Materials Regulations to determine whether their exemptions could be eliminated as a result of a final rule published in the **Federal Register** on December 21, 1990, and revisions thereto published as Part II elsewhere in this issue of the **Federal Register** entitled "Performance-Oriented Packaging Standards: Revisions and Responses to Petitions for Reconsideration."

FOR FURTHER INFORMATION CONTACT: J. Suzanne Hedgepeth, Office of Hazardous Materials Exemptions and Approvals, Research and Special Programs Administration, U.S. Department of Transportation, 400 Seventh Street, SW, Washington, DC 20590-0001, telephone (202) 366-4535 or Fax No. (202) 366-3753.

SUPPLEMENTARY INFORMATION: Numerous substantive amendments are contained in a final rule published under Docket HM-181 on December 21, 1990 (55 FR 52402) and revisions thereto published as part II elsewhere in this issue of the **Federal Register** entitled "Performance-Oriented Packaging Standards: Revisions and Responses to Petitions for Reconsideration." These changes include hazardous materials descriptions, classification criteria and new packaging requirements.

RSPA sent a notice to persons who hold exemptions, authorizing the use of non-bulk packagings, which are potentially affected by the performance-oriented packaging changes adopted under HM-181. RSPA anticipates the phase-out of exemption packagings no longer necessary due to performance-based standards of the final rule, and has advised exemption holders to reexamine the terms of their exemptions to determine whether they are still necessary. The notice follows:

Notice to Exemption Holders

Our records indicate that you are the holder of a DOT exemption potentially affected by a recent final rule.

On December 21, 1990, the Research and Special Programs Administration (RSPA) published a final rule in the **Federal Register** (55 FR 52402) under Docket HM-181 (herein referred to as "HM-181").

HM-181 makes significant changes to the Hazardous Materials Regulations (Title 49, Code of Federal Regulations, parts 170-180 or "HMR") with respect to hazardous materials descriptions, classification and packaging requirements.

Under HM-181, performance-oriented packaging standards based on United Nations (UN) standards will eventually replace non-bulk DOT packaging specifications. The final rule is effective October 1, 1991. Transitional provisions contained in this final rule generally permit the continued manufacture of non-bulk DOT specification packagings until October 1, 1994 and permit the continued use of these packagings until October 1, 1996. New packaging provisions for materials which are poisonous by inhalation are effective October 1, 1993.

The provisions of HM-181 eliminate the need for many current exemptions and will necessitate the modification of many others. Some exemption packagings partially or fully meet the newly-adopted UN performance standards. Manufacturing and marking them in accordance with HM-181 will eliminate the need for these exemptions. Other exemption packagings may not provide a level of safety equivalent to that provided under the provisions of HM-181 and, therefore, may not be eligible for continued use after HM-181 becomes effective. Other exemptions may require modification based on the new provisions.

We request that you carefully review both HM-181 and your exemption to determine if the exemption can be either terminated before its expiration date or not renewed upon expiration. Please notify RSPA's Office of Hazardous Materials Exemptions and Approvals (OHMEA) if the exemption can be terminated. In instances where you intend to apply for renewal, ensure that the application identifies any modifications necessitated by changes in HM-181 and adequately demonstrates that the modified exemption provides a level of safety equivalent to the new provisions [see 49 CFR 107.103(b)(9)].

OHMEA staff will be independently reviewing current exemptions and renewal applications and may, in some limited instances, notify exemption holders that an exemption will be considered for termination. The exemption holder will be given the opportunity to show cause why such action should not be taken. In general, exemptions would not be terminated prior to the effective dates contained in HM-181.

The changes embodied in HM-181 will appear in the 1991 edition of the HMR. Copies of Docket HM-181 may be purchased from the Government Printing Office.

Due to the diversity of the HM-181 amendments, other exemptions may also be affected. Therefore, all exemption holders are requested to reexamine the terms of their exemptions in view of the changes adopted under HM-181. Comments concerning an exemption should identify the exemption number and be submitted to RSPA's Office of Hazardous Materials Exemptions and Approvals.

Issued in Washington, DC on December 17, 1991.

Alan I. Roberts,

Associate Administrator for Hazardous Materials Safety.

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Agreement on Government Procurement, as Implemented by the Trade Agreements Act of 1979, as Amended; Notice of Value of Special Drawing Rights

AGENCY: Office of the United States Trade Representative.

ACTION: Under the authority delegated to the United States Trade Representative by sections 1-104 and 1-201 of Executive Order 12260, I hereby determine that effective on January 1, 1992, the dollar equivalent of 130,000 Special Drawing Right units as referred to in the Agreement on Government Procurement and section 1-104 of Executive Order 12260, and as most recently modified by USTR determination on January 1, 1990 (55 FR 185), is $176,000.00. The $172,000 amount announced effective January 1, 1990, remains in effect through December 31, 1991

This determination may be modified as appropriate.

FOR FURTHER INFORMATION CONTACT: Beverly Fuortes, Director for Government Procurement, Office of the United States Trade Representative (USTR), 600 17th Street, NW., Washington, DC 20506 (202) 395-3063.

DEPARTMENT OF JUSTICE

UNITED STATES PAROLE COMMISSION

Public Announcement

Pursuant To The Government In the Sunshine Act

(Public Law 94–409) [5 U.S.C. Section 552b]

DATE AND TIME: Thursday, December 12, 1991, 3:00 p.m., Eastern Daylight Time.

PLACE: 5550 Friendship Boulevard, Chevy Chase, Maryland, 20815.

STATUS: Closed—Meeting.

MATTER CONSIDERED: Appeal to the Commission involving one case decided by the National Commissioners pursuant to a reference under 28 CFR Section 2.17. This case was originally heard by an examiner panel wherein inmates of Federal prisons have applied for parole or are contesting revocation of parole or mandatory release. This was an emergency meeting pursuant to a court order which required immediate consideration by the Commission.

AGENCY CONTACT: Jeffrey Kostbar, Case Analyst, National Appeals Board, United States Parole Commission, (301) 492–5958.

Dated: December 16, 1991.

Michael A. Stover,

General Counsel, U.S. Parole Commission.

DEPARTMENT OF JUSTICE

UNITED STATES PAROLE COMMISSION

Record of Vote

(Public Law 94–409) (5 U.S.C. Sec. 552b)

I, Carol Pavilack Getty, Chairman of the United States Parole Commission, presided at a meeting of said Commission which started at three o'clock p.m. on Thursday, December 12, 1991 at the Commission's Central Office, 5550 Friendship Boulevard, Chevy Chase, Maryland 20815. The purpose of this meeting was an appeal to the Commission involving a case decided by the National Commissioners pursuant to a reference under 28 CFR Section 2.17. This is an emergency meeting pursuant to a court order which required immediate consideration by the Commission. In addition, four Commissioners were present constituting a quorum when a vote to close the meeting was submitted.

Upon motion duly made, seconded, and carried, the following Commissioners voted that Commission business required immediate consideration of the matters discussed and that the meeting be closed: Carol Pavilack Getty, Jasper Clay, Jr., Vincent Fechtel, Jr., and Victor M.F. Reyes.

IN WITNESS WHEREOF, I make this official record of the vote taken for immediate consideration of the matters discussed at the meeting and authorize this record to be made available to the public.

Dated: December 17, 1991.

Performance-Oriented Packaging Standards; Revisions and Response to Petitions for Reconsideration

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Final rule; revisions and response to petitions for reconsideration.

SUMMARY: This amendment makes revisions to a final rule published in the Federal Register under Dockets HM–181, HM–181A, HM–181B, HM–181C, HM–181D and HM–204 (55 FR 52402, December 21, 1990). That final rule comprehensively revised the Hazardous Materials Regulations (HMR; 49 CFR parts 171–180) with respect to hazard communication, classification and packaging requirements. The changes were based on the United Nations Recommendations on the Transport of Dangerous Goods (UN Recommendations) and RSPA's own initiative. This amendment also addresses a petition for reconsideration to Docket HM–142A, which was incorporated into Docket HM–181 under a final rule issued September 18, 1991 (56 FR 47158).

The intended effect of the final rules published under Docket Nos. HM–181, HM–181A, HM–181B, HM–181C, HM–181D, HM–142A, and HM–204 is to: (1) Simplify and reduce the volume of the HMR; (2) enhance safety through better classification and packaging; (3) promote flexibility and technological innovation in packaging; (4) reduce the need for exemptions from the HMR; and (5) facilitate international commerce. The revisions contained in this document are primarily in response to petitions for reconsideration received to the final rule. This final rule also makes editorial and technical corrections to the December 21, 1990 final rule, to the January 3, 1991 final rule under HM–142A, and to the 1990 49 CFR parts 106–180.

DATES: *Effective:* October 1, 1991. Because the amendments adopted herein clarify and correct certain provisions of the final rule and impose no new regulatory burden on any person, notice and public procedure are unnecessary and these amendments may be made effective without the customary 30 day delay following publication.

Applicability: The incorporation by reference of certain publications listed in these amendments is approved by the Director of the **Federal Register** as of October 1, 1991. Because of the transition period provisions in 49 CFR 171.14, the provisions of § 172.101(l)(1)(ii), which allow up to one year after a change in the Hazardous Materials Table (HMT) to use up stocks of preprinted shipping papers and to ship packages that were marked prior to the change, do not apply to these amendments.

FOR FURTHER INFORMATION CONTACT: Delmer Billings, telephone (202) 366–4488, Office of Hazardous Materials Standards, or Charles Hochman, telephone (202) 366–4545, Office of Hazardous Materials Technology, Research and Special Programs Administration, U.S. Department of Transportation, 400 Seventh Street SW., Washington, DC 20590–0001.

SUPPLEMENTARY INFORMATION:

Background

On December 21, 1990 (55 FR 52402), the Research and Special Programs Administration (RSPA) published a final rule under Docket HM–181 which comprehensively revised the HMR (49 CFR parts 171 to 180) with respect to hazard communication, classification, and packaging requirements based on the UN Recommendations. Because of the complexity of the final rule, RSPA extended to 90 days the period for receiving petitions for reconsideration to allow persons affected by the final rule sufficient time to submit petitions. Revised transition period requirements in § 171.14 were published in a separate rulemaking issued on September 18, 1991 (56 FR 47158) to give persons subject to the HMR more time to comply with the revised final rule.

This corrections document incorporates editorial and substantive revisions to the final rule based on careful review of over 250 petitions for reconsideration received by RSPA. It also includes a number of amendments that RSPA has determined are necessary to correct or clarify the final rule. Because the amendments adopted herein clarify and correct certain provisions of the final rule, relieve certain restrictions in those regulations, and impose no new regulatory burden on any person, notice and public procedure are unnecessary and these amendments may be made effective without the customary 30 day delay following publication.

Petitions Received

Numerous petitions recommended revisions to: (1) The transition period in § 171.14 for converting to the new system (these petitions were addressed in the September 18, 1991 revised final rule); (2) the package reuse provisions in § 173.28; (3) non-bulk packaging of liquids poisonous by inhalation in §§ 173.226 and 173.227; (4) generic non-bulk packaging in §§ 173.201–204 and §§ 173.211–213; (5) bulk generic packaging in §§ 173.240–245; (6) segregation of materials by highway carriers in § 177.848; (7) manufacturer package certification and notification requirements in § 178.2; (8) package certification marking requirements in § 178.503; (9) general testing requirements in § 178.601; and (10) alternatives to the leakproofness test in Appendix B to Part 178. The following are RSPA's decisions on those issues that were of most interest to petitioners. A thorough discussion of these issues and all other topics addressed by petitioners can be found in the section-by-section review of this preamble.

Petitions Granted

1. The leakproofness test before reuse required in § 173.28 is adjusted to allow lower test pressures for packagings containing Packing Group II and III materials. To facilitate compliance with this section, RSPA also is requiring new drums intended for reuse to bear permanent thickness marks expressed in millimeters. Requirements for permanent package certification markings appear in § 178.503.

2. Clearer definitions for gases and liquids poisonous by inhalation are added to §§ 171.8, 173.115 and 173.132, for regulatory consistency and to provide better criteria for identifying these materials which are subject to the more stringent hazard communications and packaging requirements in the final rule.

3. Bulk packaging authorizations for materials poisonous by inhalation are restructured for clarity and regulatory consistency.

4. Use of DOT 57 portable tanks is authorized for most Class 3 (flammable liquids) and Class 8 (corrosive) materials. However, prohibitions on the use of this packaging will remain in effect for materials poisonous by inhalation, certain multiple hazard materials and Packing Group I materials.

5. The 25 gram limitation on Division 1.4 materials is eliminated in § 173.50.

6. Selective package testing variations in § 178.601 are broadened to permit, without further design qualification testing, design changes to the exterior dimensions and closure devices of single and composite packagings. Changes are also permitted in the dimensions of outer packagings of combination packagings.

7. Drum leakproofness qualification and production test procedures are expanded to include the alternatives listed in Appendix B to Part 178. The so-called "T-zone" test (solution over part of the seams) is permitted as a production test.

8. Requirements pertaining to infectious substances are revised to specify more appropriate requirements for medical wastes.

Petitions Denied

1. RSPA is denying petitions to change defining criteria for Class 3 liquids and to remove the combustible class definition in § 173.120 and the combustible liquid reclassification option in §§ 173.120 and 173.150.

2. Petitions to relax hazard communications and packaging requirements for materials poisonous by inhalation are denied.

3. Petitions asking RSPA to allow certain materials now assigned packagings required to meet Packing Group III performance level tests, to continue being shipped in non-specification packagings, are denied.

4. RSPA is retaining the basic shipper requirements for assuring package integrity prior to being offered for transportation, including the vibration test standard as a capability specified for all packagings in § 173.24a(a)(5) and the "no identifiable release (without the use of instruments)" criterion in § 173.24(b)(1).

5. The "EX" marking requirements in § 172.320 for Class 1 materials are retained, but additional alternatives are provided.

Several petitioners addressed issues raised in the preamble to Docket HM–181 that are not a part of this rulemaking. The Hazardous Materials Advisory Council (HMAC) suggested improvements pertaining to public input into international regulatory procedures such as more extensive outreach through RSPA's Hazardous Materials Information Exchange (HMIX) service to persons having access to personal computers with modems. This effort is already underway. RSPA's computer bulletin board already contains substantial information about planned meetings on international issues, digests of all UN papers, corrections to the final rule, and other information. HMIX can be accessed by calling 1–800–PLANFOR (in Illinois, call 1–800–367–9592).

One petitioner asked RSPA to clarify when a Competent Authority Approval Certificate is necessary. The petitioner asked if a certificate is required when the HMR already authorizes something for which an international regulation requires Competent Authority approval. For example, under the International Maritime Organization (IMO) International Maritime Dangerous Goods (IMDG) Code, the use of open head drums for Packing Group II and III flammable liquids is only allowed when authorized by the Competent Authority. In these situations, the provisions in the HMR constitute the authorization of the Competent Authority and no further documentation is required.

Except as adopted herein, all petitions for reconsideration received by RSPA regarding issues addressed by the final rule published on December 21, 1990, or the final rule published on January 3, 1991 (Docket HM–142A) are hereby denied. Any subsequent submission regarding issues relating to this rulemaking must be filed as petitions for rulemaking in conformance with 49 CFR 106.31. RSPA anticipates one or more additional notices to address deficiencies in the new requirements, as they are identified. Rulemaking action is also forthcoming concerning intermediate bulk containers (IBCs).

Docket HM–189

This amendment also makes revisions to the 1990 49 CFR parts 107–179. In the past, these amendments have been published in an annual final rule under Docket HM–189 to correct editorial errors and make minor regulatory changes to the HMR. However, because of major revisions to the HMR which occurred in the December 21, 1990 final rule under Docket HM–181, RSPA has decided to incorporate the HM–189 revisions into this final rule.

Section-by-Section Review

This section-by-section review addresses only significant changes. Examples of non-significant changes which are not specifically discussed in the review include: grammatical and typographical errors; changes in reference citations; paragraph redesignations; and minor revisions to enhance clarity and consistency.

Part 107: Hazardous Materials Program Procedures

Section 107.215. This section outlines procedures for filing an application for a waiver of preemption, and paragraphs (b)(6) through (b)(8) are revised to include "Indian tribe" as well as State and political subdivisions for consistency with the final rule published February 28, 1991 under Docket HM–207.

Subpart G, OMB Control Numbers Under the Paperwork Reduction Act, is removed. The provisions of §§ 107.601 and 107.603 are consolidated and now appear as § 171.6. Section 171.6, which sets forth units of measure, is moved to § 171.10. The provisions in § 171.10, which addressed hazardous materials in bulk on board vessels or barges, are removed as they are duplicated in Part 176.

Part 171: General Information, Regulations and Definitions

Section 171.4. This section is removed and reserved.

Section 171.5. This section is removed and reserved.

Section 171.6. This section, which addressed units of measure, is moved to § 171.10. Former subpart G of part 107, which sets forth OMB control numbers, is added in its place.

Section 171.7. Editorial corrections.

Section 171.8. RSPA is adding new definitions for "Hazard zone," "Material poisonous by inhalation," and "State."

The following definitions are revised: "Bulk packaging," "Cryogenic liquid," "Infectious substance (etiologic agent)," "Inner receptacle," "Irritating material," "Maximum net mass,", "Non-bulk packaging," "Packaging,", "Person,", "Technical name," and "United States."

RSPA is removing the following definitions: "Etiologic or infectious substances," "IM Tank Table," "Magnetic materials," "Manufacturer," "Net weight, net mass or net quantity," and "Oxidizer or oxidizing material."

RSPA is adding the definitions for "Hazard zone" and "Material poisonous by inhalation" in the appropriate sequence in § 171.8. Hazard zones determine how materials posing an inhalation-hazard in transportation are described, marked on packages, labeled, placarded and packaged. Materials poisonous by inhalation are defined as a gas meeting the defining criteria in § 173.115(c) and assigned Hazard Zones A, B, C or D in accordance with § 173.116(a), and a liquid meeting the defining criteria in § 173.132(a)(1)(iii) and assigned to Hazard Zone A or B in accordance with § 173.133(a); or any material identified as an inhalation hazard by a special provision in Column 7 of the § 172.101 Table.

Two petitioners recommended that RSPA define "capacity" or "rated capacity" and "total capacity" in § 171.8. For consistency with the UN

VOL 56 ISS 245 DEC 20 1991 UMI

Recommendations and throughout Docket HM–181, RSPA is using the terms "maximum net mass" and "maximum capacity." Therefore, the recommended definitions are not needed. The definition for "maximum net mass" in § 171.8 is revised. "Maximum capacity" is sufficiently descriptive to not warrant a definition.

Another petitioner suggested that the definition for "maximum net mass" and the definition for "net weight, net mass or net quantity" are duplicative, indicating that "net mass" and "maximum net mass" are the same. RSPA agrees. Therefore, for clarification, the definition "Net weight, Net mass, or Net quantity" is removed.

Several petitioners recommended that the definition of "packaging" be revised. One petitioner stated that the first sentence should read: "Packaging means a receptacle which may require an outer packaging * * *" The petitioner stated that the "definition as written does not account for the fact that large articles without their means of initiation, or with their means of initiation containing at least two effective protective features may be carried unpackaged as authorized by item number 49 in the UN Table of Particular Packaging Requirements or Exceptions. Another petitioner stated that "packaging" as defined in § 171.8 is limited to composite or combination packagings and should be revised to refer to all types of packagings, such as cargo tanks and portable tanks. RSPA disagrees, believing there is no need to expand the generic definition of "packaging" to account for the specific functions of "outer packaging." However, consistent with UN Recommendations, RSPA is revising the term "packaging" to mean any components or materials necessary for a "receptacle" to perform its containment function and thus is removing the phrase "which require an outer packaging." The definition as revised is equally applicable to bulk and non-bulk packagings.

The definition of "technical name" is revised to include (under certain conditions) authorized generic microbiological descriptions for use as technical names for "infectious substances" (etiologic agents) shipped to laboratories for testing and analyses, provided they readily identify the general microbiological group.

A definition of "State" is added and the definitions of "person" and "United States" are revised for consistency with § 107.3, as revised in a final rule published under Docket HM–207 on February 28, 1991 (56 FR 6616).

Responsibility associated with the functions of certifying that a packaging complies with subparts L and M of part 178 has been restated and more fully established in § 178.2. In that section, "the person" is the legal entity recognized as responsible for package certification, and the reference to "manufacturer" has been removed. Therefore, RSPA is removing the definition of "manufacturer" in § 171.8. Petitions requesting a new definition of "manufacturer" are discussed in the § 178.2 section review.

Section 171.10. The provisions addressing hazardous materials in bulk on board vessels or barges are removed, as these requirements are contained in § 176.5(d). The requirements addressing units of measure, formerly found in § 171.6, are moved to this section. Numerous petitioners were concerned that RSPA was requiring use of metric units of measurements to indicate total quantities on shipping papers. RSPA adopted metric (or SI units) as the regulatory standard to harmonize with international requirements and in conjunction with DOT's policy to implement the metric system. In the final rule, metric units are indicated for such standards as required construction material thicknesses, size of package markings, label and placard specifications, and package capacities. There is no requirement in § 172.202 that the total quantity of a material be indicated in metric units on shipping papers.

RSPA agrees with recommendations from several petitioners to revise paragraph (c)(2) by adding the following conversion factors for pressure in the Table of Conversion Factors For SI Units: "1 Bar=100 kPa=14.5 psi" and "1 kPa=7.5 mm HG." RSPA is further revising the table by removing references to exponential values indicated by the letter "E" in columns two and three. Suggestions from two petitioners to add a measurement equivalence table identical to that in the International Civil Aviation Organization (ICAO) Technical Instructions because "there are circumstances where an 'exact' conversion of SI units is needed" are not accepted, in the interest of timeliness. Adjustments to the Table of Conversion Factors may be addressed in future rulemaking actions.

Section 171.11. RSPA is revising this section to clarify requirements pertaining to import/export air shipments of materials poisonous by inhalation. References to Division 2.3 and Division 6.1, Packing Group I, materials in paragraph (c) are removed. Paragraph (d)(9) is revised to remove the reference to § 173.3a and require all materials poisonous by inhalation, as defined in § 171.8, to be described, marked and packaged in accordance with the provisions of the final rule. The effect of these changes is to permit materials poisonous by inhalation to be transported under provisions of the ICAO Technical Instructions, subject to certain restrictions. Paragraph (d)(12) is added to clarify that ammonium nitrate fertilizer and ammonium nitrate mixed fertilizer may be transported only if they do not meet the definition for Class 1 (explosive) material.

Section 171.12. Paragraph (b) is reorganized for ease of reference and clarity. One petitioner objected to the changes to this section stating that import shipments stored temporarily in warehouses and then shipped to a final U.S. destination are not addressed by the final rule and that in failing to address incidental storage, shipments which are incidentally stored would have to be brought into full compliance with all of the relevant requirements in the HMR. The petitioner noted that this may present a conflict with the Trade Agreements Act of 1979. RSPA disagrees. The revised provisions of § 171.12(b) still permit shipments from warehouses in the U.S. to the end user in the U.S., under IMDG Code provisions, as long as the initial leg of the shipment, such as from a foreign port to the U.S. warehouse, conformed to IMDG Code provisions.

HMAC recommended that § 171.12(b) specify that shipments made in accordance with the IMDG Code be "certified" in accordance with the Code. This would be consistent with the similar requirement authorizing shipment in accordance with the ICAO Technical Instructions (see § 171.11(a)). RSPA agrees and has revised § 171.12(b) to indicate that a shipment must also be certified in accordance with the IMDG Code.

RSPA is granting HMAC's petition to clarify that IMDG Code descriptions and markings are permitted for materials subject to the IMDG Code, but not subject to DOT requirements, by adding the following sentence to paragraph (b)(3) (herein redesignated as (b)(2)): "However, these materials may be transported in the United States described, marked and labelled in accordance with the IMDG Code."

A petition recommending a revision to paragraph (b)(2), (redesignated as (b)(5)), excepting intermediate bulk containers (IBCs) authorized by the UN from bulk packaging requirements in Docket HM–181, is denied. Until RSPA acts to include IBCs in the HMR, these packagings will continue to be required to conform to existing regulatory

provisions in the HMR. It was pointed out that the text in § 171.12(b)(2) could mistakenly be taken to mean that shippers were being excluded from compliance with all requirements of the IMDG Code applying to bulk shipments. RSPA disagrees. Only the packaging requirements of the HMR are applicable. Hazard communication, stowage, and other requirements may conform to IMDG Code provisions, subject to other § 171.12 restrictions.

A new paragraph (b)(6) is added clarifying that export shipments must conform to the general packaging requirements in §§ 173.24, 173.24a, and 173.28, in addition to any applicable specification requirements, for U.S.-manufactured packagings. Unless packages are emptied and refilled for export, imported foreign-manufactured packagings are not subject to these requirements.

Paragraph (b)(4)(iii) (redesignated as (b)(8)) is revised to permit materials poisonous by inhalation to be transported under IMDG Code provisions, subject to restrictions on packaging and hazard communication.

One petitioner noted that paragraph (b)(4)(iv) (redesignated as (b)(9)), prohibiting Class 7 materials from being shipped under the IMDG Code, is inconsistent with paragraph (d) authorizing use of International Atomic Energy Agency (IAEA) requirements. RSPA is revising paragraph (b)(9) to clarify that Class 7 materials may be shipped under the IAEA provisions of paragraph (d).

In response to a HMAC petition, RSPA is adding a requirement in new paragraph (b)(13), consistent with requirements in § 172.203(j), that the words "Dangerous When Wet" appear on shipping papers for Division 4.3 materials. RSPA is adding a new paragraph (b)(15) to clarify that cylinders not manufactured to DOT specifications must conform to the requirements of §§ 173.301(i) and 173.301(j).

Two petitioners pointed out that paragraph (b) does not include emergency response information requirements in Subpart C of Part 172 but that paragraph (c) does. This oversight is corrected in new paragraph (b)(16). In addition, RSPA is revising paragraph (c) to clarify that the emergency telephone number requirement in § 172.201(d) does not apply to shipments made under the IMDG Code if hazardous materials are not offloaded from a vessel or are offloaded between vessels at a port facility without being transported over a public highway. Several petitioners noted regulatory inconsistencies involving permitted "port area" transport of bulk shipments only under the IMDG Code in § 171.12(b) and (c) and exceptions to vessel requirements in § 176.11. They said § 171.12(c) "seems to allow" transportation of both bulk and non-bulk packagings in compliance with the IMDG Code "in port areas." However, the petitioners added, § 171.12(c) also references part 176 which in § 176.11 allows shipments in compliance with the IMDG Code subject to the limits in § 171.12(b). The petitioners stated that "This effectively prohibits the shipment or receipt, or movement, through a port area of any bulk container which complies only with IMDG." RSPA agrees and is modifying the reference to part 176 in § 171.12(c) so that only "the applicable operational requirements in part 176 that are not addressed in the IMDG Code" apply. The exception indicating when compliance with § 172.201(c) is not required is included in § 171.12(c) and is deleted from § 176.11(a). The reference to § 176.11 is deleted.

Section 171.12a. Several petitioners viewed the provisions in this section as a significant reduction in the acceptance of hazardous materials shipped in accordance with Canadian regulations. One petitioner remarked that, "unlike the current wording of paragraph (d), the final rule does not permit the use of Canadian packagings for the shipment or reshipment of hazardous materials within the US." For example, paragraph (a) as revised in the final rule would prohibit the reshipment of monoethanolamine in a Canadian Transport Commission (CTC)–17E drum from a U.S. warehouse to a U.S. customer because the CTC specifications are not contained in the Canadian Transport of Dangerous Goods (TDG) Regulations. It was also pointed out that standards for portable tanks and tank cars are also presently not contained in the TDG Regulations. The petitioner also asserted that paragraph (b)(13), authorizing only UN certified packagings when required, further restricts use of Canadian packaging.

It should be noted that provisions in § 171.12a are also subject to the transition period requirements in § 171.14. Therefore, Canadian non-bulk packagings which were authorized for use in the United States under § 171.12a as effective prior to October 1, 1991, would still be authorized until October 1, 1996. It is anticipated that, prior to the effective dates of the various provisions for packagings, Canada will have incorporated CTC packaging, portable tank and tank car specifications into the TDG Regulations. RSPA specifically drafted § 171.12a(b)(13) in the manner it appears in the final rule because it appears that Canada may authorize certain non-bulk specification packagings indefinitely, even though those packagings have been replaced with UN performance standards in the U.S. Accepting these packagings indefinitely would be contrary to RSPA's efforts to convert to performance-based requirements for non-bulk packagings. Accordingly, paragraph (b)(13) is revised to clarify that when specification packaging is required by the HMR, TDG-authorized packagings can be used in the U.S. only if they correspond to DOT specifications or UN standards. In addition, paragraph (b)(13) is revised to clarify that cylinders not manufactured to DOT specifications must conform to the requirements of § 173.301(i) and (j).

The Association of American Railroads (AAR) objected to paragraph (b)(4) addressing U.S. requirements for Class 1 explosives. Prior to Docket HM–181, AAR said, "markings of packages containing Class 1 materials in accordance with TDG regulations were acceptable in the U.S. There is no reason to depart from this practice, in effect, requiring Canadian shippers and carriers to incur the cost of placing EX numbers on packages containing new explosives at the U.S./Canadian border." AAR also contended that Subpart C only required approval of "new" explosives and therefore only new Canadian explosives being imported into the United States required approval. RSPA has substantially revised § 172.320 (marking requirements for explosive materials) in response to this and other comments. The complete discussion of these comments is made in association with § 172.320. These changes significantly reduce the impact of § 171.12a(b)(4). RSPA does not agree with AAR contention that approval of only "new" Canadian explosives imported into the United States are subject to the approval process in Subpart C. All Canadian explosives imported into the United States have been, and continue to be, subject to these requirements.

AAR also opposed requirements in paragraph (b)(5) that shipments from Canada of Division 2.3, 2.4 and 6.1 PG I materials must be described and packaged in accordance with Docket HM–181 requirements. RSPA is revising paragraph (b)(5) to permit materials poisonous by inhalation, as defined in § 171.8, to be transported under provisions of the TDG Regulations, subject to HMR packaging requirements and certain hazard communication

VOL 56 ISS 245 DEC 20 1991 UMI

requirements. In some instances, dual marking, labeling and placarding may be necessary to satisfy both sets of regulations. This will facilitate the transborder shipments, while ensuring an acceptable level of safety in transporting these extremely hazardous materials.

Section 171.14. This section was revised in a September 18, 1991 final rule, and further amended in an October 1, 1991 final rule. The section is republished in this amendment for readers' convenience.

Part 172: Hazardous Materials Table, Special Provisions, Hazardous Materials Communications Requirements and Emergency Response Information Requirements

1. Hazardous Materials Table and Special Provisions

Section 172.101: The Hazardous Materials Table (The Table). Numerous petitioners suggested changes to the Table, both substantive and editorial. Those petitions of substantive concern are discussed below. Those petitions that correctly pointed out editorial errors and errors of omission are not discussed below but the regulatory text has been corrected as requested.

Several petitioners requested that "Lead sulfide" be deleted from the Table. The petitioners pointed out that lead sulfide is only regulated as a hazardous substance and should be shipped under the shipping name "Environmentally hazardous substance" or "other regulated material." RSPA concurs with these petitioners and has revised the Table accordingly.

A petitioner requested that a special provision similar to Special Provision A2 in ICAO, be added to the HMR and be placed in the entry for UN0059. Special Provision A2 in ICAO is a method by which products that are otherwise forbidden for transportation by aircraft may be transported by aircraft when approved by the competent authority of the country of origin. RSPA is denying this petition as outside the scope of this rulemaking. An approval provision, as envisioned by the petitioner, to replace existing provisions for applying for exemptions was not proposed nor adopted in the final rule.

One petitioner requested that "propellent, explosive solid, NA024" be allowed to be transported via air freight. RSPA agrees that this material is suitable for transport aboard cargo only aircraft and is revising Column 9B of the Table entry for NA0274 to read "5 kg".

Several petitioners requested that materials listed as a specific proper shipping name in the Table under Class 3, be allowed to be continued to be transported under that specific name when the flash point of the material is in the combustible liquid range. Petitioners pointed out that RSPA allows this for products that are reclassified as a combustible liquid in accordance with § 173.50(f). RSPA concurs with these petitioners and has amended § 172.101(d)(4) to allow materials that meet the definition of combustible liquid to be shipped under the specific proper shipping name that is specified for the Class 3 material.

Several petitioners requested that the entry "Ammonium nitrate, Division 1.1D, UN0222," be removed from the Table. Petitioners stated that this entry could lead to confusion in their industry. RSPA disagrees and denies these petitions. This entry has appeared in the § 172.102 Table for numerous years without causing any confusion. In the final rule, based on comments to the NPRM under docket HM–181, UN0233 was removed from the Table because it was RSPA's opinion that no fertilizer should meet the definition of Class 1. The entry under UN0222 does not include fertilizers and, therefore, should be listed in the Table.

Several petitioners requested that the classification of a particular product be revised, that an additional packing group be added, or that a subsidiary label be added or deleted. Except for materials poisonous by inhalation, the classification of products under Docket HM–181 is in accordance with Revision 6 of the UN Recommendations. Persons taking issue with any of these classifications may petition RSPA to revise the UN classification. This petition should include a UN data sheet as shown in Chapter 1, figure 1.1 of the UN Recommendations and any other information which would justify a change in classification.

Several petitioners requested that Special Provision B1 be added to all Class 3, Packing Group III materials. B1 reads, "[i]f the material has a flash point at or above 38 °C (100 °F) and below 93 °C (200 °F), then the bulk packaging requirements of § 173.241 of this subchapter are applicable. If the material has a flash point of less than 38 °C (100 °F), then the bulk packaging requirements of § 173.242 of this subchapter are applicable." RSPA agrees that this special provision should be applied to every Class 3, Packing Group III material, and has revised the Table accordingly.

A petitioner requested that Special Provision B32 be applied to "Hydrocyanic acid, aqueous solutions not more than 20% hydrocyanic acid, UN1613". The petitioner pointed out that this material is a Hazard Zone B poisonous by inhalation hazard material and that all Hazard Zone B materials had B32. Special Provision B32 has not been applied to this entry because RSPA did not want to authorize this material in cargo tanks or portable tanks. However, the final rule authorized any packaging specified in § 173.244, which includes cargo tanks and portable tanks. Therefore, RSPA is denying the petitioner's request to add Special Provision B32 to UN1613 and is instead adding a new Special Provision B82 which states that cargo tanks and portable tanks are not authorized for the material.

Several petitioners requested that the bulk packaging sections for "Corrosive liquid, n.o.s.—Packing Groups I and III—be revised to read §§ 173.243 and 173.241, respectively, instead of §§ 173.242 and 173.240. RSPA agrees and these entries are revised in the Table accordingly.

Under the final rule, RSPA published seven entries for ammonium nitrate fertilizer (ANF). One of these entries, NA1942, stated that the material must meet the definition in The Fertilizer Institute (TFI) "Definition and Test Procedures for Ammonium Nitrate Fertilizer." The TFI publication was a method to assure that no ANF that meets the definition of a Class 1 material is shipped under one of the ANF shipping descriptions. It was RSPA's intention that an ANF that meets the definition of a Class 1 material should not be shipped under one of the ANF shipping descriptions. However, persons offering an ANF for transportation would be able to bypass this requirement by offering the materials under one of the other ANF shipping descriptions. In addition, RSPA believes that five of the ANF shipping descriptions in the UN Recommendations are confusing and very difficult to use. Therefore, RSPA is removing six of these entries—the Class 9 entry is being retained—and is adding two generic ANF entries. In addition, both of these entries will have a special provision that states that the material must not meet the definition of a Class 1 material. Also, RSPA is revising §§ 171.11, 171.12, and 171.12a to state that an ANF must not meet the definition of a Class 1 material.

Several petitions were received related to the authorizations of IM portable tanks. Petitions were received that requested different IM tanks or the inclusion of an IM Tank as an authorized packaging. The IM tank authorizations in the final rule were based on the UN Recommendations. The IM tank authorizations of the IMDG Code were not considered in the final rule. Therefore, if the UN Recommendations specified a different tank than the IMDG Code, the tank authorized was based on the UN Recommendations, not the IMDG Code.

In addition, for materials poisonous by inhalation, RSPA specified higher integrity tanks than authorized by the UN Recommendations or the IMDG Code. In general, the IM tank authorized for a material poisonous by inhalation is an insulated IM 101 tank with no bottom outlets, a test pressure of 9 bars and with a minimum thickness of either 6.35 mm or 7.62 mm. Considering the hazards posed by materials poisonous by inhalation in transportation, RSPA believes that these are the minimal standards that should be applied to IM portable tanks that transport them.

Based on extensive petitions, RSPA is making numerous changes to the IM tanks that are authorized for hazardous materials that are not poisonous by inhalation. In addition, RSPA is modifying §§ 173.240 and 173.241 to clarify that the IM tanks that are authorized in those sections may be limited by the special provision column of the Table.

RSPA is clarifying that materials that are transported in IM portable tanks in a molten state, must be transported in insulated tanks. This is done by removing the requirement from specific entries in the Table (e.g., T38) and moving the requirement to § 173.32c. Therefore, the requirement applies to all materials transported in IM portable tanks in a molten state.

IM Tank Interim Approvals: Through this **Federal Register** publication, RSPA is revoking the IM portable tank authorizations of the IM tank table and the interim approvals that were issued by RSPA for IM portable tank authorizations. This revocation is effective October 1, 1993, for materials poisonous by inhalation and October 1, 1996, for all other hazardous materials. This revocation of the IM tank authorizations is being done because IM portable tanks are now authorized through the Table and certain specific bulk packaging sections.

One petitioner requested that the alternative proper shipping name "Toluenediamine" be added as an alternative to the proper shipping name "2,4-Toluylenediamine." The petitioner pointed out that this is how the shipping name previously appeared in the Table and that it appears in the List of Hazardous Substances in the appendix to § 172.101. RSPA believes that the alternative spelling of the name "toluenediamine" should be allowed and has revised the table to allow this alternative spelling. RSPA further believes that, when appropriate, use of either the proper shipping name "2,4-toluenediamine" or "2,4-toluylenediamine" would identify the name of the hazardous substance "toluenediamine" and such a proper shipping name would not be subject to the requirements of § 172.203(c)(1).

RSPA received numerous petitions for reconsideration regarding intermediate bulk containers (IBCs), specifically DOT Specification 57 portable tanks. Under Docket HM–181, RSPA did not implement provisions for the IBCs discussed in the UN Recommendations (chapter 16) and the 25th Amendment of the IMDG Code (chapter 26). RSPA will address design requirements, including testing and commodity authorizations, for all types of IBCs currently addressed by the UN and the IMO in a future rulemaking action. However, due to an oversight by RSPA, the commodity authorizations in Docket HM–181 for DOT Specification 57 portable tanks were more restrictive than intended, and this error is corrected.

Under Docket HM–181, it was RSPA's intention to generally allow the use of DOT Specification 57 portable tanks for those Class 3 (flammable liquids) and Class 8 (corrosive materials) commodities that are currently authorized in the HMR and that are (1) not in Packing Group I; (2) not poisonous by inhalation; and (3) do not meet another hazard class except Class 9, combustible liquid or Class 3—Packing Group III. However, a number of commodities meeting these conditions were assigned Special Provision B2 or B4 which forbids the use of DOT Specification 57 portable tanks. In this correction document, RSPA is amending B2 and B4 to remove the prohibition from using DOT Specification 57 portable tanks. For Packing Group I or dual hazard materials, RSPA has added Special Provision B3 or B10, which continue the prohibition of using certain cargo tanks, tank cars and DOT Specification 57 portable tanks.

Several petitioners requested that the numerical designations of commonly used refrigerants be allowed as part of the proper shipping name, as currently allowed under the HMR. The petitioners pointed out that RSPA recognized the acceptability of these codes under Docket HM–166H when it adopted the numerical designations. RSPA agrees and the numerical designations are added in italics to the appropriate entries in the Table, which means that they are allowed but not required to be part of the proper shipping name.

Several petitions were received regarding the classification of certain materials poisonous by inhalation. A few of these petitions did not provide any data. In the absence of new data, RSPA continues to rely on the data it has which shows these materials to be poisonous by inhalation. Other petitioners provided sufficient data to show that "Dimethyl thiophosphoryl chloride," "Nitrogen trifluoride," "Isophorone diisocyanate," "Dichlorodifluoromethane and ethylene oxide mixtures with not more than 12% ethylene oxide," and "Sulfuric acid, containing less than 30% free sulfuric acid" are not materials poisonous by inhalation and RSPA is amending the Table accordingly.

One petitioner provided data that showed that "sulfuryl chloride" is a material poisonous by inhalation and RSPA is amending the Table accordingly. Several petitioners provided data that showed that some materials are not poisonous by inhalation at certain percentages. For those materials, RSPA is revising certain entries in the Table to indicate that if these materials are poisonous by inhalation then they shall be shipped under a generic poisonous by inhalation shipping description; otherwise, these materials are not required to be shipped as poisonous by inhalation. These materials include "Chloroformates n.o.s.," "Carbon dioxide and ethylene mixtures with greater than 6% ethylene oxide," "Diborane mixtures," and "Carbon monoxide and hydrogen mixtures." Although RSPA has changed these entries in the Table, any material which has a special provision in the Table indicating the material to be poisonous by inhalation, which is transported at a percentage where the material no longer meets the definition of poisonous by inhalation, is not subject to the communication requirements of the HMR applicable to poisonous by inhalation hazard materials.

Several petitioners requested that ethylene oxide be reclassified as a flammable gas in lieu of its poison gas classification promulgated under the final rule. Petitioners did not contest that the material is poisonous by inhalation, but rather argued that the classification of ethylene oxide as a poisonous gas would increase their costs exorbitantly. The petitioners argued that the cost of classifying the material as a poisonous gas would increase their costs two to three times because of the insurance, routing and separation requirements for poison gases. In addition, the petitioners were concerned with the public perception of materials labeled with POISON GAS

VOL 56 ISS 245 DEC 20 1991 UMI

labels being shipped into food processing plants or hospitals. Petitioners requested this reclassification for ethylene oxide which is shipped in non-bulk packagings that bear an EPA-approved pesticide label.

RSPA believes that the hazards posed by ethylene oxide are too extreme to allow this product to be classified as a flammable gas instead of a poisonous gas. The fact that other agencies, (i.e., the Environmental Protection Agency, Food and Drug Administration and Occupational Health and Safety Administration) regulate this product because of its hazards to the public supports retention of the poisonous gas classification for this material. Although it is possible that the costs for shipping ethylene oxide will increase, RSPA does not believe that the increase will be nearly as severe as argued by the petitioners. The requirements discussed by petitioners are based on the old poison gas classification of POISON A, not the Docket HM-181 classification of 2.3—which includes a much larger group of materials.

The petitioners also argued that the requirement to separate ethylene oxide by four feet from other flammable liquids and gases will increase the cost to ship the material because the vehicle will have to be moved partially empty. Although ethylene oxide must be separated by four feet from flammable liquids and gases, the intervening space may contain non-hazardous materials or other compatible hazardous materials. RSPA believes that the inhalation hazard posed by ethylene oxide is more severe than its flammability hazard, even in non-bulk or combination packagings. Therefore, RSPA is denying these petitions and is retaining the poisonous gas classification for ethylene oxide.

Several petitioners requested that RSPA reconsider the bulk packaging requirements for bromine. While the petitioners acknowledge that bromine meets the criteria for a material that is poisonous by inhalation, they pointed out that bromine is a unique material that requires special handling. The petitioners also stated that the packagings adopted by RSPA for materials poisonous by inhalation are not appropriate for bromine. Additionally, the petitioners stated that certain requirements, such as outage limits, would conflict with international limits imposed by the International Maritime Organization, Dangerous Goods by Road (ADR), and Carriage of Dangerous Goods by Rail (RID). RSPA agrees with petitioners and is making several changes to the bulk packaging requirements for bromine. The following changes are made:

a. The bulk packaging reference in Column 8C of the § 172.101 Table is changed to § 173.249 from § 173.244.

b. The quantity of bromine that may be loaded into a cargo tank motor vehicle or intermodal portable tank is revised to be consistent with the current HMR, and with international regulations.

c. The special provisions in Column 7 of the § 172.101 Table are revised to remove the insulation requirements for cargo tank motor vehicles and portable tanks and authorize the continued use of packagings which have been used safely for many years. The petitioners pointed out that an insulation jacket on a bromine tank could easily obscure a minor leak and permit tank corrosion to progress undetected until an uncontrollable spill results. In bromine service, an insulation jacket would prohibit routine, continual visual examination of the exterior of a tank. RSPA believes that currently-used bulk packagings will provide the level of packaging integrity sought for PIH materials, without placing an unnecessary burden on the industry.

As requested by a petitioner, the term "n.o.s." is removed from the four aerosol proper shipping names. In addition, the packaging sections for these Table entries are amended to reference § 173.306, in order to allow aerosol containers.

RSPA is making substantial changes to the bulk packaging references in the Table for gases poisonous by inhalation. Many petitioners were confused over which section and/or special provision they were to use. Much of this confusion arose over Special Provision B13 which stated that additional provisions appeared in § 173.314 or § 173.315, in addition to the requirements in § 173.244 or § 173.245. These requirements were in addition to the requirements imposed under an appropriate "B30" and "B70" special provision for cargo tanks and tank cars, respectively. In order to clarify these requirements RSPA is changing the packaging section for these materials (except for former Poison A materials and materials not previously authorized in bulk packagings) to §§ 173.314 and 173.315, and is amending the packagings tables in these sections by adding generic entries for Division 2.3 (Hazard Zones A, B, C and D) materials. The requirements previously found in the appropriate B30 or B70 note are moved to notes in the tables in §§ 173.314 and 173.315. For those former Poison A materials and those materials not previously authorized in bulk, RSPA is referencing § 173.245 as the bulk packaging section and removing all "B notes". Therefore, bulk packagings are only authorized for these commodities under approval by the Associate Administrator for Hazardous Materials Safety.

Several petitioners requested that, for those materials that are required to have their proper shipping name marked on bulk packagings, that only the key words be required to be marked. Examples of the words that the petitioners requested be left out are "aqueous solutions" in the proper shipping name "Hydrogen peroxide, aqueous solutions" and "stabilized" in the proper shipping name "Acetone cyanohydrin, stabilized." RSPA agrees with these petitioners. RSPA is adding paragraph (f) to § 172.302, which does away with the need to remark bulk packagings, if the key words specified in the § 172.101 Table are identical to those marked on the bulk packaging.

RSPA received several petitions regarding the issue of half versus full headshields on tank car tanks. Under Docket HM-175A, RSPA and the Federal Railroad Administration are considering developing regulations to improve the transportation of hazardous materials in tank car tanks. One of the issues being considered is the feasibility of requiring full headshields on tank car tanks. Therefore, RSPA considers those petitions received to Docket HM-181 that requested that certain tanks cars be required to be fitted with full headshields to be outside the scope of this rulemaking. However, there is no prohibition in the HMR on using tank car tanks with full headshields, and it is encouraged.

RSPA received several petitions regarding the packaging requirements for alcoholic beverages. Petitioners pointed out that under the previous requirements, alcoholic beverages which were 140 proof or lower were not subject to the specification packaging requirements of the HMR, but that under Docket HM-181 these materials would be subject to the packaging requirements. The petitioners requested that this packaging exception be retained under this rulemaking. RSPA agrees and is retaining the packaging exception provided for alcoholic beverages.

Many petitioners objected to the insulation requirement for bulk packagings of corrosive materials that are poisonous by inhalation. The petitioners contended that uninsulated tanks with a corrosion allowance provide better or equivalent thermal protection than ¼ inch or ½ inch thick insulated tanks. RSPA is denying these petitions because: (1) they were unsubstantiated by data; and (2) insulation of bulk packagings provides crush ("accident damage protection") as well as thermal protection. However, RSPA is revising special provisions B14 and T38—which require insulation of bulk packagings—in response to a petitioner who requested that: (1) the phrase "completely insulated" be clarified; and (2) the thermal conductance be lowered to 0.075 Btu per hour per square foot per degree fahrenheit differential so that the special provisions are consistent with the requirements for other bulk packagings.

Several petitioners also objected to the requirement for the insulation of bulk packagings for materials poisonous by inhalation that fall within Hazard Zone C. The petitioners argued that this requirement is not consistent with the UN Recommendations or the IMDG Code and is also inconsistent in that it is not required for liquids. The petitioners also argued that there was not sufficient justification of the costs and benefits associated with this requirement.

In Docket HM-181, RSPA determined that the group of materials that were to be considered to be poisonous by inhalation would be larger for gases than for liquids. Under the final rule, only those liquids that fall within Hazard Zones A and B are considered to be poisonous by inhalation while for gases this requirement includes Hazard Zones C and D. RSPA made this decision because of the volatility associated with gases in relation to liquids. Although the packaging requirements for materials poisonous by inhalation are inconsistent with those of the international community, RSPA believes that the hazards associated with these materials in transportation are not adequately addressed by the international regulations and, therefore, RSPA is imposing more stringent packaging requirements.

The petitioners also stated that there was no clear safety reason to require insulation of cargo tanks and portable tanks for materials poisonous by inhalation assigned Hazard Zone C and, in fact, insulation would make routine inspections more difficult and less likely to reveal potential difficulties (i.e., corrosion) that, if left undetected, could lead to transportation incidents. As stated before, the insulation requirement in question provides crush as well as thermal protection of these packagings. In cargo tanks and portable tanks the primary function of the insulation is to serve as a crush protector. Though the insulation could cover up external corrosion, the petitioners did not address the accident resistant characteristics of the insulation, nor did they provide a suitable alternative. Therefore, RSPA is denying those petitions to eliminate the insulation requirements for bulk packagings of Hazard Zone C materials poisonous by inhalation.

In response to petitions for reconsideration made to Docket HM-142A, which has been incorporated into Docket HM-181, RSPA is adding a new entry "Regulated medical waste, 6.2, NA 9275, II" to provide less rigorous requirements for infectious substances which are "regulated medical wastes" as defined in appendix G of part 173. See further discussion of this issue under § 173.134.

2. Subpart C; Shipping Papers

Section 172.202. RSPA agrees with petitions to remove the option in paragraph (a)(2) allowing IMO class and division numbers in parentheses following the numerical hazard class, because § 171.12(b) already allows IMDG descriptions for vessel shipments. Accordingly, the phrases "IMO class and divisions numbers" and "in parentheses" are removed from paragraph (a)(2). For display of the subsidiary hazard class, if any, the phrase "or following the basic description" is added.

One petitioner recommended that paragraph (a)(2) be amended to except materials described as "Combustible liquid, n.o.s." from the requirement to include the hazard class on shipping papers since the hazard class name is included in the proper shipping name. The petitioner stated that this is consistent with the current HMR and would present no safety or enforcement problems. RSPA agrees and is revising paragraph (a)(2) accordingly.

Several petitioners recommended amending the provisions in paragraphs (a)(3) and (a)(4), which require that the "UN or NA" identification number be entered before the packing group. The petitioners stated that the "Packing Group" is an important part of the basic description and, therefore, should follow the hazard class entry as prescribed under the IMDG Code. They stated that, if not amended, two separate entries will be required in their computer data bases, increasing the chance for error. In addition, the petitioners recommended that the letters "PG" for Packing Group be removed because they are not recognized by the ICAO or IMO regulations.

RSPA disagrees, in part, with the petitioners. They are mistaken in their belief that the IMDG Code or ICAO (see 4.1.2 of the ICAO Technical Instructions) requires entry of the "Packing Group" before the identification number. The IMDG Code states in paragraph 9.3.11 that, except for the correct technical name (proper shipping name), hazard class and UN number, which shall appear in that sequence, the location and order in which other elements of information appear on the shipping document are optional. The IMDG Code gives an example of the sequence of the basic elements of a description on shipping documentation as follows: "Formic acid, Class 8, UN1779." The sequence of elements on shipping documentation in § 172.202(a)(3) is consistent with this and remains unchanged. However, the requirement in § 172.202(a)(4) to include the letters "PG" preceding the packing group (e.g., PG I), is being made optional in response to petitions.

Several petitioners asked RSPA to retain current language in § 172.202(a)(4) requiring that, except for empty packagings and compressed gas cylinders, "the total quantity by weight (net or gross as appropriate)" be displayed on the shipping paper. They pointed out that this language may have been inadvertently omitted in Docket HM-181. The petitioners also recommended reinstatement of the examples that are presently shown in the current § 172.202(a)(4) for the total quantity. RSPA agrees that language in the current § 172.202(a)(4) was inadvertently omitted, and accordingly, paragraph (a)(5) is revised to include it. For consistency, the terms "mass" and "capacity" are substituted for "weight" and "volume", respectively. RSPA also is including examples of total quantity in both U.S. standard or customary units and the International System of Units (SI) to indicate that either usage is permitted. For bulk packagings and cylinders, RSPA is requiring some indication of total quantity; for example "10 cylinders" or "1 tank truck."

A petitioner stated that the example of the basic description for a hazardous material on a shipping paper, in § 172.202(b), shows commas between the required elements. However, the petitioner would prefer using a slash(s) "(e.g., //)" between elements of the description, and asked whether this is acceptable. The HMR do not stipulate what methods may be used to separate the elements of a basic description on a shipping paper. RSPA believes that any means of separating the elements of a shipping description is acceptable, such as by spaces, commas, slashes, asterisks, etc., as long as the elements are readily identified.

AAR recommended eliminating the option in paragraph (d) to permit entry of the technical name between the "proper shipping name and hazard class" or "after the basic description" on a shipping paper. The petitioner stated that the option to enter the technical name between the proper shipping name and hazard class would complicate efforts to improve hazardous materials descriptions. RSPA disagrees. In the current 49 CFR, RSPA permits an option for displaying the technical name of a hazardous material, as specified in §§ 172.202(d) and 172.203(k). In this final rule, RSPA maintains the option to display entry of the technical name either after the proper shipping name or following the basic description (revised § 172.202(d)).

RSPA is revising paragraph (d) to include the following additional description for Class 7 radioactive materials, " 'RADIOACTIVE MATERIAL' unless these words are contained in the proper shipping name."

HMAC recommended adding a new paragraph (f) to allow on shipping papers, abbreviations which appear as authorized descriptions in Column 2 of the § 172.101 table, or in the appendix to the table. Currently, in § 172.201(a)(3), which was unchanged in Docket HM-181, shipping descriptions may contain abbreviations that are specifically authorized or required in the Hazardous Materials Table in § 172.101 or subpart C of part 172. Therefore, RSPA believes adding a new paragraph (f) in § 172.202 to address the use of authorized abbreviations is unnecessary and the petition is denied.

Section 172.203. A petitioner recommended that the requirement in current § 172.203(e) regarding additional shipping paper information be amended to "require" that shipping papers for all empty packagings, not just empty tank cars containing a residue of a hazardous material, contain the words, "Residue: Last Contained * * *" in association with the basic description. The petitioner believes that the permissive wording in § 172.203(e) may lead to confusion, particularly when transporting hazardous materials by water. RSPA disagrees and denies this petition.

HMAC stated that, in § 172.203(i)(2), the entry "skin corrosive only" is no longer required for under deck stowage on cargo ships, and recommended that this paragraph be corrected to reflect this. RSPA agrees and § 172.203(i) is revised accordingly.

The Conference on the Safe Transportation of Hazardous Articles (COSTHA) recommended removal of the "Aerosol" entries from the list of shipping names in paragraph (k)(3), which requires inclusion of the technical name on shipping papers. The petitioner stated that "Aerosols" in the UN, IMO, RID and ADR do not include the "n.o.s." qualifier, and the technical name is also not required on shipping documentation for "Aerosols" under the UN, IMO or ICAO. RSPA agrees and accordingly, is removing the four aerosol n.o.s. proper shipping names from the list in paragraph (k)(3).

Paragraphs (m)(1) and (m)(2) are revised to ensure that materials or mixtures meeting the definition of Division 6.1, Packing Group I or II, are properly described on shipping papers. Paragraph (m)(1) requires the word "poison" to be entered in association with the basic description if the proper shipping name of a Division 6.1 material does not indicate that it is a poison. Similarly, paragraph (m)(2) requires the technical name of a compound or principal constituent of a mixture that causes it to be classified as a poison to be entered on the shipping paper if that technical name is not included in the proper shipping name of the material in the § 172.101 Table.

Paragraph (m)(3) is revised to clarify the distinction between gases and liquids which are poisonous by inhalation that require additional shipping paper entries. It specifies that for materials poisonous by inhalation as defined in § 171.8, the words "Poison-Inhalation Hazard" and the words "Zone A," "Zone B," "Zone C," or "Zone D," for gases, or "Zone A," or "Zone B" for liquids, as appropriate, shall be entered on the shipping paper immediately following the shipping description.

Several petitioners recommended that paragraph (m)(3) be amended to indicate that "hazard zones" do not apply to liquids in Division 6.1, Packing Group II and III materials, and to clarify application of the additional description requirement, "Poison-Inhalation Hazard", on shipping papers for other classes of materials, such as corrosives and flammables, that are inhalation hazards. RSPA agrees and paragraph (m)(3) is revised accordingly. A petitioner suggested that the 1-liter capacity or less shipping paper exception for entering the words "Poison-Inhalation Hazard" for materials poisonous by inhalation be reinstated. The petitioner suggested that less restrictive alternatives may be more appropriate (e.g., apply 1-liter capacity exception to liquids only, not gases; maximum size limitation would be 500 ml; and for combination packaging, require special packaging, such as hermetically sealed outer metal can to contain primary container; and require marking and labeling, but no placarding). RSPA disagrees that the 1-liter shipping paper exception for materials poisonous by inhalation should be reinstated. As discussed in the preamble of the final rule [55 FR 52417], RSPA believes any quantity of a material having an inhalation hazard that is spilled or leaking from a damaged package poses health risks to emergency response personnel. By showing "inhalation hazard" on the shipping paper, as well as packagings, this fact is immediately communicated to emergency responders. For the reasons mentioned above, the 1-liter exception will not be reinstated. Therefore, the additional entry on shipping papers as prescribed in § 172.203(m)(3) is applicable to any quantity of materials poisonous by inhalation.

3. Subpart D; Marking

Section 172.301. Several petitioners recommended adding a new paragraph (a)(3) to permit packages to be marked with required international markings, such as "1.4S", when no label is required for small arms shipped domestically.

Under the HMR, hazardous materials may be transported in the U.S. when shipped in accordance with the regulations under ICAO and IMO (§§ 171.11 and 171.12, respectively). Consequently, the use of labeling and marking under international regulations is not prohibited and is not a violation of the HMR. The following are examples of shipping names not requiring hazard warning labels, as specified in Column 6 in the § 172.101 Table (Docket HM-181), which may be shipped in the U.S. in accordance with international marking and labeling requirements under ICAO or IMO: 1) Cartridges for weapons, blank; (Cartridges, small arms, blank), 1.4S, UN 0014, II; and 2) Cartridges for weapons; inert projectile (Cartridges, small arms), other than blank, 1.4S, UN 0012, II. Therefore, adding a new paragraph (a)(3) in § 172.301 is not necessary.

Section 172.302. One petitioner asked RSPA to amend paragraph (b) to allow marking of proper shipping names on smaller portable tanks in letters "not less than one inch high." The petitioner stated that the two-inch letters specified in § 172.302(b)(3) would be "difficult to fit" on his fleet of tanks with a rated capacity of 660 gallons or less or with a maximum rated gross weight of less than 7,700 pounds. RSPA agrees in principle with this petition and is extending relief, consistent with the placarding exception for "small" portable tanks in § 172.514, to portable tanks having a capacity of less than 3,785 L (1,000 gallons). RSPA also is accepting petitions recommending revision of the cargo tank marking size to require a 50 mm (2 inch) marking. Accordingly, consistent with the 50 mm marking required for cargo tanks in § 172.328(b), paragraph (b)(3) is revised to specify a 50 mm (2 inch) mark for cargo tanks and other bulk packages.

In order to relieve some of the burden associated with remarking bulk packages due to minor changes in shipping names, RSPA is adding a new paragraph (f) stating that a bulk packaging marked with a proper shipping name prior to October 1, 1991, does not have to be remarked if the key words of the old mark are identical to those currently specified in the § 172.101 Table. For example, a tank car marked "ANHYDROUS AMMONIA" need not be remarked "ANHYDROUS AMMONIA, LIQUEFIED."

Section 172.303. Several petitioners stated that the requirements for prohibited marking in paragraph (a), as written, would prohibit the use of terms used generically, such as paint, ink or cotton, from being used in connection with a non-hazardous product, when the name is the same as the hazardous product. They suggested that the matter can easily be solved if "or" is replaced with "and" between the words "shipping name" and "identification number." The effect would be that a package containing a non-hazardous product, whose name is the same as a hazardous product, when not marked with a UN or NA identification number, would not be in violation of the prohibited marking provision. RSPA agrees in principle with petitioners. However, changing the conjunction to "and" would permit either the shipping name or the identification number, but not both to appear on a package. This could lead to confusion. Instead, RSPA is providing an additional exception in paragraph (b) for those shipping names which describe non-regulated materials.

Several petitioners objected, for different reasons, to the exceptions provided in paragraphs (b)(1) and (b)(2). One petitioner objected to allowing non-bulk packages, under certain conditions, to remain marked. The petitioner believes that the exceptions may lead to confusion on the part of carriers, inspectors, enforcement officers, and emergency responders, and stated that requiring removal of marking, or covering the marking would present no burden to industry. RSPA is not aware of problems caused by this exception, which has been in the regulations, at § 173.29(d), for some time.

Another petitioner objected to the requirement to cover or obliterate the marking (§ 172.303(b)(2)) when moving an empty tank car from manufacturing facilities, or to or from cleaning or repair facilities. The petitioner said that, although the concept *not* to have the shipping name shown on a clean empty tank car is noteworthy, strict adherence on a tank car is a problem, recommending that RSPA permit empty, clean tank cars, moving from tank car manufacturing facilities, or to or from tank car cleaning or repair facilities, to remain marked with the hazardous material shipping name and identification number without securely covering or obliterating the marking. RSPA is denying this petition. As with the provision addressed in the previous paragraph, this is a long-standing provision previously found in § 173.29(d). RSPA believes covering of markings on empty bulk packagings is necessary to preclude confusion or unnecessary response on the part of emergency responders.

Section 172.312. Several petitioners recommended revision of requirements in paragraph (a)(2) for display of orientation markings on liquid hazardous materials in non-bulk packagings. They suggested that RSPA specify that the marking only "pictorially" conform to the ISO 780-1985 standard, to allow for commonly used methods of orientation markings on packages containing hazardous materials. They stated, for example, that the orientation marking shown in the ICAO Technical Instructions is widely used and readily recognized and understood. One petitioner recommended that two additional exceptions to the orientation marking requirements in paragraph (a) be included in paragraph (c) for manufactured articles and when the top closure is similar to the bottom closure or seal (e.g., a dry cell battery). The petitioner stated that in such cases the orientation of the inner package is either irrelevant or not applicable with respect to the closures of the inner packagings.

RSPA agrees. Therefore, in § 172.312, paragraph (a) is revised to require that the orientation marking only "pictorially" conform to the ISO 780-1985 standard, and exceptions are added in paragraph (c) for orientation markings for liquids in hermetically-sealed inner packagings and manufactured articles.

Section 172.313. RSPA is revising paragraph (a) to clarify package marking requirements for gases and liquids that are materials poisonous by inhalation as defined in § 171.8. This revision addresses HMAC's request to eliminate the need in paragraph (a) for marking "Inhalation Hazard" on packages containing lesser hazard Division 6.1 liquids.

One petitioner stated that the location for marking the phrase "Inhalation Hazard" on tank cars, as specified in paragraph (a), for a Division 2.3 material or a poisonous liquid, is not appropriate. The petitioner recommended that instead of locating the marking in association with the labels or placards, the marking would better communicate the "inhalation hazard" to emergency response personnel if it were located "in association with the required shipping name." The petitioner stated that because the placard displays the pictorial representation of poison (i.e., symbol of the skull and crossbones), the placement of the required marking is redundant. RSPA believes that locating this warning in association with a proper shipping name, when one is required, is equally as visible as when located near labels or placards. Therefore, RSPA is revising paragraph (a) to permit either location. A petitioner questioned the need to permanently mark the word "POISON" on non-bulk plastic outer packagings, as specified in § 172.313(b), used as single or composite packaging for materials in Division 6.1. The petitioner stated that RSPA had no basis for extending this provision to materials with a relatively low degree of toxicity, and that the provision should be limited to materials in Division 6.1, Packing Groups I and II. RSPA disagrees. Currently, the HMR requires that each polyethylene packaging used as an outside packaging for materials meeting the definition of a poison be permanently marked with the word "POISON" (§ 173.24(d)(4)). RSPA believes that extension of the requirements to permanently mark the word "POISON" on non-bulk plastic outer packagings used as a single or composite packaging for materials in Division 6.1 is necessary. This requirement will help ensure that foodstuffs are not packed in the same drum or package with the poison material. Therefore, the requirements in § 172.313 will remain unchanged in the final rule.

Section 172.320. Several petitions were received regarding the requirement in § 172.320 to mark packages with the approval number (i.e., EX-number) of the explosive contained therein. Products that are not given EX-numbers and for those packages that are marked with national stock numbers or product codes

VOL
56
ISS
245
DE
20
1991
UMI

that are traceable to the EX-number were excepted from this requirement. Petitioners claimed that this requirement will not enhance safety but will lead to confusion and unnecessary costs and that § 172.320 should be removed from the HMR. In addition, one petitioner stated that they were not aware of "national stock numbers" or "product codes". One petitioner requested that "Jet perforating guns, charged, NA0124 and UN0124" be excepted from this requirement because jet perforating guns are not approved by RSPA, only the charges in the perforating gun are approved. Another petitioner requested that shipments from Canada be excepted from this requirement.

RSPA believes that the requirement to place EX-numbers on packages of Class 1 materials will increase the level of safety associated with transporting Class 1 materials. This marking requirement will facilitate the enforcement of the HMR which will in turn lead to an increase in conformity with these requirements. RSPA recognized that other methods could be used to identify the approval number of a Class 1 material. One of these methods is national stock numbers. National stock numbers are recognized numbers assigned by the Department of Defense to identify commercial products. Another method is the use of a product code. This idea was presented by a petitioner to Docket HM–181A, Notice No. 90–5 who stated that "[t]he name of the manufacturer and the product trade name offer ready identification without reference to the "EX" number. Verification of product approval can be made through referencing of these markings." The markings referred to by this petitioner were those required for commercial explosives in 27 CFR part 55. It is RSPA intention to allow such marking in lieu of the EX-number as long as they are traceable to the EX-number. Therefore, the petitions that requested that § 172.320 be removed are denied.

RSPA is amending § 172.320, for clarity and to allow EX-numbers to be placed on shipping papers in lieu of being marked on packages. This should allow the shipper sufficient flexibility in complying with the requirement to identify that the explosive items being transported have been approved by the Associate Administrator for Hazardous Materials Safety. RSPA is also amending § 172.320 to delete reference to exemption DOT E–9246 because RSPA believes that exception from the EX-number marking requirement should be a part of the exemption rather than an exception built into the regulations.

In addition, RSPA believes that the EX-number requirement should apply to all shipments of Class 1 materials transiting the U.S. Therefore, a petition to except shipments from Canada from these requirements is denied. RSPA is also denying the request that UN0124 and NA0124 be excepted from the EX-number marking requirement. If no EX-number has been given to the article, the number assigned to the charge should be used.

Section 172.326. Several petitioners recommended removal of paragraph (a) requiring portable tanks to be marked on both sides with the proper shipping name of the material being transported. They contended that since portable tanks must also be marked with the ID number of the material together with vehicle placards that "the extraordinary requirement of stencilling the name of each commodity is unnecessary and burdensome in view of the cost involved." Four petitioners cited cost estimates of up to $300 in materials and time to re-apply product markings each time different materials are transported. One petitioner said that uses of most portable tanks "change from product to product." Stencilling the product name may have been appropriate for containers in dedicated service for one or two products, a petitioner pointed out, but this practice is conducted less frequently now. Another petitioner contended that eliminating the product marking requirements in paragraph (a) would create greater efficiencies in the use of these tanks.

One rail carrier urged RSPA to except IM-specification tanks from the marking requirement because IM tanks "are in most respects, similar to other liquid bulk transportation packaging. They differ from cargo tanks only in that they are not rigidly and permanently attached to the vehicle chassis." Other petitioners agreed that marking and placarding of portable tanks "should be the same as cargo tanks."

These petitions are not accepted because RSPA believes that proper shipping name information must be maintained on all portable tanks. Contrary to the contentions of petitioners, this is not a new requirement. For years, the HMR have required all portable tanks to be marked with the proper shipping names of materials contained; and nothing in the existing § 172.326 or in revisions to this section in the final rule requires that the product mark be "stencilled" on the tank. The regulations only require that the proper shipping name be "legibly marked on both sides" in two-inch letters.

IM specification and other portable tanks are treated differently from cargo tanks or rail tank cars with respect to product marking because they often are exposed to significantly different transportation situations involving a greater number of personnel who need the additional information. Unlike other bulk equipment, portable tanks are loaded, transferred between modes, unloaded and frequently maintained in temporary storage awaiting transportation while between modes (i.e., at a pier or railroad ramp). RSPA believes that the proper shipping name applied to both sides of all portable tanks, in addition to required marking of identification numbers, makes product identification more accessible to enforcement and emergency response personnel who may first encounter incidents involving portable tanks.

Paragraph (c) is revised to include the words "containing a hazardous material" following the words "portable tank".

Section 172.330. In response to a petitioner who pointed out that existing requirements in § 172.330(a)(2) to mark tank cars and multi-unit tank car tanks with the identification number specified in the § 172.101 Table, RSPA is adding paragraphs (a)(1)(ii) and (a)(2)(ii) accordingly to require the application of that mark.

Section 172.332. One petitioner recommended that RSPA align the size of the orange panel, which is used to display the identification number marking, with the IMDG Code (i.e., 120 mm X 300 mm) for uniformity. RSPA is concerned that the reduced size of IMDG Code identification markings may make them more difficult to see in emergency response situations. For this reason, the petition is denied.

3. Subpart E: Labeling

Section 172.400a. Several petitioners recommended removing paragraph (a)(1)(i) which provides exceptions for labeling cylinders containing a Division 2.1 or Division 2.2 gas that is not poisonous. One petitioner recommended revising paragraph (1) to except a Division 2.3 (poisonous gas) material from the labeling exceptions. These petitions are denied. The HMR now requires labeling, as specified in § 172.400, for a poisonous gas and, in the final rule under Docket HM–181, extends this requirement to Division 2.3 gases under the UN classification system. Therefore, the exceptions for labeling permitted under paragraph (a) do not apply to a Division 2.3 gases.

COSTHA recommended adding a new paragraph (8) to except from labeling, a material which meets the definition of Division 6.1 (poisonous) material and which conforms to the limited quantity provisions of § 173.153(b). COSTHA believes shippers should not be required to apply POISON or KEEP AWAY FROM FOOD labels for Division 6.1 poisons when packaged in UN combination packagings meeting § 178.601(g)(2).

RSPA disagrees. Limited quantity shipments of poisonous materials are required to be labeled under the HMR. This provision is also extended to limited quantity shipments of Division 6.1 (poisonous) materials under the UN classification system. Exceptions are permitted only under the provisions of exemptions from the regulations. Currently, there are long-standing exemptions authorizing the transportation of limited quantities of poisonous liquids and solids in packagings which are excepted from bearing the POISON label (e.g., DOT–E–7909). RSPA notes that provision is made in § 177.841 for transporting packages bearing POISON or KEEP AWAY FROM FOOD labels with foodstuffs, subject to certain conditions.

Section 172.402. For regulatory clarity, RSPA is reorganizing paragraph (a). In response to a petition, RSPA is relocating § 172.405(b) to § 172.402(b). Existing paragraphs (b) and (c) are redesignated as paragraphs (c) and (d).

Paragraph (d) is revised to require each packaging containing a radioactive material that also meets the definition of one or more additional hazards, except Class 9, to be labeled as a radioactive material as required by § 172.403, and labeled for each additional hazard.

Section 172.405. One petitioner objected to the provision in paragraph (a) to permit, as an option, inclusion of text indicating a hazard on a label, as provided in paragraph (a) for classes 1, 2, 3, 4, 5, 6, and 8. The petitioner stated that there is no safety benefit to eliminating this descriptive language and that the written description is helpful, particularly to casual or temporary dock employees who may not be familiar with the significance of hazard class numbers or pictorial symbols. RSPA disagrees. Section 172.401(c), which is not changed by this final rule, allows packages of hazardous materials bearing labels which are in conformance with the UN Recommendations, ICAO Technical Instructions, IMDG Code, and Canadian TDG Regulations, to be shipped in the U.S. These labels do not have text indicating the hazard, but display pictorial hazard warning symbols, which are internationally recognized. Paragraph (a) provides shippers with the option to use "text," such as used under the HMR, or "symbols," such as used on international labels, to indicate the hazard. Therefore, the provisions in paragraph (a), providing the option to use text or only symbols on labels to indicate the hazard, will remain unchanged in this final rule.

Paragraph (b) is revised to clarify that if an OXIDIZER label is modified to an OXYGEN label, the word "OXYGEN" must appear on the label.

Section 172.406. RSPA is revising paragraph (a)(1)(ii) to require labels to be placed near the proper shipping name, as previously required under § 172.406(a). Several petitioners recommended adding a new paragraph (a)(1)(iii) to clarify that the orientation of labels on a package may be shown either square-on-point or in other orientations dictated by package size. RSPA disagrees. Although it is intended that labels be shown square-on-point, it is often impractical or inadvisable to do so. Other orientations are often necessary, not just because of package size limitations, but also because of package shape. For example, placement of a label on the top head of a drum does not conform to a square-on-point orientation, but is acceptable. Therefore, RSPA denies these petitions. The introductory text of paragraph (e) is revised for clarity.

Section 172.407. Paragraph (d)(4) is revised to delete references to Office of Hazardous Materials Color Charts which are no longer available for public sale. RSPA is reviewing alternative color standards and future rulemaking activity is anticipated.

Section 172.411. A petitioner stated that there was no mention of the use of the EXPLOSIVE subsidiary label, as prescribed in § 172.411. The petitioner suggests that some mention of the EXPLOSIVE subsidiary label be included in § 172.402.

RSPA believes there is no need to include an explanation of the use of the EXPLOSIVE subsidiary label because a material which may have a subsidiary explosive hazard, but is not classed as such, is identified in the § 172.101 Table. Therefore, no further explanation is necessary.

Sections 172.411 through 172.448. Because some of the labels shown in the Docket HM–181 final rule were not correctly displayed, all labels are republished for clarity.

5. Subpart F; Placarding

Section 172.502. In § 172.502, paragraph (b) is reorganized and the exception in paragraph (c) allowing the display of an identification number on a white square-on-point configuration is added as a new paragraph (b)(2).

Section 172.504. Paragraph (c) is revised to exclude all bulk packagings from the "1000 pound exception." This is consistent with requirements in § 172.514(b) that bulk packagings containing residues remain placarded.

Paragraph (f)(4) is revised to include "EXPLOSIVES 1.3" materials. Paragraph (f)(9) is added requiring vehicles transporting combustible liquids in non-bulk packagings that also meet the definition of a Class 9 material to display either the COMBUSTIBLE or Class 9 placard. The COMBUSTIBLE placard need not be applied to vehicles transporting combustible liquids in non-bulk packagings. A new paragraph (g) is added requiring the applicable compatibility group letter to be displayed on placards for shipments of Class 1 explosives by aircraft or vessel.

Several petitioners expressed their concerns regarding placarding for Class 9 materials. They stated that the Class 9 placard should not be required for use in this country due to the fact that the vast majority of these commodities are presently shipped domestically as either ORMs or Consumer commodities, which are excepted from placarding.

The petitioners stated that intrastate motor carriers of materials in the ORM class, other than hazardous wastes, have not been subject to 49 CFR parts 390–397, the Federal Motor Carrier Safety Regulations (FMCSR), because these materials were not subject to placarding. They are concerned with the impact the "Class 9" reclassification and placarding requirements may have on intrastate motor carriers because they may now be subject to the FMCSR. RSPA believes it is necessary to require placards for Class 9 materials both to communicate appropriate information to emergency response personnel, and for uniformity with the international regulations. RSPA notes that intrastate motor carriers transporting hazardous substances in bulk are currently subject to the FMCSR; for example, financial responsibility and commercial driver's license requirements. Since many states have adopted the FMCSR and apply those requirements to intrastate motor carriers, the display of the Class 9 placard will have minimal impact.

One petitioner recommended providing an exception from the placarding requirements, identical to the exception in § 172.504(f)(3), *not* to require display of a NON-FLAMMABLE GAS placard on a motor vehicle if the vehicle is also required to display a POISON GAS placard. RSPA disagrees, and notes that the petitioner provided

VOL
56
ISS
245
DE
20
1991
UMI

no justification for the requested exception.

Several petitioners recommended excepting "Molten sulfur" from placarding, as required by § 172.504(a). RSPA disagrees with petitioners that use of a Class 9 placard for miscellaneous hazardous materials, which was adopted for uniformity and consistency with the international regulations, will lead to confusion and indecision by emergency response personnel. Currently, the identification number marking "2448" for molten sulfur may be placed on a white square-on-point configuration or orange panel. Under Docket HM–181, the identification number marking may be placed on the Class 9 placard as well. Emergency response personnel are familiar with the placarding system and the use of identification numbers to locate information to assist them in mitigating hazardous materials incidents. RSPA notes that a three-year transition period has been provided to minimize the impacts of placarding changes. Therefore, RSPA sees no justification for excepting "Molten sulfur" from placarding requirements, and these petitions are denied.

Section 172.505. This section is revised for clarity.

Section 172.510. Paragraphs (a)(2) and (a)(3) are revised to remove the words "Packing Group I" for Division 2.3, Hazard Zone A materials. One petitioner recommended that paragraph (d), which was not changed under Docket HM–161, be revised to extend the FUMIGATION placarding requirements to all modes of transportation. RSPA believes the fumigation issue is beyond the scope of this rulemaking. Therefore, no change is made at this time.

Section 172.519. Paragraph (a) is revised to clarify that the Mullen Test, noted in paragraph (a)(2), is intended to be used for placards made of tagboard.

HMAC recommended that the size requirements for placards in paragraph (c) be changed from "at least 273 mm (10.8 inches)" to "a minimum size of 250 mm (9.9 inches)," for consistency with the IMDG Code requirements. RSPA disagrees and is denying this petition. The 273 mm (10.8 inches) size of placards is currently used in the U.S. RSPA is concerned that a reduction in size for placards and, effectively, in the size of identification numbers on placards, may be detrimental to recognition of these important hazard communication elements. The larger placards enable emergency response personnel to identify the hazardous materials from further distances (e.g., poison) when mitigating an incident involving hazardous materials. Another petitioner recommended that § 172.519(f) be limited to shipments made under §§ 171.11, 171.12 and 171.12a. Because of aforementioned concerns, RSPA grants this petition. RSPA notes, however, that it is initiating a rulemaking to address the effectiveness of placarding, as mandated by section 25 of the Hazardous Materials Transportation Uniform Safety Act (HMTUSA). This issue will be raised as part of that rulemaking.

AAR and other petitioners recommended amending the HMR to add a new red over white placard for all flammable liquids with flash points between 23°C and 60°C; that is, a unique placard for all Class 3 Packing Group III materials. They stated that including this requirement in the HMR would have several beneficial effects (i.e., simplify emergency response training and the elimination of train placement requirements for flammable liquids with flash points between 23°C and 38°C). RSPA believes this issue is beyond the scope of this rulemaking.

Sections 172.522 through 172.525. In each section, paragraph (b) is revised to include the compatibility group letter.

Section 172.524. In § 172.524, in paragraph (a), the "1.5 BLASTING AGENTS" placard is revised to show an "*" above the class number for the compatibility group letter, which was inadvertently omitted from the placard display.

Sections 172.522 through 172.560. Because some of the placards shown in the Docket HM–181 final rule were not correctly displayed, all placards are republished for clarity.

Part 173: Shippers, General Requirements for Shipments and Packagings

1. Subpart A; General

Section 173.2a. Two petitioners addressed precedence of hazard with respect to Division 6.1 liquids. For consistency with the IMDG Code and ICAO, HMAC suggested that RSPA revise the table in paragraph (b) to show that "for the purpose of determining the primary hazard class in this paragraph, a Division 6.1, Packing Group III hazard, mixture or solution, may not be taken into account except in the case of a pesticide." RSPA agrees and is adding a new superscript 4 to the Division 6.1, Packing Group III entry, cross referenced with Class 3, Packing Group III, and a footnote to indicate that, for pesticides, only Division 6.1, Packing Group III, takes precedence over Class 3, Packing Group III.

Establishing precedence of hazard in cases of "divergent Packing Groups" troubled two petitioners who asked RSPA to provide more guidance. They assumed, for example, that a mixture of Class 3 Packing Group III and Class 8 Packing Group I liquids (shown in the table to have a Class 8 primary class) would be assigned Packing Group I. RSPA is revising paragraph (a)(8) to clarify this situation.

RSPA also was asked to specify how precedence of hazard is determined for materials meeting the definition of more than two hazards. In these cases, precedence can be determined by deriving the precedence of any two hazard classes and then comparing the result with the third hazard class to establish the order of precedence of hazard. This procedure can be repeated for any number of hazard classes. For example, precedence of hazard for a material meeting the definitions of Class 3, Packing Group II, Class 8, Packing Group II, and Division 6.1, Packing Group III is Class 3, Packing Group II.

Section 173.3. Several petitioners claimed that salvage drums will not consistently pass the three-foot Packing Group III drop test with liquids required in paragraph (c)(1), seriously affecting the availability of these drums for emergency operations. They claimed requiring salvage drums to meet the Packing Group III performance level for liquids will render most current salvage drums obsolete. Other petitioners asserted that required tests for salvage drums may lessen their range of applications. HMAC said the performance capabilities of salvage drums are limited because they are large open head units. A petitioner pointed out, "However, when correctly used, a salvage drum will never be required to hold liquids. All free liquid is required to be absorbed. Existing salvage drums have performed well, and where leakage is present, absorbent material is included within the package."

Another petitioner suggested that a salvage drum tested and marked for solids makes more sense given the new UN entry, "Solids containing flammable liquids, n.o.s." Because the presence of free liquids must be absorbed by absorbent material, he said "the most logical approach is to mark the drum for solids. This is a more understandable marking that would also help reinforce the requirement that there be no free liquid" in the salvage drum at the time it is closed for transport. Recognizing that liquids can settle out of solid materials even if the package is closed with no "free" liquids, one petitioner recommended that RSPA adopt the 20 kPa leakproofness test method requirement for Packing Group II in § 178.604(e)(2) instead of the 35 kPa now required in § 173.3 for liquids in the salvage drum.

RSPA agrees with the principle that a properly used salvage drum with sufficient absorbent material will hold no free liquid and that testing requirements should appropriately address the manner in which salvage drums are actually used. Thus, RSPA is revising paragraph (c)(1) to require salvage drums to withstand testing with liquid solids at the Packing Group III performance level, including a leakproofness test of 20 kPa (3 psi). To ensure the availability of salvage drums for emergency service throughout the U.S. during the transition period, RSPA also is revising paragraph (c)(1) to allow any salvage drums manufactured and marked before October 1, 1993 to pre-HM–181 requirements, to continue in service.

Section 173.4. For international consistency, RSPA accepts a recommendation that the cross-sectional compressive load test in paragraph (a)(6)(ii) be replaced with the compression test specified in § 178.606.

Section 173.9. A proposal by two petitioners to remove references to "rail car" in paragraphs (a) and (b) so that this section would apply to all transport vehicles moving under fumigation is considered beyond the scope of the final rule.

Section 173.12. Paragraph (b) is reorganized for clarity and a new paragraph (b)(5) is added specifying materials not permitted to be shipped in lab packs, including liquids classed in Division 6.1, Packing Group I. Paragraphs (d)(1) and (d)(2) are added stating that technical name requirements on shipping papers and package markings do not apply to lab packs except packagings containing hazardous substances, which must be described as required in § 172.203(c), or Division 6.1 materials subject to requirements in § 172.203(m). HMAC's recommended revision of paragraph (b) to require the words "lab pack" entered in parentheses after the generic description from the § 172.101 Table is considered beyond the scope of the final rule.

Several petitions addressed the meaning in paragraph (a) of "equivalent" open head drum" when a closed head drum is substituted for a open head unit. Petitioners contended that waste disposal firms misinterpret an "equivalent" open head replacement to mean a unit constructed of the same material but without regard for the design and performance specified for the closed head drum. Thus, they interpret paragraph (a) to allow any open head drums, creating potential safety problems. One petitioner said that an "equivalent" open head drum should comply with the part 178 marking and performance requirements that applied to the closed head unit it replaces. RSPA agrees that in cases where an "equivalent" open head drum is selected for the shipment of hazardous wastes, it must meet the performance standards of any originally authorized closed head drum. Therefore, petitions requesting removal of the word "equivalent" are not accepted.

Two petitioners urged RSPA to delete the requirement in paragraph (b) that lab packs be transported for disposal or recovery by highway only, adding that "more and more intermodal transport is being used to carry hazardous waste." They contended that there is no safety reason for restricting lab pack shipments to the highway mode. These petitions are rejected because RSPA has determined in the final rule that more stringent controls are to be placed over the packaging and transport of hazardous wastes and is not electing to broaden the range of permitted lab pack transport beyond the highway mode. However, in the final rule, RSPA is relaxing controlled transport requirements by permitting excepted lab pack shippers to use common highway carriers.

2. Subpart B; Preparation of Hazardous Materials for Transportation

Section 173.21. RSPA is accepting a petition from the Society of Plastics Industry to revise the introductory text to paragraph (f) to clarify that a material with a self accelerated decomposition temperature (SADT) of 50C (122F), that gives off a dangerous quantity of heat or gas, is forbidden in transportation.

Section 173.24. A number of petitioners addressed the determination of "no significant release" or "no identifiable release" as a condition of package integrity before offering shipments for transport. They contended that the criterion "no identifiable release" in paragraph (b)(1) is not universally applicable because not all releases are harmful. One petitioner said paragraph (b)(1) "fails to acknowledge there are degrees of hazard recognized in the three Packing Groups . . . and the technical and economic limitations of packages and equipment." Petitioners suggested revisions to paragraph (b)(1) by requiring "no significant" release or "no release in a quantity that is harmful to persons or the environment." One petitioner recommended restricting the "no identifiable release" requirement to shipments of Class 7, Division 2.3 and Division 6.1 materials.

RSPA believes that a determination of "no release" or "no significant release" or no release based on varying degrees of hazard are unquantifiable, subjective and are not applicable in the regulations. Rather than providing an undeterminable standard of measurement, paragraph (a)(1) establishes a principal shipper responsibility. It requires the person who prepares a properly certified package for transport to use good judgment "without use of instruments" to ensure that the package will not release its contents under conditions normally incident to transportation. Therefore, paragraph (a)(1) remains unchanged in the final rule.

Several petitioners asked RSPA to interpret what may constitute the use of an "instrument" in complying with paragraph (b)(1). They asked, for example, if the application of soap bubbles to detect a leak could be construed as the use of an instrument. In this case, the answer is no. However, RSPA wishes to make it clear that if someone actually uses an "instrument" such as a gas chromatogram or ultrasound technology and detects a leak, it is still a leak, and the packaging is not in compliance with paragraph (b)(1).

The Plastic Drum Institute (PDI) urged RSPA to publish its "Compatibility Test Procedures for Plastic Drum and Receptacles" in the **Federal Register** as a proposed rule to supplement paragraph (e) by addition to and modification of Appendix B to Part 173. This booklet, submitted to RSPA in August 1990, offers an alternative method of compatibility testing and rate of permeation. RSPA will consider adoption of PDI's proposal into the regulations at a later date.

The Organic Peroxides Producers Safety Division (OPPSD) asserted that most temperature-controlled organic peroxides will not survive the 100-day compatibility test at 18 C, and asked RSPA to adopt a UN-recommended preliminary test of samples filled with intended ladings for "a long period of time" without reference to temperature. RSPA does not believe that this proposed procedure is adequate. However, the procedures for testing chemical compatibility and rate of permeation contain a provision for the use of alternative procedures if they are approved by the Associate Administrator for Hazardous Materials Safety. RSPA would consider a specific alternative to the chemical compatibility test for organic peroxides under this

VOL 56 ISS 245 DEC 20 1991 UMI

approval provision if it were submitted to the Associate Administrator.

A petitioner asked RSPA to revise paragraph (e) to make it clearer that the shipper requirement to assure package compatibility with its lading applies to all packagings, not just plastic packaging. The petitioner contended that paragraph (e)(3) gives the impression that non-plastic packagings do not have to be tested for compatibility. RSPA is denying this petition. Paragraph (e)(1) makes it sufficiently clear that persons offering hazardous materials for transportation must ensure that all packagings are compatible with their lading. Paragraph (e)(3) is limited to plastic packagings, and requires testing under certain conditions.

One petitioner objected to paragraph (g) which prohibits venting of packages containing materials likely to evolve toxic, flammable or asphyxiant gases. The petitioner claimed that he has used vented drums for years to ship Class 3 Packing Group III materials "characterized by slow evolution of small amounts of hydrogen gas at ambient temperatures . . . without a single incident resulting in illness or injury because of venting." He added that prohibiting venting in this case "may encourage use of less safe procedures" and that paragraph (g)(2) is not in agreement with the UN Recommendations or the IMDG Code. RSPA agrees that venting of these materials can be permitted under certain circumstances, consistent with international standards. Therefore, paragraph (g)(2) is revised to permit venting when "the evolved gases are not poisonous, or likely to create a flammable mixture with air or be an asphyxiant under normal conditions of transportation."

Paragraph (g)(4) is revised to clarify that venting is permitted if a packaging is designed to preclude an "unintentional" release of hazardous materials.

Section 173.24a. A number of petitioners urged RSPA to remove paragraph (a)(5), requiring that packagings be capable of withstanding a vibration test, until the UN recommends the test and international modal agencies adopt it. They claim the vibration standard, as a domestic exception, will put U.S. shippers at a competitive disadvantage in both domestic and international markets. One petitioner contended that vibration testing has merit only when applied to drums intended for the transport of liquids. Another petitioner questioned the value of vibration testing for explosives packagings. The National Solid Wastes Management Association (NSWMA) said few shippers or carriers of waste materials classed in Class 9 packaged in non-specification packages have the ability to perform a vibration test. NSWMA added, "it is only reasonable that vibration testing should be the responsibility of manufacturers."

The vibration standard in paragraph (a)(5) does not require testing. As stated in the preamble to the final rule, RSPA added the easily reproducible vibration test standard in § 178.608 to the UN-recommended Subpart M tests to account for conditions likely to be encountered in typical domestic transportation environments. Paragraph (a)(5) addresses the suitability of any hazardous materials package exposed to extensive vibration stresses during transportation. The shipper is not required to perform this test. Vibration capability can be based on voluntary testing, on previous experience in the use of design types subjected to high-vibration distribution systems, or on an engineering evaluation of package design and integrity with regard to vibration.

Although vibration testing as a capability is retained in the final rule, RSPA agrees that this test should be adopted as an international standard. Consequently, the U.S. recently proposed inclusion of a similar vibration standard in the UN Recommendations.

Two petitioners expressed concern about permitted use of Packing Group I-tested packagings for Packing Group II or III materials with higher specific gravities. One petitioner pointed out that paragraphs (b)(1)(i), (b)(1)(ii), and (b)(1)(iii), which permit lower hazard but higher specific gravity materials to be shipped in Packing Group I-tested packagings, are inconsistent with paragraph (b)(2) which prohibits a single or composite packaging from containing a solid to a gross mass greater than that marked on the package.

HMAC asserted that higher specific gravity liquids should be permitted in packagings "where the weight of the drum plus contents exceed the maximum design strength of the container if filled to rated capacity." In some of these cases, HMAC said "it will be impossible to obtain the performance rating needed to meet requirements based on full containers using current technology even with the employment of the sturdiest construction material available." HMAC recommended adoption of a formula to determine a maximum allowable net product weight for high specific gravity materials.

RSPA believes paragraphs (b)(1)(i), (b)(1)(ii), and (b)(1)(iii), allowing Packing Group I-tested packagings to contain Packing Group II and III materials when they do not exceed stated specific gravity limits, are consistent with UN recommendations linking package design types with the relative densities of the materials they are intended to contain. However, to remove perceived inconsistencies between the permitted use conversions and the general gross mass standard for solids, paragraph (b)(2) is revised as follows, "Except as otherwise provided in this section, a single or composite non-bulk packaging may not be filled * * *" RSPA is accepting a petition from HMAC to allow heavier solids in packagings rated for higher hazard level liquids, if they meet the specific gravity limits in paragraphs (b)(1)(i), (b)(1)(ii), and (b)(1)(iii). Paragraph (b)(3) is revised accordingly.

One petitioner asked RSPA to re-evaluate the requirement in paragraph (c)(1)(iii) that corrosive materials in bottles be further packed in closed inner receptacles before packing in outer packaging "because it conflicts" with UN Recommendations and ICAO requirements. This petition is not accepted because there already is an exception in § 173.161 for corrosive materials in chemical kits that is consistent with UN Recommendations and ICAO.

Section 173.24b. The five percent outage specified in paragraph (a)(3) for insulated and uninsulated tanks containing Division 6.1 Packing Group I liquids poisonous by inhalation was disputed by one petitioner who claimed "there is no need for an outage requirement above two percent." The petitioner said that over a period of a year, a five percent outage requirement would result in added shipments of these materials "increasing cost and risk due to the extra shipments." RSPA believes the provision is needed to reduce the potential of bulk packages containing poison by inhalation liquids from becoming liquid full in transportation and notes that the petitioner did not provide justification, based on safety considerations, for reducing outage to two percent. Therefore, the five percent outage requirement is retained.

HMAC recommended revising paragraph (d)(2) by removing the density of a material as a factor in determining the maximum weight of lading permitted in a bulk packaging. HMAC said, "In practice, volume is usually the variable that is adjusted to achieve correct lading weight." RSPA agrees and is revising paragraph (d)(2) by removing the phrase "due to its density."

Section 173.25. Paragraph (c) pertaining to poisons being transported in the same motor vehicle with foodstuffs, feed or other edible material, is revised to require a "liquid-tight and dustproof" overpack as specified in § 177.841(e) or in an overpack "which is a UN 1A2, 1B2 or 1N2 drum tested and marked at least for the Packing Group II performance level."

Section 173.28. RSPA reviewed 33 petitions for reconsideration addressing non-bulk package reuse requirements. Eight petitioners urged RSPA to align the 43 kPa (7 psi) leakproofness test requirement before reuse in paragraph (b)(2)(i) with the leakproofness test recommended by the UN and adopted for new drums in § 178.604 of up to 30 kPa (4 psi). Two petitioners asked RSPA to except steel drums in controlled distribution from the test. PDI asserted that the 7 psi test may be suitable for steel drums but is excessive for plastic packagings. PDI claimed that when plastic drums are pressurized to 7 psi, "they are severely deformed." However, The Association of Container Reconditioners-NABADA urged RSPA to retain the 7 psi test, contending that UN recommendations for the leakproofness testing of new drums "are set too low" to adequately detect leaks before reuse.

RSPA is denying petitions to except packaging from the leakproofness test before reuse in controlled distribution or on the basis of special package construction or capacity rating because petitioners offered insufficient data to justify taking such action. Petitioners offered no evidence, for example, that closed distribution systems would eliminate normal transportation stresses on reused drums that may lead to metal fatigue, abrasion of plastic material, denting and puncturing.

In principle, RSPA believes that leakproofness testing prior to reuse, or after reconditioning, provides a verifiable check that drums intended to be reused under normal transportation conditions are capable of maintaining the integrity to which they were originally certified. Thus, noting that the vapor pressure of some Packing Group I materials often exceeds 7 psi, RSPA is requiring reused drums intended to contain Packing Group I materials to withstand a leakproofness test of at least 7 psi. For drums intended to contain materials of lesser hazard that often present significantly less vapor pressure in normal transportation, RSPA is revising paragraph (b)(2)(i) to require the 20 kPa (3 psi) test specified for PG II and III materials in § 178.604(e) (2) and (3) for new drums. RSPA believes 3 psi is an appropriate level of leakproofness testing to avoid distortion of thinner-walled packaging.

RSPA is revising marking provisions in paragraph (b)(2)(ii). Drums reused without reconditioning must be marked with the letter "L" for a drum that successfully passes the leakproofness test specified in paragraph (b)(2)(i), the name and address or symbol of the person conducting the test, and the month and last two digits of the year the test was conducted. This marking conforms, in part, with sections 9.5.4(i) and (j) of the UN Recommendations addressing reconditioner certification. It is a certification that a person who reuses a drum without reconditioning has complied with the requirements of this section.

Eight petitioners opposed requirements in paragraph (b)(4) that metal and plastic drums and jerricans or the outer packagings of composite packagings must meet minimum thickness requirements marked in millimeters on drums intended for reuse. RSPA denies these petitions to remove minimum thickness requirements for the reasons given in the December 21, 1990 final rule (see page 52428).

RSPA accepts suggestions from several plastic package manufacturers to add minimum thickness table entries for 30 and 60 liter plastic drums and retain current minimum thickness requirements for the DOT specification 34 polyethylene drum. Therefore, minimum thickness standards for plastic packagings are revised as follows: 20 liters (L), 1.1 mm (0.03 inch); 30L, 1.1mm (0.03 inch); 60L, 1.8 mm (0.071 inch). Minimum thicknesses for 30L and 60L metal packagings are 0.7 mm (0.028 inch) and 0.9 mm (0.035 inch) respectively. Requirements for 40L, 120L, 220L and 450L plastic and metal packagings remain as specified in the final rule. RSPA also is revising the heading of column 1 of the table of minimum thicknesses in paragraph (b)(4) to indicate "Maximum capacity" which better describes the capacity of a packaging to be completely filled with liquid, and to be consistent with references to "maximum capacity" throughout the final rule, particularly within the manufacturing standards.

Several petitioners objected to the introduction to paragraph (b)(4), requiring drums authorized for reuse to be marked in millimeters with the minimum thickness of the packaging material without also requiring that this mark be made permanent. One petitioner asserted that not requiring a permanent thickness mark on a drum intended for reuse would oblige a person to physically measure that drum against a minimum thickness standard and to re-mark it after each trip throughout the reuse process. RSPA agrees, and is revising the introduction to paragraph (b)(4) by incorporating language from section 9.5.2 of the UN Recommendations stating that the mark indicating package material thickness on drums intended for reuse should be applied in a permanent form (e.g. embossed).

RSPA rejects assertions from several petitioners that a minimum thickness requirement for plastic inner receptacles "is unnecessary" because the strength and durability of a composite packaging "is not derived from the inner liner." RSPA believes that inner plastic packagings are vulnerable to such damage as creasing or puncturing during loading or unloading. PDI also pointed out that very few existing reusable composite drums with liners meeting paragraph (b)(5) requirements are available. In corrections to Docket HM-181, RSPA is retaining a thickness standard for inner plastic liners. However, it is revised to 1.0 mm (0.039 inch) to ensure the ready availability of this inner packaging, by permitting use of a DOT 2SL-type liner.

Section 173.31. Requirements for manway covers are relocated from §§ 173.242 and 173.243 to new paragraph (a)(8).

Section 173.32. HMAC's petition recommending a revision to paragraph (a)(6) authorizing an unlined DOT 51 portable tank constructed of stainless steel to be used in place of a lined DOT 60 portable tank is denied because there is not sufficient justification for taking this action.

Section 173.32b. For international consistency, two petitioners requested a revision of paragraph (b) to allow the two-and-a-half year visual inspection of IM portable tanks to be carried out within three months before or after the specified date. This revision was not proposed in Notice 87-4 and is considered beyond the scope of the final rule.

Section 173.32c. Six petitioners objected to the filling density requirements for portable tanks contained in existing § 173.32c(j) and urged RSPA to remove this requirement. Paragraph (j) specifies that IM portable tanks or compartments with a volume greater that 1,900 gallons may not be loaded to a filling density less than 80 percent by volume. Petitioners asked why RSPA is imposing minimum filling density requirements on portable tank users and not on cargo tank users. One petitioner claimed that the "loading of

VOL 56 ISS 245 DEC 20 1991 UMI

highway cargo tanks at more or less than 80% full has never been required," and that "cargo and portable tanks are very similar in their use and operation." Other petitioners added that there is no evidence to support the 80 percent rule. They recommended that portable tank loading should be regulated as not exceeding maximum gross weight, capacity or approved temperature range as shown on certification plates. Although these comments may or may not be valid, paragraph (j) was not addressed in Notice 87–4, and is not germane to this final rule. Therefore, the petitions are denied.

In addition, RSPA is adding a new paragraph (q) to address insulation requirements for IM portable tanks containing molten materials.

Section 173.33. HMAC suggested a revision to paragraph (f), to state that if a higher integrity tank is constructed of stainless steel, lining should not be required. RSPA believes there is insufficient justification for taking such action. The majority of MC 331 cargo tanks are not made of stainless steel.

Section 173.40. Two petitioners asserted that paragraph (c)(2) requiring that the valve assembly on cylinders intended to contain poisonous materials that are also corrosive "be made gas tight by means of a seal cap * * *" would require the retrofit of millions of cylinders in chlorine service. The petitioners misunderstand that chlorine is not subject to this section. Packaging requirements for chlorine are contained in § 173.304.

The Compressed Gas Association (CGA) asked RSPA to provide more detail regarding the two-meter drop test specified in paragraph (d)(2) to determine the adequacy of valve protection for cylinders containing poisonous liquids. CGA pointed out that ISO is preparing a detailed standard for valve protection caps and guards and recommends that RSPA adopt that standard as an alternative. RSPA acknowledges that this alternative may be considered, but in the context of a future rulemaking action.

3. Subpart C; Definitions, Classification and Packaging for Class 1

In the preamble to the final rule, RSPA stated that in order for an explosive that had been approved under the old HMR to be transported after October 1, 1993, it would have to be reclassified under the new regulations (i.e., Docket HM–181). In addition, RSPA stated that it would provide, upon request, such reclassification. However, RSPA went on to say that all existing explosive competent authority approvals will become invalid on October 1, 1993. This last statement was incorrect. Explosive competent authority approvals will not become invalid on October 1, 1993. Such approvals will remain valid until further notice. In addition, any explosive material that has received a competent authority approval is not required to be reclassed because the approval already provides the new classification for the explosive material.

Several petitioners were concerned over the removal of the entry "ammunition, non-explosive" from the § 172.101 Table. Petitioners stated that if this entry is not retained that their non-hazardous commodities would have to be shipped as Division 1.4 materials. RSPA removed this entry from the § 172.101 Table because an explosive material that is correctly determined to be non-explosive would not be subject to the HMR unless the material meets another hazard class definition. RSPA does not believe that it is necessary to add a section to the HMR that states that if a material does not meet the definition of an explosive that the material is non-explosive. Therefore, RSPA is denying these petitions.

Section 173.50. Several petitioners requested that the 25 gram limitation placed on Division 1.4 devices be removed. Petitioners stated that the limit is arbitrary and inconsistent with the UN Recommendations and that materials that meet the tests for Division 1.4 materials should be classed as a 1.4 material without regard to quantity. Upon further review, RSPA is removing the 25-gram limitation on Division 1.4 materials. RSPA also is revising the definition of Division 1.4 to include substances and devices. As part of the approval process, RSPA will review very closely any device that contains over 25 grams of explosive material and that is recommended for Division 1.4. In addition, RSPA will not allow any such items to be classed by analogy; the devices must be subject to the appropriate tests. This administrative requirement will also be imposed on items that have been approved by a foreign competent authority.

One petitioner objected to the classification of PETN with not less than 25% water as a Division 1.1A material. The petitioner stated that this material should be classed as a 1.1D material as in the UN Recommendations. The petitioner stated that to classify PETN on the basis of the sensitivity level of dry PETN is not correct and that foreign manufacturers have been shipping water-wetted PETN safely for a long time. RSPA is classifying PETN as an initiating explosive, Division 1.1A material, because RSPA has test data to indicate that PETN wetted with 25% water gave positive test results on the UN Test 3(b)(i), BAM Friction Test.

Section 173.56. One petitioner requested that explosives approved by another foreign competent authority be allowed for transportation within the U.S. without further approval from RSPA. RSPA believes that the requirement for a U.S. approval, which existed prior to the amendments promulgated under Docket HM–181, is necessary to ensure the safe transportation of explosive materials in the U.S. Though RSPA accepts approvals issued by foreign competent authorities as the basis for an explosive approval within the U.S., RSPA reserves the right to reject any foreign approval. RSPA believes that the hazards associated with Class 1 materials are so great as to require this degree of government oversight. Therefore, RSPA is denying this petition.

Section 173.62. One petitioner requested that the particular packaging requirement "D13" be amended to state "end closures may be formed from the body material." The petitioner stated that this will allow the continued use of the DOT 23G specification packaging. RSPA does not believe that this change is necessary because as long as the 23G can meet the requirements for a 1G packaging, the 23G will continue to be authorized. Therefore, RSPA is denying this petitioner's request.

Several petitioners requested that numerous packagings be added to several of the packing methods in § 173.62. These packagings, however, are not currently authorized by the UN Recommendations. Therefore, RSPA finds this petition out of the scope of this correction document and denies these petitioners' request. One petitioner requested that the packaging exception provided for government-owned munitions in the Annex to the IMDG Code be incorporated into the HMR. RSPA concurs and has added this exception as paragraph (e) to § 173.62.

Several petitioners requested that Class 1 materials that are sent to packing method E–146 be allowed to be transported under packagings approved by the Associate Administrator for Hazardous Materials Safety. The petitioners stated that this would be in conformance with the UN Recommendations. RSPA agrees and is amending packing method E–146 to authorize the packagings that were noted in the final rule and any packaging approved by the Associate Administrator for Hazardous Materials Safety.

Section 173.63. In this section, RSPA is removing paragraphs (d) and (e) which

specified the conditions under which articles installed with igniters or initiators can be shipped when in the propulsive state. RSPA believes that such articles, which must comply with § 173.62(b)(5) and which states that all explosives shipped in the propulsive state must be protected from accidental initiation, should be allowed to be transported if they are transported in compliance with the general and applicable requirements of the HMR. Concerns for specific articles that could be shipped in the propulsive state can be handled through the approval process.

4. Subpart D; Definitions, Classification, Packing Group Assignments and Exceptions for Hazardous Materials Other than Class 1 and Class 7

Section 173.115. Paragraph (a) is reorganized to clarify the definition of Division 2.1 flammable gas. In response to two petitions, RSPA is revising paragraph (c)(2) to refer to the formula in § 173.133(b)(1)(i) for determining LC50 values for gas mixtures. RSPA also is clarifying that the criteria in paragraph (c) for materials classed in Division 2.3 specifically refer to "gases poisonous by inhalation" which are subject to additional hazard communications and packaging requirements in Parts 172 and 173. In other words, by definition in this section, any Division 2.3 material is also a poison by inhalation hazard material assigned Hazard Zones A through D.

Section 173.120. Several petitioners urged RSPA to remove the combustible class definition in paragraph (b)(1) and the combustible reclassification option in paragraph (b)(2). AAR and other petitioners asserted, as they did in comments to Docket HM–181, that the domestic combustible liquid classification introduces unneeded regulatory complexity, violating the stated aims of the final rule to simplify the HMR. AAR contended that the reclassification option will confuse rail personnel "who prepare shipping documents based on data submitted by a large number of shippers." AAR said the reclassification option will also confuse emergency responders confronted with identical commodities having different hazard classifications.

One petitioner pointed out that materials with flash points of 73° F or higher are presently excepted from specification packaging when shipped in non-bulk containers (§ 173.118(b)), so the option in paragraph (b)(2) offers little to shippers while "violating the principle of consistent hazard communication for these materials." AAR said there are other ways to distinguish between liquids below 100° F and those at or above 100° F. For example, AAR suggested that RSPA could exempt liquids with flash points above 100° F from all regulations or adopt AAR's proposed red over white placard for all Class 3, Packing Group III materials to distinguish between high and low flash point liquids.

RSPA disagrees with petitioners who would eliminate the combustible class altogether, believing that the significant number of domestically regulated materials with flash points between 38° C (100° F) and 93° C (200° F) cannot be ignored. RSPA believes that widespread shipping and in-transit storage practices, geared to the present flammable liquid definition, would be unnecessarily disrupted by another revision of the flammability range for liquid materials. This is both a safety and an economic issue. The reclassification option in paragraph (b)(2) maintains existing domestic practices in effect since 1974 when the Materials Transportation Bureau established the present domestic flammability range under Docket HM–102. In practice, RSPA does not anticipate that companies will extensively choose different flammable/combustible descriptions for domestic shipments. Some initial confusion will ensue as a result of allowing the option, but over the two-year transition period (to October 1, 1993) provided for conversion to the new hazard communication and classification system, carrier personnel, emergency responders, enforcement personnel and others are expected to adapt to the new system.

RSPA is revising paragraphs (b)(1) and (b)(2), defining combustible liquid and offering the reclassification option, by adding the phrase, "* * * that does not meet the definition of any other hazard class, except Class 9." Confusion still exists when a combustible liquid is also a hazardous substance or waste which, under Docket HM–181, are classed as Class 9 materials. The revisions to (b)(1) and (b)(2) make it clear that a flammable liquid can be reclassified as a combustible liquid if it meets no other hazard class, except Class 9. However, according to the precedence of hazards ranking in § 173.2a(a)(9), combustible liquids are ranked over materials classed as Class 9. Therefore, a combustible liquid that is also a hazardous substance or hazardous waste is classified a combustible material and is authorized to be packaged in a strong, tight non-bulk or bulk packaging, subject to the requirements in § 173.150(f)(3).

RSPA also is revising the combustible liquid reclassification option provided in paragraph (b)(2) to state that this option does not apply to materials being offered for air or vessel transportation unless other means of transportation are impracticable (e.g., air service to remote areas inaccessible to highway or rail transport).

One petitioner asked RSPA to delete or more fully justify the second test referred to in paragraph (c)(2) for determining the flash point of mixtures. This [second] test "is counterproductive," the petitioner asserted. "It is costly and time consuming to produce results which might not represent the material being shipped." Revisions to Class 3 testing methods were not proposed in Notice 87–4 and are beyond the scope of the final rule. However, RSPA may address changes in Class 3 test methods in a future rulemaking.

Section 173.124. One petitioner advised RSPA to delete the term "or toxic" from the definition in paragraph (c) of a Division 4.3 (Dangerous when wet) material because it is inconsistent with the definition in the UN Recommendations which refers only to the emission of "flammable gases" when a Division 4.3 material is in contact with water. However, RSPA considers the potential evolution of toxic gases as one of the properties of a Division 4.3 material; therefore, the definition in paragraph (c) is retained in the final rule. HMAC agreed that materials which meet the criteria of toxic gas "should be regulated in Division 4.3," and asked RSPA to petition the UN to include these materials in the UN Recommendations. Consequently, RSPA plans to make that proposal to the UN during the 1991–92 sessions of the Committee of Experts.

Section 173.126. Petitions requesting that 70 produced organic peroxides and formulations not yet tested for generic UN classification be listed separately for domestic shipment only, based on existing test data, are addressed in § 173.225.

Section 173.132. RSPA is adding a sentence to paragraph (a)(1) encouraging the use of test data reported in the chemical test literature as an alternative to conducting tests with laboratory animals whenever possible.

One petitioner asserted that the limit of inhalation toxicity for dusts and mists in paragraph (a)(1)(iii) of not more than 10 mg/L "is unrealistically high." The petitioner contended that "it is difficult to maintain a concentration of dust or mist over 1 mg/L" and recommended that the UN Committee of Experts establish "a lower, more practical concentration level of dusts and mists." RSPA agrees that a better standard

VOL 56 ISS 245 DEC 20 1991 UMI

could be devised and encourages HMAC or individual companies to develop a protocol for presentation to the UN Subcommittee of Experts.

Section 173.133. RSPA revising paragraph (a)(2) to specifically address packing groups and hazard zone assignments for liquids based on the inhalation of vapors. Note 2 to the revised table of hazard zone and packing group assignments clarifies that a liquid classed in Division 6.1, meeting criteria for Packing Group I, Hazard Zones A or B in paragraph (a)(2), "is a material poisonous by inhalation" subject to additional hazard communication requirements in part 172. In other words, by definition in this section, a liquid material poisonous by inhalation is assigned Packing Group I, Hazard Zones A or B.

RSPA also is correcting Figure 1, which graphically displays packing group and hazard zone assignments for both Division 2.3 and 6.1 materials, by deleting Hazard Zones C and D applied to liquids. In paragraph (b)(1)(ii), RSPA is revising the definition for the partial pressure of the i/th component in the formula for estimating the volatility of components in poison mixtures. In the final rule, RSPA neglected to include the reference temperature and pressure of 20C and one atmosphere (atm) respectively.

Section 173.134. In a petition for reconsideration, the National Solid Wastes Management Association (NSWMA) recommended that RSPA revise the definition for infectious substances (etiologic agents) to exclude solid waste or medical waste as defined in 40 CFR 259.10 of the EPA's regulations. The petition was filed under the final rule for Docket HM–142A (56 FR 197, January 3, 1991). On February 22, 1991 (56 FR 7312), RSPA delayed the effective date of the final rule to September 30, 1991, to provide more time to evaluate the petition. In a meeting to obtain clarification of the petition, the NSWMA urged RSPA to reestablish the 50 ml exception for infectious wastes. The NSWMA stated that RSPA's approach to transporting medical waste was inconsistent with the approach taken by other Federal agencies, notably the EPA, and would significantly increase the cost of transporting medical waste for the regulated community, including not-for-profit and small business entities. The NSWMA stated that, contrary to RSPA's preamble discussion in Docket HM–142A that most infectious waste did not contain etiologic agents or was treated on-site to destroy the agent before being transported for disposal, substantial quantities of medical waste are transported off-site for treatment. In support of its statement, the NSWMA noted a statement in EPA's Medical Waste Management in the United States: Second Interim Report to Congress (December 5, 1990, page 34) that only 2 percent of the regulated medical waste shipped off-site (29,600 tons) during the first six months of the EPA's demonstration program was treated prior to shipment. EPA's regulations on medical waste in 40 CFR Part 259 applied in only five States and expired on June 22, 1991, with the end of a two-year demonstration program that EPA established to fulfill its mandate under the Medical Waste Tracking Act of 1988 (MWTA; P.L. 100–582). The MWTA has not been extended. RSPA agrees with the NSWMA that medical waste should be treated differently than most infectious substances.

Docket HM–142A established a definition and packaging provisions for infectious substances and was to serve as a transition to Docket HM–181. On September 18, 1991, RSPA incorporated HM–142A into HM–181 [56 FR 47158]. In addition, in partial response to the NSWMA's request, RSPA extended the 50 ml exception for cultures of infectious substances (etiologic agents), from October 1, 1991, to until October 1, 1992. RSPA anticipated this extension would provide enough time to fully respond to the NSWMA's comments in this correction document. However, after publication of the document in the **Federal Register**, the NSWMA submitted a September 26, 1991 letter asking that RSPA clarify by letter or interim rulemaking that the January 3, and September 18, 1991, final rules "apply to only isolated cultures or stocks such as clinical laboratory specimens and not to 'medical waste' as defined in 40 CFR 259.10(b), 'regulated medical waste' as defined in 40 CFR 259.30(a), and 'mixtures' as defined in 40 CFR 259.31." Because RSPA was unable to publish this correction document in time to respond to the petitioner's substantive concerns, RSPA issued another partial response [56 FR 49830, October 1, 1991] extending the compliance date for hazard communication and classification requirements for all infectious substances until October 1, 1992.

In this correction document, RSPA is revising the requirements pertaining to infectious substances to define and specify more appropriate requirements for regulated medical waste. The definition of a "regulated medical waste" added to appendix G to part 173 is essentially the same definition contained in the former EPA regulations in 40 CFR part 259 and is supported by industry in their recommended guidelines.

As defined in this final rule, "regulated medical waste" includes cultures and stocks of infectious agents, pathological wastes such as human tissues and organs, human blood and blood products, sharps (e.g., discarded hypodermic needles, suture needles, scalpel blades, and blood vials), animal waste such as contaminated carcasses, and biological or contaminated materials from humans and animals.

Since the majority of these wastes are untreated and, thus, may potentially contain infectious substances, RSPA strongly believes that the public and transport personnel be protected from the hazards of these materials during transportation. The packaging requirements for these wastes are consistent with those contained in the former EPA regulations and are used in some States. For a discussion on these requirements, refer to preamble discussion to § 173.197.

After October 1, 1992, shipments of these materials must be accompanied by shipping papers. The packages must be marked "Regulated medical waste" and with the identification number "NA 9275" in accordance with § 172.301, and have affixed the INFECTIOUS SUBSTANCE label prescribed in § 172.432.

Section 173.136. Two petitioners noted that RSPA uses the existing definition of a corrosive material in § 173.240 to define a Class 8 material in paragraph (a), but uses the UN definition of a Class 8 material throughout § 173.137 for assignment of Class 8 packing groups. RSPA currently defines a corrosive material as causing "visible destruction or irreversible alterations in human skin tissues." The UN defines Class 8 material as causing "visible necrosis of the skin tissue." RSPA was asked to apply consistent criterion for Class 8 in both sections. RSPA agrees and is revising both sections to use the existing language of "visible destruction or irreversible alterations . . ." throughout.

HMAC requested a clarification of whether solid materials are addressed in both §§ 173.136 and 173.137, noting that the term "liquids" is used in § 173.136(a)(2) and "substances" is used in § 173.137(c) which implies both liquid and solid materials. Metal corrosion applies only to liquids. The use of the term "substances" in § 173.137(c) is correct because, in these sections, "corrosive material" covers both liquid and solid states.

Section 173.137. A petitioner claimed that under this section, up to three times as many animals could be required in the test specified in this section to determine an appropriate packing group. The petitioner referred to existing requirements (in Appendix A to part 173, paragraph 8) for a "go-no go" test for corrosivity based on a protocol using six test animals. "Since testing (under Docket HM–181) is no longer a 'go-no go' test, it will be harder . . . to not only classify but determine the Packing Groups of similar materials." The petitioner is correct, but under Docket HM–181 no alternative protocol was proposed for Class 8 materials. However, the UN is expected to review this issue in the 1991–92 sessions of the Committee of Experts.

Section 173.140. For clarification, RSPA accepts HMAC's petition to revise the definition of a Class 9 material in paragraph (a) to read, ". . . a material which presents a hazard during transportation, but which does not meet the definition of any other hazard class."

Section 173.150. Asserting that most Division 6.1 Packing Group III materials were previously unregulated, a petitioner requested that RSPA allow Class 3 materials that also meet Division 6.1 Packing Group III criteria to be transported under the limited quantity provisions in paragraphs (b) and (c). This petition is not accepted because RSPA intended to exclude all materials exhibiting subsidiary hazards from qualifying for the limited quantity provisions in this section—except Class 9 materials. RSPA believes there is no justification for singling out the Division 6.1 Packing Group III category for the Class 3 exception. Furthermore, in the final rule, RSPA is imposing more stringent hazard communication and packaging requirements for all poisonous liquids.

Several petitioners, including HMAC, advised RSPA to delete paragraph (f)(1), claiming that the combustible liquid exception in § 173.120(b)(2) and (f)(1) is inconsistent with RSPA's objective to align U.S. rules with UN Recommendations. They said the exception will create a dual classification system and promote inconsistencies between product information sources. For reasons stated above regarding petitions to reconsider § 173.120(b) (1) and (2), RSPA has determined not to delete the domestic combustible liquid exception. AAR points out that § 173.120(b)(2) permits a liquid with a flash point above 100F to be reclassified a combustible liquid if it meets the definition of no other hazard class. But when this reclassification is restated in paragraph (f), no reference is made to other hazard classes. Accordingly, paragraph (f)(1) is revised by adding the phrase "* * * that meets no other hazard class except Class 9."

Three petitioners asked RSPA to delete paragraph (f)(4)(iii) stating that the combustible liquid exception does not apply to materials offered for transportation at a temperature at or above its flash point. They asserted that this provision, addressed in HM–198A, is beyond the scope of the final rule. However, RSPA is maintaining paragraph (f)(4)(iii) because materials shipped in this manner can produce vapors presenting a hazardous ignition source, and must therefore be regulated.

Section 173.152. Two petitioners suggested revising paragraph (b)(1) to provide a 10–pound exception for domestic shipments of Packing Group II oxidizers in strong outer packagings. The petitioners cite two basic products that have been shipped for years in small containers (10 pounds or less) without incident. They say there is no evidence that 2.2–pound shipments provide a greater level of safety than 10–pound shipments. However, a 10–pound exception was not considered under Docket HM–181 and is beyond the scope of the final rule.

Section 173.153. COSTHA urged RSPA to broaden Division 6.1 exceptions to include PG II poison materials and to provide a POISON or KEEP AWAY FROM FOOD labeling exception for combination packagings meeting the selective testing criteria for the so-called "Superpack" in § 178.601(g)(2). In effect, this would retain hazard communication exceptions in COSTHA's current "Poison Pack" exemptions. COSTHA asserted that the absence of a Division 6.1 labeling exception seriously obstructs the domestic distribution of poison materials. Highway carriers, including fast freight and parcel delivery services, refuse to accept packages bearing POISON or KEEP AWAY FROM FOOD labels. Shippers thus experience shipping delays and large surcharges for special pickup service by common carriers of small volume shipments.

RSPA declines to generically expend the exception provided in paragraph (b) to Division 6.1 Packing Group II materials because the objective in the final rule is to fully regulate these materials, especially when shipped with foodstuffs. RSPA points out that there is no basis in existing regulations to grant a labeling exception to Division 6.1 Packing Group II materials. In the existing HMR, poison B liquids, equivalent in degree of hazard to Packing Group II poisons, are subject to labeling requirements. COSTHA's proposal also is inconsistent with UN recommendations and ICAO requirements. In section 6.7, the UN recommends that substances "marked or known to be poison in Packing Groups I, II, III should not be carried in the same * * * conveyances with substances marked or known to be foodstuffs * * *" ICAO requires the POISON label for PG I and II poison liquids and solids and the KEEP AWAY FROM FOOD label for PG III poison liquids and solids. Therefore, labeling exceptions for Division 6.1 Packing Group II poisons will continue to be subject to the exemption process.

Section 173.154. Paragraph (d) is revised to correspond with the existing § 173.245(b). It states that Class 8, Packing Group III materials that are only corrosive to aluminum or steel are excepted from the HMR "when transported by rail or highway in portable tanks, cargo tanks and tank cars constructed of materials that will not react dangerously or be degraded by the corrosive material."

Section 173.155. RSPA is revising paragraph (b) to add a labeling exception to the exceptions provided for limited quantities of miscellaneous materials in Class 9. The labeling exception was inadvertently omitted in the final rule.

Section 173.156. RSPA accepts two petitions requesting removal of the 30 kilogram (66 pound) package gross weight limitation pertaining to limited quantity packaging when applied to domestic-only shipments of ORM-D materials. This would allow ORM-D materials now commonly shipped in stretched-wrapped floor display stands or wire bound shrouded pallets exceeding 30 kg gross weight to continue to be transported that way. Paragraph (b) thus is revised to remove the package weight restriction if ORM-D materials are shipped by a private or contract motor carrier—or by a common carrier vehicle under exclusive use for such service—from a distribution center to a retail outlet.

5. Subpart E: Non-bulk Packaging for Hazardous Materials Other Than Class 1 and Class 7

Section 173.158. Responding to a petitioner's request, RSPA is authorizing a combination packaging with a 4G fiberboard outer packaging for nitric acid of 80 percent or greater concentration. This is consistent with the IMDG Code which allows a 4G outer packaging for all concentrations of nitric acid.

VOL 56 ISS 245 DEC 20 1991 UMI

Section 173.164. A petitioner asked RSPA to revise paragraph (b)(1) to be consistent with Packing Instruction 605 of the ICAO Technical Instructions for manufactured articles containing mercury. This revision would maintain a current exemption excepting mercury shipped in articles from regulation under certain conditions. The petitioner claimed that, "to date, we are not aware of any loss of contents during transportation in connection with this exemption." RSPA accepts this petition and is adding a new paragraph (b)(2) excepting from the requirements of this subchapter, "thermometers, switches and relays, each containing a total quantity of not more that 15 grams of mercury if they are installed as an integral part of a machine or apparatus and so fitted that shock or impact damage" leading to a leakage of mercury is unlikely to occur.

Section 173.173. The National Paint and Coatings Association, HMAC and other petitioners reasserted positions taken in comments to Docket HM–181, urging DOT to except five-gallon DOT Specification 37 open head pails from Subpart M testing. They claimed that the extensively used open-head five-gallon Specification 37 pail cannot pass the Packing Group II drop test, forcing them to use the substantially more expensive Specification 17H packaging that can pass the test. One petitioner recommended a new paragraph (c) authorizing metal drums not over 30 liters and capable of passing Packing Group II tests with solids for Packing Group II or III paint and paint related materials.

Other than citing cost impact, petitioners offered no justification stating why they cannot use packagings capable of meeting the minimum performance levels specified in parts 173 and 178. A number of incidents involving failure of open head five-gallon steel containers have been reported to RSPA. For example, HMIS data shows that between January 1, 1986 and January 1, 1991, 210 five-gallon Specification 37A containers failed during loading/unloading operations or in transportation, many involving shipments of paint and paint related materials. Incidents included failures of welds and seams, closures and basic packaging material. As stated in the preamble, RSPA believes the five-year transition (to October 1, 1996) provided for conversion to UN performance standards gives the paint industry ample time to develop cost-effective packaging capable of passing subpart M tests. Addressing another issue, RSPA is revising paragraph (a) to include "drying" compound among the substances included in the definition of "Paint related material."

Section 173.181. Several petitioners requested revisions to paragraph (c) to liberalize packaging authorizations for pyrophoric materials. Consistent with long-standing shipping practices, another petitioner suggested revisions to paragraph (c) authorizing glass inner bottles in strong tight, firmly cushioned metal cans further packed in fiber drums. Accordingly, paragraph (c) is revised to read, "Steel drums (1A2) or fiber drums (1G) * * * with inner strong tight metal cans * * *." One petitioner recommended that RSPA eliminate references to certain types of metal construction or material thicknesses for inner packagings, for example, specifying metal inner cans constructed of "electrocoated tin plate material not less than 0.015 inch thick," or requiring "tin plate" instead of "metal" separators between each layer of inner containers. RSPA agrees and is revising paragraphs (c) and (c)(3) to remove those specific references.

Section 173.185. The exemption (DOT E–7052) authorizing the shipment of lithium batteries is incorporated into this section and will be terminated on September 30, 1993. Rechargeable lithium batteries and devices or equipment containing lithium batteries may continue to be offered under the terms of the exemption. However, those rechargeable lithium batteries and devices or equipment containing lithium batteries not acknowledged in writing by the Office of Exemptions and Approvals by September 1, 1991 must be approved and shipped in accordance with the requirements in this section. In addition, the devices and equipment containing lithium batteries and rechargeable lithium batteries being shipped under DOT E–7052 must be reidentified in accordance with this section by September 30, 1993.

Consistent with ICAO classification, paragraph (a) is revised to include shipments of "lithium batteries and cells contained in equipment" as requiring approval by the Associate Administrator for Hazardous Materials Safety. RSPA also accepts a petitioner's request to add a new paragraph (k) permitting lithium batteries or cells discharged to below 2 volts to be shipped for testing purposes by highway only. A petitioner's recommendation that RSPA except liquid cathode lithium batteries containing up to one gram of lithium or lithium alloy from regulation is beyond the scope of the final rule.

Section 173.188. Three petitioners, including the Chemical Manufacturers Association (CMA), requested a revision to paragraph (a)(2) permitting phosphorus to be shipped in closed head steel drums (1A1) with capacities of up to 250 liters (66 gallons) and open head steel drums (1A2) with capacities up to 115 liters (30 gallons). They said this would allow use of 55 gallon specification 17C and UN 1A1 drums now authorized in DOT E–7753 for phosphorus shipments. CMA's request also is aligned with CA–910236 permitting international shipments in UN 1A1 drums not exceeding 250 L capacity. RSPA accepts this petition and is revising paragraph (a)(2) accordingly.

Section 173.193. Four petitioners objected to the 250 pound cylinder size limit contained in paragraph (b) and urged RSPA to remove it. They claimed that the cylinder capacity limitation "is not necessary or justified" for these materials, especially for methyl bromide. Petitioners pointed out that requirements for methyl bromide in existing § 173.353 impose no cylinder capacity limit. They said the cylinder size limitation also is inconsistent with the approach RSPA has taken regarding materials poisonous by inhalation packaged in cylinders. Section 173.40 contains no cylinder capacity limits, nor do §§ 173.302, 173.304 and 173.305 for compressed or liquified gases in Hazard Zones A and B. RSPA agrees that the water capacity limit for cylinders should not apply to methyl bromide and is revising paragraph (b) to state that exception.

Citing a long-standing and safe shipping practice, one petitioner asked RSPA to continue to allow methyl bromide and chloropicrin mixtures to be shipped in small packages. Accordingly, RSPA is adding a new paragraph (c) authorizing combination packaging with inside metal cans containing not over 1¾ pounds each of methyl bromide mixtures with up to two percent chloropicrin.

Section 173.197. This section has been added to specify packaging requirements for medical waste. These requirements are effective on October 1, 1992. In paragraph (a), RSPA is providing for the use of packagings conforming to the requirements of part 178 of this Subchapter at the Packing Group II performance level. Paragraph (b) requires that the packagings be capable of passing the testing requirements contained in subpart M of part 178 but excepts the packagings from having to be marked or tested to the UN standards until October 1, 1994. Specifically, the regulations require the use of rigid, leakproof packagings that are impervious to moisture and of

sufficient strength to prevent tearing or bursting under normal conditions of use and handling. Packagings used for medical waste that are sharps (e.g., discarded hypodermic needles, suture needles, pasteur pipettes, scalpel blades, blood vials, culture dishes, and slides), and for fluids in quantities greater than 20 cubic centimeters must meet certain additional requirements. Requiring these packagings to be rigid will preclude the use of double bags not packed in a strong outer packaging. However, RSPA believes the use of rigid packagings offers a more adequate level of safety to the public and transport personnel. This action will provide uniform Federal regulation of regulated medical waste in transportation.

Sections 173.202, 173.203; 173.211 through 173.213. Ten petitioners asked RSPA to add single package authorizations to the generic non-bulk packaging sections for liquids and solids. Among them, the Fiber Drum Technical Council (FDTC) asserted that fiber drums lined with an assortment of plastic, mylar, nylon, polyethylene/oil and other lining materials, strengthened to pass at least the Packing Group II test with liquids, should be authorized domestically for Packing Group II and III liquids and Packing Group I solids. In its petition, FDTC referred to the "1G fiber drum with inner plastic liner" as defined in section 9.6.6.1. of the UN Recommendations. The "lined" 1G fiber drum is distinguished from the "6HG1 composite plastic receptacle with outer fiber drum" described in section 9.6.18 which is authorized internationally for most liquids and solids.

FDTC claimed that fiber drums constructed with linings impervious to various liquid ladings provide better barrier properties than plastic counterparts. They also show good stacking strength and perform better than other packagings in high humidity and temperature environments. FDTC contended there are fewer available polyethylene resin/hazardous material compatibility matches for plastic drums or steel drum coatings. Because single-trip fiber drums can be cost-effectively incinerated, FDTC said they also are a more environmentally acceptable choice of container.

RSPA recognizes that single fiber drums have not been viewed internationally as suitable for transporting liquid hazardous materials because of the high water absorption properties of fiber packaging materials. ICAO and the IMDG Code prohibit use of fiber drums, with or without lining, for corrosive, flammable or poisonous liquids. Under ICAO, fiber drums cannot be used for Packing Group I corrosive or flammable solids, but the lined drum can be used for Packing Group I poison solids. The IMDG Code allows use of the 1G for Packing Group I poison, corrosive and Packing Group II flammable solids.

Based on the extensive, safe domestic use of this packaging for low hazard materials, RSPA believes that lined fiber drums capable of passing at least the Packing Group II performance tests with liquids should be generically authorized for those materials. Special Provision N37 in § 172.102 already authorizes integrally lined fiber drums for such materials as "Compound, cleaning liquid, n.o.s. Packing Group II and III." Consequently, paragraphs (c) in §§ 173.202 and 173.203 are revised to include the lined fiber drum 1G. RSPA also is revising § 173.211(c) to authorize the unlined fiber drum 1G for Packing Group I solids.

A number of petitioners urged RSPA to authorize the 5M1 multiwall paper bag for all hazardous solids in §§ 173.211, 173.212 and 173.213. The Chemical Packaging Committee of the Institute of Packaging Professionals (CPC) noted that existing § 173.365 authorizes the DOT Specification 44D multiwall paper bag for Poison B solids and that bags meeting the 5M1 standard have been successfully used for other solids under various exemptions. COSTHA said that many solids for which packaging in §§ 173.212 and 173.213 is authorized were previously authorized for transport in non-specification packagings, "particularly those in Packing Group III of Division 6.1 and Class 8." COSTHA contended that "safety will not be compromised by authorizing the 5M1 for these materials, provided the bag meets part 178 requirements." HMAC and other petitioners asked RSPA to revise § 173.211(c) to include the water-resistant multiwall paper bag 5M2 for Packing Group I solids.

RSPA notes that the water-resistant 5M2 multiwall bag has gained limited international acceptance. It is authorized by the IMDG Code only for Packing Group II and III Division 6.1 solids. Based on sufficient history of safe shipping, RSPA is authorizing the 5M2 as a domestic exception for all Packing Group II and III solids. However, it has not been adequately demonstrated that multiwall bags which are not water resistant can offer enough protection against moisture leaching in or out of bags containing hazardous solids. RSPA believes the five-year transition period for conversion of most packagings to the performance-based system offers enough time for the industry to improve bag technology. At that time, companies may wish to petition RSPA for a rulemaking with sufficient data to prove a multiwall paper bag 5M1 is an appropriate packaging for hazardous solids.

Section 173.204. Several petitioners asserted that requiring performance-tested packaging for materials previously shipped in non-specification packages is unnecessary and will drive up shipping costs. HMAC and NSWMA both claimed that RSPA has significantly increased packaging requirements for hazardous substances and wastes "when there has been no established history of package failure under current standards" allowing use of strong, tight packaging for substances and wastes meeting no other hazard class. FDTC said that "any packaging suitable for the containment of wastes until disposal should be adequate, especially since the law is clear concerning spills and cleanup." Petitioners suggested that assigning non-specification packaging for these materials under § 173.204 "would maintain today's proven practices," keeping in mind that shippers are still obligated under § 173.24 to offer structurally sound packages for transportation.

FDTC also petitioned RSPA to allow materials now regulated under § 173.249a to continue to be shipped in non-specification packaging. The Council said the non-specification fiber drum now used for cleaning and textile treatment compound liquids, dye intermediates and mining reagents meets National Motor Freight Classification provisions (Item 296), which includes a one-foot drop test, but that this packaging does not pass the 3.9 foot Packing Group II test required for UN certification. FDTC claimed that, over the past 20 years, more than seven million of these drums, valued at over $88 million, have been used safely. "Required use of the 6HG1 plastic-lined fiber composite for many of these materials would result in a $10 per drum or a 60% overall cost increase."

One of RSPA's overall objectives in the final rule has been to improve transportation safety by upgrading package integrity for a number of materials, including hazardous substances and wastes, previously shipped in non-specification packaging. This especially applies to hazardous wastes which too often have been shipped in substandard packagings from waste sites to disposal facilities. Therefore, consistent with international standards, and with certain exceptions

VOL 56 ISS 245 DEC 20 1991 UMI

for waste materials (See § 173.12). RSPA is requiring environmentally hazardous substances and wastes classed in Class 9 to be shipped in packagings meeting at least the Packing Group III performance level.

RSPA is employing the same approach to materials previously regulated under § 173.240a, many of which are consolidated under the "Corrosive liquids, n.o.s." entry and assigned at least Packing Group III packaging. There are very few cases in the final rule where non-specification packaging under § 173.204 is provided, and no provisions are made for non-specification fiber drums. RSPA never intended to except domestically-used fiber drums from the performance standards it adopted. When authorized for use under the UN system, fiber drums must comply with the 1G standard (§ 178.508) and pass the appropriate tests for materials they are intended to contain.

Section 173.224. In response to a petition, RSPA is revising the "Packing Methods for Self-Reacting Materials" chart in paragraph (c) to include "Fiber drum 1G, sift proof" in the "outer packaging" column for the "F5b" entry.

Section 173.225. Several petitioners, including the Organic Peroxides Producers Safety Division (OPPSD) of the Society of the Plastics Industry, urged RSPA to revise paragraph (b) and assign generic UN classifications to 70 unlisted domestically produced organic peroxides and formulations on the basis of limited test data. OPPSD said these materials are transported either under the existing "Organic peroxide, liquid or solution, n.o.s." shipping description or have been tested by the Bureau of Explosives and found to present no hazard. OPPSD added that these 70 products "have been shipped domestically without incident for years." One petitioner asked, "why should many 'old', unlisted, uniquely American organic peroxides and formulations be subject to the battery of UN classification tests prior to DOT approval for transport because there is no provision for them in the European (UN) listing DOT is adopting?" One petitioner added that the generic classification procedure in § 173.128(c) "is potentially burdensome, going far beyond the current process for classifying these materials."

RSPA invested considerable resources over the past five years working with the UN to develop the entire generic organic peroxide classification system and the list presented in the Organic Peroxides Table in paragraph (b). This list was developed from test data provided to the UN working group, including data for many entries from U.S. companies. RSPA continually urged producers, through OPPSD, to check the developing list for new entries, but the response was not positive. As a result, many of the so-called "old" products were not included in the paragraph (b) table. RSPA notes that many organic peroxide compounds and formulations listed specifically by name in the UN table prior to the Sixth edition of the UN Recommendations include U.S.-developed products, not just European products. To address the problem of classifying unlisted products, RSPA suggests that organic peroxides producers submit test data for review and assignment to the appropriate generic types described in § 173.128(b). Producers are encouraged to recommend a more effective mechanism by which a broad range of new formulations can be tested and classed. RSPA believes that over the two-year transition period for conversion to the UN classification system that "old" and new products can be effectively tested and classified.

Responding to a request by OPPSD, RSPA is making a number of editorial changes to the Organic Peroxides Table in paragraph (b), the table of Packagings for Liquid Organic Peroxides in paragraph (d)(1) and the table of Packagings for Solid Organic Peroxides in paragraph (d)(2) for better alignment with UN Recommendations. RSPA also is correcting paragraph (e)(4)(i) by removing the phrase "Type *C*" and inserting "Type B". Thus, samples of untested new organic peroxides or new formulations may be assigned to the generic Type C classification "if the materials pose a level of hazard no greater than that of a Type B organic peroxide."

Two petitioners asked RSPA to revise paragraphs (e)(2) and (e)(3) to permit use of bottom outlets on cargo tanks and portable tanks containing organic peroxides. They asserted that transportation safety would be improved by allowing tanks with bottom outlets. The petitioners claimed that "use of bottom outlets will also facilitate complete unloading of the product with only minimal cleaning." RSPA notes that organic peroxides are assigned to bulk packaging on a case-by-case basis and believes that use of bottom outlets for these materials in portable and cargo tanks cannot be generically established without a thorough safety analysis. However, this issue may be addressed in a future rulemaking if it is based on a sufficient safety analysis.

Section 173.226. Numerous petitions were submitted suggesting changes to §§ 173.226 and 173.227 for the non-bulk packaging of materials poisonous by inhalation, including revised inner and outer package minimum thicknesses, a lower hydrostatic pressure standard for outer drums, a more flexible inner drum closure provision and expanded use of authorized single packaging in dedicated distribution systems. Two petitioners asked RSPA to authorize 16 gauge 1A2 or 1H2 outer packagings meeting Packing Group II performance standards. However, no test or cost data were advanced to support this revision. RSPA accepts several petitions to authorize 16 gauge minimum thickness (0.054 inch) for 1A1 and 1N1 inner packagings over 32 gallons capacity, provided these inner packagings are capable of meeting higher drop test heights or are rated to carry materials of higher specific gravity.

HMAC, CPC and other petitioners urged RSPA to clarify that the 250 kPa (36 psi) hydrostatic test required in § 178.605(d)(3) for Packing Group I liquids does not apply to the outer drum. They claimed that no commercially available open head drum can withstand this test. RSPA agrees that a lower hydrostatic test pressure for open head outer drums is acceptable given that the primary functions of the outer drum are to provide puncture and impact protection to the inner packaging and to contain any poisonous by inhalation hazard material accidentally released from the inner packaging. Therefore, RSPA is revising paragraph (b) to require 1A2 and 1H2 outer drums to withstand the hydrostatic test pressure of 100 kPa (15 psi) specified in § 178.605(d)(1) for Packing Group II liquids. The 550 kPa (80 psi) hydrostatic test pressure specified in paragraph (b)(1) for inner packagings is retained.

Several petitioners recommended revised minimum separation distances between inner and outer drums for the double drum configurations authorized in §§ 173.226 and 173.227. They suggested a "minimum separation of 2.5 cm (1 inch) around the body of the inner drum and at least 2.5 cm on the top and bottom and between inner and outer drums." CMA and other petitioners claimed that, for many years, shippers have successfully used 85-gallon salvage drums with 2.5 cm clearances on sides, top and bottom. "This revision will permit continued use of readily available salvage drums and prevent an unneeded expense in producing and stocking a new drum of larger capacity for a limited number of products." However, no test data has been offered to support this petition. The drum separation requirements in paragraph (b)(5) were not arbitrarily drawn for the final rule. They follow RSPA's 1986 "Guidelines for Packaging Liquids Toxic by Inhalation" and are contained in numerous approvals granted under Docket HM-196.

A petitioner suggested deletion of the requirement in paragraph (c)(2) that inner packagings must have "screw-type" closures. The petitioner contended that there are "better, safer and more effective closures" than the screw-type device required in paragraph (c). RSPA agrees that any closure held in place "by any means capable of preventing back-off or loosening of the closure" is sufficient. Therefore, paragraph (c)(2) is revised by removing the phrase "screw-type closure." This revision also aligns paragraph (c) with section 9.6.2.4 of the UN Recommendations stating that any closure "should be so designed and applied that they will remain secure and leakproof under normal conditions of transport" without specifying a certain type of closure.

Petitions asking RSPA to extend the authorized use of single packagings in dedicated transportation for lower hazard poisonous by inhalation materials (§ 173.227(c)) to Hazard Zone A or B materials are declined because they contravene RSPA's intent in the final rule to impose extraordinary measures to prevent leaks and dispersion of these materials to the atmosphere. Thus, for Hazard Zone A and B materials, the basic double-drum configuration is maintained for all non-bulk transportation.

Section 173.227. Four petitioners requested a revision of paragraph (b) to authorize either 18 gauge 1A2 and 1H2 outer packagings meeting the Packing Group II performance level or a 16 gauge salvage drum equivalent. Other petitioners suggested revising paragraph (b) to allow a 1H2 drum or a 6HA1 composite drum further packed in a 1A2 or 1H2 drum and revising paragraph (b)(3) to add the 1N1 drum to the list of authorized inner packagings. However, no test data was provided to justify taking these actions.

In response to petitioner requests, for reasons given above, RSPA is revising paragraph (b)(1) to require 1A1, 1H2 and 6HA1 outer packagings to withstand the hydrostatic test pressure of 100 kPa specified in § 178.605(d)(1) for Packing Group II liquids.

CMA suggested that RSPA remove either paragraph (b)(2)(ii) requiring a closure to be held in place to prevent backing off, or (b)(2)(iii) requiring a closure to be secured by a cap seal. CMA claimed that requiring a closure that employs both back off protection and a cap seal capable of withstanding 100 kPa would be "a major stumbling block in compliance. There is no current design that would permit installation of back off protection without compromising the cap seal requirement." CMA urges RSPA to require one or the other until a proven combination has been designed and field tested. This petition is not accepted. Two closure manufacturers have indicated to RSPA that paragraph (b)(2) requirements do not constitute serious design problems and can satisfactorily be complied with. Furthermore, specified back off protection and a cap seal capable of withstanding 100 kPa are contained in RSPA's 1986 "Guidelines for Packaging Liquids Toxic by Inhalation" and are incorporated in numerous HM-196 approvals.

A number of petitioners asked RSPA to revise paragraph (c) by adding the 1H1 closed head plastic drum as a single packaging in dedicated transport. They said adding the 1H1 would liberalize the use of plastic single packagings holding prior HM-196 approval—and in cases where poison materials also are corrosive to steel. CMA also cites "satisfactory shipping history of 1H1 plastic drums of phosphorus oxychloride, as well as the favorable experience gained under HM-196 for other products. It is believed that this omission is an error." However, no test data has been offered to show that the 1H1 as a single packaging meets a sufficiently high level of integrity to be authorized for materials poisonous by inhalation, thus these petitions are not accepted. RSPA would consider a petition for rulemaking on this issue based on adequate test data.

6. Subpart F: Bulk Packaging for Hazardous Materials Other Than Class 1 and Class 7

Section 173.240. RSPA is removing the authorizations for AAR Class 203W, 206W and 211W tank car tanks from paragraph (a) because non-specification tanks already are permitted. Several petitioners asked RSPA to revise paragraphs (a) and (b) to refer to a definition of "sift-proof" in § 171.8 as applied to "sift-proof closed rail cars" and "sift-proof closed vehicles." They suggested that the definition include a "tarpaulin-covered open-type vehicle" for ammonium nitrate fertilizers. Petitioners also urged RSPA to maintain existing § 173.182(b)(2) permitting the use of "sift-proof closed or open type motor vehicles" for transporting ammonium nitrate fertilizers. They contended that elimination of § 173.182(b)(2) "would have a serious effect on the explosives and agricultural industries."

When applied to a closed rail car or vehicle, RSPA believes that the term "sift-proof" already is adequately defined under the "no identifiable release" provision in § 173.24(b)(1). It is also RSPA's opinion that tarpaulin-covered open vehicles meet the definition of "closed vehicles." A request to authorize the use of sift-proof bulk bags for solid environmentally hazardous substances is considered beyond the scope of the final rule.

RSPA is not accepting one petitioner's request to revise paragraph (c) to refer to a broader range of "closed bulk packagings" by deleting references to "closed bins." References to "closed bulk packages" in this section, implying inclusion of IBCs and bulk bags, are considered beyond the scope of the final rule.

A number of petitioners, including HMAC, asked RSPA to align §§ 173.240 through 173.244 with the IMDG Code by authorizing IMO type 1, 2 and 5 portable tanks because they believe these tanks offer containment equivalent to DOT's specification IM 101, IM 102 and DOT 51 portable tanks respectively.

Two petitioners asked RSPA to add authorizations for IM-101 and IM-102 portable tanks in § 173.242, authorize the IM-101 in § 173.243 and authorize the IM-101, qualified by T-notes, in § 173.244. Another petitioner said that RSPA granted interim approval to ship molten cyanuric chloride, classed as "Corrosive liquid, poisonous, n.o.s.", in IM 101 portable tanks. The petitioner pointed out that the IMDG Code also authorizes corrosive liquids posing a poisonous subsidiary hazard to be shipped in IMO type 1 tanks.

Except as limited by special provisions in Column 7 of the § 172.101 Table, these tanks already are authorized in §§ 173.240(c) and 173.241(c) because non-specification portable tanks are permitted by these sections to be used for the transport of lesser hazard materials. For clarification, RSPA is revising paragraph (c) in both §§ 173.240 and 173.241 to specifically authorize IM type 1, 2 and 5 and IM 101 and IM 102 portable tanks. However, requests that IMO types 1, 2, and 5 and IM 101 and IM 102 portable tanks be authorized in §§ 173.242 through 173.244 are not accepted. RSPA believes there is not sufficient justification for creating a new packaging scheme for higher hazard materials based solely on IMO recommendations.

Section 173.241. RSPA is removing the special requirements in paragraph (c) for the generic authorization of DOT 57 portable tanks in this section because

VOL 56 ISS 245 DEC 20 1991 UMI

they are inappropriate for this level of hazard.

Section 173.242. For regulatory consistency, RSPA is moving references to DOT Specification 111A100W4 and 111J100W4 tank cars, and Class DOT 103, 104 and 111 tank car tanks in paragraph (a) in §§ 173.242 and 173.243 to the generic section for the qualification, maintenance and use of tank cars (§ 173.31).

Sections 173.243. A petitioner recommended that RSPA remove the requirement in paragraph (a) for gauging devices on Class DOT 103, 104 and 111 tank cars. The petitioner explained that he operates a fleet of 100 insulated DOT-111A100W tank cars built for acrylonitrile service. These cars have no bottom outlets and contain no gauging devices to measure outage through open manways. The petitioner stated, "we feel our operation not only eliminates the need for gauging devices, it is also a safer operation, eliminating a potential leak area." RSPA accepts this petition and paragraph (a) is revised accordingly. Paragraph (b)(2) is revised to remove the authorization for the DOT 406 cargo tank because it is inappropriate for this level of hazard.

Sections 173.243 and 173.244. RSPA is revising paragraph (a) in these sections to properly describe authorized tank car tanks as being "fusion welded" and not "riveted." Therefore, references to "fusion welded" are inserted and references to "riveted tank car tanks" are removed.

Section 173.244. In response to several petitions, RSPA is allowing the use of MC 312 and MC 412 cargo tank motor vehicles subject to the conditions and limitations specified in special provisions B30 and B32. This is in response to several petitioners who argued that heavy walled MC 312 and DOT 412 cargo tanks provide an acceptable level of safety for materials poisonous by inhalation.

Section 173.245. For regulatory consistency, RSPA is adding authorization of tank car tanks and multi-unit tank car tanks when approved by the Associate Administrator for Hazardous Materials Safety.

7. Subpart G: Gases, Preparation and Packagings

Sections 173.302 and 173.304. Under the Docket HM-181 final rule, Column 8B of the § 172.101 Table authorized packagings in §§ 173.302 and 173.304 for various gases which had been reclassified as Division 2.3 materials. However, neither of these two sections was revised in the Docket HM-181 final rule to remove the prohibition against the use of these packagings for poisonous gases. By removing the phrase "or poisonous gas" in these two sections, as appropriate, a Division 2.3 material which is authorized to be packaged in a packaging listed in §§ 173.302 and 173.304 may be so packaged.

Section 173.306. Although not proposed in Docket HM-181, RSPA agrees with COSTHA's petition to add a definition of "flammable aerosol" in the final rule. COSTHA proposed that the definition be added to the defining criteria in § 173.115, but RSPA believes it more appropriately belongs in this section. Accordingly, paragraph (i) is added, incorporating the definition of flammable compressed gas in § 173.300(b)(2), (3) and (4). For consistency, RSPA is revising the limited quantities specified in paragraphs (a)(3)(i) and (b)(1) for metal aerosol containers and foodstuffs and soaps in non-refillable containers as follows, "* * * not exceeding 50 cubic inches capacity (1 liter) * * *." In addition, § 173.306 has been revised to allow Division 6.1 Packing Group III materials to be shipped in accordance with the authorized packagings of this section.

Sections 173.314 and 173.315. These sections are revised in order to clarify the packaging requirements for material poisonous by inhalation. The requirements previously found in § 173.244 and the special provisions for bulk packagings (i.e., B notes) have been moved to these sections. In § 173.315, there are now 4 generic entries for Division 2.3 materials—one corresponding to each hazard zone—and generic entries for Divisions 2.1 and 2.2, which were previously located in § 173.315(a)(2).

Section 173.314. RSPA is revising the table in paragraph (c) amending tank car authorizations for Division 2.3 materials for consistency with special provisions in § 172.102. Several notes to the table are revised by deleting several obsolete provisions. Other notes are edited for clarity. Note 25 to the table is removed as unnecessary since the quantity limitations aboard an aircraft would be exceeded for these packages. Note 16 is removed since it is no longer referenced. Entries for "nitrogen dioxide, liquified" and "ethylene oxide" are added. A fourth column is added captioned "notes". Paragraph (g) is amended by adding a new paragraph (3) referencing additional tank requirements.

HMAC suggested that RSPA revise the paragraph (c) table to include all compressed gases by name, including n.o.s. categories, and to identify notes to the table as appropriate. RSPA developed generic compressed gas entries to cover over 100 materials specifically named in § 172.101, and will retain the generic entries in the final rule. However, some specific compressed gases are listed in the paragraph (c) table because they present hazards requiring added levels of protection.

One petitioner recommended that RSPA remove Note 30 from the entry for "hydrogen chloride" and revise Special Provision B86 to require that new refrigerated liquid tank cars intended to contain this material be equipped with full head shields. The requirement of full head shields for a broader range of hazardous materials in tank cars is being addressed under Docket HM-175A and thus is beyond the scope of the final rule.

Section 173.323. RSPA is accepting a petition recommending removal of the requirement that all copper alloys in package construction material used to contain ethylene oxide be prohibited from contacting the lading, and is revising paragraph (a) accordingly. The petitioner pointed out that ethylene oxide packaging equipped with brass valves has been used for years under DOT E-9047 without incident.

Responding to another petition, RSPA is correcting paragraph (b)(1) to authorize ethylene oxide in 4G fiberboard boxes with inner glass ampules or vials up to a total per package weight of 100 grams (3.5 ounces). RSPA also is revising paragraph (b)(4) to incorporate the existing § 173.124(a)(2) authorizing ethylene oxide to be shipped in cylinders over one gallon and five gallon capacities equipped with pressurizing valves and insulation. The five-gallon cylinder must be equipped with eductor tubes.

The Ethylene Oxide Industry Association (EOI) suggested revising paragraph (b)(5) to authorize ethylene oxide in 1A1 drums meeting the Packing Group III performance standard because that performance level equates to a Division 2.3 Hazard Zone D hazard level. However, this comparison is irrelevant given that only Packing Group I standards apply to the packaging of liquid materials poisonous by inhalation. EOI said reference in paragraph (b)(5) to a drum meeting the Packing Group I performance standard "is inconsistent" with poison gases being evaluated on a hazard zone basis. EOI added that the drum authorized in paragraph (b)(5) essentially is derived from the existing § 173.124 authorizing a DOT Specification 5P drum required to pass a Packing Group II drop test of four feet.

In the final rule, assignment of hazardous materials to non-bulk packagings is based on the packing group system which relates the hazard level of materials to be packaged with the appropriate performance level of the packagings. Non-bulk packaging for all materials poisonous by inhalation, including ethylene oxide classified as a Division 2.3 Hazard Zone C poison gas, has been substantially upgraded in the final rule. Consistent with the generic packaging requirements for Hazard Zone C poison gases in § 173.227, the inner package primarily containing ethylene oxide must be capable of meeting the Packing Group I performance level.

Part 174: Carriage by Rail

Section 174.25. AAR noted that the table in § 174.25(a)(2) does not contain placard notations for Division 6.1 PG III and Class 9 materials, even though rail cars transporting these materials must be placarded. AAR suggested that shipping papers for all placarded rail cars should contain an appropriate placard notation to avoid confusion. RSPA agrees, and the table in paragraph (a)(2) is revised by adding an entry for Division 6.1 PG III materials, and revising the placard notation for Class 9 materials. AAR also recommended that there should be no placard endorsement residues of these materials should excepting tank cars containing a residue of a Division 6.1 PG III or a Class 9 material from the "DANGEROUS" placard endorsement.

Section 174.81. (See § 177.848 for discussion of segregation table issues.)

Section 174.82. AAR and other petitioners asked RSPA to revise paragraph (a), to except all Class 3, PG III materials (flash points between 23° C and 38° C) from required handling of placarded rail cars. AAR asserted that "there is no safety justification for imposing train placement restrictions (on these materials)." Since RSPA is adopting the UN classification system, which does not include a 38° C threshold, AAR suggested, "now is the logical time to exempt all flammable liquids with flash points above 23° C from train placement restrictions." These petitions are considered beyond the scope of Docket HM-181; however, train placement documentation is being addressed in a forthcoming rulemaking action under Docket HM-201A.

Part 176: Carriage by Vessel

Section 176.11. Several petitioners suggested that the reference to "171.12(b)" in § 176.11 was incorrect. Petitioners pointed out that this reference would not allow the shipment of bulk packagings in accordance with the IMDG Code in port areas, which is allowed in § 171.12(c). In the final rule, RSPA did not intend to forbid the movement of IMDG Code bulk packagings in port areas. Therefore, RSPA is amending the reference to § 171.12 by removing the direct reference to paragraph (b). This will allow shippers and carriers to determine which paragraphs of § 171.12 apply to their shipments.

The second sentence of paragraph (a) was intended to state that for Class 1 shipments made in accordance with the IMDG Code, the referenced sections in Part 176 do not apply. The present text is unclear. RSPA is clarifying this sentence by revising it to read, "The requirements of §§ 176.83, 176.84 and 176.112 through 174 are not applicable to shipments of Class 1 (explosive) materials made in accordance with the IMDG Code."

Section 176.76. One petitioner requested that the words containership and barge be added to § 176.76(b). RSPA disagrees. The definitions of trailership and carfloat, which are included in § 176.76(b), include barges. Therefore, RSPA sees no need to include barges in § 176.76(b). Containerships should not be added because they are specially equipped to carry containers, not vehicles. Vehicles should be carried only on vessels that are equipped to carry them. RSPA is denying this petitioner's request.

Section 176.170. Several petitioners requested that the limitation of 5,000 kilograms of Class 1 materials in freight containers of length greater than 6 m in § 176.170 be removed. It is RSPA's concern that freight containers of over 6 m in length could sag and then possibly fail without a proper weight limitation placed on that freight container. The limitation of 5,000 kg, which was developed in an international forum, is believed to be the maximum weight that these freight containers can hold without an unacceptable level of risk of the freight container failing. Therefore, these petitioners' request is denied. However, if a level of safety equivalent to that provided in § 176.170 can be provided, exemption applications submitted in accordance with 49 CFR 107.103 for greater than 5,000 kilograms will be reviewed on a case by case basis.

Section 176.415. RSPA is removing the reference to ammonium nitrate, Division 1.1D, UN0222, from § 176.415(c)(1)(2) and (5). This is being done because the permit requirements for Division 1.1 materials are found in § 176.100.

Part 177: Carriage by Public Highway

Section 177.848. A number of petitioners objected to revisions of the Segregation Table for Hazardous Materials in the final rule, asserting that they are more stringent than existing requirements in § 177.848 for highway and rail operations, and more stringent than requirements for vessel loading. Petitioners claimed that RSPA "failed to consider significant operational differences between the modes" and that revised requirements in §§ 174.81 and 177.848 "impose vast and unnecessary costs." COSTHA questioned the need to align rail and highway segregation requirements with those in the IMDG Code "since the majority of rail and highway shipments are not destined for eventual transport by vessel."

The United Parcel Service (UPS), the Air Transport Association (ATA) and other petitioners said the new segregation restrictions will interfere with long-standing local pickup and delivery operations, create shipment delays, increase the number of vehicles on the road and cause problems at distribution centers and warehouses which stock and ship a wide variety of goods. UPS noted that the required four-foot separation distance for the segregation of many materials indicated by the letter "O" in the table "complements standard palletized shipments, but ignores long-standing practices for loading small packaged materials." HMAC asserted that the new segregation requirements substantially increase the number of hazard classes to which loading restrictions apply.

Most petitioners urged RSPA to reestablish the existing segregation table in § 177.848 for rail and highway operations. The National Motor Freight Traffic Association, ATA and several carriers suggested that if RSPA retains the revised table, the four-foot separation requirement in paragraph (e)(3) should be deleted. Other petitioners recommended removal of the 10 cm minimum height requirement in paragraph (e)(5)(ii). One petitioner recommended that RSPA revise paragraph (e) to allow palletized loads with "O" and "B" segregation requirements to be transported together with a physical barrier such as a load bar, slip sheet or wooden dunnage between the adjacent materials. However, this proposal was never considered in Docket HM-181 and is beyond the scope of the final rule.

Revised segregation requirements in the final rule are intended to improve transportation safety by imposing appropriate controls over the way certain materials are loaded, especially gases and liquids poisonous by

VOL 56 ISS 245 DEC 20 1991 UMI

inhalation. No distinction is made for materials poisonous by inhalation in the existing segregation table. RSPA adopted the segregation table format in section 15.1.16 of the IMDG Code, but not its content, as ATA contended. The IMDG Code employs different separation distances and storage requirements. The Code states in section 15.2.3.1 that dangerous goods which have to be separated from each other should not be carried in the same cargo transport unit, but the Code does not specifically address prohibited co-loading. RSPA determined to impose more stringent segregation requirements for certain materials shipped by rail or highway because these materials are exposed to greater transportation stresses over longer durations (over-the-road vibration and car handling in rail yards).

In response to petitioner requests, RSPA is revising the tables in paragraph (d) in §§ 174.81 and 177.848 by removing letter "O" requirements for Class 3 liquids co-loaded with 4.1, 4.3 and 5.2 materials; and for Division 2.1 flammable gases co-loaded with 4.2, 4.3, 5.1 and 5.2 materials. RSPA also is revising the tables in §§ 174.81 and 177.848 to permit the co-loading of Class 8 (corrosive) liquids with Division 4.3 materials under the less restrictive conditions specified by the letter "O." The tables in both sections are further revised by removing paragraph (e)(5)(ii) specifying letter "B" requirements and removing the letter "B" from the table. The 10 cm minimum height requirement is not limited to palletized materials, and has been moved to paragraph (e)(3). RSPA emphasizes that, in addition to the four-foot separation distance and 10 cm minimum height indicated by the letter "O" in paragraph (e)(3), any other equivalent means may be employed to assure that, in the event of an incident resulting in leakage of materials from packages, commingling of hazardous materials will not occur.

Part 178: Specifications for Packagings

Section 178.2. Several petitioners asked RSPA to clarify the term "manufacturer" as it is applied to the functions of certifying compliance with performance standards under part 178. HMAC observed that paragraph (b) fails to identify any particular person who is required to perform the marking function. The definition of "manufacturer" in § 171.8 also fails to specifically identify such a person. HMAC added that it is unclear why "marking" should be identified as the sole critical factor in determining the "manufacturer" since the process of creating any packaging also includes its design, fabrication, assembly, testing and may include such other functions as maintenance, reconditioning, repair or preparation for transport. HMAC suggested a new definition of "manufacturer" as any person "who designs, manufactures, fabricates, assembles, marks, maintains, reconditions, repairs, tests or prepares a package . . ." Another petitioner said that "most people encountering the term 'manufacturer' would assume it means the actual manufacturer of the packaging," and recommended that RSPA adopt additional terms as necessary to identify other participants in the packaging certification process.

RSPA agrees that responsibility for certifying compliance with part 178 should be more clearly established. However, RSPA believes identification of specifically responsible persons, as HMAC suggested, should be left to the contractual arrangements made by parties who create, close, and test design types. Accordingly, paragraph (b) is revised by removing the reference to "manufacturer" and paragraph (b)(2) is revised to emphasize that "the person" whose name is included in the certification mark required in § 178.503(a)(8) is to be held responsible for compliance with subparts L and M of part 178. In other words, "the person" (manufacturer, shipper, third-party laboratory, or others) who applies the certification mark containing his name, address or symbol is carrying out the function of certifying that the packaging he sells, distributes or uses complies in every respect with the successfully tested design type. For consistency elsewhere in part 178, RSPA is removing references to the "manufacturer" as being solely responsible for package certification.

Two petitioners asked RSPA to make the notification requirements in paragraph (c) a recommendation and not a requirement. They said mandatory notification requirements will add significant expense in time, documentation and delivery of notification. One petitioner claimed, "Within the drum industry, methods of closure are well known." Requiring manufacturers to notify each person to whom packagings are transferred of design shortfalls is essential in a performance standards system in which eventual users are much more involved in package design.

Notification to users of requirements not met at the time of transfer addresses a gap in the Hazardous Materials Regulations by closing a loop of compliance with parts 178 and 173 for persons who certify packagings and persons who prepare them for transportation. Therefore, paragraph (c) is revised to specify that the packaging manufacturer "or other person certifying compliance with the requirements of this part," and each subsequent packaging distributor, must notify users of what remains to be done to prepare (close) packagings built to certified design types for transportation. For example, a drum user could be notified of the type of gasketing described in the design type test documentation for closing a drum built to the successfully tested design type. A combination packaging user could be notified of the type of tape described in the documentation to close an outer 4G fiberboard box. Notification requirements in paragraph (c) directly relate to the shipper's part 173 responsibility to assure that the integrity of packages constructed or assembled according to successfully tested design types is maintained under normal transportation conditions. Paragraph (c) and § 173.24(d) comprise essential safety initiatives in the final rule and are therefore maintained as requirements.

Section 178.3. Seven petitioners addressed the size and location of package certification markings specified in paragraph (a). Four petitioners recommended removal of marking sizes specified in paragraph (a)(4) to allow greater design flexibility and to be consistent with UN Recommendations which do not suggest specific marking sizes. One petitioner urged RSPA to prohibit the placing of markings on the bottoms of packagings "because it makes it very difficult to verify the markings if containers are heavy."

The marking sizes specified in paragraph (a)(4) are intended to provide necessary standardization in the application of legible markings and are consistent with UN Recommendations suggesting "a size relative to the packaging as to be readily visible." With respect to marking location, RSPA encourages the industry to develop its own set of cost-effective standards. The issues of marking size and location are currently being considered by the UN Subcommittee of Experts and any changes to these requirements will be addressed in future rulemaking. A new paragraph (c) is added to clarify that a packaging may be marked in conformance with more than one specification or standard.

Section 178.503. Five petitioners asked RSPA to add a new paragraph (b) to § 178.503 requiring the permanent embossing of drum certification information. NABADA claimed that the lack of permanent certification markings "will result in the obliteration of all

information about the packaging during the reconditioning process * * * severely limiting the potential for use of that drum again." NABADA said the application of a drum mark that can withstand the reconditioning process "enables reconditioners to readily identify drums for sale after the process is completed. Otherwise, reconditioners would have to retest and recertify each unmarked drum for resale with the material intended to be shipped." NABADA asserted this would complicate the business of reconditioning, selecting and reselling drums, substantially adding to product cost.

RSPA accepts a petition from NABADA that, consistent with Section 9.5.2 of the UN Recommendations, "every reusable packaging liable to undergo a reconditioning process which might obliterate the package markings" should bear certain markings in a permanent form (e.g. embossed). Accordingly, RSPA is revising the introductory paragraph (a) to require that the marks specified in paragraphs (a)(1) through (a)(6) and (a)(9) be made permanent.

Responding to suggestions from several petitioners, RSPA also is revising the introductory paragraph (a) to state that a single marking may be applied in one line or in multiple lines if the prescribed sequence is maintained. Paragraph (a) also is revised to recommend use of slash marks (as indicated by examples in paragraph (d)) to present information contained in the certification mark.

Revision of various elements of the package certification mark specified in paragraph (a) was requested by nine petitioners. One petitioner suggested that the introductory notes contained in section 9.5 of the UN Recommendations, defining the purposes and limitations of the certification mark representing a successfully tested packaging design type, be incorporated into paragraph (a). However, RSPA believes the intent of the UN notes is already expressed in part 178 and in §§ 173.24 and 173.24a. Therefore, these notes are not included in § 178.503.

In response to petitioner requests, RSPA is making several revisions to paragraph (a). RSPA is revising introductory paragraph (a) to clarify that marking in a "durable manner" may require some permanent markings. A single marking may be applied in one line or in multiple lines if the prescribed sequence is maintained. Paragraph (a) also is revised to recommend use of slash marks (as indicated by examples in paragraph (d)) to present information contained in the certification mark.

One petitioner claimed that by requiring the marked test pressure to be "rounded off" to the nearest 10 kPa, a packaging could show a test pressure rating that is greater than its performance ability. Accordingly, RSPA is revising paragraph (a)(5)(i) to require the test pressure marked in kilopascals be "rounded down" to the nearest 10 kPa.

Paragraph (a)(7) is revised to more clearly indicate the "state authorizing allocation of the mark" and that the letters "USA" indicate that the packaging is manufactured and marked in the U.S. in compliance with the final rule. Packages marked "USA" must be manufactured in the US. Paragraph (a)(8) is revised to specify that the name and address or symbol of the "person" (i.e., manufacturer, approval agency or others) who applies the mark certifies compliance with subparts L and M of part 178. This reinforces the intent in the final rule to hold the person who certifies a design type responsible for fully complying with part 178 requirements.

Several petitioners asked RSPA to align paragraph (a)(9) with the marking requirements for selective testing Variation II in the Competent Authority approval issued on February 21, 1991 (incorporated into § 178.601(g)(2)(viii) in corrections to the final rule). Accordingly, paragraph (a)(9) is removed and paragraph (a)(2) revised to include the following sentence, "The letter 'V' must follow the packaging identification code on packagings tested in accordance with § 178.601(g)(2); for example, "4GV."

Paragraph (a)(10) is redesignated as (a)(9) and revised to require that the package thickness marking also be applied to packages intended to be reconditioned. One petitioner recommended revising this paragraph to "reflect important differences between head and body thicknesses," and to express "the nominal thickness of material construction used in the heads and body rounded down to the nearest 0.1 mm." As stated in the preamble to the final rule, RSPA is relying on the actual marked thickness of the package to implement authorized reuse requirements in § 173.28. Therefore, the mark specified in redesignated paragraph (a)(9) expresses a stated minimum rather than a permitted range of thicknesses. An example is added to show how the minimum thickness may be displayed when head and body thicknesses are different.

RSPA is adding a new paragraph (a)(10) recommending, but not requiring (because it is not suggested by the UN), a mark indicating the rated capacity of packagings intended to carry liquids.

NABADA claimed that the marking requirement in paragraph (c) will result in dual marking by the reconditioner who reconditions a DOT specification package (marked near the top) that also carries a UN certification mark (usually marked near the bottom). RSPA should remove the phrase "shall be marked by the reconditioner near the marks required in paragraphs (a) (1) through (6)," NABADA said, because it is inconsistent with the existing requirement in § 173.28 to place the reconditioner's mark "within 10 inches of the head." International standards do not specify exact manufacturer or reconditioner certification marking locations, thus, RSPA is not requiring them in paragraph (c). RSPA's intent in paragraph (c) is to require a reconditioner to place his mark "near" the manufacturer's original UN mark for consistency and to be readily visible in relation to the first six performance rating and structural information elements of the manufacturer's mark.

Sections 178.504, 178.505 and 178.506. For consistency with UN Recommendations and the IMDG Code, paragraphs (b)(4), (b)(3) and (b)(3) of each of these sections are revised to recommend, but not require, that steel, aluminum and other metal drums "have at least two expanding rolling hoops." Paragraphs (b)(5), (b)(4) and (b)(4) of these sections also are revised to recommend, but not require, that flanges be mechanically seamed or welded to steel, aluminum and other metal drum bodies.

Sections 178.508, 178.509 and 178.522. One petitioner suggested that these sections be revised to specify maximum total quantity limits for fiber, plastic and composite packagings with inner plastic receptacles. This petition is declined because, in the final rule, RSPA is not specifying non-bulk packaging outage requirements.

Section 178.521. Three petitioners requested that standards in § 178.520(b)(3) authorizing a range of inner-lining materials for water-resistant textile bags (5L3) be applied also to standards for multi-wall water-resistant paper bags (5M2) in § 178.521 (b)(2). Another petitioner claimed that 5M2 standards in paragraph (b)(2) place "a limitation on [design] flexibility and technical innovation of the bag by requiring restrictive placement of water-resistant plies." However, RSPA has insufficient justification at this time to revise UN 5M2 standards. RSPA may consider addressing this issue at a

future time if provided with additional information.

Section 178.601. Revisions to general testing requirements in § 178.601 drew a substantial number of petitions for reconsideration of the final rule. HMAC urged RSPA not to refer to prescribed subpart M tests in paragraph (a) as "minimum requirements." HMAC claimed that the term "minimum requirements" invites tort litigation plaintiffs "to assert that mere compliance with the precise requirements is 'minimal', less than safe and therefore, constitutes negligence."

RSPA disagrees with the contention that an assertion of "minimum" standards can be construed as a reduction of transportation safety. Packaging requirements in 49 CFR have always been considered "minimum" in that they are designed to ensure an adequate level of safety without imposing excessive regulation. In the final rule, RSPA is not departing from this principle in stating that the tests prescribed in subpart M represent "minimum" performance levels. This means packages expected to carry hazardous materials in "normal" distribution systems must be capable of passing at least the "minimum" test procedures specified in subpart M. To ensure package capability in any given distribution system, it may be desirable to test at higher levels.

Several petitioners were troubled by the meaning of the term "identical" in the definition of a "different packaging" in paragraph (c)(4), and asked that the term be removed. In the preamble to Docket HM–181, RSPA stated that performance tests may be conducted at a single facility to qualify all "identical" packagings produced by the same manufacturer at multiple locations. Although one petitioner agreed with this policy, he said there is little guidance in paragraph (c)(4) regarding the meaning of "identical". The petitioner asked, "Even if the design specifications are the same, even if molds, dies and materials of construction are uniform, can we meet an engineering-derived definition of identical packages" produced at multiple locations?" NABADA interpreted "identical" in paragraph (c)(4) to mean that it is RSPA's intent to demand design-type requalification retests "even if no change in the designer's definition of a design type has been made because the second package is 'not identical to' the first design."

By 'identical", RSPA is not implying that packagings must be produced to the exactitude of design types containing precisely established engineering specifications. In paragraph (c)(4), RSPA intends "identical" to mean a production unit that is alike in every respect with the successfully tested design-type described in detail in the test documentation required in paragraph (k) to be kept by the person who certifies the tested design type. This documentation should incorporate details of "design, package size, material and thickness, manner of construction" and closure recommended by the UN in its definition of design-type. RSPA believes that such documentation should constitute a sufficient level of detail to ensure compliance with Subpart M requirements. If a packaging is being produced by the same manufacturer at multiple sites, the test documentation should be maintained and complied with at those locations.

Several petitioners urged RSPA to revise the design requalification test requirements in paragraph (e) regarding retest intervals. One petitioner requested extending the retest interval for "expensive" stainless steel, nickel or monel packages from one to three years. Another petitioner, claiming low annual production rates, suggested a retest frequency based on the number of units produced. The Aerospace Industries Association (AIA) suggested following the 24-month interval for requalifying combination package design types by subsequent retest intervals of at least 36 months. The Department of Defense (DOD) contended that retest frequency requirements in paragraph (e) "present a significant problem for DOD munitions packaging." DOD said it conducts package production quality control by the use of "specifications, configuration-controlled drawings and/or special packaging instructions (SPIs)" and this procedure is disturbed by the recurring retest intervals imposed by the final rule.

Given the number of locations that may produce packaging in accordance with a given design-type, RSPA generally considers the retest intervals to be the minimum to ensure design-type requalification and will retain them in paragraph (e). However, RSPA agrees that, if fully justified by data showing the need to modify requalification procedures, special circumstances may warrant some modification. Thus RSPA is revising paragraph (e) to allow changes in retest frequency subject to the approval on a case-by-case basis by the Associate Administrator of Hazardous Materials Safety.

Several petitioners, including COSTHA, requested that selective testing in accordance with Variations III, IV and V published in the February 21, 1991 **Federal Register** (56 FR 7076) be incorporated into paragraph (g). COSTHA noted, "There is no logical reason from a safety standpoint to preclude application of (Variations III, IV and V) from the selective testing of packaginga intended for use solely in domestic transport under Docket HM–181." RSPA agrees and therefore is revising paragraph (g) by adding new paragraphs (g)(3), (Variation 3) allowing variations in the external dimensions of single or composite packagings. (g)(4) (Variation 4) allowing variations in the external dimensions of the outer packagings of combination packagings and (g)(5) (Variation 5) allowing variations in the use of closure devices and gasketings. RSPA also is revising paragraph (c)(4) to add a new paragraph (v) to include "packaging which differ only in their lesser design height" in the definition of "design type." The provision was inadvertently omitted from the final rule.

RSPA is revising paragraph (g)(2)(viii) (Variation 2) to allow retention of the full weight of the outer packaging in the marked gross mass of the combination package, and to require the letter "V" to be marked instead of "SP".

The Institute of Makers of Explosives (IME) asked RSPA to revise paragraph (g)(3) (Variation 3) to allow differences in volumetric capacity linked with changes in the density of materials without design requalification of single and composite packagings. IME claimed that "the volume required to package 50 pounds of explosives will vary with the density of the material being packed. [Yet,] in variation 3, RSPA ties volumetric factors (length and width) to mass with no consideration for density." However, to be consistent with selective testing variations already agreed to by the UN, and that are incorporated into paragraph (g), RSPA considers additional variations beyond the scope of the final rule. With sufficient justification, additional selective testing variations may be considered in future rulemakings.

One petitioner urged RSPA to limit substitution of different inner packagings which have not been tested, to surface transportation only. The petitioner said allowing design changes without further testing for packagings intended for air transport that contain materials in Packing Groups I and II "poses an unacceptable degree of risk in this sensitive shipping environment."

For air transport, RSPA believes an adequate level of safety would be achieved if different packagings authorized under all the variations in paragraph (g) meet requirements in § 173.27(c)(1) and (2). Therefore, RSPA is revising the introduction to paragraph (g) to include those requirements.

One petitioner questioned the application of selective testing requirements to § 173.27(c)(3)(i) which authorizes use of a supplementary packaging that meets the pressure requirement for air shipment of liquids when the inner packaging does not itself meet the pressure capability standard in § 173.27(c)(2)(i) (eg., a glass bottle inside a steel drum where the drum meets the pressure requirement). The petitioner assumed that if the supplementary packaging can be considered an inner packaging with respect to selective testing variations in paragraph (g), then any variation of inner receptacles within the supplementary packaging would not be a factor in determining whether or not further testing of the package is required.

A supplementary package could be considered an inner packaging, but RSPA does not agree that this would apply in all cases. It may not be appropriate in many circumstances to consider changes of inner receptacles within a supplementary packaging as being a minor design variation which would not require testing under paragraph (g). Waiving further design testing in these cases would require approval by the Associate Administrator for Hazardous Materials Safety.

Three petitioners urged RSPA to relax requirements in paragraph (k) that design qualification and periodic test records be kept at each location where packagings are manufactured. HMAC and CPC asserted that this requirement "would be burdensome to the chemical packaging industry without providing any additional safety." They said record retention would be especially burdensome to shippers who assemble and fill combination packaging design types at multiple plant locations.

As mentioned above, RSPA believes that maintaining design qualification test documentation at every location where packagings are produced to a successfully tested design type provides essential quality control. In other words, test documentation maintained at every manufacturing site ensures that, on inspection, each production unit conforms to the originally tested design type.

Therefore, RSPA is maintaining test documentation requirements in paragraph (k) for design qualification and periodic retesting. RSPA agrees with one petitioner that test documentation could be contained in a central computer system accessed by all locations where packagings are produced.

Section 178.602. Several petitioners asked RSPA to provide a clearer standard of package "capacity" in paragraph (b), referring to the fill quantity necessary to conduct testing with the product. Accordingly, RSPA is revising paragraph (b) to indicate a required fillable level of 95 percent of "total" capacity for liquids and 98 percent of total capacity for solids.

Six petitioners claimed that the two-percent relative humidity deviation specified in paragraph (d) for the preparation of fiberboard packagings for testing is impractical. One petitioner said this requirement may be obtainable, "but it places a costly burden on a test facility to acquire a precision humidity chamber capable of meeting the two-percent variation." Another petitioner asserted that the variation now required "is unnecessarily restrictive when one considers the dynamic environments in which these packages are transported." Several petitioners asked RSPA to either delete the two-percent variation over the 24-hour conditioning period altogether or require conditioning in an atmosphere of 48 percent relative humidity minimum and a temperature range of 18° C to 29° C.

FDTC suggested that RSPA allow short term relative humidity fluctuations of up to five percent contained in its proposal to the UN Committee of Experts and since adopted by the UN. Consequently, RSPA is revising paragraph (d) to allow fluctuations in relative humidity of plus or minus five percent as long as the readings average plus or minus two percent over the entire 24-hour conditioning period. Any other revision would be inconsistent with the UN Recommendations.

A petitioner asked RSPA to revise paragraph (e) allowing open head drums to undergo production leakproofness testing without first installing removable heads. The petitioner pointed out that during production leakproofness testing, the open end of a drum is sealed as part of the test procedure. Requiring a drum to be tested with the lid in place "would be very time consuming" and offer no better test results. RSPA believes that paragraph 178.604(c)(1) meant to allow for testing packagings without removable heads in place. Therefore, RSPA is modifying paragraph (e) to read, "Except as otherwise provided, each packaging must be closed . . ." and clarifying paragraph 178.604(c)(1) by adding a new sentence which reads, "Removable heads need not be installed during production testing."

Sections 178.603 and 178.605. Responding to a petitioner's request, RSPA is clarifying introductory paragraphs in §§ 178.603 and 178.605 to state that the drop and hydrostatic tests must be conducted for package design type qualification and that retests are to be performed as specified in § 178.601(e).

Section 178.603. To reduce drop testing costs, one petitioner urged RSPA to revise paragraph (a) to allow reuse of samples for the four orientations of the design qualification test which require up to five samples for each drop. He claimed that reuse of a sample package "would actually be a more severe test of the package." The object in the final rule with respect to design requalification is to obtain authentic results by using a minimal but sufficient sampling of packagings out of the production line for each drop orientation.

Other petitioners asked RSPA to extend the reduced sample exception in paragraph (b) for the periodic retesting of stainless steel, nickel or monel to aluminum and steel drums. They said this revision should apply as well to reduced sample exceptions in §§ 178.604(b), 178.605(b), 178.606(b) and 178.608(b). Another petitioner asked RSPA to revise paragraph (b) to allow use of two combination packaging samples for the second and subsequent retests. RSPA is declining to adopt these petitions to extend the general exception, but will consider allowing additional test sample reductions on a case-by-case basis subject to the approval of the Associate Administrator for Hazardous Materials Safety.

RSPA believes there is not sufficient justification for adopting revisions to paragraph (f) for passing the drop test suggested by several petitioners. However, for clarification, RSPA is adopting the Military Traffic Management Command's (MTMC) request to revise paragraph (f)(6) as follows, "No rupture is permitted in packagings for goods in Class 1 which would permit spillage of loose explosive substances or articles from the outer packaging."

One petitioner suggested revising paragraph (a) to align with section 9.7.3.1 of the UN Recommendations to require for other than flat drops, that the center of gravity be vertically over the point of impact. RSPA believes that such a method would be difficult to achieve with a test sample filled to 98% of capacity with the material it is intended to contain. For other than flat drops, RSPA has always maintained that drops oriented to strike diagonally on edge are most effective.

Section 178.604. One petitioner urged RSPA to except high-integrity drums used in controlled distribution systems from leakproofness test requirements altogether. However, this petitioner

VOL
56
ISS
245
DE
20
1991
UMI

presented no evidence that high-integrity drums, even when utilized in controlled distribution, are subject to any less transportation stress which the minimum test standards prescribed in Subpart M are designed to address. Furthermore, high-integrity drums often carry the most hazardous materials to which appropriate test standards must apply.

RSPA is accepting petitions requesting that the three leakproofness test methods described in appendix B to part 178 be authorized for design qualification together with the full submersion test specified in paragraph (d). Therefore, the introduction to appendix B is revised to state that "the following leakproofness test methods are authorized." The phrase "for other than the original design qualification test" is removed.

The required 30-second test duration to detect leakage from packagings undergoing the helium and pressure differential tests described in paragraphs (1) and (2) of appendix B drew substantial petitioner opposition. Eight petitioners urged RSPA to delete references to the 30-second hold in both tests. They said leakproof testing techniques should not be limited to an arbitrary test duration standard. Instead, emphasis should be placed on the manufacturer's responsibility to adequately perform the leakproof test regardless of test duration.

PDI had recommended the 30-second test duration in comments to Docket HM-181 for the much slower plastic drum production line of the mid-1980s. In its petition, however, PDI said that over the past five years, production line procedures, including the way packaging is leakproof tested, have become more efficient. PDI asserted that the 30-second hold for both tests has "become overly restrictive" and that it would inhibit manufacturers from improving package testing procedures.

Several petitioners claimed that new technical developments in helium testing have rendered the 30-second hold impractical. One petitioner said the 30-second duration requirement for the helium test should be withdrawn because the test equipment he uses effectively examines a drum in about three and a half seconds. Another petitioner uses technology geared to container type, size and the operator's own production pace and requirements. He said the time it takes to effectively conduct a helium test by using this newer technology "will vary, but it certainly does not require 30 seconds to separate minute differences in the pressure." Another petitioner said the 30-second requirement "would impose a production rate of about 100 drums per hour whereas most production rates are geared for 600 or more drums per hour."

The Steel Shipping Container Institute (SSCI) said the 30-second hold requirement for the helium and pressure differential test "is not feasible or consistent with manufacturing processes for steel drums," and that steel pails have been leakproof tested for years in much less than 30 seconds per unit. SSCI pointed out that the UN does not recommend, nor does ICAO or the IMDG Code specify, leakproofness test duration.

RSPA believes that the full submersion leakproofness test prescribed in paragraph (d) must be conducted "for a period of time sufficient to pressurize the interior of the packaging to the specified air pressure" so that legitimate test results occur. The principle of "sufficient duration" is meant to apply as well to the approved alternative tests in appendix B. RSPA will maintain this principle in the final rule. However, RSPA acknowledges that petitioners make a sufficiently good case that leakproofness test methods yielding good results from test durations of less than five seconds have developed for both plastic and steel drum production lines. Accordingly, RSPA is revising paragraphs (1) and (2) of appendix B to remove references to 30 seconds. Therefore, a packaging passes the helium and pressure differential tests if there is no leakage over a sufficient duration to determine leakage of helium or change in pressure differential.

In response to petitioners who claimed that evacuation of a helium testing chamber down to a pressure of 0 kPa is not feasible or consistent with existing practices, RSPA is revising paragraph (1) to require evacuating a test chamber down to 5 kPa or less. Five petitioners asserted that the so-called production line "T-zone test", involving examination of one drum seam under pressure coupled with chime cuts, is at least as effective as testing the entire drum submerged under water as prescribed in paragraph (d). As a standard production line process, SSCI said T-zone tests employ internal air pressures of up to 15 psi coupled with a visual inspection of chime cuts. By contrast, SSCI noted that RSPA has adopted UN recommendations establishing much lower air pressure applications for the full submersion test.

Several SSCI member companies supplemented SSCI's petition to add the T-zone test to the authorized test alternatives in appendix B with T-zone equivalency test data. They compared T-zone test results with those obtained from "submerged under water" and "solution over [all] seams" procedures. To measure equivalency, SSCI said one drum was removed from the production line each hour after being tested by the T-zone method and tested by fully submerging it under water or applying a solution of soap suds over all seams while internal air pressure was applied. One company tested 138 samples this way over 26 production days with no leaks detected. Another company found no leaks among 387 test samples over 52 production days. A third company said that out of 400 drums tested, only four leaking drums were rejected after full submersion testing after having first passed the T-zone test. For all the drums this company sold in 1990, SSCI said that less than one out of every thousand was claimed to be leaking after having left the manufacturing premises. This rate of drum failure is supported by RSPA's HMIS incident reporting data. For example, out of 6,610 incidents involving DOT 17C, 17E, 17F and 17H drums reported to RSPA between January 1981 and January 1991, 185 weld/seam failures were recorded, or about 18 such failures a year.

One petitioner suggested permitting a T-zone test which examines "the entire weld and both seams over a distance of at least three inches on either side of the weld." The petitioner claims this test "should have a reliability of more than 95 percent" relative to the full submersion test specified in paragraph (d). T-zone tests now conducted under approval (eg., SA-811002) involve application of soap solution "over the entire side seam and a distance of not less than eight inches on each side of the side seam along the side chime seam(s)."

Prior to RSPA's jurisdiction over the authorization of hazardous materials packaging, the Association of American Railroads Bureau of Explosives granted drum manufacturers approvals to employ the T-zone test. These approvals have been continued for over 10 years. However, the HMR have always specified production line leakproof testing by applying air pressure to drums restrained under water or with solution over all seams. For example, this requirement is contained in §§ 178.115-13, 178.116-13, 178.117-14, 178.118-14 for DOT specification 17 steel drums and in §§ 178.80-14, 178.81-14, 178.82-14, 178.83-15 and 178.88-13 for DOT specification 5 steel drums. Although drum manufacturers have shown the T-zone test to be a fairly reliable indicator of drum failures, they have not adequately shown this test to be an "equally effective" leakproofness testing method. RSPA notes that companies that conducted the equivalency tests did not evaluate the effectiveness of the T-zone test by using drums that were known to leak. This procedure may have yielded less favorable results.

However, in view of the time it takes to conduct the full submersion leakproofness test in high-volume production lines, and based on data submitted by petitioners, RSPA agrees that a partial solution over seams leakproofness test, with chime cuts, conducted at currently applied test pressure levels (i.e., not less than 7 psi) is an acceptable production line procedure for detecting leaks. Therefore, RSPA is revising Appendix B to permit a production line solution over partial seams leakproofness test for drums intended to be used for all three packing groups, provided packagings are restrained while an internal air pressure of not less than 7 psi is applied. As required under the current approval, packagings must be coated with soap solution over the entire side seam and a distance of not less than eight inches on each side of the side seam along the chime seam(s). Chime cuts must be made on the initial drum at the beginning of each production run and on the initial drum after any adjustment to the chime seamer.

Proposed addition to appendix B of an alcohol spray test for fiber drums and use of a "sensitive commercial pressure gauge" are declined because petitioners did not submit sufficient information to justify taking these actions.

HMAC asked RSPA to revise paragraph (d) to require the use of an inert gas detector to detect leakage in cases where full water submersion would affect the integrity of the packaging. However, RSPA believes the alternatives to full water submersion now authorized for design qualification and production testing should adequately address this problem without any further revision of paragraph (d).

Section 178.606. RSPA is adding a provision to paragraph (b) to permit, under certain conditions, stack testing of the outer packagings of combination packagings without the inner packagings.

Two petitioners asked RSPA to extend the dynamic compression test authorized for periodic retesting in paragraph (c)(2)(ii) to the design qualification stacking test prescribed in paragraph (c). These petitions are declined because, in this final rule, RSPA has determined not to go beyond UN recommendations in mandating any design-type test not contained in chapter 9. Alternative design-type tests yielding equivalent results may be used if approved by the Associate Administrator for Hazardous Materials Safety.

A recommendation by MTMC to add alternative design qualification tests for plastic drums and jerricans, including shorter duration tests in varying temperature or pressure is declined for lack of adequate justification. RSPA is adopting HMAC's suggested revised formula for determining the application of dynamic compression in retesting packagings intended for both liquids and solids. The revised formula takes into account the partial filling of packagings for testing (98% for liquids, 95% for solids).

Section 178.606. Four petitioners recommended removal of the vibration test standard because vibration testing is not now a requirement under international standards. For reasons stated under § 173.24a(a)(5), RSPA is maintaining this capability standard. RSPA is accepting CPC's petition to modify the vibration test method to include the use of rotary motion tables producing the same peak-to-peak vertical double amplitude. CPC said these machines constitute about 95 percent of those available.

RSPA also is revising criteria in paragraph (c) for passing the test by adding the following language, "No test sample should show any deterioration which could adversely affect transportation safety or any distortion liable to reduce packaging strength." This revision is contained in the U.S. proposal to add the vibration test to chapter 9 of the UN Recommendations. It extends to vibration testing, RSPA's intent in Docket HM-181 to emphasize maintenance of package structural integrity during transportation by aligning criteria for passing the vibration test with criteria in § 178.603(f) for passing the drop test and § 178.606(d) for passing the stacking test. It also more closely aligns the vibration capability standard with general requirements for packagings in § 173.24.

Part 179: Specifications for Tank Cars

Section 179.101-1. As requested by one petitioner, the "Insulation" entry requirements for 112A200W, 112A340W, 112A500W, 114A340W, and 114A400W tank car tanks are changed to read "[4] optional".

Section 179.105-7. In response to several petitions, RSPA is amending this section by adding the word "insulated" before "tank car tank" and correcting the reference from section "A8.01" of appendix A of the AAR Specifications for Tank Cars" to "A8.00." In addition, RSPA is allowing the use of smaller pressure relief devices for all materials poisonous by inhalation, rather than limiting this provision to Division 2.3 materials.

Section 179.200-18. Several petitioners suggested a longer implementation period for the stencilling requirements in paragraph (b)(4). RSPA disagrees. These stencils may be applied during the loading process.

Federal Preemption Under the HMTA

Section 105(a)(4) of the HMTA, as amended by the HMTUSA, preempts any non-Federal (i.e., State, political subdivision, or Indian tribe) law or regulation concerning certain "covered subjects" unless the non-Federal requirement is "substantively the same" as the Federal law or regulation on that subject. The "covered subjects" are:

(i) The designation, description, and classification of hazardous materials;

(ii) The packing, repacking, handling, labeling, marking, and placarding of hazardous materials;

(iii) The preparation, execution, and use of shipping documents pertaining to hazardous materials and requirements respecting the number, content, and placement of such documents;

(iv) The written notification, recording, and reporting of the unintentional release in transportation of hazardous materials; or

(v) The design, manufacturing, fabrication, marking, maintenance, reconditioning, repairing, or testing of a package or container which is represented, marked, certified, or sold as qualified for use in the transportation of hazardous materials.

49 App. U.S.C. 1804(a)(4) (A) and (B)

In a February 28, 1991 final rule (56 FR 8616), RSPA added this new preemption standard to § 107.202 to mirror the statute. Section 105(a)(5) of the HMTA, as amended by the HMTUSA, provides that if DOT issues a regulation concerning any of the covered subjects after the date of enactment of the HMTUSA (November 16, 1990), DOT must determine and publish in the **Federal Register** the effective date of the Federal preemption. That effective date may not be earlier than the 90th day following the date of issuance and not later than two years after the date of issuance.

To the extent that the requirements of Docket HM-181 involve covered subjects, States, political subdivisions, or Indian tribes may only establish, maintain, and enforce laws, regulations, or other requirements concerning such subjects if they are substantively the

VOL 56 ISS 245 DEC 20 1991 UMI

same as the requirements in Docket HM–181. RSPA has determined that the effective date of Federal preemption for these requirements will be October 1, 1993.

Rulemaking Analyses and Notices

A. Executive Order 12291

This final rule has been reviewed under the criteria specified in § 1(b) of Executive Order 12291 and is determined not to be a major rule. However, it is a significant rule under the regulatory procedures of the Department of Transportation (44 FR 11034). This final rule does not impose additional requirements and, in fact, provides relief in some areas. The net result is that costs imposed under the final rule published in the **Federal Register** on December 21, 1990 are reduced, but without a reduction in safety [55 FR 52402]. The original regulatory evaluation of the final rule was reexamined but was not modified because the changes made under this rule provide limited relief and thus will result in minimal economic impact on industry.

B. Executive Order 12612

This action has been analyzed in accordance with Executive Order 12612 ("Federalism"). The HMTA contains an express preemption provision which RSPA is implementing at the minimum level necessary to achieve the objectives of the statute. Therefore, preparation of a Federalism Assessment is not warranted.

C. Impact on Small Entities

Based on limited information concerning size and nature of entities likely to be affected by this rule, I certify this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A regulatory flexibility analysis is available for review in the docket.

D. Paperwork Reduction Act

This amendment imposes no changes to the information collection and recordkeeping requirements contained in the December 21, 1990 final rule, which was approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. chapter 35.

E. Regulatory Information Number (RIN)

A regulatory information number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN numbers contained in the heading of this document can be used to cross-reference this action with the Unified Agenda.

F. National Environmental Policy Act

This final rule has been reviewed under the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*) and does not require an environmental impact statement.

49 CFR Part 178

Hazardous materials transportation, Motor vehicle safety, Packaging and containers, Reporting and recordkeeping requirements.

49 CFR Part 179

Hazardous materials transportation, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 180

Hazardous materials transportation, Motor carriers, Motor vehicle safety, Packaging and containers, Reporting and recordkeeping requirements.

In consideration of the foregoing, 49 CFR chapter I is amended as follows:

PART 106—RULEMAKING PROCEDURES

1. The authority citation for part 106 continues to read as follows:

Authority: 49 App. U.S.C. 1472(h)(1); 49 App. U.S.C. 1672; 49 App. U.S.C. 1803, 1804, 1808; 49 App. U.S.C. 1653, 1657(e); 49 App. U.S.C. 2002.

§ 106.3 [Amended]

2. In § 106.3, in paragraph (a) the wording "Director, Office of Hazardous Materials Transportation" is removed and replaced with "Associate Administrator for Hazardous Materials Safety".

Appendix A [Amended]

3. In part 106, appendix A, in paragraph (a), the wording "Director, Office of Hazardous Materials Transportation" is removed and replaced with "Associate Administrator for Hazardous Materials Safety".

PART 107—HAZARDOUS MATERIALS PROGRAM PROCEDURES

4. The authority citation for part 107 continues to read as follows:

Authority: 49 App. U.S.C. 1421(c); 49 App. U.S.C. 1802, 1806, 1808, 1811; 49 CFR 1.45 and 1.53 and app. A of part 1, Public Law 89–670 (49 U.S.C. 1653(d), 1655).

§ 107.1 [Amended]

5. In § 107.1, in paragraph (a), the wording "Office of Hazardous Materials Transportation" is removed and replaced with "Associate Administrator for Hazardous Materials Safety".

6. In § 107.215, paragraphs (b)(6), (b)(7), and (b)(8) are revised to read as follows:

§ 107.215 Application.

* * * * * *

(b) * * *

(6) State why the applicant believes the State, political subdivision or Indian tribe requirements affords an equal or greater level of protection to the public than is afforded by the requirements of the Act or the regulations issued under the Act;

(7) State why the applicant believes the State, political subdivision or Indian tribe requirement does not unreasonably burden commerce; and

(8) Specify what steps the State, political subdivision or Indian tribe is taking to administer and enforce effectively its inconsistent requirement.

§ 107.502 [Amended]

7. In § 107.502, in paragraph (d), the wording "Office of Hazardous Materials Transportation" is removed and replaced with "Associate Administrator for Hazardous Materials Safety".

Subpart G [Removed]

8. In part 107, subpart G, consisting of §§ 107.601 and 107.603, is removed.

§§ 107.3 and 107.402 [Amended]

9. In addition to the amendments set forth above, in §§ 107.3 and 107.402(a), the wording "Director, Office of Hazardous Materials Transportation" is removed and replaced with "Associate Administrator for Hazardous Materials Safety" each place it appears.

§§ 107.401, 107.402, 107.403, 107.404, 107.405 [Amended]

10. In addition to the amendments set forth above, part 107 is amended by removing the wording "Director, OHMT" and replacing it with "Associate Administrator for Hazardous Materials Safety" in the following sections:

(a) § 107.401(b)
(b) § 107.402(b)(8)
(c) § 107.402(c)
(d) § 107.403(a)
(e) § 107.403(b)
(f) § 107.404(a)(3)
(g) § 107.404(b)
(h) § 107.405(a)
(i) § 107.405(b)

§ 107.3 [Amended]

11. In addition to the amendments set forth above, in § 107.3, the definition "OHMT" is removed.

§ 107.317 [Amended]

11a. In addition to the amendments set forth above, in § 107.317(c), the wording "OHMT" is removed and replaced with "Associate Administrator for Hazardous Materials Safety".

PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

12. The authority citation for part 171 continues to read as follows:

Authority: 49 App. U.S.C. 1802, 1803, 1804, 1805, 1808, 1818; 49 CFR Part 1.

§ 171.3 [Amended]

13. In § 171.3, in Note 1, in the first sentence, the word "that" is revised to read "to".

§ 171.4 [Removed and Reserved]

14. Section 171.4 is removed and reserved.

§ 171.5 [Removed and Reserved]

15. Section 171.5 is removed and reserved.

16. Section 171.6 is revised to read as follows:

§ 171.6 Control numbers under the Paperwork Reduction Act.

(a) *Purpose and scope.* This section collects and displays the control numbers assigned to the HMR collections of information by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980. This section complies with the requirements of 5 CFR 1320.7(f), 1320.12, 1320.13 and 1320.14 (OMB regulations implementing the Paperwork Reduction Act of 1980) for the display of control numbers assigned by OMB to collections of information of the HMR.

(b) *OMB control numbers.* The table in paragraph (b)(2) of this section sets forth the control numbers assigned to collection of information in the HMR by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980.

(1) Column 1 lists the OMB control number assigned to the HMR collections of information. Column 2 contains the Report Title of the approved collection of information. Column 3 lists the part(s) or section(s) in 49 CFR identified or described in the collection of information.

(2) Table.

Current OMB control No.	Title	Title 49 CFR part or section where identified and described
2137–0014	Cargo Tank Specification Requirements.	§§ 107.503, 178.320, 178.337, 178.338, 178.345, 180.417, 180.409.
2137–0018	Portable Tank Inspection and Testing.	§§ 173.24, 173.32, 173.32a, 173.32b, 173.32d
2137–0022	Recordkeeping and Information Collection for Cylinders.	§§ 173.34, 173.303(d)
2137–0034	Hazardous Material Shipping Papers.	Part 172, §§ 172.7(a)(1), 173.22(a)(1), 173.56(b)(1), (d)(1), (e)(2), 173.150(f)(3)(i), 174.10(c), 174.12, 174.25, 174.26(c), 174.114, 175.30, 175.35, 175.703, 176.9, 176.24, 176.27, 176.30, 176.31, 176.36, 176.89, 176.90, 176.95.
2137–0039	Hazardous Materials Incident Report.	§§ 171.15, 171.16.
2137–0051	Rulemaking and Exemption Petitions.	Part 107, Subpart B, §§ 106.31, 107.5, 107.7, 107.103(b)(11), (d).
2137–0510	RAM Transportation Requirements.	§§ 173.22(c), (d), 173.417(a)(5), (b)(3), (4), 173.471(a), 471(d), (f), 173.472, 173.476(a), 173.416(b), 173.473(a), 173.476(b), 173.473(d), (e), 173.478(a), 173.417(b)(4), 173.477, 173.478, 173.415(a), 173.457(b), 173.414(d), 177.825(a), (d).
2137–0542	Cryogenic Liquids Requirements.	§§ 177.816, 177.818, 177.840(h), 173.33(d)(1)(ii).

VOL 56 ISS 245 DEC 20 1991 UMI

Current OMB control No.	Title	Title 49 CFR part or section where identified and described
2137–0557	Approvals for Hazardous Materials.	§§ 107.402, 107.404, 107.300a, 173.300b, 173.51(a), (b)(1), (2), (4), (c), (f), (g), (i), (j)(3), 173.63(c), 173.171(a), (c), 173.180(a), 173.340(a), (b), (c)(4), 173.336, 172.102(c)(B69), 173.21, 173.159(f), 173.3a, 173.4(a)(11), 173.24(e)(3)(iii), 173.128(c)(4), 173.225(b)(4), (c), 173.245(b), 173.334(d), 173.7, 173.806, 176.340, 173.305, 173.315, 173.319, 173.334, 173.185(a)(h)(1), (2), (3)(ii), 173.214, 178.601(g), 178.606(c), 178.608(b)(5), 179.14(b), 172.101(k)(2)(3).
2137–0559	Rail Carriers and Tank Car Tank Requirements.	§§ 173.31(a)(4), 173.31(c)(8), (d), 173.31(d)(4), Table Footnote (l), 173.332(d), 173.336(b)(4), 173.366(a), 173.273(a)(4), 173.247(a)(14), 173.10, 174.9, 174.20, 174.50, 174.61(c), 174.63(d)(1), (2), 174.81 Table Note b, 177.8484(a) Table Note b, 174.114(a), 174.104(c), (e), (f).
2137–0572	Testing Requirements for Packaging.	§§ 178.601(l), 178.0–2(c).
2137–0575	Bulk Packaging Marking Requirements.	§§ 172.332, 172.336.
2137–0580	Emergency Response Communication Standards.	Part 172, Subpart G.

§ 171.7 [Amended]

17. In § 171.7, the following changes are made:

a. In the paragraph (a) heading, the word "*incorporation*" is revised to read "*incorporated*".

b. In paragraph (a)(3), in the table, for the entry for "*General Services Administration*, Federal Specification RR–C–901C", the references "172.302; 172.304" are removed and replaced with "173.302; 173.304; 173.336".

c. In paragraph (b), in the table, for the entry "Emergency Handling of Hazardous Materials in Surface Transportation", the year "1987" is removed and replaced with "1989".

18. In § 171.8, the following definitions are added, revised, or removed, as indicated, in appropriate alphabetical order:

§ 171.8 Definitions and abbreviations.

(Add:)

* * * * *

Hazard zone means one of four levels of hazard (Hazard Zones A through D) assigned to gases, as specified in § 173.116(a) of this subchapter, and one of two levels of hazards (Hazard Zones A and B) assigned to liquids that are poisonous by inhalation, as specified in § 173.133(a) of this subchapter. A hazard zone is based on the LC50 value for acute inhalation toxicity of gases and vapors, as specified in § 173.133(a).

Infectious substance (etiologic agent). See § 173.134 of this subchapter.

* * * * *

Magnetic material. See § 173.21(d) of this subchapter.

* * * * *

Material poisonous by inhalation means:

(1) A gas meeting the defining criteria in § 173.115(c) of this subchapter and assigned to Hazard Zone A, B, C, or D in accordance with § 173.116(a) of this subchapter;

(2) A liquid (other than as a mist) meeting the defining criteria in § 173.132(a)(1)(iii) of this subchapter and assigned to Hazard Zone A or B in accordance with § 173.133(a) of this subchapter; or

(3) Any material identified as an inhalation hazard by a special provision in Column 7 of the § 172.101 Table.

* * * * *

Oxidizer. See § 173.28 of this subchapter.

* * * * *

State means a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, the Virgin Islands, American Samoa, Guam, or any other territory or possession of the United States designated by the Secretary.

* * * * *

(Revise:)

* * * * *

Bulk packaging means a packaging, other than a vessel or a barge, including a transport vehicle or freight container, in which hazardous materials are loaded with no intermediate form of containment and which has:

(1) A maximum capacity greater than 450 L (119 gallons) as a receptacle for a liquid;

(2) A maximum net mass greater than 400 kg (882 pounds) or a maximum capacity greater than 450 L (119 gallons) as a receptacle for a solid; or

(3) A water capacity greater than 454 kg (1000 pounds) as a receptacle for a gas as defined in § 173.115 of this subchapter.

* * * * *

Cryogenic liquid. See § 173.115(g) of this subchapter.

* * * * *

Inner receptacle means a receptacle which requires an outer packaging in order to perform its containment function. The inner receptacle may be an inner packaging of a combination packaging or the inner receptacle of a composite packaging.

* * * * *

Irritating material. See § 173.132(a)(2) of this subchapter.

* * * * *

Maximum net mass means the allowable maximum net mass of contents in a single packaging, or as used in subpart M of part 178 of this subchapter, the maximum combined mass of inner packaging, and the contents thereof.

* * * * *

Non-bulk packaging means a packaging which has:

(1) An maximum capacity of 450 L (119 gallons) or less as a receptacle for a liquid;

(2) A maximum net mass of 400 kg (882 pounds) or less and a maximum capacity of 450 L (119 gallons) or less as a receptacle for a solid; or

(3) A water capacity of 454 kg (1000 pounds) or less as a receptacle for a gas as defined in § 173.115 of this subchapter.

* * * * *

Packaging means a receptacle and any other components or materials necessary for the receptacle to perform its containment function in conformance with the minimum packing requirements of this subchapter. For radioactive materials packaging, see § 173.403 of this subchapter.

* * * * *

Person means an individual, firm, copartnership, corporation, company, association, joint-stock association, including any trustee, receiver, assignee, or similar representative thereof, or government, Indian tribe, or agency or instrumentality of any government or Indian tribe when it offers hazardous materials for transportation in commerce or transports hazardous materials in furtherance of a commercial enterprise, but such term does not include:

(1) The United States Postal Service; or

(2) For the purposes of sections 110 and 111 of the Hazardous Materials Transportation Act (49 App. U.S.C. 1809–1810), any agency or instrumentality of the Federal Government.

* * * * *

Technical name means a recognized chemical name or microbiological name currently used in scientific and technical handbooks, journals, and texts. Generic descriptions are authorized for use as technical names provided they readily identify the general chemical group, or microbiological group. Examples of acceptable generic chemical descriptions are organic phosphate compounds, petroleum aliphatic hydrocarbons and tertiary amines. For proficiency testing only, generic microbiological descriptions such as bacteria, mycobacteria, fungus, and viral samples may be used. Except for names which appear in Subpart B of Part 172 of this subchapter, trade names may not be used as technical names.

* * * * *

United States means a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, the Virgin Islands, American Samoa, Guam, or any other territory or possession of the United States designated by the Secretary.

19–20. Section 171.10 is revised to read as follows:

§ 171.10 Units of measure.

(a) General. To ensure compatibility with international transportation standards, most units of measure in this subchapter are expressed using the International System of Units ("SI" or metric). Where SI units appear, they are the regulatory standard. U.S. standard or customary units, which appear in parentheses following the SI units, are for information only and are not intended to be the regulatory standard.

(b) Abbreviations for SI units of measure generally used throughout this subchapter are as shown in paragraph (c) of this section. Customary units shown throughout this subchapter are generally not abbreviated.

(c) Conversion values. (1) Conversion values are provided in the following table and are based on values provided in ASTM E 380–89, "Standard for Metric Practice."

(2) If an exact conversion is needed, the following method should be used.

TABLE OF CONVERSION FACTORS FOR SI UNITS

Measurement	SI to U.S. standard	U.S. standard to SI
Length	1 cm=0.3937008 in	1 in=2.540000 cm
	1 m=3.280840 ft	1 ft=0.3048000 m
Thickness	1 mm=0.03937006 in	1 in=25.40000 mm
Mass (weight)	1 kg=2.204622 lb	1 lb=0.4535924 kg
	1 gr=0.03527397 oz	1 oz=28.34952 gr
Pressure	1 kPa=0.1450377 psi	1 psi=6.894757 kPa
	1 Bar=100 kPa=14.5 psi	1 psi=0.06 Bar
	1 kPa=7.5 mm Hg	
Volume (liquid)	1 l=0.2641720 gal	1 gal=3.785412 l
	1 ml=0.03381402 oz	1 oz=29.57353 ml
	1 m³=35.31466 ft³	1 ft³=0.02831685 m³
Density	1 kg/m³=0.06242797 lb/ft³	1 lb/ft³=16.01846 kg/m³

Abbreviations for units of measure are as follows:
Unit of measure and abbreviation:
(SI): Millimeter, mm; centimeter, cm; meter, m; gram, g; kilogram, kg; kiloPascal, kPa; liter, L; milliliter, ml; cubic meter, m³;
(U.S.): inch, in; foot, ft; ounce, oz; pound, lb; pounds per square inch, psi; gallon, gal; cubic feet, ft³.

21. In § 171.11, paragraphs (c) and (d)(9) are revised and paragraph (d)(12) is added to read as follows:

§ 171.11 Use of ICAO technical instructions.

* * * * *

(c) Is not a forbidden material or package according to § 173.21 of this subchapter or Column 3 of the § 172.101 Table; and

(d) * * *

(9) When a hazardous material, which is subject to the requirements of the ICAO Technical Instructions, is a material poisonous by inhalation (see § 171.8 of this subchapter)—

(i) The shipping description must include the words "Poison-Inhalation Hazard" or "Inhalation Hazard", as required in § 172.203(m) of this subchapter;

(ii) The material must be packaged in accordance with the requirements of this subchapter; and

(iii) The package must be marked in accordance with § 172.313 of this subchapter and labeled with "POISON" or "POISON GAS", as appropriate, in accordance with subpart E of part 172 of this subchapter.

* * * * *

(12) If an ammonium nitrate fertilizer or ammonium nitrate mixed fertilizer, must not meet the definition and criteria of a Class 1 (explosive) material.

22. In § 171.12, paragraph (b) is revised, the last parenthetical sentence of paragraph (c) is revised, and paragraphs (c)(1) and (2) are added to read as follows:

§ 171.12 Import and export shipments.

* * * * *

(b) *IMDG Code.* The IMDG Code sets forth descriptions, classifications, packagings, labeling and vessel stowage requirements. Notwithstanding the provisions of this subchapter, a material which is packaged, marked, classed, labeled, placarded, described, stowed

VOL 56 ISS 245 DEC 20 1991 UMI

and segregated, and certified in accordance with the IMDG Code, and otherwise conforms to the requirements of this section, may be offered and accepted for transportation and transported within the United States. The following conditions and limitations apply:

(1) The provisions of this paragraph (b) apply only if all or part of the transportation is by vessel.

(2) A number of materials listed in the IMDG Code are not subject to the requirements of this subchapter. The provisions of this subchapter do not apply to materials listed in the IMDG Code which are not designated as hazardous materials under this subchapter. These materials may, however, be transported in the U.S. when described, marked and labeled in accordance with the IMDG Code.

(3) A material designated as a hazardous material under this subchapter which is not subject to the requirements of the IMDG Code may not be transported under the provisions of this section.

(4) A forbidden material or package according to § 173.21 of this subchapter or Column 3 of the § 172.101 Table may not be transported under the provisions of this section.

(5) Bulk packagings must conform to the requirements of this subchapter.

(6) For export, packagings must conform to the applicable requirements in §§ 173.24, 173.24a and 173.28 of this subchapter.

(7) A Class 1 material must be classed and approved under the procedures in Subpart C of Part 173 of this subchapter, and packages of Class 1 materials must be marked in accordance with § 172.320 and Part 178 of this subchapter.

(8) When a hazardous material, which is subject to the requirements of the IMDG Code, is a material poisonous by inhalation (see § 171.8 of this subchapter)—

(i) The shipping description must include the words "Poison-Inhalation Hazard" or "Inhalation Hazard", as required in § 172.203(m) of this subchapter;

(ii) The material must be packaged in accordance with the requirements of this subchapter; and

(iii) The package must be marked in accordance with § 172.313 of this subchapter and labeled and placarded with "POISON" or "POISON GAS", as appropriate, in accordance with Subparts E and F, respectively, of Part 172 of this subchapter.

(9) Class 7 materials must conform to the provisions of paragraph (d) of this section.

(10) For a hazardous waste, as defined in this subchapter—

(i) The word "Waste" must precede the proper shipping name on shipping papers and packages; and

(ii) The requirements of § 172.205 of this subchapter with respect to hazardous waste manifests are applicable.

(11) A hazardous substance as defined in this subchapter must conform to the requirements of §§ 172.203(c) and 172.324 of this subchapter.

(12) A poisonous material must conform to the requirements of § 172.203(m) of this subchapter.

(13) For a Division 4.3 material, the words "Dangerous When Wet" must appear in association with the basic description on shipping papers.

(14) Any ammonium nitrate fertilizer or ammonium nitrate mixed fertilizer must not meet the definition and criteria of a Class 1 (explosive) material.

(15) Cylinders not manufactured to DOT specifications must conform to the requirements of § 173.301(i) and (j) of this subchapter.

(16) Shipments of hazardous materials under this section must conform to the requirements for emergency response information as prescribed in subpart G of part 172 of this subchapter.

(c) * * * The requirement in § 172.201(d) of this subchapter for an emergency telephone number does not apply to shipments made in accordance with the IMDG Code if the hazardous material:

(1) Is not offloaded from the vessel;

(2) Is offloaded between ocean vessels at a U.S. port facility without being transported by public highway.

* * * * *

23–24. In § 171.12a, the first sentence in paragraph (b) introductory text, and paragraphs (b)(1), (b)(5) and (b)(13) are revised and paragraph (b)(14) is added to read as follows:

§ 171.12a Canadian shipments and packagings.

* * * * *

(b) *Conditions and limitations.* Notwithstanding the requirements of Parts 172, 173, and 178 of this subchapter, and subject to the limitations of paragraph (a) of this section, a hazardous material that is classed, marked, labeled, placarded, described on a shipping paper, packaged, and offered for transportation in accordance with the Regulations Respecting the Handling, Offering for Transport and Transporting of Dangerous Goods (the Transportation of Dangerous Goods Regulations or TDG Regulations), issued by the Government of Canada, may be offered and accepted for transportation and transported by motor vehicle or rail car. * * *

(1) A number of materials listed in the TDG Regulations may not be subject to the requirements of this subchapter. The provisions of this subchapter do not apply to materials listed in the TDG Regulations which are not designated as hazardous materials under this subchapter. These materials may, however, be transported in the U.S. when described, marked and labeled in accordance with the TDG Regulations.

* * * * *

(5) When a hazardous material, which is a material poisonous by inhalation under the provisions of this subchapter (see § 171.8 of this subchapter), is subject to the requirements of the TDG Regulations—

(i) The shipping description must include the words "Poison-Inhalation Hazard" or "Inhalation Hazard", as required in § 172.203(m) of this subchapter;

(ii) The material must be packaged in accordance with the requirements of this subchapter; and

(iii) The package must be marked in accordance with § 172.313 of this subchapter. Except for a package containing anhydrous ammonia, the package must be labeled and placarded with "POISON" or "POISON GAS", as appropriate, in accordance with subparts E and F, respectively, of part 172 of this subchapter. For shipments of anhydrous ammonia, the shipping paper must contain an indication that the markings, labels and placards have been applied in conformance with the TDG Regulations and this paragraph (b)(5).

* * * * *

(13) When the provisions of this subchapter require that a DOT specification or UN standard packaging must be used for a hazardous material, a packaging authorized by the TDG Regulations may be used only if it corresponds to the DOT specification or UN packaging authorized by this subchapter. Cylinders not manufactured to DOT specifications must conform to the requirements of § 173.301(i) and (j) of this subchapter.

(14) Any ammonium nitrate fertilizer or ammonium nitrate mixed fertilizer must not meet the definition and criteria of a Class 1 (explosive) material.

§ 171.12a [Amended]

25. In addition, in § 171.12a, the following changes are made:

a. In paragraph (a), in the second sentence, the word "either" is added immediately before the word "terminate".

b. In paragraph (b)(4), "§ 173.320" is revised to read "§ 172.320".

26. Section 171.14 is republished to read as follows:

§ 171.14 Transitional provisions for implementing requirements based on the UN recommendations.

(a) *Purpose and scope.* A rule published in the Federal Register on December 21, 1990, effective October 1, 1991, resulted in a comprehensive revision of this subchapter based on the UN Recommendations. The purpose of the provisions of this section is to provide an orderly transition to the new requirements, so as to minimize any burdens associated with them. During a transition period as provided herein, persons may elect to comply with either the applicable old requirements of this subchapter in effect on September 30, 1991, or the new requirements of this subchapter appearing in the December 21, 1990 rule, and the rule published in the Federal Register on September 18, 1991, effective October 1, 1991.

(b) *Transition dates.* The following transition dates apply only to the new requirements in the December 21, 1990 rule:

(1) *October 1, 1991.* On October 1, 1991, the following requirements are effective:

(i) For new explosives, the hazard classification procedures as set forth in subpart C of part 173 (for explosives) of this subchapter and, except for vehicle placarding, hazard communication requirements (i.e., shipping papers, emergency response information, package markings, and labeling) as set forth in part 172 of this subchapter.

(ii) The classification of materials poisonous by inhalation meeting the criteria of Division 2.3 (see § 173.115(c) of this subchapter), which includes materials assigned Special Provision 13 in Column 7 of the § 172.101 Table; Division 6.1 (see § 173.133(a) of this subchapter); or are otherwise identified as poisonous by inhalation through a special provision in Column 7 of the § 172.101 Table. For such materials, the words "Poison-Inhalation Hazard" or "Inhalation Hazard" as required by § 172.203(m) or by Special Provision 13, as appropriate, shall be entered on shipping papers in association with the basic description.

(2) *October 1, 1992.* On October 1, 1992, the following requirements are effective:

(i) Hazard communication requirements of part 172 of this subchapter (including placarding requirements of subpart F of part 172 of this subchapter) for all materials poisonous by inhalation, which includes materials meeting the criteria in §§ 173.115(c) and 173.133(a) of this subchapter or materials otherwise identified as poisonous by inhalation through a special provision (or assigned Special Provision 13) in Column 7 of the § 172.101 Table.

(ii) For infectious substances (etiologic agents), the hazard classification procedures as set forth in § 173.134 of this subchapter and hazard communication requirements (i.e., shipping papers, emergency response information, package markings, and labeling) as set forth in part 172 of this subchapter.

(3) *October 1, 1993.* On October 1, 1993, the following requirements are effective:

(i) Classification and hazard communication requirements in part 172 of this subchapter, other than subpart F (placarding), and part 173 of this subchapter, that were not previously in effect;

(ii) Packaging requirements for all materials meeting the criteria for poisonous by inhalation;

(iii) Modal segregation requirements in §§ 174.81 and 177.848 of this subchapter; and

(iv) All other requirements of the December 21, 1990, rule for which a lengthier transition period is not provided elsewhere in this section.

(4) *October 1, 1994.* On October 1, 1994, the following are effective:

(i) Placarding requirements in subpart F of part 172 of this subchapter that were not previously in effect; and

(ii) Package manufacturing and marking requirements under the provisions of subpart B of 173, and parts 178 and 179 of this subchapter. (DOT specification packagings removed from part 178 of this subchapter by the December 21, 1990, rule may no longer be manufactured.).

(5) *October 1, 1996.* On October 1, 1996, requirements in parts 172 and 173 of this subchapter for maintenance and use of packagings that were not previously in effect are effective. (DOT specification packagings removed from part 178 of this subchapter by the December 21, 1990 final rule and packaging authorizations removed from part 173 of this subchapter by the December 21, 1990 final rule may no longer be used in place of new packaging requirements.).

(c) *Other transitional provisions.*—(1) *Packages filled prior to October 1, 1991.* Notwithstanding the marking and labeling provisions of subparts D and E, respectively, of part 172, and the packaging provisions of part 173 and subpart B of part 172 of this subchapter, a package may be offered for transportation and transported prior to October 1, 2001, if it—

(i) Conforms to the old requirements of this subchapter in effect on September 30, 1991;

(ii) Is filled with hazardous materials prior to October 1, 1991;

(iii) Is marked "Inhalation Hazard", if appropriate, in accordance with § 172.313 of this subchapter or Special Provision 13, as assigned in the § 172.101 Table; and

(iv) Is not emptied and refilled on or after October 1, 1991.

(2) *Transitional placarding provisions.* Until October 1, 1994, placards which conform to specifications for placards in effect on September 30, 1991, may be used in place of the placards specified in subpart F of part 172 of this subchapter, in accordance with the following table:

PLACARD SUBSTITUTION TABLE

Hazard class or division No.	Current placard name	Old (Sept. 30, 1991) placard name
Division 1.1	Explosives 1.1	Explosives A.
Division 1.2	Explosives 1.2	Explosives A.
Division 1.3	Explosives 1.3	Explosives B.
Division 1.4	Explosives 1.4	Dangerous.
Division 1.5	Explosives 1.5	Blasting agents.
Division 1.6	Explosives 1.6	Dangerous.
Division 2.1	Flammable gas	Flammable gas.
Division 2.2	Nonflammable gas	Nonflammable gas.
Division 2.3	Poison gas	Poison gas.
Class 3	Flammable	Flammable
Combustible liquid.	Combustible	Combustible.
Division 4.1	Flammable solid.	Flammable solid.
Division 4.2	Spontaneously combustible.	Flammable solid.
Division 4.3	Dangerous when wet.	Flammable solid W.
Division 5.1	Oxidizer	Oxidizer.
Division 5.2	Organic peroxide.	Organic peroxide.
Division 6.1, PG I and II.	Poison	Poison.
Division 6.1, PG III.	Keep away from food.	(none required).
Class 7	Radioactive	Radioactive.
Class 8	Corrosive	Corrosive.
Class 9	Class 9	(none required.)

(3) *Intermixing old and new requirements.* During the transition periods provided in paragraph (b) of this section, it is recommended that hazard communication requirements be consistent where practicable, i.e., marking, labeling, placarding, and shipping paper descriptions should conform to either the old requirements of this subchapter in effect on September 30, 1991, or new requirements of this subchapter added or revised by the December 21, 1990, rule, without intermixing of communication elements. However, intermixing is permitted, during the applicable transition periods.

VOL 56 ISS 245 DEC 20 1991 UMI

for packaging, hazard communication, and handling provisions, as follows:

(i) A package may be manufactured to the old requirements of this subchapter in effect on September 30, 1991 (e.g., a DOT 17E drum) even if marked and labeled for the hazardous material contained therein under the new requirements of this subchapter appearing in the December 21, 1990 rule;

(ii) A package may be manufactured to the new requirements of this subchapter appearing in the December 21, 1990 rule (e.g., a UN 4G box) even if marked and labeled for the hazardous material contained therein under the old requirements of this subchapter in effect on September 30, 1991;

(iii) If either shipping names or identification numbers are identical, a shipping paper may display the old shipping description even if the package is marked and labeled under the new shipping description;

(iv) If either shipping names or identification numbers are identical, a shipping paper may display the new shipping description even if the package is marked and labeled under the old shipping description;

(v) Either old or new placards may be used during the appropriate placarding transition period regardless of whether old or new shipping descriptions and package markings are used; and

(vi) Either old or new handling requirements, including segregation and stowage, may be used during the applicable transition period (see paragraph (b)(3) of this section).

§ 171.19 [Amended]

27. In § 171.19, the wording "Director, OHMT" is removed and replaced with "Associate Administrator for Hazardous Materials Safety" each place it appears.

§ 171.20 [Amended]

28. In § 171.20, the following changes are made:

a. In paragraph (b), the wording "Director, Office of Hazardous Materials Transportation" is removed and replaced with "Associate Administrator for Hazardous Materials Safety".

b. In paragraphs (a) and (c), the wording "Director, OHMT" is removed and replaced with "Associate Administrator for Hazardous Materials Safety" each place it appears.

PART 172—HAZARDOUS MATERIALS TABLE, SPECIAL PROVISIONS, HAZARDOUS MATERIALS COMMUNICATIONS REQUIREMENTS AND EMERGENCY RESPONSE INFORMATION REQUIREMENTS

29. The authority citation for part 172 is revised to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1805, 1808; 49 CFR part 1, unless otherwise noted.

30. In § 172.101, paragraphs (c)(10)(i)(E) and (F) are added to read as follows:

§ 172.101 Purpose and use of hazardous materials table.

* * * * *

(c) * * *
(10) * * *
(i) * * *

(E) The material is identified by special provision in Column 7 of the § 172.101 Table as a material poisonous by inhalation; however, it no longer meets the definition of poisonous by inhalation or it falls within a different hazard zone than that specified in the special provision; *or*

(F) The material can be appropriately described by a shipping name that describes its intended application, such as "Coating solution", "Extracts, flavoring" or "Compound, cleaning liquid".

* * * * *

§ 172.101 [Amended]

31. In addition, in § 172.101, the following changes are made:

a. In paragraph (c)(8), the paragraph heading is revised to read "*Hazardous substances.*"

b. In paragraph (c)(9), a paragraph heading is added to read "*Hazardous wastes.*"

c. In paragraph (c)(10), the paragraph heading is revised to read "*Mixtures and solutions.*"

d. In paragraph (c)(10)(i) introductory text, the wording "not identified specifically by name," is added immediately after "solution" and before "comprised" and the wording "material shall" is revised to read "material, shall".

e. In paragraph (c)(10)(i)(C), the "or" at the end of the paragraph is removed.

f. In paragraph (c)(10)(i)(D), the period is removed and replaced with a semicolon.

g. In paragraph (c)(10)(ii), the wording "paragraphs (c)(10)(i)(A), (i)(B), (i)(C), and (i)(D) of this section are" is revised to read "paragraph (c)(10)(i) of this section is".

h. In paragraph (c)(11) introductory text, the wording "173.56(e)(1) or 173.114a(g)(2)" is revised to read "or 173.56(e)(1)".

i. In paragraph (c)(12)(i), the wording "Column 5" is revised to read "Column 6".

j. In paragraph (c)(12)(ii), a paragraph heading is added to read: "*Generic or n.o.s. descriptions.*"

k. In paragraph (c)(12)(iii), a paragraph heading is added to read: "*Multiple hazard materials.*"; the wording "or a dual hazard n.o.s. description (e.g., "Flammable liquid, corrosive n.o.s.")" is removed; the wording "(e.g., "Flammable liquid, corrosive n.o.s.")" is added immediately after "shipping description" and before "shall"; and a second sentence is added to read "Except for a pesticide, a subsidiary hazard of Division 6.1, Packing Group III, need not be considered for selecting a shipping description."

l. In paragraph (d)(4), the wording "or has a flash point above 60.5°C (141°F) but below 93°C (200°F)" is added at the end of the sentence.

m. In paragraph (f), the wording "Classes 1, 2 and 7 materials, combustible liquids, and ORM-D materials" is revised to read "Classes 2 and 7 materials and ORM-D materials".

n. In paragraph (i)(3), in the first sentence, the wording "packaging other than IM portable tanks." is revised to read "packagings, subject to the limitations, requirements and additional authorizations of Column 7." The third sentence is revised to read "Additional authorizations and limitations for use of IM portable tanks are set forth in Column 7."

o. In paragraph (i)(3)(i), the wording "for a solid or liquid, respectively" is removed.

p. In paragraph (i)(4), "(i.e.," is revised to read "(e.g.,".

q. In paragraph (l)(2), the word "Any" is revised to read "any" and the wording "Except as otherwise provided in this section," is added at the beginning of the sentence.

32. In § 172.101, the title of the Table, and the Table itself are revised to read as follows:

§ 172.101 HAZARDOUS MATERIALS TABLE

Symbols (1)	Hazardous materials descriptions and proper shipping names (2)	Hazard class or Division (3)	Identification Numbers (4)	Packing group (5)	Label(s) required (if not excepted) (6)	Special provisions (7)	(8) Packaging authorizations (§ 173.***) Exceptions (8A)	Non-bulk packaging (8B)	Bulk packaging (8C)	(9) Quantity limitations Passenger aircraft or rail car (9A)	Cargo aircraft only (9B)	(10) Vessel stowage requirements Vessel stowage (10A)	Other stowage provisions (10B)

VOL 56 ISS 245 DE 20 1991 UMI

33. In § 172.102, the second sentence in paragraph (a) is revised and paragraphs (a)(1) and (2) are added, and in paragraph (c), the following special provisions are added, revised, or removed as indicated:

a. In paragraph (c)(1), Special Provisions 7, 10, 15, 16, 18, and 20 are added; and Special Provisions 1, 2, 3, 4, 5, 8, 13, 53, 110, 112, and 114 are revised.

b. In paragraph (c)(2), Special Provisions A12 and A34 are added.

c. In paragraph (c)(3), Special Provisions B3, B10, B48, and B82 are added; Special Provisions B2, B4, B5, B11, B14, B16, B26, B30, B31, B32, B33, B37, B58, B59, B66, B67, B68, B74, and B79 are revised; and Special Provisions B13, B34, B35, B36, B40, B51, B73 and B75 are removed.

d. In paragraph (c)(5), Special Provisions N9, N10, N11, N20, N81, and N82 are added and Special Provision N45 is revised.

e. In paragraph (c)(7)(i) table, Special Provision T22 is added; in paragraph (c)(7)(ii), Special Provisions T28, T34, and T37 are added, and Special Provisions T29, T30, and T38 are revised.

§ 172.102 Special provisions.

(a) * * * When a special provision specifies packaging or packaging requirements—

(1) The special provision is in addition to the standard requirements for all packagings prescribed in § 173.24 of this subchapter and any other applicable packaging requirements in subparts A and B of part 173 of this subchapter; and

(2) To the extent a special provision imposes limitations or additional requirements on the packaging provisions set forth in Column 8 of the § 172.101 Table, packagings must conform to the requirements of the special provision.

(c) * * *

(1) * * *

Code/Special Provisions

1 This material is poisonous by inhalation (see § 171.8 of this subchapter) in Hazard Zone A (see § 173.115(a) or § 173.133(a) of this subchapter), and must be described as an inhalation hazard under the provisions of this subchapter.

2 This material is poisonous by inhalation (see § 171.8 of this subchapter) in Hazard Zone B (see § 173.116(a) or § 173.133(a) of this subchapter), and must be described as an inhalation hazard under the provisions of this subchapter.

3 This material is poisonous by inhalation (see § 171.8 of this subchapter) in Hazard Zone C (see § 173.116(a) of this subchapter), and must be described as an inhalation hazard under the provisions of this subchapter.

4 This material is poisonous by inhalation (see § 171.8 of this subchapter) in Hazard Zone C (see § 173.116(a) of this subchapter), and must be described as an inhalation hazard under the provisions of this subchapter.

5 If this material meets the definition for a material poisonous by inhalation (see § 171.8 of this subchapter), a shipping name must be selected which identifies the inhalation hazard, in Division 2.3 or Division 6.1, as appropriate.

* * * * *

7 An ammonium nitrate fertilizer is a fertilizer formulation, containing 90% or more ammonium nitrate and no more than 0.2% organic combustible material (calculated as carbon), which does not meet the definition and criteria of a Class 1 (explosive) material (See § 173.50 of this subchapter).

8 A hazardous substance that is not a hazardous waste may be shipped under the shipping description "Other regulated substances, liquid *or* solid, n.o.s.", as appropriate. In addition, for solid materials, special provision B54 applies.

* * * * *

10 An ammonium nitrate mixed fertilizer is a fertilizer formulation, containing less than 90% ammonium nitrate and other ingredients, which does not meet the definition and criteria of a Class 1 (explosive) material (See § 173.50 of this subchapter).

* * * * *

13 The words "Inhalation Hazard" shall be entered on each shipping paper in association with the shipping description, shall be marked on each non-bulk package in association with the proper shipping name and identification number, and shall be marked on two opposing sides of each bulk package. Size of marking on bulk package must conform to § 172.302(b) of this subchapter. The requirements of §§ 172.203(m) and 172.505 of this subchapter do not apply.

* * * * *

15 Chemical kits include boxes, cases, etc., containing small amounts of various compatible dangerous goods which are used for medical, analytical or testing purposes and for which exceptions are provided in this subchapter. Inner packagings must not exceed 250 mL for liquids or 250 g for solids and must be protected from other materials in the kit. For transportation by aircraft, any dangerous goods forbidden in passenger aircraft may not be included in these kits. Kits must be packed in wooden boxes (4C1, 4C2), plywood boxes (4D), reconstituted wood boxes (4F), fiberboard boxes (4G) or plastic boxes (4H1, 4H2) which must be marked 'Chemical kits.' Each package shall be classified for the material contained therein; if two or more different classes of material are present the class of the package shall be determined in accordance with § 173.2a of this subchapter. Each package must be labeled according to each substance contained in the package; this includes the primary hazard label and any subsidiary risk labels applicable to each individual substance within the kit. The total quantity of dangerous goods in any one kit must not exceed either 1 L or 1 kg. The total quantity of dangerous goods in any one package must not exceed either 10 L or 10 kg. The packing group assigned to the kit as a whole must be the most stringent packing group assigned to any individual substance contained in the kit.

16 This description applies only to materials that have been classed as Division 1.3.

* * * * *

18 This article and its packaging must be approved by the Associate Administrator for Hazardous Materials Safety.

20 The transport of this substance, when in concentrations of greater than 10% nitroglycerin, is prohibited. Concentrations of below 5% nitroglycerin may be transported as a Class 3 material; see UN 1204 and UN 3064.

* * * * *

53 Packages of these materials must bear the subsidiary risk label, "EXPLOSIVE", unless otherwise provided in this subchapter or through an approval issued by the Associate Administrator for Hazardous Materials Safety, or the competent authority of the country of origin. A copy of the approval shall accompany the shipping papers.

* * * * *

110 Cartridges containing 3.2 grams or less of deflagrating (propellant) explosives installed in a fire extinguisher are not subject to the requirements of this subchapter.

* * * * *

112 "Cartridges, small arms" and "Cartridges, power devices (which are used to project fastening devices)" which have been classed in Division 1.4 Compatibility Group S (1.4S) may be reclassed and offered for domestic transportation as ORM-D material if they are offered for transportation and transported in accordance with the limitations and packaging requirements of § 173.230 of this subchapter.

* * * * *

114 Jet perforating guns, charged, oil well, without detonator may be reclassed to Division 1.4 Compatibility Group D (1.4D) if the following conditions are met:

a. The total weight of the explosive contents of the shaped charges assembled in the guns does not exceed 90.5 kg (200 pounds) per vehicle; and

b. The guns are packaged in accordance with Packing Method US006 as specified in § 173.62 of this subchapter.

* * * * *

(2) * * *

Code/Special Provisions

* * * * *

A12 The quantity of lithium contained in any piece of equipment must not exceed 12 grams per cell and 500 grams per battery for cargo aircraft. No piece of equipment may contain more than 5 kilograms of lithium batteries. Lithium batteries are forbidden for transportation by passenger-carrying aircraft unless approved by the Associate Administrator for Hazardous Materials Safety.

* * * * *

A34 Aerosols containing a corrosive liquid in Packing Group II charged with a gas

are not permitted for transportation by aircraft.

(3) * * *

Code/Special Provisions

* * * * *

B2 MC 306 and DOT 406 cargo tanks are not authorized.

B3 MC 306 and DOT 406 cargo tanks and DOT 57 portable tanks are not authorized.

B4 AAR 206 tank car tanks and MC 306 and DOT 406 cargo tanks are not authorized.

B5 Only ammonium nitrate solutions with 35 percent or less water that will remain completely in solution at a maximum lading temperature of 116°C (240°F) are authorized for the transport in the following bulk packagings: DOT 103 ALW, 111A60 ALW tank car tanks and MC 307, MC 312, DOT 407 and DOT 412 cargo tanks with at least 172 kPa (25 psig) design pressure. The packaging shall be designed for a working temperature of at least 121°C (250°F). Only Specifications MC 304, MC 307 or DOT 407 cargo tank motor vehicles are authorized for transportation by vessel.

* * * * *

B10 AAR 206 tank car tanks, MC 306 and DOT 406 cargo tanks, and DOT 57 portable tanks are not authorized.

B11 Tank car tanks must have a test pressure of at least 2,068.5 kPa (300 psi). Cargo and portable tanks must have a design pressure of at least 1,207 kPa (175 psig).

* * * * *

B14 Each tank, except a multi-unit tank car tank, must be insulated with at least 100 mm (3.9 inches) of cork or other suitable insulation material of sufficient thickness that the overall thermal conductance at 15.5°C (60°F) is not more than 1.533 kilojoules per hour per square meter per degree celsius (0.075 Btu per hour per square foot per degree Fahrenheit) temperature differential. The exterior surface of a carbon steel tank and the interior surface of a carbon steel jacket must be given a protective coating. The jacket must be flashed around all openings so as to be weather-tight.

* * * * *

B16 The lading must be completely covered with nitrogen, inert gas or other inert materials.

* * * * *

B26 Tanks must be insulated. Insulation must be at least 100 mm (3.9 inches) except that the insulation thickness may be reduced to 51 mm (2 inches) over the exterior heater coils. Interior heating coils are not authorized. The packaging may not be loaded with a material outside of the packaging's design temperature range. In addition, the material must be covered with an inert gas or filled with water to the tank's capacity. After unloading, the material must also be covered with an inert gas or filled with water to the entire capacity of the tank.

* * * * *

B30 MC 312, MC 330, MC 331 and DOT 412 cargo tanks and DOT 51 portable tanks must be made of stainless steel, except that steel other than stainless steel may be used in accordance with the provisions of § 173.24b(b) of this subchapter. Thickness of stainless steel for tank shell and heads for cargo tanks and portable tanks must be the greater of 7.62 mm (0.300 inch) or the thickness required for a tank with a design pressure at least equal to 1.5 times the vapor pressure of the lading at 46°C (115° F). In addition, MC 312 and DOT 412 cargo tank motor vehicles must:

a. Be ASME Code (U) stamped for 100% radiography of all pressure-retaining welds;

b. Have accident damage protection which conforms with § 178.345–8 of this subchapter;

c. Have a MAWP or design pressure of at least 87 psig; and

d. Have a bolted ASA manway cover.

B31 Bromine tank cars built prior to December 31, 1990 to DOT105A500W which have been stencilled and valved as DOT105A300W may continue in service.

B32 MC 312, MC 330, MC 331 DOT 412 cargo tanks and DOT 51 portable tanks must be made of stainless steel, except that steel other than stainless steel may be used in accordance with the provisions of § 173.24b(b) of this subchapter. Thickness of stainless steel for tank shell and heads for cargo tanks and portable tanks must be the greater of 6.35 mm (0.250 inch) or the thickness required for a tank with a design pressure at least equal to 1.3 times the vapor pressure of the lading at 46°C (115° F). In addition, MC 312 and DOT 412 cargo tank motor vehicles must:

a. Be ASME Code (U) stamped for 100% radiography of all pressure-retaining welds;

b. Have accident damage protection which conforms with § 178.345–8 of this subchapter;

c. Have a MAWP or design pressure of at least 87 psig; and

d. Have a bolted ASA manway cover.

B33 MC 300, MC 301, MC 302, MC 303, MC 305, MC 306, and DOT 406 cargo tanks equipped with a 1 psig normal vent used to transport gasoline are subject to the following requirements. Based on the volatility class determined by using ASTM D439 and the Reid vapor pressure (RVP) of the particular gasoline, the maximum lading pressure and maximum ambient temperature permitted during the loading of gasoline may not exceed that listed in Table I.

TABLE I—MAXIMUM AMBIENT TEMPERATURE—GASOLINE

ASTM D439 volatility class	Maximum lading and ambient temperature (see note 1)
A (RVP <= 9.0 psia)	131° F
B (RVP <= 10.0 psia)	124° F
C (RVP <= 11.5 psia)	116° F
D (RVP <= 13.5 psia)	107° F
E (RVP <= 15.0 psia)	100° F

Note 1: Based on maximum lading pressure of 1 psig at top of cargo tank.

* * * * *

B37 The amount of nitric oxide charged into any tank car tank may not exceed 1,379 kPa (200 psig) at 21° C (70° F).

* * * * *

B48 Portable tanks in sodium metal service may be visually inspected at least once every 5 years instead of being retested hydrostatically. Date of the visual inspection must be stenciled on the tank near the other required markings.

* * * * *

B58 Notwithstanding the provisions of § 173.244(a) of this subchapter, only DOT 105J300W tank car tanks are authorized. Class 106 and 110 multi-unit tank car tanks are also authorized.

B59 AAR Specification 207A40W, 207A40W6, 207A48W, 207A60W, 207A80W tank car tanks are also authorized provided that the lading is covered in a nitrogen blanket.

* * * * *

B66 Each tank must be equipped with gas tight valve protection caps. Outage must be sufficient to prevent tanks from becoming liquid full at 55°C (130°F). Specification 110A500W tanks must be stainless steel.

B67 Tanks must be lagged with not less than a 100 mm (3.9 inch) thickness of cork. All valves and fittings must be protected by a securely attached cover made of metal not subject to deterioration by the lading, and all valve openings, except safety valve, must be fitted with screw plugs or caps to prevent leakage in the event of valve failure.

B68 Sodium must be in a molten condition when loaded and allowed to solidify before shipment. Outage must be at least 5 percent at 98°C (208°F). Bulk packagings must have exterior heating coils fusion welded to the tank shell which have been properly stress relieved. The only tank car tanks authorized are Class DOT 105 tank cars having a test pressure of 2069 kPa (300 psig) or greater.

* * * * *

B74 Notwithstanding the provisions of §§ 173.243(a) and 173.244(a) of this subchapter, only the following tank car tanks are authorized: DOT 105J300W, 112J340W, 112T340W, 114J340W, 114T340W and 105J300ALW tank car tanks; and Class DOT 106 and 110 multi-unit tank car tanks.

* * * * *

B79 Tank car tanks must have head puncture resistance and thermal protection in accordance with §§ 179.105–4 and 179.105–5 of this subchapter for tanks built before April 1, 1989.

* * * * *

B82 Cargo tanks and portable tanks are not authorized.

* * * * *

(5) * * *

Code/Special Provisions

* * * * *

N9 If the substance is impregnated with less than 5% oil, it is excepted from the labeling requirements of subpart D of this part and the packaging tests of subpart M of part 178 of this subchapter.

N10 Lighters and their inner packagings, which have been approved by the Associate Administrator for Hazardous Materials Safety (see § 173.21(i) of this subchapter), must be packaged in one of the following outer packagings at the Packing Group II

VOL 56 ISS 245 DEC 20 1991 UMI

level: 4C1 or 4C2 wooden boxes; 4D plywood boxes; 4F reconstituted wood boxes; 4G fiberboard boxes; or 4H1 or 4H2 plastic boxes.

N11 This material is excepted for the specification packaging requirements of this subchapter if the material is packaged in strong, tight non-bulk packaging meeting the requirements of subparts A and B of Part 173 of this subchapter.

* * * * *

N20 A 5M1 multi-wall paper bag is authorized if transported in a closed transport vehicle.

* * * * *

N45 Copper cartridges are authorized as inner packagings if the hazardous material is not in dispersion.

* * * * *

N81 Polychlorinated biphenyl items, as defined in 40 CFR 761.3, for which specification packagings are impractical, may be packaged in non-specification packagings meeting the general packaging requirements of subparts A and B of part 173 of this subchapter. Alternatively, the item itself may be used as a packaging if it meets the general packaging requirements of subparts A and B of part 173 of this subchapter.

N82 See § 173.306 of this subchapter for classification criteria for flammable aerosols.

* * * * *

(7) * * *

(i) * * *

IM TANK CONFIGURATIONS

Code	IM tank type	Minimum test pressure (bars)	Bottom outlets	Pressure relief devices
(1)	(2)	(3)	(4)	(5)
*	*	*	*	*
T22	101	6	§ 173.32c(g)(1)	§ 178.270–11(a)(1)(2)
*	*	*	*	*

(ii) * * *

Code/Special Provisions

* * * * *

T28 IM portable tanks in sodium metal service are not required to be hydrostatically retested.

T29 The lading must be completely covered with nitrogen, inert gas or other inert materials.

T30 IM 102 portable tanks without bottom openings or with bottom openings conforming to § 173.32c(g)(1) of this subchapter are authorized for a hazardous material with a flash point of 0°C (32°F) or greater and a vapor pressure not greater than 65.5 kPa (9.5 psia) at 65.6°C (150°F).

* * * * *

T34 The IM Tank authorization is limited to aqueous solutions containing not more than 40% dimethylamine.

* * * * *

T37 IM portable tanks are only authorized for the shipment of hydrogen peroxide solutions in water containing 72 percent or less hydrogen peroxide by weight. Pressure relief devices shall be designed to prevent the entry of foreign matter, the leakage of liquid and the development of any dangerous excess pressure. In addition, the tank shall be designed so that internal surfaces may be effectively cleaned and passivated. Each tank must be equipped with pressure relief devices conforming to the following requirements:

Concentration of hydrogen peroxide solution	Total venting capacity in standard cubic feet per hour (S.C.F.H.) per pound of hydrogen peroxide solution
52 percent or less	11
Over 52 percent but not greater than 60 percent	22
Over 60 percent but not greater than 72 percent	32

T38 Each tank, except a multi-unit tank car tank, must be insulated with at least 100 mm (3.9 inches) of cork or other suitable insulation material of sufficient thickness that the overall thermal conductance at 15.5°C (60°F) is not more than 1.533 kilojoules per hour per square meter per degree celsius (0.075 Btu per hour per square foot per degree Fahrenheit) temperature differential. The exterior surface of a carbon steel tank and the interior surface of a carbon steel jacket must be given a protective coating. The jacket must be flashed around all openings so as to be weather-tight.

* * * * *

§ 172.102 [Amended]

34. In addition, in § 172.102, the following changes are made:

a. In paragraph (b) introductory text, the word "may" is removed.

b. In paragraph (c)(1), in special provision 109, in the first sentence, the wording "Except as provided in § 173.63(d) of this subchapter," is removed and the word "rocket" is revised to read "Rocket".

c. In paragraph (c)(1), in special provision 111, "(1.)A)" is revised to read "(1.1A)".

d. In paragraph (c)(7) introductory text, the wording "the IM Tank Table" is revised to read "IM Tank Configurations".

35. In § 172.202, paragraphs (a)(2), (a)(4), and (a)(5) are revised to read as follows:

§ 172.202 Description of hazardous material on shipping papers.

(a) * * *

(1) * * *

(2) The hazard class or division prescribed for the material as shown in Column 3 of the § 172.101 Table (class names or subsidiary hazard class number may be entered following the numerical hazard class, or following the basic description). The hazard class need not be included for the entry "Combustible liquid, n.o.s.";

(3) * * *

(4) The packing group, in Roman numerals, prescribed for the material in Column 5 of the § 172.101 Table, if any. The packing group may be preceded by the letters "PG" (e.g., "PG II"); and

(5) Except for empty packagings (see § 173.29 of this subchapter), cylinders for Class 2 (compressed gases) materials, and bulk packagings, the total quantity (by net or gross mass, capacity, or as otherwise appropriate), including the unit of measurement, of the hazardous material covered by the description (e.g., "800 lbs", "55 gal.", "3629 kg", or "208 L"). For cylinders for Class 2 (compressed gases) materials and bulk packagings, some indication of total quantity must be shown (e.g., "10 cylinders" or "1 cargo tank").

* * * * *

36. In § 172.203, paragraphs (d)(1)(i) through (d)(1)(v) are redesignated as paragraphs (d)(2) through (d)(6), paragraphs (d)(1)(vi) introductory text and (d)(1)(vi)(A) through (D) are redesignated as paragraphs (d)(7) introductory text and (d)(7)(i) through (iv), paragraphs (d)(1)(vii) and (d)(1)(viii) are redesignated as paragraphs (d)(8) and (d)(9), introductory text is added to paragraph (d) following the heading and paragraph (d)(1) is revised, and paragraphs (i), (k)(3) and (m)(1), (m)(2) and (m)(3) are revised, to read as follows:

§ 172.203 Additional description requirements.

* * * * *

(d) *Radioactive material.* The description for a shipment of a Class 7 (radioactive) material must include the following additional entries as appropriate:

(1) The words "RADIOACTIVE MATERIAL" unless these words are contained in the proper shipping name.

* * * * *

(i) *Transportation by water.* Each shipment by water must have the following additional shipping paper entries:

(1) Identification of the type of packagings such as barrels, drums, cylinders, and boxes.

(2) The number of each type of package including those in a freight container or on a pallet.

(3) The gross mass of each type of package or the individual gross mass of each package.

* * * * *

(k) * * *

(3) Proper shipping names for which the provisions of this paragraph apply are as follows:

Alcohols, toxic, n.o.s.
Articles, explosive, n.o.s.
Caustic alkali liquids, n.o.s.
Combustible liquid, n.o.s.
Compounds, cleaning liquid, *corrosive*
Compounds, cleaning liquid, *flammable*
Compounds, tree *or* weed killing, liquid, *corrosive*
Compounds, tree *or* weed killing, liquid, *flammable*
Compounds, tree *or* weed killing, liquid, *poisonous*
Components, explosive train, n.o.s.
Compressed *or* Liquefied gases, n.o.s.
Compressed *or* Liquefied gases, flammable, n.o.s.
Compressed *or* Liquefied gases, flammable, toxic, n.o.s.
Compressed or Liquefied gases, toxic, n.o.s.
Contrivances, water-activated
Corrosive liquids, flammable, n.o.s.
Corrosive liquids, n.o.s.
Corrosive liquids, oxidizing, n.o.s.
Corrosive liquids, poisonous, n.o.s.
Corrosive liquids, which in contact with water emit flammable gases, n.o.s.
Corrosive solids, flammable, n.o.s.
Corrosive solids, n.o.s.
Corrosive solids, oxidizing, n.o.s.
Corrosive solids, poisonous, n.o.s.
Corrosive solids, self heating, n.o.s.
Corrosive solids, which in contact with water emit flammable gases, n.o.s.
Disinfectants, corrosive, liquid, n.o.s.
Disinfectants, liquid, n.o.s.
Disinfectants, solids, n.o.s.
Dispersant gas, n.o.s.
Dyes, liquid, n.o.s. *or* Dye intermediates, liquid, n.o.s.
Dyes, solid, n.o.s. *or* Dye intermediates, solid, n.o.s.
Environmentally hazardous substances, liquid, n.o.s.
Environmentally hazardous substances, solid, n.o.s.
Flammable liquids, corrosive, n.o.s.
Flammable liquids, n.o.s.
Flammable liquids, poisonous, n.o.s.
Flammable solids, corrosive, n.o.s.
Flammable solids, n.o.s.
Flammable solids, poisonous, n.o.s.
Halogenated irritating liquids, n.o.s.
Hazardous waste, liquid, n.o.s.
Hazardous waste, solid, n.o.s.
Infectious substances, affecting animals
Infectious substances, affecting humans
Insecticide gases, *flammable*, n.o.s.
Insecticide gases, n.o.s.
Insecticide gases, toxic, n.o.s.
Medicines, n.o.s.
Metal powders, flammable, n.o.s.
Organic peroxide type B, liquid
Organic peroxide type B, liquid, temperature controlled
Organic peroxide type B, solid
Organic peroxide type B, solid, temperature controlled
Organic peroxide type C, liquid
Organic peroxide type C, liquid, temperature controlled
Organic peroxide type C, solid
Organic peroxide type C, solid, temperature controlled
Organic peroxide type D, liquid
Organic peroxide type D, liquid, temperature controlled
Organic peroxide type D, solid
Organic peroxide type D, solid, temperature controlled
Organic peroxide type E, liquid
Organic peroxide type E, liquid, temperature controlled
Organic peroxide type E, solid
Organic peroxide type E, solid, temperature controlled
Organic peroxide type F, liquid
Organic peroxide type F, liquid, temperature controlled
Organic peroxide type F, solid
Organic peroxide type F, solid, temperature controlled
Other regulated substances, liquid, n.o.s.
Other regulated substances, solid, n.o.s.
Oxidizing substances, liquid, corrosive, n.o.s.
Oxidizing substances, liquid, n.o.s.
Oxidizing substances, liquid, poisonous, n.o.s.
Oxidizing substances, solid, corrosive, n.o.s.
Oxidizing substances, solid, n.o.s.
Oxidizing substances, solid, poisonous, n.o.s.
Pesticides, liquid, flammable, toxic, n.o.s.
Pesticides, liquid, toxic, flammable, n.o.s.
Pesticides, liquid, toxic, n.o.s.
Pesticides, solid, toxic, n.o.s.
Poisonous liquids, corrosive, n.o.s.
Poisonous liquids, flammable, n.o.s.
Poisonous liquids, n.o.s.
Poisonous liquids, oxidizing, n.o.s.
Poisonous liquids, which in contact with water emit flammable gases, n.o.s.
Poisonous solids, corrosive, n.o.s.
Poisonous solids, flammable, n.o.s.
Poisonous solids, n.o.s.
Poisonous solids, oxidizing, n.o.s.
Poisonous solids, self-heating, n.o.s.
Poisonous solids, which in contact with water emit flammable gases, n.o.s.
Pyrophoric liquids, n.o.s.
Pyrophoric solids, n.o.s.
Pyrophoric metals, n.o.s. *or* Pyrophoric alloys, n.o.s.
Refrigerant gas, n.o.s.
Refrigerant gases, n.o.s.
Rodenticides, n.o.s.
Samples, explosive (*other than initiating explosives*)
Self-heating substances, solid, corrosive, n.o.s.
Self-heating substances, solid, n.o.s.
Self-heating substances, solid, poisonous, n.o.s.
Self-reactive substances, Sample, n.o.s.
Self-reactive substances, Trial quantities, n.o.s.
Substances, explosive, n.o.s.
Substances, explosive, very insensitive (substances, EVI) n.o.s.".
Substances, which in contact with water emit flammable gases, liquid, corrosive, n.o.s.
Substances, which in contact with water emit flammable gases, liquid, n.o.s.
Substances, which in contact with water emit flammable gases, liquid, poisonous, n.o.s.
Substances, which in contact with water emit flammable gases, solid, corrosive, n.o.s.
Substances, which in contact with water emit flammable gases, solid, n.o.s.
Substances, which in contact with water emit flammable gases, solid, oxidizing, n.o.s.
Substances, which in contact with water emit flammable gases, solid, poisonous, n.o.s.
Substances, which in contact with water emit flammable gases, solid, self-heating, n.o.s.
Substances, which in contact with water emit flammable gases, solid, flammable n.o.s.
Tear gas substances, n.o.s. liquid *or* solid

* * * * *

(m) * * *

(1) If a liquid or solid material in a package meets the definition of a Division 6.1, Packing Group I or II, according to this subchapter, and the fact that it is a poison is not disclosed in the shipping name, the word "Poison" shall be entered on the shipping paper in association with the shipping description.

(2) If the technical name of the compound or principal constituent that causes a material to meet the definition of Division 6.1, Packing Group I or II (as defined in § 173.132(a) of this subchapter), or Division 2.3 (as defined

VOL 56 ISS 245 DEC 20 1991 UMI

in § 173.115(c) of this subchapter), is not included in the proper shipping name for the material, the technical name shall be entered on the shipping paper in the manner prescribed in paragraph (k) of this section.

(3) For materials which are poisonous by inhalation (see § 171.8 of this subchapter), the words "Poison-Inhalation Hazard" and the words "Zone A", "Zone B", "Zone C", or "Zone D", for gases or "Zone A" or "Zone B" for liquids, as appropriate, shall be entered on the shipping paper immediately following the shipping description. The word "Poison" need not be repeated if it otherwise appears in the shipping description.

§ 172.203 [Amended]

37. In addition, in § 172.203, the following changes are made:

a. In paragraph (c)(2), in the second sentence, "3" is revised to read "6.1"; and "PG" is removed both places it appears.

b. In paragraph (k) introductory text, "PG" is removed both places it appears; and the last sentence is revised to read "For example, 'Organic peroxide type B, solid, 5.2, UN 3102 (dibenzoyl peroxide, 52–100%)' or 'Organic peroxide type E, solid, 5.2, UN 3108 (dibenzoyl peroxide, paste, <52%)'."

c. In paragraph (k)(1), in the second sentence, "compound" is revised to read "mixtures" both places it appears; and "PG" is removed both places it appears.

d. In paragraphs (k)(2) and (k)(4)(iii), "PG" is removed each place it appears.

e. In paragraph (k)(4)(ii), the reference "§ 172.101(c)(12)" is revised to read "§ 172.101(c)(11)".

f. In paragraph (k)(4)(iv), the last sentence is revised to read "For example: 'Carbamate pesticides, liquid, flammable, toxic, n.o.s., *flash point less than 23°C* (contains Xylene) 3, 6.1, UN 2758, II'."

38. In § 172.302, paragraphs (b)(2) and (b)(3) are revised, and a new paragraph (f) is added to read as follows:

§ 172.302 General marking requirements for bulk packagings.

* * * * *

(b) * * *

(1) * * *

(2) 25 mm (one inch) for portable tanks with capacities of less than 3,785 L (1,000 gallons); and

(3) 50 mm (2.0 inches) for cargo tanks and other bulk packages.

* * * * *

(f) A bulk packaging marked prior to October 1, 1991, in conformance to the regulations of this subchapter in effect on September 30, 1991, need not be remarked if the key words of the proper shipping name are identical to those currently specified in the § 172.101 Table. For example, a tank car marked "ANHYDROUS AMMONIA" need not be remarked "ANHYDROUS AMMONIA, LIQUEFIED".

39. In § 172.303, the introductory text of paragraph (b) is republished, and paragraph (b)(3) is added to read as follows:

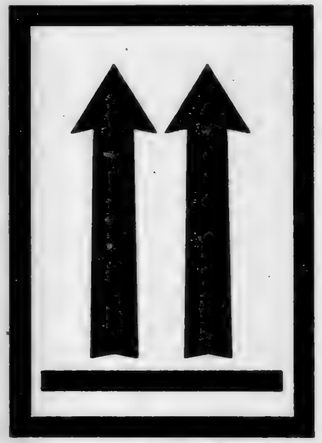
§ 172.303 Prohibited marking.

* * * * *

(b) This section does not apply to—

(1) * * *

(2) * * *



(3) The marking of a shipping name on a package when the name describes a material not regulated under this subchapter.

40. In § 172.312, paragraph (a)(2) is revised, and paragraphs (c)(4) and (c)(5) are added to read as follows:

§ 172.312 Liquid hazardous materials in non-bulk packagings.

(a) * * *

(2) Legibly marked, with package orientation markings that conform pictorially to ISO Standard 780–1985, on two opposite vertical sides of the package with the arrows pointing in the correct upright direction.

Package orientation

(b) * * *

(c) * * *

(4) Liquids contained in manufactured articles (e.g., alcohol or mercury in thermometers) which are leak-tight in all orientations.

(5) A non-bulk package with hermetically-sealed inner packagings.

41. In § 172.313, paragraph (a) is revised to read as follows:

§ 172.313 Poisonous hazardous materials.

(a) For materials poisonous by inhalation (see § 171.8 of this subchapter), the package shall be marked "Inhalation Hazard" in association with the required labels or placards, as appropriate, or shipping name, when required. (See § 172.302(b) of this subpart for size s.

* * * * *

42. In § 172.316, the section heading is revised to read as follows:

§ 172.316 Packagings containing materials classed as ORM–D.

43. Section 172.320 is revised to read as follows:

§ 172.320 Explosive hazardous materials.

(a) Except as otherwise provided in paragraphs (b), (c), (d) and (e) of this section, each package containing a Class 1 material must be marked with the EX-number for each substance, article or device contained therein.

(b) Except for fireworks approved in accordance with § 173.56(j) of this subchapter, a package of Class 1 materials may be marked, in lieu of the EX-number required by paragraph (a) of this section, with a national stock number issued by the Department of Defense or identifying information required by regulations for commercial explosives specified in 27 CFR part 55, if the national stock number or identifying information can be specifically associated with the EX-number assigned.

(c) When more than five different Class 1 materials are packed in the same package, the package may be marked with only five of the EX-numbers, national stock numbers, product codes, or combination thereof.

(d) The requirements of this section do not apply if the EX-number, product code or national stock number of each explosive item described under a proper shipping description is shown in association with the shipping description required by § 172.202(a) of this part. Product codes and national stock numbers must be traceable to the specific EX-number assigned by the Associate Administrator for Hazardous Materials Safety.

(e) The requirements of this section do not apply to the following Class 1 materials:

(1) Those being shipped to a testing agency in accordance with § 173.56(d) of this subchapter;

(2) Those being shipped in accordance with § 173.56(e) of this subchapter, for the purposes of developmental testing;

(3) Those which meet the requirements of § 173.56(h) of this subchapter and therefore are not subject to the approval process of § 173.56 of this subchapter;

(4) Until October 1, 1993, those which are shipped under § 171.19 of this subchapter; and

(5) Those that are transported in accordance with § 173.56(c)(2) of this subchapter and, therefore, are covered by a national security classification currently in effect.

§ 172.326 [Amended]

44. In § 172.326, the following changes are made:

a. In paragraph (c)(1), the wording "containing a hazardous material" is added immediately after "portable tank" and before "must be marked".

b. In paragraph (c)(2), the wording "containing a hazardous material" is added immediately after "portable tank" and before "to a motor carrier".

§ 172.328 [Amended]

45. In § 172.328, in paragraph (c) introductory text, the paragraph heading is revised to read "*QT/NQT markings.*".

46. In § 172.330, paragraphs (a)(1) and (a)(2) are revised to read as follows:

§ 172.330 Tank cars and multi-unit tank car tanks.

(a) * * *

(1) In a tank car unless the tank car is:

(i) Marked on each side, when required by a special provision to the § 172.101 Table or Part 173 of this subchapter, with the proper shipping name specified for the material in the § 172.101 Table, or with a common name authorized for the material in this subchapter (e.g., "Refrigerant Gas"); and

(ii) Marked on each side and each end, as required by § 172.302 of this subpart, with the identification number specified for the material in the § 172.101 Table.

(2) In a multi-unit tank car tank, unless the tank is marked on two opposing sides, in letters and numerals no less than 50 mm (2.0 inches) high—

(i) With the proper shipping name specified for the material in the § 172.101 Table or with a common name authorized for the material in this subchapter (e.g., "Refrigerant Gas"); and

(ii) With the identification number specified for the material in the § 172.101 Table, unless marked in accordance with §§ 172.302(a) and 172.332 of this subpart.

* * * * *

§ 172.332 [Amended]

47. In § 172.332, in paragraph (a), the reference "172.302," is added immediately after "§§" and before "172.326".

§ 173.334 [Amended]

48. In § 173.334, in paragraph (a), the wording "or DANGEROUS placard." is revised to read "DANGEROUS, or subsidiary hazard placard."

§ 172.336 [Amended]

49. In § 172.336, the following changes are made:

a. The section heading is revised to read as follows:

§ 172.336 Identification numbers; special provisions.

b. In paragraph (b)(1), "100 cm" is revised to read "100 mm".

c. In paragraphs (c)(2) and (c)(3), the wording "144 points" is revised to read "50 mm (2 inches)" each place it appears.

§ 172.400 [Amended]

50. In § 172.400, the following changes are made:

a. In paragraph (a)(3), the wording "capacity or unless" is revised to read "capacity, unless".

b. In the paragraph (b) table, in column 1, the entry "5." is revised to read "5.2".

51. In § 172.402, the introductory text preceding the table in paragraph (a) is revised, paragraphs (b) and (c) are redesignated as (c) and (d), newly designated paragraph (d) is revised, and new paragraphs (b) and (e) are added to read as follows:

§ 172.402 Additional labeling requirements.

(a) *Subsidiary hazard labels.* Each package containing a hazardous material—

(1) Shall be labeled with primary and subsidiary hazard labels as specified in Column 6 of the § 172.101 Table; and

(2) For other than Class 2 or Class 1 materials (for subsidiary labeling requirements for Class 1 materials see paragraph (e) of this section), if not already labeled under paragraph (a)(1) of this section, shall be labeled with subsidiary hazard labels in accordance with the following table:

* * * * *

(b) *Display of hazard class on labels.* The appropriate hazard class or, for Division 5.1 or 5.2 the division number, shall be displayed in the lower corner of a primary hazard label and may not be displayed on a subsidiary label.

* * * * *

(d) *Radioactive Materials.* Each package containing a radioactive material that also meets the definition of one or more additional hazards, except Class 9, shall be labeled as a radioactive material as required by § 172.403 of this subpart and for each additional hazard.

(e) *Class 1 (explosive) Materials.* In addition to the label specified in Column 6 of the § 172.101 Table, each package of Class 1 material that also meets the definition for:

(1) Division 6.1, Packing Groups I or II, shall be labeled POISON; or

(2) Class 7, shall be labeled in accordance with § 172.403 of this subpart.

52. In § 172.405, paragraph (b) is removed, paragraph (c) is redesignated as new paragraph (b) and revised to read as follows:

§ 172.405 Authorized label modifications.

* * * * *

(b) For a package containing Oxygen, compressed, or Oxygen, refrigerated liquid, the OXIDIZER label specified in § 172.426 of this subpart, modified to display the word "OXYGEN" instead of "OXIDIZER", and the class number "2" instead of "5.1", may be used in place of the NON-FLAMMABLE GAS and OXIDIZER labels. Notwithstanding the provisions of paragraph (a) of this section, the word "OXYGEN" must appear on the label.

53. In § 172.406, the headings for paragraphs (a), (b), (c), (e), and (f) are revised, a heading is added to paragraph (d), and paragraph (a)(1)(ii) and the introductory text to paragraph (e) are revised, to read as follows:

§ 172.406 Placement of labels.

(a) *General.* (1) * * *

* * * * *

(ii) Be located on the same surface of the package and near the proper shipping name marking, if the package dimensions are adequate.

(b) *Exceptions.* * * *

* * * * *

(c) *Placement of multiple labels.* * * *

* * * * *

(d) *Contrast with background.* * * *

* * * * *

(e) *Duplicate labeling.* Generally, only one of each different required label must be displayed on a package. However, duplicate labels must be displayed on at least two sides or two ends (other than the bottom) of—

* * * * *

(f) *Visibility.* * * *

54. In § 172.407, paragraph (d)(4) is revised to read as follows:

§ 172.407 Label specifications.

* * * * *

VOL 56 ISS 245 DE 20 1991 UMI

(d) * * *

(4) (i) A color on a label, upon visual examination, must fall within the color tolerances—

(A) Displayed on color charts conforming to the technical specifications for charts set forth in Table 1 or 2 in appendix A to this part; or

(B) For labels printed on packaging surfaces, specified in Table 3 in appendix A to this part.

(ii) Color charts conforming to appendix A to this part are on display in Room 8421, Nassif Building, 400 Seventh Street, SW., Washington DC 20590–0001.

* * * * *

55. Section 172.411 is revised to read as follows:

§ 172.411 EXPLOSIVE 1.1, 1.2, 1.3, 1.4, 1.5 and 1.6 labels, and EXPLOSIVE Subsidiary label.

(a) Except for size and color, the EXPLOSIVE 1.1, EXPLOSIVE 1.2 and EXPLOSIVE 1.3 labels must be as follows:

(b) In addition to complying with § 172.407, the background color on the EXPLOSIVE 1.1, EXPLOSIVE 1.2 and EXPLOSIVE 1.3 labels must be orange. The "*" shall be replaced with the appropriate division number and compatibility group. The compatibility group letter must be the same size as the division number and must be shown as a capitalized Roman letter.

(c) Except for size and color, the EXPLOSIVE 1.4, EXPLOSIVE 1.5, EXPLOSIVE 1.6 labels, and EXPLOSIVE Subsidiary label must be as follows:

EXPLOSIVE 1.4:

EXPLOSIVE 1.5:

EXPLOSIVE 1.6:

EXPLOSIVE Subsidiary label:

(d) In addition to complying with § 172.407, the background color on the EXPLOSIVE 1.4, EXPLOSIVE 1.5, EXPLOSIVE 1.6, and EXPLOSIVE Subsidiary label must be orange. Except for the EXPLOSIVE subsidiary label, the "*" shall be replaced with the appropriate compatibility group. The compatibility group letter must be shown as a capitalized Roman letter measuring at least 12.7 mm (0.5 inches) in height. Except for the EXPLOSIVE subsidiary label, division numerals must measure at least 30 mm (1.2 inches) in height and at least 5 mm (0.2 inches) in width.

56. Sections 172.415 through 172.417, 172.419, 172.420, 172.422, 172.423, 172.426, 172.427, 172.430 through 172.432, 172.436, 172.438, 172.440, 172.442, 172.446, and 172.448 are republished as follows:

§ 172.415 NON-FLAMMABLE GAS Label

(a) Except for size and color, the NON-FLAMMABLE GAS label must be as follows:

(b) In addition to complying with § 172.407, the background color on the NON-FLAMMABLE GAS label must be green.

§ 172.416 POISON GAS label.

(a) Except for size and color, the POISON GAS label must be as follows:

(b) In addition to complying with § 172.407, the background on the POISON GAS label must be white.

§ 172.417 FLAMMABLE GAS label.

(a) Except for size and color, the FLAMMABLE GAS label must be as foll

(b) In addition to complying with § 172.407, the background color on the FLAMMABLE GAS label must be red.

§ 172.419 FLAMMABLE LIQUID label.

(a) Except for size and color the FLAMMABLE LIQUID label must be as follows:

(b) In addition to complying with § 172.407, the background color on the FLAMMABLE LIQUID label must be red.

§ 172.420 FLAMMABLE SOLID label.

(a) Except for size and color, the FLAMMABLE SOLID label must be as follows:

(b) In addition to complying with § 172.407, the background on the FLAMMABLE SOLID label must be white with vertical red stripes equally spaced on each side of a red stripe placed in the center of the label. The red vertical stripes must be spaced so that, visually, they appear equal in width to the white spaces between them. The symbol (flame) and text (when used) must be overprinted. The text "FLAMMABLE SOLID" may be placed in a white rectangle.

§ 172.422 SPONTANEOUSLY COMBUSTIBLE label.

(a) Except for size and color, the SPONTANEOUSLY COMBUSTIBLE label must be as follows:

(b) In addition to complying with § 172.407, the background color on the lower half of the SPONTANEOUSLY COMBUSTIBLE label must be red and the upper half must be white.

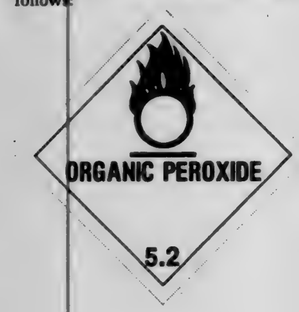
§ 172.423 DANGEROUS WHEN WET label.

(a) Except for size and color, the DANGEROUS WHEN WET label must be as follows:

(b) In addition to complying with § 172.407, the background color on the DANGEROUS WHEN WET label must be blue.

§ 172.426 OXIDIZER label.

(a) Except for size and color, the OXIDIZER label must be as follows:



VOL 56 ISS 245 DEC 20 1991 UMI

(b) In addition to complying with § 172.407, the background color on the OXIDIZER label must be yellow.

§ 172.427 ORGANIC PEROXIDE label.

(a) Except for size and color, the ORGANIC PEROXIDE label must be as follows:

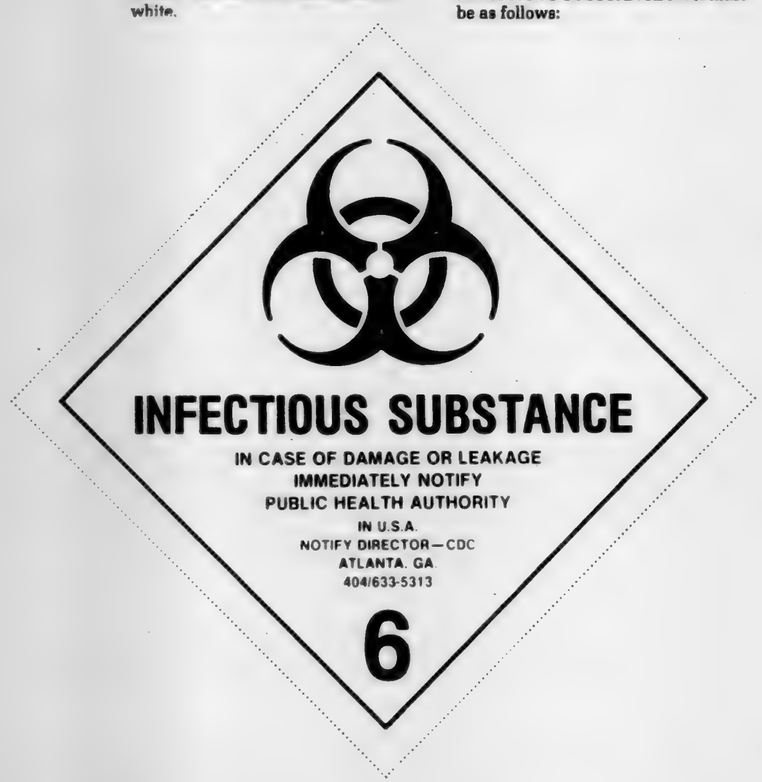
(b) In addition to complying with § 172.407, the background color on the ORGANIC PEROXIDE label must be yellow.

§ 172.430 POISON label.

(a) Except for size and color, the POISON label must be as follows:

(b) In addition to complying with § 172.407, the background on the KEEP AWAY FROM FOOD label must be white.

(b) In addition to complying with § 172.407, the background on the POISON label must be white.



§ 172.431 KEEP AWAY FROM FOOD label.

(a) Except for size and color, the KEEP AWAY FROM FOOD label must be as follows:

§ 172.432 INFECTIOUS SUBSTANCE label.

(a) Except for size and color, the INFECTIOUS SUBSTANCE label must be as follows:

(b) In addition to complying with § 172.407, the background on the INFECTIOUS SUBSTANCE label must be white.

§ 172.436 RADIOACTIVE WHITE-I label.

(a) Except for size and color, the RADIOACTIVE WHITE-I label must be as follows:

(b) In addition to complying with § 172.407, the background on the RADIOACTIVE WHITE-I label must be white. The printing and symbol must be black, except for the "I" which must be red.

§ 172.438 RADIOACTIVE YELLOW-II label.

(a) Except for size and color, the RADIOACTIVE YELLOW-II must be as follows:

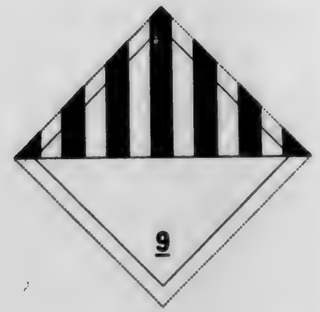
(b) In addition to complying with § 172.407, the background color on the RADIOACTIVE YELLOW-II label must be yellow in the top half and white in the lower half. The printing and symbol must be black, except for the "II" which must be red.

§ 172.440 RADIOACTIVE YELLOW-III label.

(a) Except for size and color, the RADIOACTIVE YELLOW-III label must be as follows:

(b) In addition to complying with § 172.407, the background color on the RADIOACTIVE YELLOW-III label must be yellow in the top half and white in the lower half. The printing and symbol must be black, except for the "III" which must be red.

§ 172.442 CORROSIVE label.



(a) Except for size and color, the CORROSIVE label must be as follows:

(b) In addition to complying with § 172.407, the background on the CORROSIVE label must be white in the top half and black in the lower half.

§ 172.446 CLASS 9 label.

(a) Except for size and color, the "CLASS 9" (miscellaneous hazardous materials) label must be as follows:

(b) In addition to complying with § 172.407, the background on the CLASS 9 label must be white with seven black vertical stripes on the top half. The black vertical stripes must be spaced, so that, visually, they appear equal in width to the six white spaces between them. The lower half of the label must be white with the class number "9" underlined and centered at the bottom.

§ 172.448 CARGO AIRCRAFT ONLY label.

(a) Except for size and color, the CARGO AIRCRAFT ONLY label must be as follows:

(b) The CARGO AIRCRAFT ONLY label must be black on an orange background.

57. In § 172.502, the paragraph heading in (a) is revised, paragraph (b) is revised, paragraph (c) is removed, and paragraph (d) is redesignated as new paragraph (c) and revised to read as follows:

§ 172.502 Prohibited and permissive placarding.

(a) *Prohibited placarding.* * * *

* * * * * *

VOL 56 ISS 245 DEC 20 1991 UMI

(b) *Exceptions.* (1) The restrictions in paragraph (a) of this section do not apply to a bulk packaging, freight container, unit load device, transport vehicle or rail car which is placarded in conformance with the TDG Regulations, the IMDG Code or the UN Recommendations.

(2) The restrictions of paragraph (a) of this section do not apply to the display of an identification number on a white square-on-point configuration in accordance with § 172.336(b) of this part.

(c) *Permissive placarding.* Placards may be displayed for a hazardous material, even when not required, if the placarding otherwise conforms to the requirements of this subpart.

58. In § 172.504, paragraphs (f)(4), (f)(7), and (f)(8) are revised and a new paragraph (g) is added to read as follows:

§ 172.504 General placarding requirements.

* * * * *

(f) * * *

(4) An EXPLOSIVES 1.3, 1.4, 1.5, 1.6 or OXIDIZER placard is not required for Division 1.3, 1.4, 1.5, 1.6 or 5.1 materials on a freight container, unit load device, transport vehicle or rail car which also contains Division 1.1 or 1.2 explosives and is placarded with EXPLOSIVES 1.1 or 1.2 placards, as required.

* * * * *

(7) For domestic transportation of oxygen, compressed or oxygen, refrigerated liquid, the OXYGEN placard in § 172.530 of this subpart may be used in place of a NON-FLAMMABLE GAS placard.

(8) Except for a material classed as a combustible liquid that also meets the definition of a Class 9 material, a COMBUSTIBLE placard is not required for a material classed as a combustible liquid when transported in a non-bulk packaging. For a material in a non-bulk packaging classed as a combustible liquid that also meets the definition of a Class 9 material, the CLASS 9 placard may be substituted for the COMBUSTIBLE placard.

(g) For shipments of Class 1 (explosive) materials by aircraft or vessel, the applicable compatibility group letter must be displayed on the placards required by this section.

§ 172.504 [Amended]

59. In addition, in § 172.504, the following changes are made:

a. In paragraph (e), in Table 1, column 2, a footnote reference "[1]" is added immediately following "RADIOACTIVE" and a footnote is added immediately at the end of the table to read as follows:

"[1] RADIOACTIVE placard also required for exclusive use shipments of low specific activity material in accordance with § 173.425 (b) or (c) of this subchapter.".

b. In paragraph (e), in Table 2, column 2, the word "COMBUSIBLE" is revised to read "COMBUSTIBLE".

c. In paragraphs (a), (b), (f) introductory text, (f)(3) and (f)(5), the wording "motor vehicle" is revised to read "transport vehicle" each place it appears.

d. In paragraph (c) introductory text, the wording "portable tanks, cargo tanks, tank cars," is revised to read "bulk packagings,".

60. In § 172.505, the section heading and paragraph (b) are revised and a new paragraph (d) is added, to read as follows:

§ 172.505 Placarding for subsidiary hazards.

* * * * *

(b) In addition to the RADIOACTIVE placard which may be required by § 172.504(e) of this subpart, each transport vehicle, portable tank or freight container that contains 454 kg (1001 pounds) or more gross weight of fissile or low specific activity uranium hexafluoride shall be placarded with a CORROSIVE placard on each side and each end.

* * * * *

(d) Hazardous materials that possess secondary hazards may exhibit subsidiary placards that correspond to the placards described in this part, even when not required by this part (see also § 172.519(b) (4) of this subpart).

§ 172.505 [Amended]

61. In addition, in § 172.505, in paragraph (a), the wording "in addition to the placards required by § 172.504. Duplication of the POISON or POISON GAS placard is not required." is revised to read "if not so placarded under § 172.504.".

62. In § 172.510, paragraph (c) is revised to read as follows:

§ 172.510 Special placarding provisions: Rail.

* * * * *

(c) *RESIDUE and subsidiary placards.* Each tank car containing the residue of a hazardous material must have each primary placard changed to the corresponding RESIDUE placard. See § 172.505(c) of this subpart for display requirements for subsidiary hazards.

* * * * *

§ 172.510 [Amended]

63. In addition, in § 172.510, the following changes are made:

a. In paragraph (a)(2), the wording "Division 2.3, Packaging Group I, Hazard Zone A" is revised to read "Division 2.3, Hazard Zone A"; and the wording "POISONOUS GAS" is revised to read "POISON GAS".

b. In paragraph (a)(3), the wording "Division 2.3, Packing Group I, Hazard Zone A" is revised to read "Division 2.3, Hazard Zone A"; and the wording "POISONOUS GAS—RESIDUE" is revised to read "POISON GAS—RESIDUE".

64. In § 172.519, paragraph (a)(2) is removed, paragraphs (a)(3) and (a)(4) are redesignated as (a)(2) and (a)(3), respectively, a third sentence is added at the end of newly designated paragraph (a)(2) and paragraph (f) is revised, to read as follows:

§ 172.519 General specifications for placards.

(a) * * *

(2) * * * In addition, each placard made of tagboard must be able to pass a 414 kPa (60 p.s.i.) Mullen test.

* * * * *

(f) *Exceptions.* For a shipment under the provisions of §§ 171.11, 171.12 or § 171.12a of this subchapter, a placard conforming to specifications in the ICAO Technical Instructions, the IMDG Code, or the TDG Regulations, respectively, may be used in place of a corresponding placard which conforms to the requirements of this subpart.

65. In § 172.522, the paragraph (a) placard is republished and paragraph (b) is revised to read as follows:

§ 172.522 EXPLOSIVES 1.1, EXPLOSIVES 1.2 AND EXPLOSIVES 1.3 placards.

(a) * * *

(b) In addition to complying with § 172.519 of this subpart, the background color on the EXPLOSIVES 1.1, EXPLOSIVES 1.2, and EXPLOSIVES 1.3 placards must be orange. The "*" shall be replaced with the appropriate division number and, when required, appropriate compatibility group letter. The symbol, text, numerals and inner border must be black.

66. In § 172.523, the paragraph (a) placard is republished and paragraph (b) is revised to read as follows:

§ 172.523 EXPLOSIVES 1.4 placard.

(a) * * *

(b) In addition to complying with § 172.519 of this subpart, the background color on the EXPLOSIVES 1.4 placard must be orange. The "*" shall be replaced, when required, with the appropriate compatibility group letter. The division numeral, 1.4, must measure at least 64 mm (2.5 inches) in height. The text, numerals and inner border must be black.

67. In § 172.524, the paragraph (a) placard is republished and paragraph (b) is revised to read as follows:

§ 172.524 EXPLOSIVES 1.5 placard.

(a) * * *

(b) In addition to complying with the § 172.519 of this subpart, the background color on EXPLOSIVES 1.5 placard must be orange. The "*" shall be replaced, when required, with the appropriate compatibility group letter. The division numeral, 1.5, must measure at least 64 mm (2.5 inches) in height. The text, numerals and inner border must be black.

68. In § 172.525, the paragraph (a) placard is republished and paragraph (b) is revised to read as follows:

§ 172.525 EXPLOSIVES 1.6 placard.

(a) * * *

(b) In addition to complying with § 172.519 of this subpart, the background color on the EXPLOSIVES 1.6 placard must be orange. The "*" shall be replaced, when required, with the appropriate compatibility group letter. The division numeral, 1.6, must measure at least 64 mm (2.5 inches) in height. The text, numerals and inner bordest be black.

69. In § 172.526, paragraphs (a)(1), (a)(2) and (a)(4) are revised to read as follows:

§ 172.526 Standard requirements for the RESIDUE placard.

(a) * * *

(1) Except as provided in paragraph (a)(3) of this section, the lower triangle of the RESIDUE placard must be black and the word "RESIDUE" must be in white letters approximately 25 mm (1 inch) high, made with approximately 6.3 mm (0.25 inch) stroke.

(2) Except for the RADIOACTIVE, EXPLOSIVES 1.1, 1.2, 1.3, 1.4, 1.5 or 1.6, DANGEROUS, or subsidiary placard required by § 172.505 of this subpart, the RESIDUE placard may be used to display the appropriate identification number in accordance with the provisions of subpart D of this part.

* * * * *

(4) Otherwise, the RESIDUE placard must be as specified in §§ 172.519, 172.528, 172.530, 172.532, 172.542, 172.544, 172.546, 172.547, 172.548, 172.550, 172.552, 172.553, 172.554, 172.558 and 172.560 as appropriate for the residue of the hazardous material being transported and required by this subchapter to be placarded. No other placard may be used as a RESIDUE placard.

* * * * *

§ 172.526 [Amended]

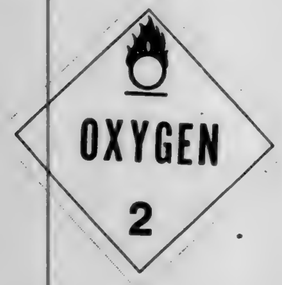
70. In addition, in § 172.526, in paragraph (c)(3), the wording ", and paragraph (a)(10) of appendix B to this part" is removed and a period is added in its place.

71. Section 172.528 is republished as follows:

§ 172.528 NON-FLAMMABLE GAS placard.

(a) Except for size and color, the NON-FLAMMABLE GAS placard must be as follows:

VOL 56 ISS 245 DE 20 1991 UMI



(b) In addition to complying with § 172.519, the background color on the NON-FLAMMABLE GAS placard must be green. The letters in both words must be at least 38 mm (1.5 inches) high. The symbol, text, class number and inner border must be white.

72. Section 172.530 is republished as follows:

§ 172.530 OXYGEN placard.

(a) Except for size and color, the OXYGEN placard must be as follows:

(b) In addition to complying with § 172.519 of this subpart, the background color on the OXYGEN placard must be yellow. The symbol, text, class number and inner border must be black.

73. Section 172.532 is republished as follows:

§ 172.532 FLAMMABLE GAS placard.

(a) Except for size and color, the FLAMMABLE GAS placard must be as follows:

(b) In addition to complying with § 172.519, the background color on the FLAMMABLE GAS placard must be red. The symbol, text, class number and inner border must be white.

74–75. Sections 172.540, 172.542, 172.544, 172.546 through 172.548, 172.550, 172.552 through 172.554, 172.556, 172.558, and 172.560 are republished to read as follows:

§ 172.540 POISON GAS placard.

(a) Except for size and color, the POISON GAS placard must be as follows:

(b) In addition to complying with § 172.519, the background color on the POISON GAS placard must be white. The symbol, text, class number and inner border must be black.

§ 172.542 FLAMMABLE placard.

(a) Except for size and color, the FLAMMABLE placard must be as follows:

(b) In addition to complying with § 172.519, the background color on the FLAMMABLE placard must be red. The symbol, text, class number and inner border must be white.

(c) The word "GASOLINE" may be used in place of the word "FLAMMABLE" on a placard that is displayed on a cargo tank or a portable tank being used to transport gasoline by highway. The word "GASOLINE" must be shown in white.

§ 172.544 COMBUSTIBLE placard.

(a) Except for size and color, the COMBUSTIBLE placard must be as follows:

(b) In addition to complying with § 172.519, the background color on the COMBUSTIBLE placard must be red. The symbol, text, class number and inner border must be white. On a COMBUSTIBLE placard with a white bottom as prescribed by § 172.332(c)(4), the class number must be red or black.

(c) The words "FUEL OIL" may be used in place of the word "COMBUSTIBLE" on a placard that is displayed on a cargo tank or portable tank being used to transport by highway fuel oil that is not classed as a flammable liquid. The words "FUEL OIL" must be shown in white.

§ 172.546 FLAMMABLE SOLID placard.

(a) Except for size and color, the FLAMMABLE SOLID placard must be as follows:

(b) In addition to complying with § 172.519, the background on the FLAMMABLE SOLID placard must be white with seven vertical red stripes. The stripes must be equally spaced, with one red stripe placed in the center of the label. Each red stripe and each white space between two red stripes must be 25 mm (1.0 inches) wide. The letters in the word "SOLID" must be at least 38.1 mm (1.5 inches) high. The symbol, text, class number and inner border must be black.

§ 172.547 SPONTANEOUSLY COMBUSTIBLE placard.

(a) Except for size and color, the SPONTANEOUSLY COMBUSTIBLE placard must be as follows:

(b) In addition to complying with § 172.519, the background color on the SPONTANEOUSLY COMBUSTIBLE placard must be red in the lower half and white in upper half. The letters in the word "SPONTANEOUSLY" must be at least 25 mm (0.98 inches) high. The symbol, text, class number and inner border must be black.

§ 172.548 DANGEROUS WHEN WET placard.

(a) Except for size and color, the DANGEROUS WHEN WET placard must be as follows:

(b) In addition to complying with § 172.519, the background color on the DANGEROUS WHEN WET placard must be blue. The letters in the words "WHEN WET" must be at least 25 mm (1.0 inches) high. The symbol, text, class number and inner border must be white.

§ 172.550 OXIDIZER placard.

(a) Except for size and color, the OXIDIZER placard must be as follows:

(b) In addition to complying with § 172.519, the background color on the OXIDIZER placard must be yellow. The symbol, text, division number and inner border must be black.

§ 172.552 ORGANIC PEROXIDE placard.

(a) Except for size and color, the ORGANIC PEROXIDE placard must be as follows:

(b) In addition to complying with § 172.519, the background color on the ORGANIC PEROXIDE placard must be yellow. The symbol, text, division number and inner border must be black.

§ 172.553 KEEP AWAY FROM FOOD placard.

(a) Except for size and color, the KEEP AWAY FROM FOOD placard must be as follows:

SECTION 172.553(a)

(b) In addition to complying with § 172.519, the background on the KEEP AWAY FROM FOOD placard must be white. The size of the lettering below the word "HARMFUL" must be proportional to that shown. The symbol, text, class number and inner border must be black.

§ 172.554 POISON placard.

(a) Except for size and color, the POISON placard must be as follows:

SECTION 172.554(a)

(b) In addition to complying with § 172.519, the background on the POISON placard must be white. The symbol, text, class number and inner border must be black.

§ 172.556 RADIOACTIVE placard.

(a) Except for size and color, the RADIOACTIVE placard must be as follows:

SECTION 172.556(a)

(b) In addition to complying with § 172.519, the background color on the RADIOACTIVE placard must be white in the lower portion with a yellow triangle in the upper portion. The base of the yellow triangle must be 29 mm ± 5mm (1.1 inches ±z0.2 inches) above the placard horizontal center line. The symbol, text, class number and inner border must be black.

§ 172.558 CORROSIVE placard.

(a) Except for size and color, the CORROSIVE placard must be as follows:

SECTION 172.558(a)

(b) In addition to complying with § 172.519, the background color on the CORROSIVE placard must be black in the lower portion with a white triangle in the upper portion. The base of the white triangle must be 38 mm ± 5mm (1.5 inches ± 0.2 inches) above the placard horizontal center linetext and class number must be white. The symbol and inner border must be black.

§ 172.560 CLASS 9 placard.

(a) Except for size and color the CLASS 9 (miscellaneous hazardous materials) placard must be as follows:

SECTION 172.560(a)

(b) In addition to complying with § 172.519, the background on the CLASS 9 placard must be white with seven black vertical stripes on the top half. The black vertical stripes must be spaced so that, visually, they appear equal in width to the six white spaces between them. The lower half of the placard must be white with the class number 9 underlined and centered at the bottom.

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

76. The authority citation for part 173 continues to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1805, 1806, 1807, 1808; 49 CFR part 1, unless otherwise noted.

§ 173.2a [Amended]

77. In § 173.2a, the following changes are made:

a. In paragraph (a)(8), the wording "The precedence of hazards" is revised to read "The hazard class and packing group".

b. In paragraph (b), in the Precedence of Hazard Table, in the column titled "8, I liquid", the second entry "3" is revised to read "8"; in the column titled "6.1 III", the third entry is revised to read "3"; and a new footnote 4 is added at the end of the table to read as follows: "For pesticides only, where a material has the hazards of Class 3, Packing Group III, and Division 6.1, Packing Group III, the primary hazard is Division 6.1, Packing Group III.".

78. In § 173.3, paragraph (c)(1) is revised to read as follows:

§ 173.3 Packaging and exceptions.

* * * * *

(c) * * *

(1) The drum must be a UN 1A2, 1B2, 1N2 or 1H2 tested and marked for Packing Group III or higher performance standards for liquids or solids and a leakproofness test of 20 kPa (3 psi). Alternatively, a drum manufactured and marked prior to October 1, 1993 as a salvage drum, in accordance with the provisions of this section in effect on September 30, 1991, is authorized. Capacity of the drum may not exceed 450 L (119 gallons).

* * * * *

§ 173.3 [Amended]

79. In addition, in § 173.3, in paragraph (c)(3), in the first sentence, the word "defective" is removed.

§ 173.3a [Removed]

80. Section 173.3a is removed.

81. In § 173.4, paragraph (a)(6)(ii) is revised to read as follows:

§ 173.4 Exceptions for small quantities.

(a) * * *

(6) * * *

(ii) A compressive load as specified in § 178.606(c) of this subchapter.

* * * * *

§ 173.4 [Amended]

82. In addition, in § 173.4, in paragraph (b), the second sentence is removed.

§ 173.10 [Amended]

83. In § 173.10, in paragraph (a), "below 30°C (100°F)" is revised to read "below 38°Ψ (100°F)".

84. In § 173.12, paragraph (b) is revised and paragraph (d) is added to read as follows:

§ 173.12 Exceptions for shipment of waste materials.

* * * * *

(b) *Lab packs.* (1) Waste materials classed as Class or Division 3, 4.1, 4.2, 4.3, 5.1, 6.1, 8, or 9 are excepted from the specification packaging requirements of this subchapter for combination packagings if packaged in accordance with this paragraph and transported for disposal or recovery by highway only. In addition, a generic description from the § 172.101 Table may be used in place of specific chemical names, when two or more chemically compatible waste materials in the same hazard class are packaged in the same outside packaging.

(2) Additional packaging requirements are as follows:

(i) The outer packaging must be a UN 1A2 or UN 1B2 metal drum, a UN 1D plywood drum, a UN 1G fiber drum or a UN 1H2 plastic drum tested and marked at least for the Packing Group III performance level for liquids or solids;

(ii) The inner packagings must be either glass, not exceeding 4 L (1 gallon) rated capacity, or metal or plastic, not exceeding 20 L (5.3 gallons) rated capacity;

(iii) Each outer packaging may contain only one class of hazardous material;

(iv) Inner packagings containing liquid must be surrounded by a chemically compatible absorbent material in sufficient quantity to absorb the total liquid contents; and

(v) Gross weight of the complete package may not exceed 205 kg (452 lbs)

.

(3) *Prohibited materials.* Materials meeting the definition of Division 6.1, Packing Group I, or Division 4.2, Packing Group I, and bromine pentafluoride; bromine trifluoride; chloric acid; and oleum (*fuming sulfuric acid*) may not be packaged or described under the provisions of this paragraph.

(c) * * *

(d) *Technical names for n.o.s. descriptions.* The requirements for the inclusion of technical names for n.o.s. descriptions on shipping papers and package markings, §§ 172.203 and 172.301 of this subchapter, respectively, do not apply to packagings prepared in accordance with paragraph (b) of this section, except as follows:

(1) Packages containing materials meeting the definition of a hazardous substance must be described as required in § 172.203(c) of this subchapter and marked as required in § 172.324 of this subchapter; and

(2) Packages containing hazardous materials subject to the provisions of § 172.203(m) of this subchapter must be described in accordance with § 172.203(m) of this subchapter.

85. In § 173.21, in the introductory text of paragraph (f), the first sentence is revised to read as follows:

§ 173.21 Forbidden materials and packages.

* * * * *

(f) A package containing a material which is likely to decompose with a self-accelerated decomposition temperature (SADT) of 50°C (122°F) or less, or polymerize at a temperature of 54°C (130°F) or less with an evolution of a dangerous quantity of heat or gas when decomposing or polymerizing, unless the material is stabilized or inhibited in a manner to preclude such evolution. * * *

* * * * *

§ 173.21 [Amended]

86. In addition, in § 173.21, the following changes are made:

a. In paragraph (f)(2), in the second sentence, the reference "173.225" is revised to read "§ 173.225".

b. In paragraph (i), in the first sentence, the word "inner" is added immediately after "its" and before "packaging."

§ 173.22 [Amended]

87. In § 173.22, in paragraph (c)(2), the wording "Director, Office of Hazardous Materials Transportation" is removed and replaced with "Associate Administrator for Hazardous Materials Safety".

§ 173.24 [Amended]

88. In § 173.24, the following changes are made:

a. In paragraph (h), the paragraph heading "Outrage and filling limits" is revised to read: "Outage and filling limits".

b. In paragraph (c)(2), the wording "173.6, 173.7" is revised to read "173.7, 173.27".

c. In paragraph (g)(2), the wording "not toxic, flammable or asphyxiant gases;" is revised to read "not poisonous, likely to create a flammable mixture with air or be an asphyxiant under normal conditions of transportation;".

d. In paragraph (g)(3), "identifiable" is revised to read "unintentional".

89. In § 173.24a, paragraph (b)(3) is revised to read as follows:

§ 173.24a Additional general requirements for non-bulk packagings and packages.

* * * * *

(b) * * *

(3) A single or composite non-bulk packaging which is tested and marked for liquid hazardous materials may be filled with a solid hazardous material to a gross mass, in kilograms, not exceeding the rated capacity of the packaging in liters, multiplied by the specific gravity marked on the packaging, or 1.2 if not marked. In addition:

(i) A single or composite non-bulk packaging which is tested and marked for Packing Group I liquid hazardous materials may be filled with a solid Packing Group II hazardous material to a gross mass, in kilograms, not exceeding the rated capacity of the packaging in liters, multiplied by 1.5, multiplied by the specific gravity marked on the packaging, or 1.2 if not marked.

(ii) A single or composite non-bulk packaging which is tested and marked for Packing Group I liquid hazardous materials may be filled with a solid Packing Group III hazardous material to

VOL 56 ISS 245 DE 20 1991 UMI

VOL 56 ISS 245 DEC 20 1991 UMI

a gross mass, in kilograms, not exceeding the rated capacity of the packaging in liters, multiplied by 2.25, multiplied by the specific gravity marked on the packaging, or 1.2 if not marked.

(iii) A single or composite non-bulk packaging which is tested and marked for Packing Group II liquid hazardous materials may be filled with a solid Packing Group III hazardous material to a gross mass, in kilograms, not exceeding the rated capacity of the packaging in liters, multiplied by 1.5, multiplied by the specific gravity marked on the packaging, or 1.2 if not marked.

* * * * *

§ 173.24a [Amended]

90. In addition, in § 173.24a, the following changes are made:

a. In paragraph (b)(2), the words "A single" are revised to read "a single" and the wording "Except as otherwise provided in this section," is added at the beginning of the sentence.

b. In paragraph (b)(5), a period is added at the end of the sentence.

§ 173.24b [Amended]

91. In § 173.24b, the following changes are made:

a. In paragraph (a)(1), "Liquids" is revised to read "Liquids and liquefied gases".

b. In paragraph (a)(3), the wording "Bulk packaging for liquids toxic by inhalation. For a liquid which meets the definition for Division 6.1, Packing Group I, based on inhalation toxicity," is revised to read "Bulk packagings for materials poisonous by inhalation. For a material which meets the definition of poisonous by inhalation (see § 171.8 of this subchapter),".

c. In paragraph (d)(2), the wording "Due to its density, exceeds" is removed and replaced with "Exceeds".

92. In § 173.25, paragraphs (a)(5) and (c) are revised to read as follows:

§ 173.25 Authorized packages and overpacks.

(a) * * *

(5) Packages containing Class 8 (corrosive) materials in Packing Group I or Division 5.1 (oxidizing) materials in Packing Group I may not be overpacked with any other materials.

* * * * *

(c) Hazardous materials which are required to be labeled POISON may be transported in the same motor vehicle with material that is marked or known to be foodstuffs, feed or any edible material intended for consumption by humans or animals provided the hazardous material is marked, labeled, and packaged in accordance with this subchapter, conforms to the requirements of paragraph (a) of this section and is overpacked as specified in § 177.841(e) of this subchapter or in an overpack which is a UN 1A2, 1B2, or 1N2 drum tested and marked for a Packing Group II or higher performance level.

§ 173.27 [Amended]

93. In § 173.27, the following changes are made:

a. In paragraph (c)(2)(i), the wording "produces a pressure" is revised to read "produces a gauge pressure".

b. In paragraph (f), Table 2, Column 2, "1kg" is revised to read "1 kg".

94. In § 173.28, the section heading, paragraphs (b)(2)(i), (b)(2)(ii) and paragraph (b)(4) table are revised to read as follows:

§ 173.28 Reuse, reconditioning and remanufacture of packagings.

* * * * *

(b) * * *

(2) * * *

(i) Retested without failure in accordance with § 178.604 of this subchapter using an internal air pressure (gauge) of at least 48 kPa (7.0 psi) for Packing Group I and 20 kPa (3.0 psi) for Packing Group II and Packing Group III; and

(ii) Marked with the letter "L", with the name and address or symbol of the person conducting the test, and the month and last two digits of the year the test was conducted. Symbols, if used, must be registered with the Associate Administrator for Hazardous Materials Safety.

* * * * *

(4) * * *

Maximum capacity not over	Minimum thickness of packaging material	
	Metal drum or jerrican	Plastic drum or jerrican
20 L	0.6 mm (0.024 inch).	1.1 mm (0.043 inch).
30 L	0.7 mm (0.028 inch).	1.1 mm (0.043 inch).
40 L	0.7 mm (0.028 inch).	1.8 mm (0.071 inch).
60 L	0.9 mm (0.035 inch).	1.8 mm (0.071 inch).
120 L	0.9 mm (0.035 inch).	2.2 mm (0.087 inch).
220 L	0.96 mm (0.038 inch) [1].	2.2 mm (0.087 inch).
450 L	1.8 mm (0.071 inch).	5.0 mm (0.197 inch).

[1] Metal drums or jerricans constructed with a minimum thickness of 0.8 mm (0.03 inch) body and 1.1 mm (0.043 inch) heads are authorized.

* * * * *

§ 173.28 [Amended]

95. In addition, in § 173.28, the following changes are made:

a. In paragraph (b)(4), the wording "marked in millimeters" is revised to read "marked in a permanent manner (e.g., embossed) in millimeters".

b. In paragraph (b)(5), "1.5 mm (0.059 inch)" is revised to read "1.0 mm (0.039 inch)".

96. In § 173.31, paragraph (a)(18) is added to read as follows:

§ 173.31 Qualification, maintenance, and use of tank cars.

(a) * * *

(18) Except for DOT Specification 111A100W4 and 111J100W4 tank car tanks, Class DOT 103, 104, and 111 tank car tanks used to transport materials meeting the definition of a Class 3 material in § 173.120 of this subchapter must have closures for manways so designed that pressure will be released automatically and safely in the process of removing the manway cover.

§ 173.32 [Amended]

97. In § 173.32, in paragraph (a)(5), the wording "the IM Tank Table" is revised to read "§ 172.101(c)(7) of this subchapter" and the section heading is revised to read as follows:

§ 173.32 Qualification, maintenance and use of portable tanks other than Specification IM portable tanks.

98. In § 173.32c, paragraph (q) is added to read as follows:

§ 173.32c Use of Specification IM portable tanks.

* * * * *

(q) If the hazardous material being transported is in a molten state, the tank must be thermally insulated by completely covering it with at least 100 mm (3.94 inches) of cork or other suitable insulation material of sufficient thickness that the overall thermal conductance is not more than 0.080 Btu per hour per square foot per degree Fahrenheit differential.

§ 173.32c [Amended]

99. In § 173.32c, in paragraph (g)(2), the wording "by the IM Tank Table in § 172.102 of this subchapter" is removed and replaced with "through § 172.102(c)(7) of this subchapter".

§ 173.34 [Amended]

100–101. In § 173.34, in paragraph (c)(3), the wording "Director, Office of Hazardous Materials Transportation" is removed and replaced with "Associate Administrator for Hazardous Materials Safety".

Subpart C—Definitions, Classification and Packaging for Class 1

102. The subpart C heading is revised to read as set forth above.

103. In § 173.50, paragraph (b)(4) is revised to read as follows:

§ 173.50 Class 1—definitions.

* * * * *

(b) * * *

(4) *Division 1.4* consists of explosives that present a minor explosion hazard. The explosive effects are largely confined to the package and no projection of fragments of appreciable size or range is to be expected. An external fire must not cause virtually instantaneous explosion of almost the entire contents of the package.

* * * * *

§ 173.50 [Amended]

104. In addition, in § 173.50, in Footnote 1, the word "Probability" is revised to read "probability".

§ 173.54 [Amended]

105. In § 173.54, the following changes are made:

a. In paragraph (a), a period is added at the end of the sentence.

b. In paragraph (j), the wording "the Hazardous Materials Table in § 172.101" is revised to read "the § 172.101 Table".

§ 173.56 [Amended]

106. In § 173.56, the following changes are made:

a. In paragraph (b)(1), the wording "shipping description'" is revised to read "shipping description," and the period between "Mines" and "U.S." is removed and replaced with a comma.

b. In paragraph (g), in the first sentence, the reference "§ 171.12a" is added immediately after "§§ 171.11, 171.12," and before "or 176.11".

c. In paragraph (h)(3), the word "or" is removed and replaced with the word "and".

107. In § 173.58, in paragraph (c)(ii), the word "and" is removed, in paragraph (c)(iii), the period at the end of the paragraph is removed and replaced with the words "; and", and paragraph (c)(1)(iv) is added to read as follows:

§ 173.58 Assignment of class and division for explosives.

* * * * *

(c) * * *

(1) * * *

(iv) The 1.6 Article Bullet Impact Test.

* * * * *

§ 173.58 [Amended]

108. In addition, in § 173.58, in paragraphs (b) introductory text and (b)(2), the wording "DOT Test" is revised to read "DDT Test", both places it appears.

§ 173.59 [Amended]

109. In § 173.59, the wording "N.V.S." in the heading for the term *"Substance, explosive, very insensitive, (Substance, EVI) N.V.S."* is revised to read "N.O.S.".

§ 173.60 [Amended]

110. In § 173.60, in paragraph (b)(8), the wording "rigid plastic box" is revised to read "rigid plastic-lined box".

§ 173.61 [Amended]

111. In § 173.61, in paragraph (d), the wording "UN 0333, 0334, 0335, 0336, and 0337" is revised by adding "UN" immediately before each of the second through fourth numbers.

112. In § 173.62, paragraph (a) is revised and paragraph (e) is added to read as follows:

§ 173.62 Specific packaging requirements.

(a) Except as provided in paragraph (e) of this section, when the § 172.101 Table specifies that an explosive must be packaged in accordance with this section, only non-bulk packagings which conform to the provisions of paragraphs (b), (c) and (d) of this section, and the applicable requirements in §§ 173.60 and 173.61 of this subpart, may be used.

* * * * *

(e) Class 1 (explosive) materials owned by the Department of Defense, packaged prior to January 1, 1988 in accordance with the requirements of this subchapter in effect at that time, are excepted from the requirements of part 178 of this subchapter provided the packagings have maintained their integrity and the goods are declared as government-owned goods packaged prior to January 1, 1988.

§ 173.62 [Amended]

113. In addition, in § 173.62, the following changes are made:

a. In paragraph (b), the word "Table" is added immediately after "of the Explosives" and before "by their" in the second sentence, and in the Explosives Table, in the column entitled "Identification No.", "UN0411E–22(a)" is revised to read "UN0411".

b. In addition, in paragraph (b), the following entries are added to the Explosives Table in appropriate alpha-numerical order:

EXPLOSIVES TABLE

Identification No.	Packing methods
* * * * *	
UN0407	E–25
* * * * *	
UN0448	E–25
* * * * *	
UN0479	E–103
UN0480	E–103
UN0481	E–103
* * * * *	
UN0485	E–103
* * * * *	

c. In paragraph (c), in the Table of Packing Methods, note US006, in paragraph a., a period is added at the end of the sentence; in paragraph e., at the end of the sentence, the wording "provided that:" is added; and in paragraph f.4., the wording "When more one" is revised to read "When more than one".

d. In addition, in paragraph (c), in the Table of Packing Methods, the following changes are made:

1. For E–6(a)(i), the phrase "Rubberized, textile" is removed and replaced with the phrase "Rubberized textile" under the column headed "Inner packagings".

2. For E–8, the phrase "(4G1)," is removed and replaced with the phrase "(4G)," under the column headed "Outer packagings".

3. For E–17, add "47" to the column headed "Particular packing exception/requirement".

4. For E–102, the phrase "13.46" is added to the column headed "Particular packing exception/requirement".

5. For E–103, the phrase "the subchapter" is removed and replaced with the phrase "this subchapter" under the column headed "Inner packagings".

6. For E–106, add a new entry "Drums, Steel, removable head (1A2)." in the column headed "Outer packagings".

7. For E–108, the phrase "Wooded." is removed and replaced with the phrase "Wood." under the column headed "Inner packagings and the phrase "Wooden," is removed and replaced with the phrase "Wood," under the column headed "Outer packagings".

8. For E–121, the phrase "(4G1)" is removed and replaced with the phrase "(4G)" under the column headed "Outer packagings".

9. For E–133, the phrase "outer package" is removed and replaced with the phrase "outer packaging" under the column headed "inner packagings".

10. For E–142, revise the column headed "Particular packing exception/requirement" to read "41, D9, D11".

VOL 56 ISS 245 DEC 20 1991 UMI

11. For E–148(a), E–148(b), and E–148(c), add "D16" to the column headed "Particular packing exception/ requirement".

e. In paragraph (d), in the Table, in entry 22, the word "or" is added immediately after "wood" and before "wool"; in entry D2, the paragraph designator "(a)(1)" is revised to read "(a)(i)"; and a new entry D16 is added as the last entry immediately after D15 to read as follows:

"D16.....	Additional packagings may be approved by the Associate Administrator for Hazardous Materials Safety.".

§ 173.63 [Amended]

114. In § 173.63, the following changes are made:

a. In paragraph (a) introductory text, "(1.4D)" is revised to read "(1.4D)".

b. Paragraphs (d) and (e) are removed and reserved.

115. In § 173.115, paragraphs (a), (c) heading, (c) introductory text, and (c)(2) are revised to read as follows:

§ 173.115 Class 2, Divisions 2.1, 2.2, and 2.3—Definitions.

(a) *Division 2.1 (Flammable gas).* For the purpose of this subchapter, a "flammable gas" (Division 2.1) means any material which is a gas at 20°C (68°F) or less and 101.3 kPa (14.7 psi) of pressure (a material which has a boiling point of 20°C (68°F) or less at 101.3 kPa (14.7 psi) which—

(1) Is ignitable at 101.3 kPa (14.7 psi) when in a mixture of 13 percent or less by volume with air; or

(2) Has a flammable range at 101.3 kPa (14.7 psi) with air of at least 12 percent regardless of the lower limit.

Except for aerosols, the limits specified in paragraphs (a)(1) and (a)(2) of this section shall be determined at 101.3 kPa (14.7 psi) of pressure and a temperature of 20°C (68°F) in accordance with ASTM E681–85, Standard Test Method for Concentration Limits of Flammability of Chemicals. The flammability of aerosols is determined by the tests specified in § 173.306(i) (2), (3), and (4) of this part.

* * * * *

(c) *Division 2.3 (Gas poisonous by inhalation).* For the purpose of this subchapter, a "gas poisonous by inhalation" (Division 2.3) means a material which is a gas at 20°C (68°F) or less and a pressure of 101.3 kPa (14.7 psi) (a material which has a boiling point of 20°C (68°F) or less at 101.3 kPa (14.7 psi)) and which—

(1) * * *

(2) In the absence of adequate data on human toxicity, is presumed to be toxic to humans because when tested on laboratory animals it has an LC50 value of not more than 5000 ml/m³ (see § 173.116(a) of this subpart for assignment of Hazard Zones A, B, C or D). LC50 values for mixtures may be determined using the formula in § 173.133(b)(1)(i) of this subpart.

* * * * *

§ 173.116 [Amended]

116. In § 173.116, in paragraph (a), "Column 5" is revised to read "Column 7".

117. In § 173.120, paragraph (b)(2) is revised to read as follows:

§ 173.120 Class 3—Definitions.

* * * * *

(b) * * *

(2) A flammable liquid with a flash point at or above 38°C (100°F) that does not meet the definition of any other hazard class, except Class 9, may be reclassed as a combustible liquid. This provision does not apply to transportation by vessel or aircraft, except where other means of transportation is impracticable.

* * * * *

§ 173.120 [Amended]

118. In § 173.120, the following changes are made:

a. In paragraphs (a)(1) introductory text, (a)(1)(ii), and (b)(1), "60°C (140°F)" is revised to read "60.5°C (141°F)".

b. In paragraph (b)(1), the wording "hazard class specified in this subchapter and has a flash point" is revised to read "hazard class specified in this subchapter, except Class 9, and has a flash point".

c. In paragraph (c)(2), in the third sentence, "10 percent" is revised to read "10 percent".

§ 173.121 [Amended]

119. In § 173.121, the following changes are made:

a. In the paragraph (a) table, for the entry "III" in column 2, "< 60°C (140°F)" is revised to read "< 60.5°C (141°F)".

b. In the paragraph (b)(1)(iv) table, in Column 3, for the entry "Over 100", "Over −5" is revised to read "Over +5".

§ 173.124 [Amended]

120. In § 173.124, the following changes are made:

a. In paragraphs (a)(3)(ii), the reference "2.2" is revised to read "2.c.(2)".

b. In paragraph (a)(3)(iii), the reference "2.3.2" is revised to read "2.c.(2)".

c. In paragraph (b)(1), the reference "3.1.1 or 3.1.2" is revised to read "3.a.(1) or 3.a.(2)".

d. In paragraph (b)(2), the reference "3.2.1" is revised to read "3.b.(1)".

§ 173.128 [Amended]

121. In § 173.128, the following changes are made:

a. In paragraph (c)(2), the reference "§ 173.223" is revised to read "§ 173.21(f)".

b. In paragraph (d), "Figure 1.1" is revised to read "Figure 11.1".

§ 173.132 [Amended]

122. In § 173.132, the following changes are made:

a. In paragraph (a)(1) introductory text, the wording "(whenever possible, animal test data that has been reported in the chemical literature should be used)" is added immediately after "laboratory animals".

b. In paragraph (a)(1)(iii)(B), the wording "not more than 5000 ml/ms" is revised to read "not more than 5000 ml/m³".

c. In paragraph (b)(1), in the first sentence, "oral" is added immediately after "acute" and before "toxicity", and "adult" is added immediately after "young" and before "albino".

d. In paragraph (b)(2), the word "braiding" is revised to read "abrading".

123. In § 173.133, the section heading and paragraph (a)(2) are revised to read as follows:

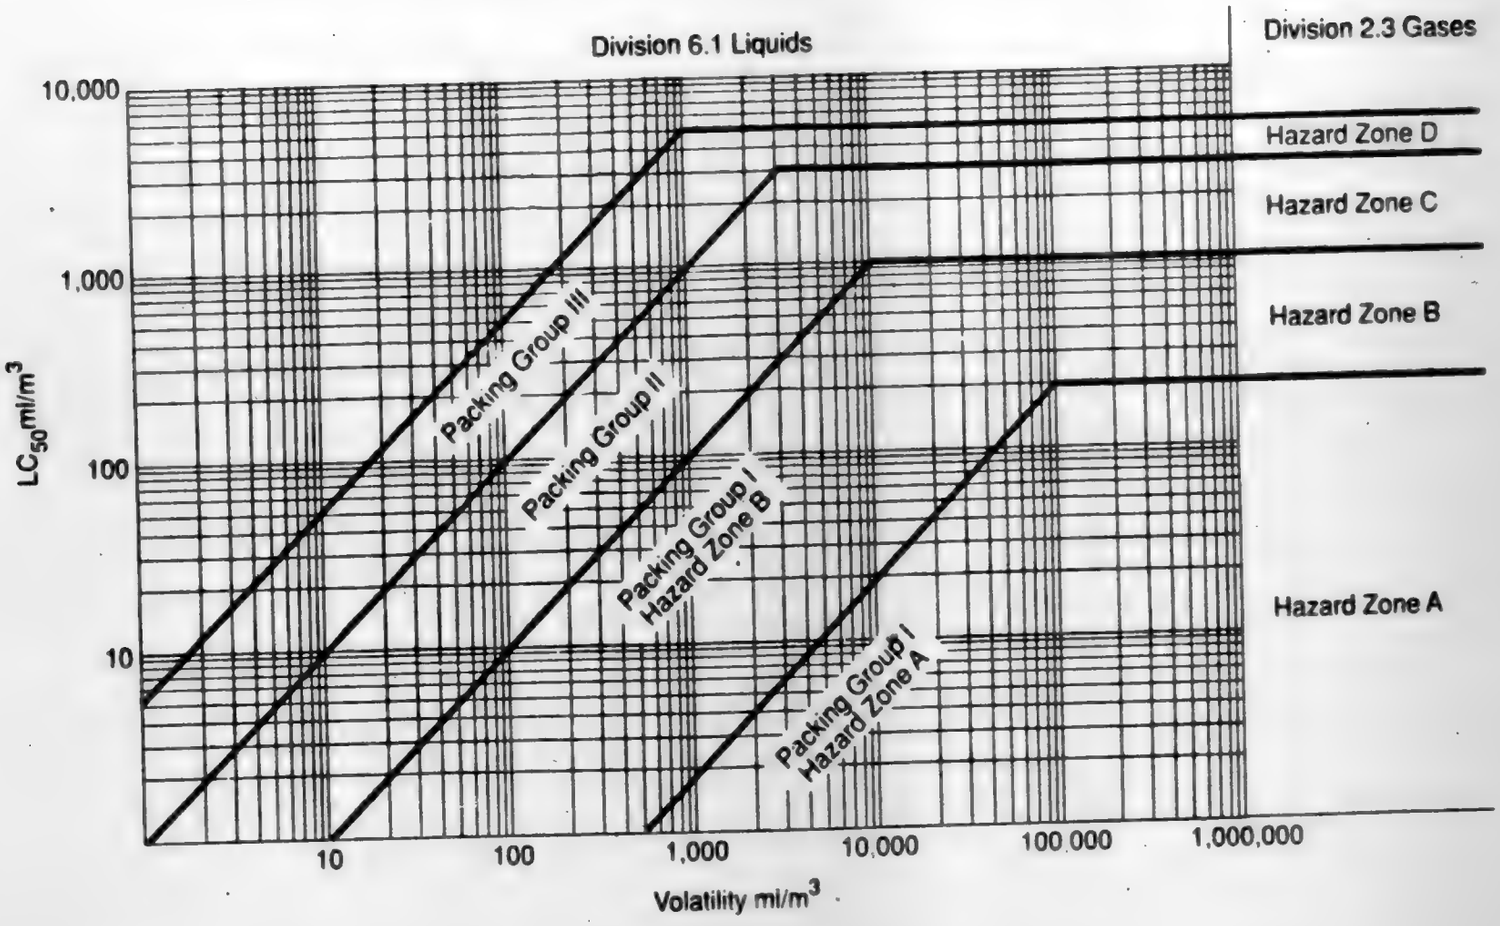
§ 173.133 Assignment of packing group and hazard zones for Division 6.1 materials.

(a) * * *

(2)(i) The packing group and hazard zone assignments for liquids (see § 173.115(c) of this subpart for gases) based on inhalation of vapors shall be in accordance with the following Table:

Packing Group	Vapor concentration and toxicity
I (Hazard Zone A).	V > 500 LC_{50} and LC_{50} < 200 mL/M³.
I (Hazard Zone B).	V > 10 LC_{50}; LC_{50} < 1000 mL/m³; and the criteria for Packing Group I, Hazard Zone A are not met.
	V > LC_{50}; LC_{50} < 3000 mL/m³; and the criteria for Packing Group I, are not met.
	V > .2 LC_{50}; LC_{50} < 5000 mL/m³; and the criteria for Packing Groups I and II, are not met.

Note 1: V is the saturated vapor concentration in air of the material in mL/m³ at 20C° and standard atmospheric pressure.



Note 2: A liquid in Division 6.1 meeting criteria for Packing Group I, Hazard Zones A or B stated in paragraph (a)(2) of this section is a material poisonous by inhalation subject to the additional hazard communication requirements in §§ 172.203(m)(3), 172.313 and Table 1 of § 172.504(e) of this subchapter.

(ii) These criteria are represented graphically in Figure I:

BILLING CODE 4910-60-M

Figure 1

Inhalation Toxicity: Packing Group and Hazard Zone Borderlines

BILLING CODE 4910-60-C

VOL 56 ISS 245 DEC 20 1991 UMI

* * * * *

§ 173.133 [Amended]

124. In addition, in § 173.133, the following changes are made:

a. In the paragraph (a)(1) table, in column 4, "<0.5, <2" is revised to read "<0.5, <2".

b. In paragraph (b)(1)(ii), in the formula, "760" is removed and replaced with "101.3".

c. In paragraph (b)(1)(ii), the wording "partial pressure may be calculated" is revised to read "partial pressure of the *ith* component substance in kPa at 20 °C and one atmospheric pressure. Pi may be calculated".

125. In § 173.134, paragraph (a)(4) is added to read as follows:

§ 173.134 Class 6, Division 6.2—Definitions.

(a) * * *

(4) A "regulated medical waste" as defined in Appendix G of this part.

* * * * *

§ 173.134 [Amended]

126. In addition, in § 173.134, in paragraph (a)(1), in the first sentence, the wording "has the potential to cause" is revised to read "causes or may cause".

§ 173.136 [Amended]

127. In § 173.136, in paragraph (b), the wording "paragraph (a) of this section. RSPA may revise its classification or make the material subject to the requirements of this subchapter" is revised to read "paragraph (a) of this section. RSPA may revise its classification or make the determination that the material is not subject to the requirements of this subchapter".

§ 173.137 [Amended]

128. In § 173.137, in paragraphs (a), (b), and (c)(1), the wording "visible necrosis of the skin tissue" is removed and replaced with "visible destruction or irreversible alterations of the skin tissue" each place it appears.

129. Section 173.140 is revised to read as follows:

§ 173.140 Class 9—Definitions.

For the purpose of this subchapter, "miscellaneous hazardous material" (class 9) means a material which:

(a) Has an anesthetic, noxious or other similar property which could cause extreme annoyance or discomfort to a flight crew member so as to prevent the correct performance of assigned duties; and

(b) Meets the definition in § 171.8 of this subchapter for a hazardous substance or a hazardous waste.

130. In § 173.150, paragraphs (f)(1) and (f)(3) (iv) and (vi) are revised to read as follows:

§ 173.150 Exceptions for Class 3 (flammable and combustible liquids).

* * * * *

(f) * * * (1) A flammable liquid with a flash point at or above 38 °C (100°F) that does not meet the definition of any other hazard class, except Class 9, may be reclassed as a combustible liquid. This provision does not apply to transportation by vessel or aircraft, except where other means of transportation is impracticable.

* * * * *

(3) * * *

(iv) Placarding requirements of Subpart F of Part 172 of this subchapter;

(v) * * *

(vi) Reporting incidents as prescribed by §§ 171.15 and 171.16 of this subchapter;

(vii) Packaging requirements of Subpart B of this part and, in addition, non-bulk packagings must comply with requirements of § 173.203; and

* * * * *

§ 173.150 [Amended]

131. In addition, in § 173.150, in paragraph (b)(3), "4.0 L (1 gallon)" is revised to read "5.0 L (1 gallon)".

§ 173.154 [Amended]

132. In § 173.154, in paragraph (d), the wording "packaging constructed" is revised to read "portable tank, cargo tank, or tank car constructed".

§ 173.155 [Amended]

133. In § 173.155, in paragraph (b), in the first sentence, the wording "are excepted from the specification packaging" is revised to read "are excepted from labeling, unless offered or intended for transportation by aircraft, and the specification packaging".

§ 173.156 [Amended]

134. In § 173.156, the following changes are made:

a. In paragraph (b), in the second sentence, the wording "contract motor carrier from a distribution center" is revised to read "contract motor carrier or a common carrier vehicle under exclusive use for such service, from a distribution center to a retail outlet".

b. In addition, in paragraph (b), a third sentence is added at the end of the paragraph to read "Packagings of ORM-D materials shipped in this manner are not subject to the 30 kg (66 pound) gross weight limitation.".

§ 173.158 [Amended]

135. In § 173.158, the following changes are made:

a. In paragraph (e), the wording "4G fiberboard boxes or" is added immediately after "may be packaged in" and before "4C1, 4C2, 4D or 4F wooden boxes".

b. In paragraph (h)(2), the wording "further individually overpacked in tightly closed metal packagings" is added immediately after "capacity".

§ 173.159 [Amended]

136. In § 173.159, in paragraph (d)(1), in the first sentence, "(0.063 mm)" is revised to read "(0.063 inches)".

§ 173.164 [Amended]

137. In § 173.164, the following changes are made:

a. Paragraphs (b)(2) through (b)(4) are redesignated (b)(3) through (b)(5).

b. Paragraph (b)(1) is amended by designating the last sentence as paragraph (b)(2).

c. In newly designated paragraph (b)(2), "also" is removed and the wording "from the requirements of this subchapter" is added immediately after "excepted" and before "if installed", and in newly designated paragraphs (b)(2) and (b)(3)(iv) the semicolon at the end of the sentence is removed and replaced with a period each place it appears.

138. In § 173.171, the introductory paragraph and paragraph (a) are revised to read as follows:

§ 173.171 Smokeless powder for small arms.

Smokeless powder for small arms which has been classed in Division 1.3 may be reclassed as a 4.1 material, for transportation by highway and rail only, subject to the following conditions:

(a) The powder must be examined and approved for a Division 1.3 classification in accordance with § 173.56 of this part;

* * * * *

§ 173.171 [Amended]

139. In addition, in § 173.171, in paragraph (c), in the second sentence, the wording "must be a type" is revised to read "must be of the same type".

§ 173.173 [Amended]

140. In § 173.173, in paragraph (a), in the third sentence, the wording "drying," is added immediately after "thinning," and before "reducing".

§ 173.181 [Amended]

141. In § 173.181, the following changes are made:

a. In paragraph (c) introductory text, the wording "or fiber drums (1G)" is added immediately after "(1A2)" and before "not exceeding"; the wording "strong tight" is added immediately after "each with" and before "inner metal cans"; and the wording "constructed of not less than 0.379 mm (0.015 inch) nominal thickness electro-coated tin plate" is removed.

b. In paragraph (c)(3), "tin" is revised to read "metal".

142. In § 173.185, paragraph (j) introductory text is revised and paragraph (k) is added to read as follows:

§ 173.185 Lithium batteries and cells.

* * * * *

(j) Lithium cells and batteries, for disposal, may be offered for transportation or transported to a permitted storage facility and disposal site by motor vehicle only, if the cells and batteries—

* * * * *

(k) Cells or batteries discharged to below 2 volts, not to exceed 100 cells or batteries per shipment, may be shipped for testing purposes by highway only.

§ 173.185 [Amended]

143. In addition, in § 173.185, the following changes are made:

a. In paragraph (a), the second sentence is revised to read "Rechargeable lithium batteries and cells, devices containing regulated lithium batteries (including lithium batteries contained in equipment) and cells, and lithium batteries and cells which do not otherwise comply with the requirements of this section may not be transported except as approved by the Associate Administrator for Hazardous Materials Safety."

b. In paragraph (i) introductory text, "subpart" is revised to read "subchapter".

c. In paragraphs (j)2) and (j)(3), "Is" is removed and replaced with "Are", both times it appears.

144. In § 173.188, paragraph (a)(2) is revised to read as follows:

§ 173.188 White or yellow phosphorous.

* * * * *

(a) * * *

(2) Steel drums (1A1) not over 250 L (66 gallons) capacity each or steel drums (1A2) not over 115 L (30 gallons) capacity each.

* * * * *

§ 173.192 [Amended]

145. In § 173.192, the following changes are made:

a. In the introductory text, the reference "§ 173.101" is revised to read "§ 172.101".

b. In paragraph (a)(2), "127 kg (280 pounds)" is revised to read "57 kg (125 pounds)".

146. In § 173.193, paragraph (c) is redesignated paragraph (d) and revised; a second sentence is added at the end of paragraph (b); and a new paragraph (c) is added to read as follows:

§ 173.193 Bromoacetone, methyl bromide, chloropicrin and methyl bromide or methyl chloride mixtures, etc.

* * * * *

(b) * * * This capacity does not apply to shipments of methyl bromide.

(c) Methyl bromide mixtures containing up to 2% chloropicrin must be packaged in 4G fiberboard boxes with inside metal cans containing not over one pound each, or inside metal cans with a minimum wall thickness of 0.007 inch containing not over 1¼ pounds each. The one-pound can must be capable of withstanding an internal pressure of 130 psig without leakage or permanent distortion. Vapor pressure of the contents must not exceed 130 psig at 55 °C (130 °F). The 1¼–pound can must be capable of withstanding an internal pressure of 140 psig without leakage or permanent distortion. Vapor pressure of the contents must not exceed 140 psig at 55 °C (130 °F). Cans must not be liquid full at 130 °F. Cans must be constructed of tinplate or lined with suitable material and must have concave or pressure ends.

(d) Cylinders must conform to § 173.40 of this part.

147. In § 173.195, the section heading is revised to read as follows:

§ 173.195 Hydrogen cyanide, anhydrous, stabilized (hydrocyanic acid, aqueous solution).

148. Subpart E is amended by adding § 173.197 to read as follows:

§ 173.197 Regulated medical waste.

(a) Regulated medical waste must be packaged in packagings conforming to the requirements of part 178 of this subchapter at the Packing Group II performance level. The packagings must be:

(1) Rigid;

(2) Leak resistant;

(3) Impervious to moisture;

(4) Of sufficient strength to prevent tearing or bursting under normal conditions of use and handling;

(5) Sealed to prevent leakage during transport;

(6) Puncture resistant for sharps and sharps with residual fluids; and

(7) Break-resistant and tightly lidded or stoppered for fluids in quantities greater than 20 cubic centimeters.

(b) Until October 1, 1994, packages do not have to be marked or tested but must be capable of meeting the requirements in subpart M of part 178 of this subchapter.

§ 173.202 [Amended]

149. In § 173.202, in paragraph (c), the entry "Fiber drum: 1G (with liner)" is added immediately below the entry "Plastic drum: 1H1 or 1H2".

§ 173.203 [Amended]

150. In § 173.203, in paragraph (c), the entry "Fiber drum: 1G (with liner)" is added immediately below the entry "Plastic drum: 1H1 or 1H2".

§ 173.211 [Amended]

151. In § 173.211, in paragraph (c), the entry "Fiber drum: 1G" is added immediately below the entry "Plastic drum: 1H1 or 1H2".

§ 173.224 [Amended]

152. In § 173.224, the following changes are made:

a. In the paragraph (c) table, in columns (2a) and (2b), for each entry, the metric measurements are revised by removing the parentheses, moving the metric measurements to precede the U.S. standard measurements, and adding parentheses around the U.S. standard measurements.

b. In the paragraph (c) table, in column (2b), for the entry F5a, "55 kg (110 lb)" is revised to read "50 kg (110 lb)"; and in the column "Outer packaging", for the entry F5b, the wording "Fiber drum, sift proof 1G" is added.

153. In § 173.225, in paragraph (b), the Organic Peroxides Table is revised to read as follows:

§ 173.225 Packaging requirements and other provisions for organic peroxides.

* * * * *

(b) * * *

VOL 56 ISS 245 DEC 20 1991 UMI

ORGANIC PEROXIDES TABLE

Technical Name	ID Number	Concentration (Mass %)	Diluent (Mass %) A	Diluent (Mass %) B	Diluent (Mass %) I	Water (Mass %)	Packing Method	Temperature(°C) Control	Temperature(°C) Emergency	Notes

§ 173.225 [Amended]

154. In addition, in § 173.225, the following changes are made:

a. In paragraph (c)(4)(i), "Type C" is revised to read "Type B".

b. In the § 173.225(d)(1) Table, in the Table heading, the wording "Table 11.2(A)—" is removed.

c. In the § 173.225(d)(1) Table, in the Column 2 heading, the wording "(see 9.4.7)" is removed.

d. In the § 173.225 (d)(1) Table, for the entry "Steel drum", in the columns titled "OP7A" and "OP8A", "60" and "225" are removed and replaced with "60 L" and "225 L", respectively.

e. In the § 173.225(d)(1) Table, for the entry "Fiber drum [3]", in the column titled "OP4A [3]", "5 KG" is removed and replaced with "5/25 kg", and in the column titled "OP5A [2], the term "50 kg" is removed and replaced with "25 kg".

f. In the § 173.225(d)(2) Table, in the Column 2 heading, the wording "(see 9.4.7)" is removed.

g. In the § 173.225(d)(2) Table, the column heading "OP2B [2]" is removed and replaced with the column heading "OP2B [2,3]".

h. In the § 173.225(d)(2) Table, in the column heading "OP5B [2]", for the entries "Plastics receptacle with outer fiberboard box.", "Plastics receptacle with outer plastics drum." and "Plastics receptacle with outer solid plastics box.", "30 kg" is removed and replaced with "25 kg" each place it appears.

i. In the § 173.225(d)(2) Table, in the column heading "OP6B [2]", for the entries "Plastics receptacle with outer fiberboard box.", "Plastics receptacle with outer plastics drums." and "Plastics receptacle with outer solid plastics box.", "60 kg" is removed and replaced with "50 kg" each place it appears.

§ 173.226 [Amended]

155. In § 173.226, the following changes are made:

a. In paragraph (b) introductory text, a new sentence is added after the third sentence to read "Outer 1A2 and 1H2 drums must withstand a hydrostatic test pressure of 100 kPa (15 psi).".

b. In paragraph (c)(2), in the fourth sentence, "screw-type" is removed.

§ 173.227 [Amended]

156. In § 173.227, the following changes are made:

a. In paragraph (b) introductory text, a new sentence is added after the third sentence to read "Outer 1A2 and 1H2 drums must withstand a hydrostatic test pressure of 100 kPa (15 psi).".

b. In paragraph (b)(3)(ii)(D), "(0.625 inch)" is revised to read "(0.0625 inch)".

c. In paragraph (b)(3)(iii)(D), "(0.62 inch)" is revised to read "(0.0625 inch)" and "(0.43 inch)" is revised to read "(0.043 inch)".

157. In § 173.230, paragraphs (b)(1)(v) and (b)(2)(v) are added to read as follows:

§ 173.230 Non-bulk packagings for ORM-D materials.

* * * * *

(b) * * * (1) * * *

(v) Cartridges, power devices which are used to project fastening devices.

(2) * * *

(v) Cartridges, power devices which are used to project fastening devices and 22 caliber rim-fire cartridges may be packaged loose in strong outside packagings.

* * * * *

§ 173.230 [Amended]

158. In addition, in § 173.230, in paragraphs (b)(1)(iii) and (b)(2)(iii), the word "and" is removed; and in paragraphs (b)(1)(iv) and (b)(2)(iv), the period is removed at the end of the sentence and replaced with "; and".

159. In § 173.240, paragraphs (a) and (c) are revised to read as follows:

§ 173.240 Bulk packaging for certain low hazard solid materials.

* * * * *

(a) *Rail cars:* Class DOT 103, 104, 105, 109, 111, 112, 114, or 115 tank car tanks; Class 106 or 110 multi-unit tank car tanks; and metal non-DOT specification, sift-proof tank car tanks and sift-proof closed cars.

* * * * *

(c) *Portable tanks and closed bulk bins*: DOT 51, 52, 53, 56, 57 and 60 portable tanks; IMO type 1, 2 and 5, and IM 101 and IM 102 portable tanks; marine portable tanks conforming to 46 CFR part 64; and sift-proof non-DOT specification portable tanks and closed bulk bins.

160. In § 173.241, paragraph (c) is revised to read as follows:

§ 173.241 Bulk packagings for certain low hazard liquid and solid materials

* * * * *

(c) *Portable tanks*: DOT 51, 52, 56, 57 and 60 portable tanks; IMO type 1, 2 and 5, and IM 101 and IM 102 portable tanks; marine portable tanks conforming to 46 CFR part 64; and non-DOT specification portable tanks suitable for transport of liquids.

§ 173.242 [Amended]

161. In § 173.242, in paragraph (a), the last sentence is removed.

§ 173.243 [Amended]

162. In § 173.243, the following changes are made:

a. In paragraph (a), in the first sentence, the wording "fusion-welded" is added immediately after "115" and before "tank car tanks", and the second, third, and fourth sentences are removed.

b. In paragraph (b)(2), the wording "DOT 406," is removed.

163. In § 173.244, the section heading and paragraph (b) are revised to read as follows:

§ 173.244 Bulk packaging for certain pyrophoric liquids (Division 4.2) and poisonous liquids with inhalation hazards (Division 6.1).

* * * * *

(b) *Cargo tanks:* Specifications MC 330 and MC 331 cargo tank motor vehicles and, except for Division 4.2 materials, MC 312 and DOT 412 cargo tank motor vehicles.

* * * * *

§ 173.244 [Amended]

164. In addition, in § 173.244, in paragraph (a), the wording "fusion-welded" is added immediately after "114" and before "tank car tanks", and the last sentence is removed.

165. In § 173.245, paragraph (a) is added to read as follows:

§ 173.245 Bulk packaging for extremely hazardous materials such as poisonous gases (Division 2.3).

* * * * *

(a) Tank car tanks and multi-unit tank car tanks, when approved by the Associate Administrator for Hazardous Materials Safety.

* * * * *

§ 173.249 [Amended]

166. In § 173.249, the following changes are made:

a. In paragraph (b), two sentences are added at the end of the paragraph to read "The total quantity in one tank may not be less than 88 percent nor more than 96 percent of the volume of the tank. Cargo tanks in bromine service built prior to August 31, 1991 may continue in service under the requirements contained in § 173.252(a)(4) of this part in effect on September 30, 1991.".

b. In paragraph (c), in the first sentence, the word "intermodal" is removed, and a new sentence is added at the end of the paragraph to read "The total quantity in one tank may not be less than 88 percent nor more than 92 percent of the volume of the tank.".

167. In § 173.302, paragraph (h) is added to read as follows:

§ 173.302 Charging of cylinders with non-liquefied compressed gases.

* * * * *

(h) *Poisonous gases.* Packagings containing Division 2.3 materials must conform to the requirements of § 173.40 of this part.

§ 173.302 [Amended]

168. In addition, in § 173.302, the following changes are made:

a. In paragraph (a) introductory text, the wording "(except gas in solution or poisonous gas)" is revised to read "(except gas in solution)".

b. In paragraph (a)(4)(iii), the reference "RR–C–901b" is revised to read "RR–C–901c" each place it appears, and the wording "dated August 1, 1967" is revised to read "dated January 15, 1981".

169. In § 173.304, paragraph (g) is added to read as follows:

§ 173.304 Charging of cylinders with liquefied compressed gas.

* * * * *

(g) *Poisonous mixtures.* Packagings containing Division 2.3 materials must conform to the requirements of § 173.40 of this part.

§ 173.304 [Amended]

170. In addition, in § 173.304, the following changes are made:

a. In paragraph (a) introductory text, the wording "except gas in solution or poisonous gas" is revised to read "except gas in solution".

b. In paragraph (a)(1), the wording "or poisonous material (class A, B, or irritating material)," is revised to read "or poisonous material (Division 6.1 or 2.3).".

c. In paragraph (a)(4)(ii), the reference "RR–C–901b" is revised to read "RR–C–901c" each place it appears.

§ 173.305 [Amended]

171. In § 173.305, the following changes are made:

a. In paragraph (a), the reference "§ 173.300(a)" is removed and replaced with "§ 173.115".

b. In paragraph (d), the wording "any poisonous material, Class A, or irritating material" is revised to read "any poisonous material (Division 6.1 or 2.3)"; and the wording "§ 173.326(a) or § 173.381(a)" is revised to read "§§ 173.115 or 173.132".

172. In § 173.306, paragraph (i) is added to read as follows:

§ 173.306 Limited quantities of compressed gases.

* * * * *

(i) To determine the flammability of aerosols, the following test method must be applied:

(1) Either a mixture of 13 percent or less (by volume) with air forms a flammable mixture or the flammable range with air is wider than 12 percent regardless of the lower limit. These limits shall be determined at atmospheric temperature and pressure. The method of sampling and test procedure shall be acceptable to the Bureau of Explosives and approved by the Associate Administrator for Hazardous Materials Safety.

(2) Using the Bureau of Explosives' Flame Projection Apparatus, the flame projects more than 18 inches beyond the ignition source with valve opened fully or the flame flashes back and burns at the valve with any degree of valve opening.

(3) Using the Bureau of Explosives' Open Drum Apparatus, there is any significant propagation of flame away from the ignition source.

(4) Using the Bureau of Explosives' Closed Drum Apparatus, there is any explosion of the vapor-air mixture in the drum.

§ 173.306 [Amended]

173. In § 173.306, the following changes are made:

a. In paragraph (a) introductory text, a third sentence is added at the end, and in paragraph (h) introductory text, a new sentence is added immediately after the first sentence, to read "Each package may not exceed 30 kg (66 pounds) gross weight."

b. In paragraphs (a)(3)(i) and (b)(1), the wording "(27.7 fluid ounces)" is

VOL 56 ISS 245 DEC 20 1991 UMI

revised to read "(1 liter)" both places it appears.

c. In paragraph (b) introductory text, the wording "(except poisonous gases as defined by § 173.326)" is revised to read "(except poisonous gases as defined by § 173.115(a)(3) of this part)".

d. In paragraph (b)(3), in the first sentence, the wording "is nonpoisonous and" is revised to read "is, except for Division 6.1 Packing Group III material, nonpoisonous and".

§ 173.308 [Amended]

174. In § 173.308, the following changes are made:

a. In paragraph (a)(1), the wording "2.3 fluid ounces" is revised to read "70 ml (2.3 fluid ounces)".

b. In paragraph (a)(2), "60 °F" is revised to read "15 °C (59 °F)".

c. In paragraph (a)(3), "130 °F" is revised to read "55 °C (131 °F)".

d. In paragraph (c), in the second sentence, the wording "25 feet" is revised to read "8 m (26 feet)".

175. In § 173.314, paragraph (c) is revised and paragraph (g)(3) is added to read as follows:

§ 173.314 Requirements for compressed gases in tank car tanks.

* * * * *

(c) *Authorized gases, filling densities, and tank car tanks.* A compressed gas offered for transportation in a tank car tank must be prepared in accordance with paragraphs (b) through (i) of this section, §§ 172.101, 173.10, 173.24b, and 173.31 of this subchapter, and the following table (for cryogenic liquids, see § 173.319 of this subpart):

Kind of gas	Maximum permitted filling density (see Note 1)	Authorized tank car	Notes
Ammonia, anhydrous, or ammonia solutions >50 percent ammonia	Note 21	105A300W, 112S340W, 114S340W	24
	Note 21	106A500X	
Ammonia, solutions with >35 percent ≤50 percent ammonia by mass	Note 21	105A, 112A, 114A, 111A100W4	
Argon, compressed	Note 20	107A	
Boron trichloride	Note 21	105A300W, 106A500X	
Carbon dioxide, refrigerated liquid	Note 5	105A500W	6
Chlorine	125	105A500W	12, 30
	125	106A500X	
Chlorine trifluoride	Note 21	106A500X, 110A500W	
Chlorine pentafluoride	Note 21	106A500X, 110A500W	
Dimethylamine, anhydrous	59	106A500X	
	61	112T340W, 112J340W	4
	62	105A300W	4, 23
Dimethyl ether	59	106A500X, 110A500W	
	62	105A300W	4, 23
Dinitrogen tetroxide or nitrogen tetroxide (see Nitrogen dioxide)			
Division 2.1 materials not specifically provided for in this table	Note 21	105A, 111A100W4, 112T, 112J, 114T, 114J	4, 13, 23
	Note 21	106A, 110A	7
Division 2.2 materials not specifically identified in this table	Note 21	105A, 109A, 111A100W4, 112A, 114A	13
	Note 21	106A, 110A	7
Division 2.3, Hazard Zone A, materials not specifically identified in this table	None	None	22
Division 2.3, Hazard Zone B, materials not specifically identified in this table	Note 21	105J300W, 112J340W, 112T340W, 114J340W, 114T340W	3, 9
	Note 21	106A, 110A	7
Division 2.3, Hazard Zone C, materials not specifically identified in this table	Note 21	105J300W, 112J340W, 112T340W, 114J340W, 114T340W	3, 9
	Note 21	106A, 110A	7
Division 2.3, Hazard Zone D, materials not specifically identified in this table	Note 21	105J300W, 109A, 112J340W, 112T340W, 114J340W, 114T340W	9, 15
	Note 21	106A, 110A	7
Ethylamine	Note 21	105A100W, 111A100W4, 112J200W, 112T200W, 114J340W, 114T340W	4, 23
	Note 21	106A, 110A	
Helium	Note 20	107A	
Hydrogen	Note 20	107A	2
Hydrogen chloride, refrigerated liquid	Note 18	105A600W	17, 30
Hydrogen sulfide	68	106A800X	7, 8
Methylamine, anhydrous	62	105A300W	4, 23
	61	112T340W, 112J340W	4
	60	106A500X	
Methyl bromide	Note 21	105A100W, 111A100W4	29, 30
	Note 21	106A	7
Methyl chloride	85	112T340W, 112J340W	4
	86	105A300W	4, 23
	84	106A500X	
Methyl mercaptan	82	105A300W	4, 23
	80	106A500X	7
Nitrogen	Note 20	107A	
Nitrogen dioxide, liquefied	Note 21	105A500W	
	Note 21	106A500X, 110A500W	
Nitrosyl chloride	124	105A300W	10, 30
	110	106A800X	7, 11
Nitrous oxide	Note 5	105A500W	6, 30
Oxygen	Note 20	107A	
Phosgene	Note 21	106A500X	7
Sulfur dioxide	125	105A200W	30
	125	106A500X, 110A500W	
Sulfuryl fluoride	120	105A500W	

Kind of gas	Maximum permitted filling density (see Note 1)	Authorized tank car	Notes
Vinyl fluoride, inhibited	Note 19	105A600W	17, 23

Notes:
1 The filling density for liquefied gases is hereby defined as the percent ratio of the weight of gas in the tank to the weight of water that the tank will hold. For determining the water capacity of the tank in pounds, the weight of one gallon of water at 15.55°C (60°F) in air is 8.32828 pounds.
2 Each tank must be equipped with one or more safety relief devices of an approved design. The discharge outlet of each safety relief device must be connected to a manifold having an unobstructed discharge area of at least 1¼ times the total discharge area of the safety relief devices connected to the manifold. All manifolds must be connected to a single common header having an unobstructed discharge outlet pointing upward and extending above top of the car. The header and the header outlet must each have an unobstructed discharge area at least equal to the total discharge area of the manifolds connected to the header. The header outlet must be equipped with an approved ignition device which will instantly ignite any hydrogen discharged through the safety relief device.
3 If the material has a secondary hazard in Division 2.1, then the provisions of Note 4 are applicable.
4 For single unit tank car tanks, interior pipes of loading and unloading valves must be equipped with excess-flow valves of approved design. For single unit tank car tanks built after December 30, 1971, the interior pipes of gaging devices with an opening for the passage of lading exceeding 1.52 mm (0.060 inch) diameter must be equipped with excess flow valves of approved design. The interior pipes of sampling devices must be equipped with excess flow valves of approved design. The protective housing cover must be provided with an opening above each safety relief valve which is concentric with the discharge of the valve and which has an area at least equal to the valve outlet area. Each protective housing cover opening must be provided with a weatherproof cover designed for vertical discharge.
5 The liquid portion of the gas at 0°F must not completely fill the tank.
6 Each tank must be insulated with an approved material of a thickness so that the thermal conductance is not more than 0.03 B.t.u. per square foot, per degree F. differential in temperature per hour, except that the insulation thickness directly over the center sills may be reduced to give thermal conductance not exceeding 0.04 B.t.u. per square foot, per degree F. differential in temperature per hour (this reduction permits an anchorage not exceeding seven inches from top of center sills to bottom of tank). Tank must be equipped with one safety relief valve of approved design set to open at a pressure not exceeding 75 percent of the test pressure of the tank and one frangible disc of approved design set to function at a pressure less than the test pressure of the tank. The discharge capacity of each of these safety relief devices must be sufficient to prevent building up of pressure in the tank in excess of 82.5 percent of the test pressure of the tank. Tanks must be equipped with two pressure-regulating valves of approved design set to open at a pressure not to exceed 350 psi on 105A500–W tanks and at a pressure not to exceed 400 psi on 105A600–W tanks. Each regulating valve and safety relief device must have its final discharge piped to the outside of the protective housing. See § 179.102–1 of this subchapter for additional requirements.
7 Rail freight and highway only. (See §§ 174.204 and 177.834(m) of this subchapter for special requirements.)
8 Each tank must be equipped with adequate safety relief devices of the fusible plug type having a yield temperature not over 76.66°C (170°F), nor less than 69.44°C (157°F). Each device must be resistant to extrusion of the fusible alloy and leak tight at 55°C (130°F). Each valve outlet must be sealed by a threaded cap or a threaded solid plug. In addition, all valves must be protected by a metal cover.
9 Except for materials with a secondary hazard in Division 2.1, DOT 105J300ALW tank cars are also authorized.
10 Tanks and any ancillary equipment in contact with the lading, such as manhole covers, venting, loading and discharge valves, safety relief valves, check valves, and eduction pipes, must be made of metal or clad with metal not subject to rapid deterioration by the lading. Cork must be used as an insulating material.
11 Nitrosyl chloride must be transported in nickel-clad tanks with safety relief devices incorporating a fusible plug set to function at a temperature 79.44°C (175°F). Safety relief devices must be vapor tight at 54.44°C (130°F).
12 Interior pipes of liquid discharge valves must be equipped with excess flow valves of approved design. The quantity of chlorine loaded into a single-unit tank car tank must not be loaded in excess of the normal lading weights nor in excess of 90 tons. Tank car tanks built to DOT 105A500W may be stenciled either DOT 105A300W or DOT 105A500W with the size and type of safety relief device required by the stenciled specification.
13 If the commodity meets the definition of a refrigerant gas or dispersant gas in § 173.115(j) of this part, tank car tanks must be marked "DISPERSANT GAS" or "REFRIGERANT GAS" or with the proper shipping name.
14 Lading must be covered with a dry inert gas padding to render the vapor space nonflammable at 105°F.
15 If the material has a secondary hazard in Division 2.1, then Class DOT 109A tank car tanks are not authorized. Specification DOT 112 tank car tanks must conform to Class DOT 112T or DOT 112J requirements and DOT 114 tank car tanks must conform to Class DOT 114T or DOT 114J requirements. The provisions of Notes 4 and 23 are also applicable.
16 [Reserved]
17 See paragraph (g) of this section.
18 89 percent maximum to 80.1 percent minimum at a maximum test pressure of 90 psig, when offered for transportation.
19 59.6 percent maximum to 53.6 percent minimum at a maximum test pressure of 105 psig, when offered for transportation.
20 The gas pressure at 54.44°C (130°F) in any noninsulated Class DOT 107A tank may not exceed 7/8 of the marked test pressure, except that a tank may be charged with helium to a pressure 10 percent in excess of the marked maximum gas pressure at 54.44°C (130°F) of each tank.
21 See § 173.24b of this subchapter.
22 See § 173.24b of this subchapter.
23 Class 105 tanks must meet 105J requirements if: (1) the tank was built after August 31, 1981; or (2) the tank exceeds 18,500 gallons and was built before September 1, 1981. Class 111 tanks must meet 111J requirements if the tank exceeds 18,500 gallons. Class DOT 111 tank cars built after March 1, 1984 are not authorized for the transportation of Division 2.1 materials.
24 Class 105 tanks must meet 105S requirements if: (1) the tank was built after August 31, 1981; or (2) the tank exceeds 18,500 gallons and was built before September 1, 1981.
25 [Reserved]
26 [Reserved]
27 [Reserved]
28 [Reserved]
29 DOT 111A100W4 tank car tanks built after September 30, 1991 are not authorized.
30 Class 105 tanks must meet 105J requirements if the tank was built after September 30, 1991.

* * * * *

(g) * * *

(3) See § 179.102–17 of this subchapter for additional requirements.

* * * * *

§ 173.314 [Amended]

176. In addition, in § 173.314, the following changes are made:

a. In paragraph (a), the reference "§ 173.300" is revised to read "§ 173.115".

b. In paragraph (b)(3), "For cars" is revised to read "For tanks".

c. In paragraph (b)(6), "approved by the AAR Tank Car Committee" is removed.

177. In § 173.315, paragraph (a)(2) is removed; the section heading is revised; the Table in paragraph (a) is amended by revising, removing and adding in alphabetical order the following entries, and by revising and adding in numerical order the following notes to the Table, as indicated; and the last sentence of introductory text in paragraph (c) is revised to read as follows:

§ 173.315 Compressed gases in cargo tanks and portable tanks.

(a) * * *

VOL 56 ISS 245 DEC 20 1991 UMI

Kind of gas	Maximum permitted filling density: Percent by weight (see note 1)	Maximum permitted filling density: Percent by volume (see par. (f) of this section	Specification container required: Type (see note 2)	Specification container required: Minimum design pressure (psig)
[REVISE]				
Chlorine	125	See Note 7	DOT-51, MC-330, MC-331.	225; See Notes 4 and 8.
Methyl mercaptan	80	90	DOT-51, MC-330, MC-331; See Note 23.	100.
Sulfur dioxide (tanks not over 1,200 gallons water capacity)	125	87.5	DOT-51, MC-330, MC-331; See Note 24.	150; See Note 4.
Sulfur dioxide (tanks over 1,200 gallons water capacity)	125	87.5	DOT-51, MC-330, MC-331; See Note 24.	125; See Note 4.
Sulfur dioxide (optional portable tank 1,000–2,000 pounds water capacity, fusible plug).	125	See Note 6	DOT-51; See Note 24.	225.

[REVISE]

* * * * *

Note 4: Material must be steel. Packagings must have a corrosion allowance of 20 percent or 0.10 inch, whichever is less, added to the metal thickness. The minimum wall thickness for chlorine packagings is 0.300 inch for stainless steel or 0.625 inch for carbon steel, including corrosion allowance.

Note 8: Chlorine packagings may be shipped only if the contents are to be unloaded at one unloading point.

Note 12: No aluminum, copper, silver, zinc or an alloy of any of these metals shall be used in packaging construction where it comes into contact with the lading.

* * * * *

[ADD]

* * * * *

Note 18: The minimum packaging design pressure must not be less than the vapor pressure at the reference temperature of the lading plus one percent or 173.4 kPa (25 psig), whichever is less.

Note 19: The minimum packagings design pressure must not be less than the vapor pressure at the reference temperature of the lading.

Note 20: The minimum packaging design pressure must not be less than 1.5 times the vapor pressure of the lading at 46°C (115°F).

Note 21: The minimum packaging design pressure must not be less than 1.3 times the vapor pressure of the lading at 46°C (115°F).

Note 22: The minimum packaging design pressure must not be less than 1.1 times the vapor pressure of the lading at 46°C (115°F).

Note 23: Packagings must be made of stainless steel except that steel other than stainless steel may be used in accordance with the provisions of § 173.24b(b) of this part. Thickness of stainless steel for shell and heads must be the greater of 7.62 mm (0.300 inch) or the thickness required for the packaging at its minimum design pressure.

Note 24: Packagings must be made of stainless steel except that steel other than stainless steel may be used in accordance with the provisions of § 173.24b(b) of this part. Thickness of stainless steel for shell and heads must be the greater of 8.35 mm (0.250 inch) or the thickness required for the packaging at its minimum design pressure.

Note 25: Packagings must be made of stainless steel except that steel other than stainless steel may be used in accordance with the provisions of § 173.24b(b) of this part. Thickness for shell and heads must be as calculated for the packaging at its minimum design pressure.

* * * * *

(c) * * * The outage and filling limits for liquefied gases must be as prescribed in § 173.24b of this part, except that this requirement does not apply to:

* * * * *

§ 173.318 [Amended]

178. In § 173.318, in the parenthetical expression in paragraph (e), the wording "(see §§ 173.33(d)(1)(ii) and 178.338–9(b) of this subchapter)" is revised to read "(see paragraph (g)(3) of this section and § 178.338–9(b) of this subchapter)".

179. In § 173.323, paragraphs (b)(1) and (b)(4) are revised to read as follows:

§ 173.323 Ethylene oxide.

* * * * *

(b) * * *

(1) In 4G fiberboard boxes with inner glass ampoules or vials. Total quantity of ethylene oxide may not exceed 100 grams (3.5 ounces) per package. The completed package must be capable of passing Packing Group I performance tests.

* * * * *

(4) In specification cylinders, as authorized for any compressed gas except acetylene. Pressurizing valves and insulation are required for cylinders over 4 L (1 gallon) capacity. Eductor tubes must be provided for cylinders over 19 L (5 gallons) capacity. Cylinders must be seamless or welded steel (not brazed) with a nominal capacity of no more than 115 L (30 gallons) and may not be liquid full below 82 °C (180 °F). Before each refilling, each cylinder must be tested for leakage at no less than 103.4 kPa (15 psig) pressure. In addition, each cylinder must be equipped with a fusible type relief device with yield temperature of 69 °C to 77 °C (157 °F to 170 °F). The capacity of the relief device and the effectiveness of the insulation must be such that the charged cylinder will not explode when tested by the method described in CGA Pamphlet C–14 or other equivalent method.

* * * * *

§ 173.323 [Amended]

180. In addition, in § 173.323, in paragraph (a), the wording "copper, silver mercury or any of their alloys" is revised to read "silver mercury or any of its alloys or copper", and a sentence is added immediately after the first sentence to read: "Copper alloys may be used only where gas mixtures do not contain free acetylene at any concentration that will form copper acetylene.".

181. In § 173.421–1, the section heading and paragraph (a) are revised to read as follows:

§ 173.421–1 Additional requirements for excepted packages containing Class 7 (radioactive) materials.

(a) Excepted packages prepared for shipment under the provisions of §§ 173.421, 173.422, 173.424, or 173.427 of this subpart must be certified as being acceptable for transportation by having a notice enclosed in or on the package, included with the packing list, or otherwise forwarded with the package. This notice must include the name of the consignor or consignee and the statement "This package conforms to the conditions and limitations specified in 49 CFR 173.421 for radioactive material, excepted package-limited quantity of material, UN2910; 49 CFR 173.422 for radioactive material, excepted package—instruments or articles, UN2910; 49 CFR 173.424 for radioactive material, excepted package—articles manufactured from natural or depleted uranium or natural thorium, UN2910; or 49 CFR 173.427 for radioactive material, excepted package—empty packaging, UN2910," as appropriate.

* * * * *

§ 173.421–2 [Amended]

182. In § 173.421–2, paragraph (d) is removed.

§ 173.465 [Amended]

183. In § 173.465, in paragraph (d), "¶f" is revised to read "of".

§ 173.471 [Amended]

184. In § 173.471, in the parenthetical following paragraph (g), the last sentence "The information collection requirements contained in paragraph (e) were approved under control number 2137–0514." is removed.

§§ 173.22, 173.34, 173.300 [Amended]

185. In addition to the amendments set forth above, part 173 is amended by removing the phrase "Office of Hazardous Materials Transportation" and, inserting in its place, the phrase "Associate Administrator for Hazardous Materials Safety" in the following sections:

(a) Section 173.22a(b)
(b) Section 173.34(e)(1)(iv)
(c) Section 173.300a(b)(1)
(d) Section 173.300a(e)
(e) Section 173.300b(b)(1)

§§ 173.471, 173.473 [Amended]

186. In addition to the amendments set forth above, part 173 is amended by removing the phrase "OHMT" and, inserting in its place, the phrase "the Associate Administrator for Hazardous Materials Safety" in the following sections:

(a) Section 173.471(f)
(b) Section 173.473(a)(1)
(c) Section 173.473(a)(3)

§§ 173.11, 173.32a, 173.34, 173.300a, 173.300b, 173.300c, 173.305, 173.315, 173.457 [Amended]

187. In addition to the amendments set forth above, part 173 is amended by removing the phrase "Director, OHMT" and, inserting in its place, the phrase "Associate Administrator for Hazardous Materials Safety" each place it appears in the following sections:

(a) Section 173.11(a)
(b) Section 173.32a(c)
(c) Section 173.32a(d)
(d) Section 173.32a(h) introductory text
(e) Section 173.32a(h)(2) introductory text
(f) Section 173.32a(h)(3)
(g) Section 173.34(e)(6)
(h) Section 173.34(i)
(i) Section 173.34(i)(4)(i)
(j) Section 173.34(l) introductory text
(k) Section 173.34(l)(2)
(l) Section 173.34(l)(3)
(m) Section 173.300a(c)
(n) Section 173.300a(d)
(o) Section 173.300a(e)
(p) Section 173.300a(g)
(q) Section 173.300a(h)
(r) Section 173.300a(i)
(s) Section 173.300b(c)
(t) Section 173.300b(d)
(u) Section 173.300b(e)
(v) Section 173.300b(f)
(w) Section 173.300b(g)
(x) Section 173.300c(a) introductory text
(y) Section 173.300c(b)
(z) Section 173.305(c)(1)
(aa) Section 173.315(i)(12)
(bb) Section 173.457(b)(4)

Appendix B [Amended]

188. In appendix B to part 173, in paragraph 6., the phrase "a height of 1.2 meters (3.94 feet) onto solid concrete" is removed and replaced with the phrase "a height determined in accordance with § 178.603(d) of this subchapter onto a rigid non-resilient, flat and horizontal surface".

VOL 56 ISS 245 DEC 20 1991 UMI

Appendix E [Amended]

189. In appendix E to part 173, in 2.c.(3)(A), the reference "2.3.2" is revised to read "2.c.(2)".

190. Appendix G is added to part 173 to read as follows:

Appendix G to Part 173—Definition of Regulated Medical Waste

1. *General*

A "regulated medical waste" is a waste material listed in the following table that is—

(a) Generated in the diagnosis, treatment (e.g., provision of medical services), or immunization of human beings or animals;

(b) In research pertaining thereto; or

(c) In the production or testing of biologicals.

TABLE—REGULATED MEDICAL WASTE

Waste class	Description
(1) Cultures and Stocks.	Cultures and stocks of infectious agents and associated biologicals, including: cultures from medical and pathological laboratories; cultures and stocks of infectious agents from research and industrial laboratories; wastes from the production of biologicals; discarded live and attenuated vaccines; and culture dishes and devices used to transfer, inoculate, and mix cultures.
(2) Pathological Wastes.	Human pathological wastes, including tissues, organs, and body parts and body fluids that are removed during surgery or autopsy, or other medical procedures, and specimens of body fluids and their containers.
(3) Human Blood and Blood Products.	(1) Liquid waste human blood; (2) products of blood; (3) items saturated and/or dripping with human blood; or (4) items that were saturated and/or dripping with human blood that are now caked with dried human blood; including serum, plasma, and other blood components, and their containers, which were used or intended for use in either patient care, testing and laboratory analysis or the development of pharmaceuticals. Intravenous bags are also included in this category.
(4) Sharps.	Sharps that have been used in animal or human patient care or treatment or in medical, research, or industrial laboratories, including hypodermic needles, syringes (with or without the attached needle), pasteur pipettes, scalpel blades, blood vials, needles with attached tubing, and culture dishes (regardless of presence of infectious agents). Also included are other types of broken or unbroken glassware that were in contact with infectious agents, such as used slides and cover slips.
(5) Animal Waste.	Contaminated animal carcasses, body parts, and bedding of animals that were know to have been exposed to infectious agents during research (including research in veterinary hospitals), production of biologicals, or testing of pharmaceuticals.
(6) Isolation Waste.	Biological waste and discarded materials contaminated with blood, excretion, exudates, or secretions from humans who are isolated to protect others from certain highly communicable disease, or isolated animals known to be infected with highly communicable diseases.
(7) Unused Sharps.	The following unused, discarded sharps: hypodermic needles, suture needles, syringes, and scalpel blades.

Note: The term "solid waste" includes solid, semi-solid, or liquid materials, but does not include domestic sewage materials identified in the requirements of the Environmental Protection Agency contained in 40 CFR 261.4.

2. *Exceptions*

(a) The following wastes are excepted from the requirements for regulated medical waste:

(i) Hazardous waste identified or listed under the regulations in 40 CFR part 261;

(ii) Household waste, as defined in 40 CFR 261.4(b)(1);

(iii) Ash from incineration of regulated medical waste once the incineration process has been completed;

(iv) Residues from treatment and destruction processes of regulated medical waste once the waste has been both treated and destroyed; or

(v) Human corpses, remains, and anatomical parts that are intended for interment or cremation.

(b) Samples of regulated medical waste transported off-site by EPA or State-designated enforcement personnel for enforcement purposes are excepted from the requirements of this subchapter during the enforcement proceeding.

(c) Until October 1, 1992, cultures of etiologic agents of 50 milliliters (1.666 fluid ounces) or less total quantity in one outside package are not subject to any requirements of this subchapter if the items as packaged do not contain any material otherwise subject to the requirements of parts 171 through 180 of this subchapter.

PART 174—CARRIAGE BY RAIL

191. The authority citation for part 174 continues to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1808; 49 CFR part 1.

§ 174.25 [Amended]

192. In § 174.25, the following changes are made:

a. In paragraph (a)(2), the table is amended by adding the entry "Division 6.1 PG III" immediately above the entry for "Class 7" in Column 1; adding "Placarded KEEP AWAY FROM FOOD" immediately above the entry "Placarded RADIOACTIVE" in Column 2; and adding "(None)" immediately above the entry "Radioactive material" in Column 3. For the entry "Class 9", in Column 2 "(None)" is revised to read "Placarded CLASS 9". In the last entry, in Column 1, the wording "a residue of a combustible liquid" is revised to read "a residue of a combustible liquid, a residue of a Division 6.1 PG III material, or a residue of a Class 9 material"; and in Column 3, "(None." is revised to read "(None).".

b. In paragraph (b)(1)(i), the wording "or § 172.102 (when authorized)" is removed.

c. In paragraph (c), "Naptha" is revised to read "Naphtha".

§ 174.67 [Amended]

193. In § 174.67, in paragraph (a)(3), the word "high" is added immediately after "(3.9 inches)" and after "(2 inches)".

194. In § 174.81, the Segregation Table in paragraph (d) and paragraph (e)(5) are revised to read as follows:

§ 174.81 Segregation of hazardous materials.

* * * * *

(d) * * *

SEGREGATION TABLE FOR HAZARDOUS MATERIALS

Class or Division	Notes	1.1, 1.2	1.3	1.4	1.5	1.6	2.1	2.2	2.3 gas Zone A	2.3 gas other than Zone A	3	4.1	4.2	4.3	5.1	5.2	6.1 liquids PG I Zone A	7	8 liquids only

* * * * *

(e) * * *

(5) The note "A" in the second column of the Table means that, notwithstanding the requirements of the letter "X", ammonium nitrate fertilizer may be loaded or stored with Division 1.1 (Class A explosive) materials.

* * * * *

§ 174.81 [Amended]

195. In addition, in § 174.81, the following changes are made:

a. In paragraph (b), the reference "§ 171.12" is revised to read "§ 176.83(b)".

b. In paragraph (e)(3), the wording "unless separated by a distance of 1.2 m (4 feet) in all directions, or separated" is revised to read "unless separated by a distance of 1.2 m (4 feet) in all directions and packages maintained, such as on pallets, at a minimum height of 10 cm off the floor of the transport vehicle, or separated".

c. In paragraph (h), in the first sentence, the wording "were of the lower division." is revised to read "were of the lower numerical division (i.e., Division 1.1 being lower than Division 1.2).".

§ 174.82 [Amended]

196. In § 174.82, in paragraph (a), "Class 6" is revised to read "Division 6.1".

§ 174.83 [Amended]

197. In § 174.83, in paragraph (b)(2), "PG I," immediately following "Division 2.3 (" is removed.

§ 174.84 [Amended]

198. In § 174.84, "PG I," immediately following "Division 2.3 (" is removed.

§ 174.200 [Amended]

199. In § 174.200, in paragraph (c)(4), "(129°F)" is revised to read "(129°F)".

PART 175—CARRIAGE BY AIRCRAFT

200. The authority citation for part 175 continues to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1807, 1808; 49 CFR part 1.

§ 175.10 [Amended]

201. In § 175.10, the following changes are made:

a. In paragraph (a)(4)(ii), "47 ml" is revised to read "470 ml".

b. In paragraphs (a)(2) and (a)(15), the wording "Director, Office of Hazardous Materials Transportation" is removed and replaced with "Associate Administrator for Hazardous Materials Safety".

§ 175.320 [Amended]

202. In § 175.320, in paragraph (b)(9), "(49 feet)" is revised to read "(50 feet)".

§ 175.701 [Amended]

203. In § 175.701, in paragraph (c) introductory text, the wording "Director, OHMT" is removed and replaced with "Associate Administrator for Hazardous Materials Safety" each place it appears.

PART 176—CARRIAGE BY VESSEL

204. The authority citation for part 176 continues to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1805, 1808; 49 CFR 1.53, app. A to part 1.

§ 176.5 [Amended]

205. In § 176.5, in paragraph (a), the wording "paragraphs (b) and (e) of this section" is revised to read "paragraph (b) of this section".

§ 176.11 [Amended]

206. In § 176.11, in paragraph (a), in the first sentence, the reference "§ 171.12(b)" is removed and replaced with "§ 171.12", and the second sentence is revised to read "The requirements of §§ 176.83, 176.84, and 176.112 through 176.174 are not applicable to shipments of Class 1 (explosive) materials made in accordance with the IMDG Code."

§ 176.30 [Amended]

207. In § 176.30, in paragraph (a)(5)(i), "§ 172.101 of this subchapter; or" is revised to read "the § 172.101 Table; or".

VOL 56 ISS 245 DE 20 1991 UMI

§ 176.69 [Amended]

208. In § 176.69, in paragraph (a), the wording "Class 9 (miscellaneous hazardous materials) materials)" is revised to read "Class 9 (miscellaneous hazardous) materials)".

§ 176.74 [Amended]

209. In § 176.74, in paragraph (c), the wording "(miscellaneous hazardous materials) materials" is revised to read "(miscellaneous hazardous) materials".

§ 176.76 [Amended]

210. In § 176.76, in paragraph (a)(2), the second sentence is amended by revising "Restraint" to read "restraint" and by adding the word "Vertical" at the beginning of the sentence.

§ 176.83 [Amended]

211. In § 176.83, the following changes are made:

a. In paragraphs (a)(7) (i) and (ii), "all" is revised to read "All" both places it appears.

b. In paragraph (f), in Table 176.83(f), under the heading "Open versus open, On deck" the third entry "One container spaces" is revised to read "One container space".

c. In paragraph (g)(2), "for trailerships" is revised to read "For trailerships".

d. In paragraph (g), in Table 176.83(g), under the heading "Closed versus open, Under deck", the fourth entry "At least 6 meters" is revised to read "At least 6 meters or one bulkhead" and, under the heading "Open versus open, On deck", the third entry "At least 6 meters or one bulkhead" is revised to read "At least 6 meters".

212. In § 176.84, the section heading is revised; and in paragraph (b), in the table, provision "115" is revised to read as follows:

§ 176.84 Other requirements for stowage and segregation for cargo vessels and passenger vessels.

* * * * *

(b) *Table of provisions:*

Code	Provisions
*	* * * * *
115	If packaged in glass or earthenware inner packagings in wooden or fiberboard outer packagings, the maximum quantity on any vessel is 500 kg (equivalent to 450 liters).
*	* * * * *

§ 176.84 [Amended]

213. In addition, in § 176.84, the following changes are made:

a. In paragraph (c)(2), in the Table, in Note 20E, the reference "§ 172.84(c)(5)" is revised to read "§ 176.84(c)(3)".

b. In paragraph (c)(3)(ii)(A), the wording "steel portable magazines or steel portable magazines" is revised to read "steel portable magazines or steel freight containers".

§ 176.99 [Amended]

214. In § 176.99, the wording "(Class A explosive)" is revised to read "(Class A and B explosives)".

§ 176.132 [Amended]

215. In § 176.132, in paragraph (a)(2), the word "battening" is revised to read "Battening".

§ 176.136 [Amended]

216. In § 176.136, in paragraph (c), in the first sentence, "UN" is added immediately before each number, beginning with "0015".

§ 176.146 [Amended]

217. In § 176.146, in paragraphs (d)(1) and (d)(2), the word "an" is revised to read "An" both places it appears.

§ 176.156 [Amended]

218. In § 176.156, in paragraph (d), the reference "§172.602" is revised to read "§ 172.602".

§ 176.170 [Amended]

219. In § 176.170, the following changes are made:

a. In paragraph (a), the wording "regarded a magazine" is revised to read "regarded as a magazine".

b. In paragraph (c), the wording ", and a non-metallic lining." is added before the period at the end of the sentence.

c. In paragraph (e), a comma is added after the wording "On vessels".

§ 176.205 [Amended]

220. In § 176.205, in paragraph (b)(7), the third sentence is revised to read "It must consist of two layers of corrosion-resistant metal wire of 20 x 20 mesh or finer, spaced not less than 1 cm (0.4 inch) or more than 4 cm (1.6 inches) apart."

§ 176.305 [Amended]

221. In § 176.305, in paragraph (d)(2), the third sentence is revised to read "It must consist of two layers of corrosion-resistant metal wire of 20 x 20 mesh or finer, spaced not less than 1 cm (0.4 inch) or more than 4 cm (1.6 inches) apart."

§ 176.315 [Amended]

222. In § 176.315, in paragraph (a), the wording "79,800 liters (21,081 U.S. gallons)" is revised to read "79,500 liters (21,000 U.S. gallons)".

§ 176.410 [Amended]

223. In § 176.410, in paragraph (b), the wording "(miscellaneous hazardous materials)" is removed.

224. In § 176.415, paragraphs (c)(1), (c)(2), and (c)(5) are revised to read as follows:

§ 176.415 Permit requirements for Division 1.5 (blasting agents), ammonium nitrates, and certain ammonium nitrate fertilizers.

* * * * *

(c) * * *

(1) If the material is ammonium nitrate fertilizer, Division 5.1 (oxidizer), UN2070; or Explosives, blasting, type E, Division 1.5 (blasting agents) compatibility group D, UN0332 in combustible packaging or in a rigid packaging with combustible inside packaging, it must be loaded or unloaded at a facility remote from populous areas or high value or high hazard industrial facilities so that in the event of fire or explosion loss of lives and property may be minimized;

(2) If the material is an ammonium nitrate fertilizer, Division 5.1 (oxidizer), UN2070, containing more than 60 percent ammonium nitrate; or ammonium nitrate fertilizer, Division 5.1 (oxidizer), UN2070 in rigid packagings with combustible inside packagings, it must be loaded or unloaded at a facility removed from congested areas or high value or high hazard industrial facilities;

* * * * *

(5) If the material is ammonium nitrate fertilizer, Division 5.1 (oxidizer), UN2070; an ammonium nitrate fertilizer, Division 5.1 (oxidizer) containing more than 60 percent ammonium nitrate; or a Division 1.5 (blasting agents) compatibility group D material in non-rigid combustible packaging and loaded in freight containers or transport vehicles, it may be loaded or unloaded at a non-isolated facility provided that facility is approved by the COTP.

§ 176.415 [Amended]

225. In addition, in § 176.415, the following changes are made:

a. In paragraphs (a)(1), (b)(1) and (b)(5), the word "container" is revised to read "packaging".

b. In paragraph (a)(2), the wording "(miscellaneous hazardous materials) material" is removed.

c. In paragraph (b)(6), the wording "(miscellaneous hazardous materials)" is removed.

d. In paragraph (c)(3), at the end of the sentence, the word "and" is removed; and in paragraph (c)(4), at the end of the last sentence, the period is removed and replaced with "; and".

§ 176.704 [Amended]

226. In § 176.704, in paragraph (f), the wording "Office of Hazardous Materials Transportation (OHMT)" is removed and replaced with "Associate Administrator for Hazardous Materials Safety".

227. In § 176.905, paragraph (k) is revised to read as follows:

§ 176.905 Motor vehicles or mechanical equipment powered by internal combustion engines.

* * * * *

(k) When motor vehicles with fuel in their tanks are stowed in a closed freight container, their battery cables must be disconnected and secured away from the battery terminals and the following warning must be affixed to the access doors: "WARNING—MAY CONTAIN EXPLOSIVE MIXTURES WITH AIR—KEEP IGNITION SOURCES AWAY WHEN OPENING." The warning must be on a contrasting background and must be readily legible from a distance of 8 meters (26 feet).

PART 177—CARRIAGE BY PUBLIC HIGHWAY

228. The authority citation for part 177 continues to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1805, 49 CFR part 1.

§ 177.825 [Amended]

229. In § 177.825, in paragraph (f) introductory text, the wording "Director, Office of Hazardous Materials Transportation" is removed and replaced with "Associate Administrator for Hazardous Materials Safety".

§ 177.844 [Amended]

230. In § 177.844, in the section heading, the section number "§ 117.844" is revised to read "§ 177.844".

231. In § 177.848, the Segregation Table in paragraph (d) and paragraph (e)(5) are revised to read as follows:

§ 177.848 Segregation of hazardous materials.

* * * * *

(d) * * *

SEGREGATION TABLE FOR HAZARDOUS MATERIALS

Class or division	Notes	1.1 1.2	1.3	1.4	1.5	1.6	2.1	2.2	2.3 gas zone A	2.3 gas other than zone A	3	4.1	4.2	4.3	5.1	5.2	6.1 liquids PG I zone A	7	8 liquids only

Poisonous gas other than Zone A. 2.3		X	X	O	X		O				O	O	O	O	O	O			O
Flammable liquids 3		X	X	O	X				X	O					O		X		
Flammable solids 4.1		X			X				X	O							X		O
Spontaneously combustible materials. 4.2		X	X	O	X				X	O							X		X
Dangerous when wet materials. 4.3		X	X		X				X	O							X		O
Oxidizers 5.1	A	X	X		X				X	O							X		O
Organic peroxides 5.2		X	X		X				X	O							X		O
Poisonous liquids PG I Zone A. 6.1		X	X	O	X		O				X	X	X	X	X	X			X
Radioactive materials. 7		X			X		O												
Corrosive liquids 8		X	X	O	X		O		X	O		O	X	O	O	O	X		

* * * * *

(e) * * *

(5) The note "A" in the second column of the Table means that, notwithstanding the requirements of the letter "X", ammonium nitrate fertilizer may be loaded or stored with Division 1.1 (Class A explosive) materials.

* * * * *

§ 177.848 [Amended]

232. In addition, in § 177.848, the following changes are made:

a. In paragraph (b), the reference "§ 171.12" is revised to read "§ 176.83(b)".

b. In paragraph (e)(3), the wording "unless separated by a distance of 1.2 m (4 feet) in all directions, or separated" is revised to read "unless separated by a distance of 1.2 m (4 feet) in all directions and packages maintained, such as on pallets, at a minimum height of 10 cm off the floor of the transport vehicle, or separated".

c. In paragraph (h), in the first sentence, the wording "were of the lower division." is revised to read "were of the lower numerical division (i.e., Division 1.1 being lower than Division 1.2).".

§ 177.870 [Amended]

233. In § 177.870, in paragraph (e), "(99.2 pounds)" is revised to read "(99 pounds)".

VOL 56 ISS 245 DEC 20 1991 UMI

§§ 177.821, 177.825, 177.826, 177.838 [Amended]

234. In addition to the amendments set forth above, part 177 is amended by removing the phrase "Director, OHMT" and, inserting in its place, the phrase "Associate Administrator for Hazardous Materials Safety" each place it appears in the following sections:

(a) Section 177.821(f)
(b) Section 177.825(b)(1)(iii)(A)
(c) Section 177.825(b)(1)(iii)(B)
(d) Section 177.826(a)
(e) Section 177.838(g)

PART 178—SPECIFICATIONS FOR PACKAGINGS

235. The authority citation for part 178 continues to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1805, 1806, 1808; 49 CFR part 1, unless otherwise noted.

236. In § 178.2, the section heading, paragraph (b), and the introductory text of paragraph (c) are revised to read as follows:

§ 178.2 Applicability and responsibility.

* * * * *

(b) *Specification markings.* When this part requires that a packaging be marked with a DOT specification or UN standard marking, marking of the packaging with the appropriate DOT or UN markings is the certification that—

(1) Except as otherwise provided in this section, all requirements of the DOT specification or UN standard, including performance tests, are met; and

(2) All functions performed by, or on behalf of, the person whose name or symbol appears as part of the marking conform to requirements specified in this part.

(c) *Notification.* Except as specifically provided in §§ 178.337–18 and 178.345–10 of this part, the manufacturer or other person certifying compliance with the requirements of this part, and each subsequent distributor of that packaging shall—

* * * * *

§ 178.2 [Amended]

237. In addition, in § 178.2, in paragraph (c)(1)(ii), the wording "any closures needed" is revised to read "any closures, including gaskets, needed".

238. In § 178.3, a new paragraph (c) is added to read as follows:

§ 178.3 Marking of packagings.

* * * * *

(c) Where a packaging conforms to more than one UN standard or DOT specification, the packaging may bear more than one marking, provided the packaging meets all the requirements of each standard or specification. Where more than one marking appears on a packaging, each marking must appear in its entirety.

§ 178.33a [Amended]

239. In § 178.33a, in the section heading, "Specification 2O" is revised to read "Specification 2Q".

Subpart B [Amended]

240. Subpart B of part 178 is amended by redesignating § 178.34–4 as § 178.360–4 and transferring it to subpart K.

§ 178.45–17 [Amended]

241. In § 178.45–17, in paragraph (e), the wording "Office of Hazardous Materials Transportation" is removed and replaced with "Associate Administrator for Hazardous Materials Safety".

§ 178.65–14 [Amended]

242. In § 178.65–14, in paragraph (d), the wording "Office of Hazardous Materials Transportation" is removed and replaced with "Associate Administrator for Hazardous Materials Safety".

§ 178.270–2 [Amended]

243. In § 178.270–2, in paragraph (b), the wording "and the IM tank table" is removed.

§ 178.270–5 [Amended]

244. In § 178.270–5, in paragraph (d), the wording "in the IM Tank Table," is revised to read "in this subchapter,".

245. In § 178.503, paragraph (a)(9) is removed; paragraph (a)(10) is redesignated as (a)(9); paragraph (a) introductory text and paragraph (a)(7) are revised; and a new paragraph (a)(10) is added to read as follows:

§ 178.503 Marking of packagings.

(a) The manufacturer shall mark every packaging that is required to conform to a UN standard of this subpart in a durable and clearly visible manner. Every reusable packaging liable to undergo a reconditioning process which might obliterate the packaging marks must bear the marks specified in § 178.503 (a)(1) through (a)(6) and (a)(9) in a permanent form (e.g., embossed) able to withstand the reconditioning process. A marking may be applied in a single line or in multiple lines provided the correct sequence is respected. As illustrated by the examples in paragraph (d) of this section, slash marks should be used to present the following information in the sequence presented:

* * * * *

(7) The state authorizing allocation of the mark. The letters 'USA' indicate that the packaging is manufactured and marked in the United States in compliance with the provisions of this subchapter;

* * * * *

(10) Rated capacity of the packaging expressed in liters may be marked.

* * * * *

§ 178.503 [Amended]

246. In addition, in § 178.503, the following changes are made:

a. In paragraph (a)(1), the wording "for metal receptacles" is revised to read "for embossed metal receptacles".

b. In paragraph (a)(2), a new sentence is added after the first sentence to read "The letter "V" must follow the packaging identification code on packagings tested in accordance with § 178.601(g)(2); for example, "4GV".".

c. In paragraph (a)(5)(i), the word "off" is revised to read "down".

d. In paragraph (a)(8), the wording "with the UN standard" is revised to read "with subpart L and subpart M of this part".

e. In newly designated paragraph (a)(9), the wording "or reconditioning" is added immediately after "reuse" and before "as"; and a sentence is added at the end of the paragraph to read: "Where a drum is constructed with different head and body thicknesses, the different thicknesses may be marked (e.g., "1.2–1.0" for drums having different head and body thicknesses, and "0.8–1.0–1.2" for drums having different top head, body and bottom head thicknesses, respectively); and".

f. In paragraph (b), the word "only" is added immediately after "applied" and before "to the removable head".

§ 178.504 [Amended]

247. In § 178.504, the following changes are made:

a. In paragraph (b)(4), in the first sentence, the wording "must have at least either two" is revised to read "may have at least two".

b. In paragraph (b)(5), in the fourth sentence, the wording "Closure flanges must be mechanically seamed" is revised to read "Closure flanges may be mechanically seamed".

§ 178.505 [Amended]

248. In § 178.505, the following changes are made:

a. In paragraph (b)(3), in the first sentence, the wording "must have at least either two" is revised to read "may have at least two".

b. In paragraph (b)(4), in the fourth sentence, the wording "Closure flanges must be welded in place" is revised to read "Closure flanges may be welded in place".

§ 178.506 [Amended]

249. In § 178.506, the following changes are made:

a. In paragraph (b)(3), in the first sentence, the wording "must have at least either two" is revised to read "may have at least two".

b. In paragraph (b)(4), in the fourth sentence, the wording "Closure flanges must be welded in place" is revised to read "Closure flanges may be welded in place".

§ 178.520 [Amended]

250. In § 178.520, in paragraph (b)(3), the wording "or metalized film or foil" is added before the period and immediately after "plastic material".

§ 178.521 [Amended]

251. In § 178.521, in paragraph (b)(2), in the third sentence, the word "also" is added immediately after "must" and before "be placed".

252. In § 178.601, paragraph (g)(2)(vii) is removed; paragraph (g)(2)(viii) is redesignated as (g)(2)(vii); paragraph (g)(3) is redesignated as (g)(7); newly designated paragraph (g)(2)(vii) is revised; and paragraphs (c)(4)(v) and (g)(3) through (g)(6) are added to read as follows:

§ 178.601 General requirements.

* * * * *

(c) * * *

(4) * * *

(v) Packagings which differ from the design type only in their lesser design height.

* * * * *

(g) * * *

(2) * * *

(vii) Packagings must be marked in accordance with § 178.503 of this part as having been tested to Packing Group I performance for combination packagings. The marked maximum gross mass may not exceed the sum of the mass of the outer packaging plus one half the mass of the filled inner packagings of the tested combination packaging. In addition, the marking required by § 178.503(a)(2) of this part must include the letter 'V'."

(3) *Variation 3.* Packagings other than combination packagings which are produced with reductions in external dimensions (i.e., length, width or diameter) of up to 25 percent of the dimensions of a tested packaging may be used without further testing provided an equivalent level of performance is maintained. The packagings must, in all other respects (including wall thicknesses), be identical to the tested design-type. The marked gross mass (when required) must be reduced in proportion to the reduction in volume.

(4) *Variation 4.* Variations are permitted in outer packagings of a tested design-type combination packaging, without further testing, provided an equivalent level of performance is maintained, as follows:

(i) Each external dimension (length, width and height) is less than or equal to the corresponding dimension of the tested design-type;

(ii) The structural design of the tested outer packaging (i.e. methods of construction, materials of construction, strength characteristics of materials of construction, method of closure and material thicknesses) is maintained;

(iii) The inner packagings are identical to the inner packagings used in the tested design type except that their size and mass may be less; and they are oriented within the outer packaging in the same manner as in the tested packaging;

(iv) The same type or design of absorbent materials, cushioning materials and any other components necessary to contain and protect inner packagings, as used in the tested design type, are maintained. The thickness of cushioning material between inner packagings and between inner packagings and the outside of the packaging may not be less than the thicknesses in the tested design type packaging; and

(v) Sufficient additional cushioning material is used to take up void spaces and to prevent significant movement of the inner packagings.

An outer packaging qualifying for use in transport in accordance with all of the above conditions may also be used without testing to transport inner packagings substituted for the originally tested inner packagings in accordance with the conditions set out in Variation 1 in paragraph (g)(1) of this section.

(5) *Variation 5.* Single packagings (i.e., non-bulk packagings other than combination packagings), that differ from a tested design type only to the extent that the closure device or gasketing differs from that used in the originally tested design type, may be used without further testing, provided an equivalent level of performance is maintained, subject to the following conditions (the qualifying tests):

(i) A packaging with the replacement closure devices or gasketing must successfully pass the drop test specified in § 178.602 in the orientation which most severely tests the integrity of the closure or gasket;

(ii) When intended to contain liquids, a packaging with the replacement closure devices or gasketing must successfully pass the leakproofness test specified in § 178.603, the hydrostatic pressure test specified in § 178.605, and the stacking test specified in § 178.606.

Replacement closures and gasketings qualified under the above test requirements are authorized without additional testing for packagings described in paragraph (g)(3) of this section. Replacement closures and gasketings qualified under the above test requirements also are authorized without additional testing for different tested design types packagings of the same type as the originally tested packaging, provided the original design type tests are more severe or comparable to tests which would otherwise be conducted on the packaging with the replacement closures or gasketings. (For example: The packaging used in the qualifying tests has a lesser packaging wall thickness than the packaging with replacement closure devices or gasketing; the gross mass of the packaging used in the qualifying drop test equals or exceeds the mass for which the packaging with replacement closure devices or gasketing was tested; the packaging used in the qualifying drop test was dropped from the same or greater height than the height from which the packaging with replacement closure devices or gasketing was dropped in design type tests; and the specific gravity of the substance used in the qualifying drop test was the same or greater than the specific gravity of the liquid used in the design type tests of the packaging with replacement closure devices or gasketing.)

(6) The provisions in Variations 1, 2, and 4 in paragraphs (g)(1), (2) and (4) of this section for combination packagings may be applied to packagings containing articles, where the provisions for inner packagings are applied analogously to the articles. In this case, inner packagings need not comply with § 173.27(c)(1) and (c)(2) of this subchapter.

* * * * *

§ 178.601 [Amended]

253. In addition, in § 178.601, the following changes are made:

a. In paragraph (c)(4)(iii), the word "or" is removed; and in paragraph (c)(4)(iv), the period at the end of the sentence is removed and replaced with "; or".

b. In paragraph (e), a new sentence is added after the first sentence to read "Changes in retest frequency are subject to the approval of the Associate Administrator for Hazardous Materials Safety.".

VOL 56 ISS 245 DEC 20 1991 UMI

c. In paragraph (g) introductory text, a second sentence is added at the end to read "For air transport, packagings must comply with § 173.27(c)(1) and (c)(2) of this subchapter.".

d. In paragraph (g)(2)(vi), the word "and" is added at the end of the paragraph.

e. In paragraph (h), the wording "or test intervals," is added immediately after "methods," and before "other than".

f. In paragraph (k) introductory text, the word "manufacturer" is removed and replaced with the wording "person who certifies the tested design type".

254. In § 178.602, paragraph (a) is revised to read as follows:

§ 178.602 Preparation of packagings and packages for testing.

(a) Except as otherwise provided in this subchapter, each packaging and package must be closed in preparation for testing and tests must be carried out in the same manner as if prepared for transportation, including inner packagings in the case of combination packagings.

* * * * *

§ 178.602 [Amended]

255. In § 178.602, the following changes are made:

a. In paragraph (b), the first sentence is revised to read "For the drop and stacking test, inner and single-unit receptacles must be filled to not less than 95 percent of maximum capacity (see § 171.8 of this subchapter) in the case of solids and not less than 98 percent of maximum capacity in the case of liquids.".

b. In paragraph (d)(1), the wording "; or" is removed at the end of the paragraph and replaced with a period; and a new sentence is added to read "Average values should fall within these limits. Short-term fluctuations and measurement limitations may cause individual measurements to vary by up to ± 5 percent relative humidity without significant impairment of test reproducibility;".

c. In paragraph (d)(2), the wording "; or" is removed at the end of the paragraph and replaced with a period; and a new sentence is added to read "Average values should fall within these limits. Short-term fluctuations and measurement limitations may cause individual measurements to vary by up to ± 5 percent relative humidity without significant impairment of test reproducibility; or".

d. In paragraph (e), in the first sentence, the wording "Except as otherwise provided," is added immediately before the wording "Each packaging", and the word "Each" is revised to read "each".

256. In § 178.603, a heading is added to paragraph (a); and paragraphs (a) introductory text and (f)(6) are revised to read as follows:

§ 178.603 Drop test.

(a) *General.* The drop test must be conducted for the qualification of all packaging design types and performed periodically as specified in § 178.601(e). The number of drops required and the packages' orientations are as follows:

* * * * *

(f) * * *

(6) No rupture is permitted in packagings for materials in Class 1 which would permit spillage of loose explosive substances or articles from the outer packaging.

§ 178.603 [Amended]

257. In § 178.603, the following changes are made:

a. In paragraph (b), a sentence is added at the end of the paragraph to read "Exceptions for the number of steel and aluminum packaging samples used for conducting the drop test are subject to the approval of the Associate Administrator for Hazardous Materials Safety.".

b. In paragraph (c), in the first sentence, "−180° C (0° F)" is revised to read "−18° C (0° F)" and a sentence is added at the end of the paragraph to read "Test samples prepared in this way are not required to be conditioned in accordance with § 178.602(d).".

c. In paragraphs (e)(1)(iii) and (e)(2)(i)(C), "0.8 m (3 feet)" is revised to read "0.8 m (2.6 feet)".

d. In paragraph (e)(2)(ii)(B), "1.0 m (3 feet)" is revised to read "1.0 m (3.3 feet)".

§ 178.604 [Amended]

258. In § 178.604, the following changes are made:

a. In paragraph (b)(2), a sentence is added at the end of the paragraph to read "Exceptions for the number of samples used in conducting the leakproofness test are subject to the approval of the Associate Administrator for Hazardous Materials Safety.".

b. In paragraph (c)(1), a sentence is added at the end of the paragraph to read "Removable heads need not be installed during production testing.".

c. In paragraph (d), in the last sentence, the wording ", or if approved by the Associate Administrator for Hazardous Materials Safety" is removed.

259. In § 178.605, in paragraph (a), the paragraph heading and the first sentence are revised to read as follows:

§ 178.605 Hydrostatic pressure test.

(a) *General.* The hydrostatic pressure test must be conducted for the qualification of all metal, plastic, and composite packaging design types intended to contain liquids and be performed periodically as specified in § 178.601(e). * * *

* * * * *

§ 178.605 [Amended]

260. In addition, in § 178.605, in paragraph (b), a sentence is added at the end of the paragraph to read "Exceptions for the number of aluminum and steel sample packagings used in conducting the hydrostatic pressure test are subject to the approval of the Associate Administrator of Hazardous Materials Safety.".

§ 178.606 [Amended]

261. In § 178.606, the following changes are made:

a. In paragraph (a), "packages" is revised to read "packaging design types".

b. In paragraph (b), two sentences are added at the end of the paragraph to read "Exceptions for the number of aluminum and steel sample packagings used in conducting the stacking test are subject to the approval of the Associate Administrator of Hazardous Materials Safety. Notwithstanding the provisions of § 178.602(a) of this subpart, combination packagings may be subjected to the stacking test without their inner packagings, except where this would invalidate the results of the test."

c. In paragraph (c)(2)(ii), in the second sentence, the word "drum" is revised to read "packaging", and the first line of the formula is revised to read as follows:

"Liquids: $A=(n-1)\ [w+\ (s \times v \times 8.3 \times .98)]\ \times 1.5$; Solids: $A=(n-1)\ [w+\ (s \times v \times 8.3 \times .95)]\ \times 1.5$".

d. In paragraph (d), in the third sentence, the wording "strength or cause instability in stacks of packages." is revised to read "strength, cause instability in stacks of packages, or cause damage to inner packagings likely to reduce safety in transportation.".

§ 178.608 [Amended]

262. In § 178.608, the following changes are made:

a. In paragraph (b)(2), the wording "or rotary" is added immediately after "vertical" and before "double-amplitude".

b. In paragraph (c), a sentence is added at the end of the paragraph to read "No test sample should show any deterioration which could adversely affect transportation safety or any distortion liable to reduce packaging strength."

263. In addition to the amendments set forth above, Part 178 is amended by removing the phrase "Director, OHMT" and, inserting in its place, the phrase "Associate Administrator for Hazardous Materials Safety" in the following sections:

(a) Section 178.33–9(a)(2)
(b) Section 178.33a–9(a)(2)
(c) Section 178.36–3
(d) Section 178.36–20(a)(3)
(e) Section 178.37–3
(f) Section 178.37–20(a)(3)
(g) Section 178.38–3
(h) Section 178.38–20(a)(2)
(i) Section 178.39–3
(j) Section 178.39–19(a)(2)
(k) Section 178.42–3
(l) Section 178.42–14(a)(2)
(m) Section 178.44–3
(n) Section 178.44–23(a)(2)
(o) Section 178.45–3
(p) Section 178.46–3
(q) Section 178.46–15(a)(2)
(r) Section 178.47–3
(s) Section 178.47–21(a)(2)
(t) Section 178.50–3
(u) Section 178.50–19(a)(2)
(v) Section 178.51–3
(w) Section 178.51–19(a)(2)
(x) Section 178.53–3
(y) Section 178.53–18(a)(2)
(z) Section 178.55–3
(aa) Section 178.55–20(a)(2)
(bb) Section 178.56–3
(cc) Section 178.56–19(a)(2)
(dd) Section 178.57–3
(ee) Section 178.57–20(a)(3)
(ff) Section 178.58–3
(gg) Section 178.58–21(a)(2)
(hh) Section 178.59–3(a)
(ii) Section 178.59–18(a)(2)
(jj) Section 178.60–3(a)
(kk) Section 178.60–22(a)(2)
(ll) Section 178.61–3
(mm) Section 178.61–20(a)(2)
(nn) Section 178.65–3(a)
(oo) Section 178.65–3(b)
(pp) Section 178.65–3(c)
(qq) Section 178.68–3
(rr) Section 178.68–19(a)(2)
(ss) Section 178.270–2(c)
(tt) Section 178.352–6(a)(3)
(uu) Section 178.358–5(b)(5)
(vv) Section 178.362–6(b)

264. In appendix B to part 178, the following changes are made:

a. In the introductory text, the wording "for other than the original design qualification tests" is removed.

b. In paragraph (1), in the second sentence, "0 kPa" is revised to read "5 kPa", "100 kPa" is revised to read "95 kPa", and the word "drum" is revised to read "packaging".

c. In paragraph (1), in the fourth sentence, the wording ", but not less than 30 seconds" is removed.

d. In paragraph (1), in the last sentence, the wording "from the packaging during 30 seconds of testing" is removed.

e. In paragraph (2), the last sentence is revised to read, "A packaging passes the pressure differential test if there is no change in measured internal pressure.".

f. A new paragraph (4) is added to read as follows:

Appendix B to Part 178—Alternative Leakproofness Test Methods

* * * * *

(4) *Solution over partial seams test.* For drums, the following test may be used: The packaging must be restrained while an internal air pressure of 48 kPa (7.0 psig) is applied; the method of restraint may not affect the results of the test. The packaging must be coated with a soap solution over the entire side seam and a distance of not less than eight inches on each side of the side seam along the chime seam(s). The test must be conducted for a period of time sufficient to pressurize the interior of the packaging to the specified air pressure and to determine if there is leakage of air from the packaging. A packaging passes the test if there is no leakage of air from the packaging. Chime cuts must be made on the initial drum at the beginning of each production run and on the initial drum after any adjustment to the chime seamer. Chime cuts must be maintained on file in date order for not less than six months and be made available to a representative of the Department of Transportation on request.

PART 179—SPECIFICATIONS FOR TANK CARS

265. The authority citation for part 179 continues to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1805, 1806, 1808; 49 CFR part 1, unless otherwise noted.

§ 179.101–1 [Amended]

266. In § 179.101–1, in the table in paragraph (a), the following changes are made:

a. In the "Insulation" requirement entry for 112A200W, 112A340W, 112A400W, 112A500W, 114A340W, and 114A400W, the wording "[4.13] Optional" is revised to read "[4] optional".

b. In Footnote 4, the wording "tank manway nozzle" is revised to read "tank, manway nozzle".

§ 179.105–7 [Amended]

267. In § 179.105–7, in the paragraph (c) introductory text, the following changes are made:

a. The wording "a tank car tank" is revised to read "an insulated tank car tank".

b. The wording "Division 2.3 (poisonous gas) material" is revised to read "material poisonous by inhalation (see § 171.8 of this subchapter)".

c. The reference "A8.01" is revised to read "A8.00".

PART 180—CONTINUING QUALIFICATION AND MAINTENANCE OF PACKAGINGS

268. The authority citation for part 180 continues to read as follows:

Authority: 49 App. U.S.C. 1803; 49 CFR Part 1.

§ 180.409 [Amended]

269. In § 180.409, in paragraph (b)(2), the wording "Director, Office of Hazardous Materials Transportation" is removed and replaced with "Associate Administrator for Hazardous Materials Safety".

§ 180.415 [Amended]

270. In § 180.415, in the last sentence in paragraph (b), the wording "10–85" is revised to read "10–95" and the year "1985" is revised to read "1995".

Issued in Washington, DC on November 19, 1991, under authority delegated in 49 CFR part 1.

Travis P. Dungan,

Administrator, Research and Special Programs Administration.

DEPARTMENT OF EDUCATION

34 CFR Part 325

RIN 1820-AA90

State Systems for Transition Services for Youth with Disabilities

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary establishes regulations for a new program authority enacted in the Education of the Handicapped Act Amendments of 1990. The regulations would enable the Secretary to make one-time, 5-year grants, on a competitive basis, to State vocational rehabilitation agencies and State educational agencies that submit joint applications to develop, implement, and improve transition services for youth with disabilities from age 14 through the age they exit school. The regulations make provisions for a State educational agency, whose vocational rehabilitation agency does not choose to participate, to jointly apply with one other State agency that provides transition services; describe how grant funds must be used; describe which applications will be given preference; and provide selection criteria for making grant awards.

EFFECTIVE DATE: These regulations take effect either 45 days after publications in the **Federal Register** or later if the Congress takes certain adjournments. If you want to know the effective date of the regulations call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: William Halloran, Secondary and Transition Branch, Office of Special Education Programs, Department of Education, 400 Maryland Avenue, SW, Switzer Building, room 4625, Washington, DC 20202-2734. Telephone: (202) 732-1112 or V/TDD (202) 732-1100.

SUPPLEMENTARY INFORMATION: These regulations implement the new program authority in section 626(e) of part C of the Individuals with Disabilities Education Act (IDEA), as amended by Public Law 101-476, and provide selection criteria for making grant awards. Grants under these regulations will bring together resources from a variety of sources including local education agencies, postsecondary training programs, State agencies, the private sector, rehabilitation agencies, local and State employment agencies, local Private Industry Councils, and families of students with disabilities and their advocates. In keeping with AMERICA 2000, the President's strategy to meet the National Education Goals, these resources will be used to provide transition services that will prepare students for responsible citizenship, further learning, and productive employment in our modern economy. Except for the selection criteria, the proposed regulations primarily set forth the statutory requirements for this program.

The statute requires States that receive grants to:

- Increase the availability, access, and quality of transition assistance through the development and improvement of policies, procedures, systems, and other mechanisms for youth with disabilities and their families as those youth prepare for and enter adult life.
- Improve the ability of professionals, parents, and advocates to work with those youth in ways that promote the understanding of and the capability to successfully make the transition from 'student' to 'adult'.
- Improve working relationships among education personnel, both within LEAs and in postsecondary training programs, relevant State agencies, the private sector (especially employers), rehabilitation personnel, local and State employment agencies, local Private Industry Councils (PICS) authorized by the Job Training Partnership Act (JTPA), and families of students with disabilities and their advocates to identify and achieve consensus on the general nature and specific application of transition services to meet the needs of youth with disabilities.
- Create an incentive for accessing and using the expertise and resources of programs, projects, and activities related to transition funded through this section and with other sources.

Section 602(a)(19) of IDEA defines "transition services" as a coordinated set of activities for a student, designed within an outcome-oriented process that promotes movement from school to post-school activities, including postsecondary education, vocational training, integrated employment (including supported employment), continuing and adult education, adult services, independent living, or community participation. The coordinated set of activities must be based upon the individual student's needs, taking into account the student's preferences and interests, and must include instruction, community experiences, the development of employment and other post-school adult living objectives, and, if appropriate, acquisition of daily living skills and functional vocational evaluation.

These regulations constitute a step in implementing the AMERICA 2000 strategy for achieving the National Education Goals agreed to by the President and the Governors.

One aspect of the President's strategy is to foster better and more accountable schools. Under these regulations, the Secretary will seek to identify innovative approaches that will improve today's schools by enhancing services to assist youth with disabilities to successfully achieve transition services.

Analysis of Comments and Changes

On June 11, 1991, at 56 FR 26856, the Secretary published in the **Federal Register**, a Notice of Proposed Rulemaking for the State Systems for Transition Services for Youth with Disabilities. Twelve respondents commented on the proposed regulations.

Comment: Three commenters stated that the selected criterion under quality of key personnel addressing the recruitment of underrepresented populations should become a discrete subsection containing two criteria: (a) Recruitment of underrepresented populations as staff in proposed projects; and (b) recruitment of underrepresented populations to be served by the proposed projects. Another commenter stated that the selection criteria should be revised to include points for existing staff assigned to the project who are members of underrepresented populations.

Discussion: The Secretary agrees that the needs of underrepresented populations should apply to both the staffing of the project and youth with disabilities to be served through project activities. However, those factors are already well covered by the selection criteria. The quality of key personnel criterion includes a component for recruitment of underrepresented populations. In addition, the extent of need and expected impact selection criterion requires the applicant to describe how the State will address the needs of youth with disabilities from minority backgrounds. The recruitment and employment of project personnel would include existing staff who are recruited to serve as project personnel.

Change: None.

Comment: Four commenters indicated that the State educational agency should be designated as the lead agency, both fiscally and programmatically, in all joint applications submitted for the purpose of emphasizing that funds be used to help States implement the new transition requirement in part B. Another commenter indicated that a clearer statement is necessary to stress that the State educational agency must always be a party to the joint application.

Discussion: The statute provides for submission of a joint application and does not provide for designation of a lead agency. In addition, the Secretary wants to provide flexibility to States in administering the grant. However, language has been added to the regulations to clarify that the State educational agency must always be a party to the joint application. Language also has been added to require that States use funds to assist the State educational agency in implementing the new transition requirement under part B of the IDEA.

Change: The changes have been made in § 325.2 and § 325.3 of the regulations.

Comment: Three commenters indicated that the one-time five year grants to assist States to implement and improve transition services for youth with disabilities should not be limited to a single competition.

Discussion: The authorizing legislation stipulates that the Secretary shall make one-time, five year grants on a competitive basis to States. The one-time limitation applies to States receiving grants rather than a single competition.

Change: None.

Comment: One commenter suggested that the regulations require a recipient State to disseminate to educators, rehabilitation professionals, youth and their families information on the benefits and incentives for employment contained in the Social Security Disability Program.

Discussion: The Secretary agrees with the commenter and has expanded the plan of operation selection criterion to require the applicant to develop procedures to ensure that youth who are potentially eligible for the entitlement programs of the Social Security Administration, will be provided information and referral services.

Change: The change has been incorporated into the selection criteria in § 325.21(c): Plan of Operation.

Comment: One commenter recommended adding a parenthesis to the definition of "youth with disabilities" to read "Youth with disabilities means individuals with disabilities from age 14 (or younger, where appropriate) through the age they exit school."

Discussion: The definition of "youth with disabilities" contained in the regulations is from the authorizing legislation.

Change: None.

Comment: One commenter indicated that evaluation should not be delayed to the fifth year of the grant, but should be an on-going process. The commenter indicated that the fifth year of the grant should not be devoted exclusively to evaluation.

Discussion: The Secretary agrees with the commenter that evaluation should be an on-going process throughout the five years of the grant and that the fifth year should not be devoted exclusively to evaluation. Evaluation is a required activity in the fifth year, but project activities are not limited to evaluation in that year. Likewise, evaluation activities may be conducted in the first through the fourth years even though they are not specifically mentioned.

Change: Change made to determine the quality of the plan for evaluating the project throughout the entire grant, leading to the required fifth year evaluation.

Comment: One commenter suggested that States be allowed to select some but not all of the criteria to be used to evaluate their applications.

Discussion: Applicants may choose to emphasize different criteria in their applications, however the Secretary must evaluate the quality of applications based on all the selection criteria in the regulation.

Change: None.

Comment: One commenter stated that if indirect cost rates are to be compared as part of the grant application review process, it should be stated in the criteria.

Discussion: The Secretary does not compare indirect cost rates in the application review process.

Change: None.

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Regulatory Flexibility Act Certification

The Secretary certifies that these regulations would not have a significant economic impact on a substantial number of small entities. Because these regulations would affect only States and State agencies, the regulations would not have an impact on small entities. States and State agencies are not defined as "small entities" in the Regulatory Flexibility Act.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR part 79. The objective of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Assessment of Educational Impact

In the notice of proposed rulemaking, the Secretary requested comments on whether the proposed regulations would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

Based on the response to the proposed rules and on its own review, the Department has determined that the regulations in this document do not require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 325

Grants program, State, State education agencies, Transition services, Vocational rehabilitation, Youth with disabilities.

(Catalog of Federal Domestic Assistance Number 84.158, Secondary Education and Transition Services for Youth with Disabilities.)

Dated: November 1, 1991.

Lamar Alexander,

Secretary of Education.

The Secretary amends title 34 of the Code of Federal Regulations by adding a new part 325 to read as follows:

PART 325—STATE SYSTEMS FOR TRANSITION SERVICES FOR YOUTH WITH DISABILITIES PROGRAM

Subpart A—General

Sec.

325.1 What is the State Systems for Transition Services for Youth with Disabilities Program?
325.2 Who is eligible for a grant?
325.3 How must States use funds under this program?
325.4 What regulations apply?
325.5 What definitions apply?

Subpart B—How Does a State Apply for a Grant?

325.10 What must an application include?

Subpart C—How Does the Secretary Make a Grant?

325.20 How does the Secretary evaluate an application?
325.21 What selection criteria does the Secretary use?

VOL 56 ISS 245 DEC 20 1991 UMI

Subpart D—What Conditions Must Be Met After a Grant?

325.30 What other conditions must be met by a grantee under this program?

Authority: 20 U.S.C. 1425(e), unless otherwise noted.

Subpart A—General

§ 325.1 What is the State systems for transition services for youth with disabilities program?

This program provides assistance to States to develop, implement, and improve systems to provide transition services for youth with disabilities from age 14 through the age they exit school.

(Authority: 20 U.S.C. 1425(e)(1))

§ 325.2 Who is eligible for a grant?

Under this program the Secretary may make a one-time, five-year grant—

(a) To a State educational agency and a State vocational rehabilitation agency that submit a joint application; or

(b) If a vocational rehabilitation agency does not choose to participate, to a State educational agency and a State agency that provides transition services to individuals who are leaving programs under the Act, that submit a joint application.

(Authority: 20 U.S.C. 1425(e)(2))

§ 325.3 How must States use funds under this program?

Agencies that receive grants under this program shall use grant funds to—

(a) Increase the availability, access, and quality of transition assistance through the development and improvement of policies, procedures, systems, and other mechanisms for youth with disabilities and their families as those youth prepare for and enter adult life;

(b) Improve the ability of professionals, parents, and advocates to work with those youth in ways that promote the understanding of and the capability to successfully make the transition from student to adult;

(c) Improve working relationships among education personnel, both within LEAs and in postsecondary training programs, relevant State agencies, the private sector (especially employers), rehabilitation personnel, local and State employment agencies, local Private Industry Councils authorized by the Job Training Partnership Act, and families of students with disabilities and their advocates to identify and achieve consensus on the general nature and specific application of transition services to meet the needs of those youth;

(d) Create an incentive for accessing and using the expertise and resources of programs, projects, and activities related to transition funded under this program and with other sources;

(e) Create incentives for the implementation of lasting State-wide system changes in the transition of students with disabilities to postsecondary training, education, and employment; and

(f) Assist the State education agency in implementing the requirement in section 602(a)(20)(D) of the Act that the student's individualized education program include a statement of needed transition services for students, beginning no later than age 16 and annually thereafter (and, if determined appropriate for the individual, beginning at age 14), including, if appropriate, a statement of the interagency responsibilities or linkages, (or both) before the student leaves the school setting.

(Authority: 20 U.S.C. 1425(e)(3))

§ 325.4 What regulations apply?

The following regulations apply to this program:

(a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR—

(1) Part 75 (Direct Grant Programs);

(2) Part 77 (Definitions that Apply to Department Regulations);

(3) Part 79 (Intergovernmental Review of Department of Education Programs and Activities);

(4) Part 80 (Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments);

(5) Part 81 (General Education Provisions Act—Enforcement);

(6) Part 82 (New Restrictions on Lobbying);

(7) Part 85 (Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants)); and

(8) Part 86 (Drug-Free Schools and Campuses).

(b) The regulations in this Part 325.

(Authority: 20 U.S.C. 1425(e))

§ 325.5 What definitions apply?

(a) *Definition in the Act.* The following term used in this part is defined in section 602(a)(19) of the Individuals with Disabilities Education Act:

Transition services

(b) *Definitions in EDGAR.* The following terms used in this part are defined in 34 CFR 77.1:

Application
EDGAR
Grant
Local education agency (LEA)
Project
Secretary
State
State educational agency (SEA)

(c) *Other Definitions.* The following definitions also apply to this Part:

"Act" means the Individuals with Disabilities Education Act.

"Youth with disabilities" means individuals with disabilities from age 14 through the age they exit school.

(Authority: 20 U.S.C. 1425(e))

Subpart B—How Does a State Apply for a Grant?

§ 325.10 What must an application include?

An application under this program must include the following:

(a) A description of how the State educational agency and State vocational rehabilitation agency or other State agency will use—

(1) The first year, if necessary, to plan how to implement transition services;

(2) The second through fourth years to develop and implement transition services; and

(3) The fifth year to evaluate transition services.

(b) A description of how the grant funds will be used during the planning period and phased out during the evaluation period to ensure the continuation of transition services.

(c) A description of the current availability, access, and quality of transition services for eligible youth and a description of how, over five years, the State will improve and expand the availability, access, and quality of transition services for youth with disabilities and their families as those youth prepare for and enter adult life.

(d) A description of how the State will improve and increase the ability of professionals, parents, advocates, and youth to promote the understanding of and the capability to successfully make the transition from student to adult.

(e) A description of how the State will improve and increase working relationships among education personnel, both with LEAs and in postsecondary training programs, relevant State agencies, the private sector (especially employers), rehabilitation personnel, local and State employment agencies, local Private Industry Councils authorized by the Job Training Partnership Act, students with disabilities, their families, and their advocates to identify and achieve consensus on the general nature and specific application of transition services to meet the needs of youth with disabilities.

(f) A description of how the State will use grant funds as an incentive for accessing and using the expertise and resources of programs, projects, and activities related to transition funded through this program and with other sources.

(g) A description of how the State will address, in whole or in part, the needs of youth with disabilities from minority backgrounds.

(Approved by the Office of Management and Budget under control number 1820–0028)

(Authority: 20 U.S.C. 1410(b), 1425(e)(4)(A))

Subpart C—How Does the Secretary Make a Grant?

§ 325.20 How does the Secretary evaluate an application?

(a) The Secretary evaluates an application submitted under this program on the basis of the criteria in § 325.21.

(b) The Secretary awards up to 100 points under these criteria.

(c) The maximum possible score for each criterion is indicated in parentheses.

(Authority: 20 U.S.C. 1425(e))

§ 325.21 What selection criteria does the Secretary use?

The Secretary uses the following criteria to evaluate the quality of an application submitted under this part:

(a) *Extent of need and expected impact* (20 points). The Secretary reviews each application to determine the justification for the proposed activities in the State based on the State need for and expected impact from the activities to develop, implement, and improve systems to provide transition services for youth with disabilities from age 14 through the age they exit school. The Secretary looks for information that provides—

(1) A description of the current availability, access, and quality of transition services for eligible youth and a description of how, over five years, the State will improve and expand the availability, access, and quality of transition services for youth with disabilities and their families as those youth prepare for and enter adult life;

(2) A description of how the State will improve and increase the ability of professionals, parents, advocates, and youth to promote the understanding of and the capability to successfully make the transition from student to adult;

(3) A description of how the State will improve and increase working relationships among education personnel, both within LEAs and in postsecondary training programs, relevant State agencies, the private sector (especially employers), rehabilitation personnel, local and State employment agencies, local Private Industry Councils authorized by the Job Training Partnership Act, students with disabilities, their families, and their advocates to identify and achieve consensus on the general nature and specific application or transition services to meet the needs of youth with disabilities;

(4) A description of how the State will use grant funds as an incentive for accessing and using the expertise and resources of programs, projects, and activities related to transition funded under this program and with other sources; and

(5) A description of how the State will address the unique needs of youth with disabilities from minority backgrounds.

(b) *Technical soundness* (25 points). The Secretary reviews each application to determine the technical soundness of the project and whether the applicant has the capacity to achieve lasting statewide change, including a description of how the State will—

(1) Target resources to school settings, such as providing access to rehabilitation counselors for students with disabilities who are in school settings;

(2) Target a substantial amount of grant funds, received under this program, to program evaluation and documentation of, and dissemination of information about, transition services as well as to improve the capacity for case management;

(3) Provide incentives for interagency and private sector resource pooling and otherwise investing in transition services, especially in the form of cooperative agreements, particularly with Private Industry Councils authorized by the Job Training Partnership Act and local branches of State employment agencies;

(4) Provide for early, ongoing information and training for those involved with or who could be involved with transition services—professionals, parents, youth with disabilities, including self-advocacy training for those youth, and advocates for those youth as well as Private Industry Councils authorized by the Job Training Partnership Act and local branches of State employment agencies;

(5) Provide for the early and direct involvement of all relevant parties, including Private Industry Councils authorized by the Job Training Partnership Act and local branches of State employment agencies, in operating and planning improvements in transition services, and the early and direct involvement of all relevant parties in planning and implementing transition services for individual youth;

(6) Provide access to training for eligible youth that matches labor market needs in their communities;

(7) Integrate transition services with relevant opportunities in communities, including those sponsored by Private Industry Councils authorized by the Job Training Partnership Act and local employment agencies;

(8) Clearly define the services and service delivery system that will result from the project. The State must have analyzed in detail how these will differ from the current services and current delivery system;

(9) Identify all relevant barriers to implementing the proposed statewide changes and identify and propose appropriate strategies for eliminating those barriers;

(10) Use an evaluation plan for transition services that is outcome oriented, that focuses on individual youth-focused benefits, and that is based on standard sources of information such as the individualized education programs required by the IDEA;

(11) Disseminate annually information about project activities and procedures and information from project evaluation activities, including information regarding effective strategies and obstacles to achieving project goals, to the organizations described in § 325.30, and to other interested organizations within the State; and

(12) Ensure that, if appropriate and no later than age 22, eligible youth who participate in transition services under this program would be served as appropriate in the State section 110 program, the title VI, part C program, or the title VII, part A program, authorized under the Rehabilitation Act of 1973, as amended.

(c) *Plan of operation* (20 points). The Secretary reviews each application for information that shows the quality of the plan of operation for the project, including—

(1) An effective plan of management delineating the roles of both participating agencies and ensures proper and efficient administration of the project;

(2) A clear description of how the objectives of the project relate to the purpose of the program;

(3) The way the joint applicants plan to use their resources and personnel to achieve each objective;

VOL
56
ISS
245
DE
20
1991
UMI

(4) A description of how all State and other agencies whose cooperation and participation are necessary for statewide implementation are actively collaborating in project management;

(5) A description of how the joint applicants will provide for the direct participation of youth with disabilities and parents in the planning, development, and implementation of the project;

(6) A description of the procedures to be used to ensure that youth and their families who are potentially eligible for the disability programs of the Social Security Administration are provided information, training, and referral services;

(7) A description of how the first year will be used to plan, if necessary, how to implement transition services, the second through fourth years to develop and implement transition services, and the fifth year to evaluate statewide services;

(8) Whether the budget is adequate to support the project and costs are reasonable in relation to the objectives of the project; and

(9) The extent to which grant funds will be used during the planning period and phased out during the evaluation period to ensure the continuation of transition services.

(d) *Quality of key personnel* (25 points, distributed as indicated).

(1) The Secretary reviews each application for information that shows the qualifications of key personnel the applicant plans to use on the project, including information that shows—

(i) The qualifications of the project director (8 points); and

(ii) The qualifications of each of the other key personnel to be used in the project, including experience and training in fields related to the objectives of the project (7 points).

(2) In determining the qualifications of each person referred to in paragraphs (d)(1) (i) and (ii) of this section the Secretary also considers—

(i) The time that each person will commit to the project;

(ii) Experience and training in conducting, documenting, and applying the types of activities to be conducted; and

(iii) Knowledge of the results and findings of relevant projects and potential for application of this information in addressing the need for transitional services to youth with disabilities.

(3) Recruitment of underrepresented populations (10 points). The Secretary reviews each application for information that shows effective efforts are being made to recruit members of underrepresented populations as project staff, including—

(i) Strategies to recruit employees who are members of underrepresented populations, including members of racial or ethnic minority groups and individuals with disabilities; and

(ii) Procedures to provide training and other necessary support to retain and advance qualified personnel from underrepresented populations.

(e) *Evaluation* (10 points). The Secretary reviews each application to determine the quality of the plan for evaluating the project throughout the entire grant, leading to the required fifth year evaluation. The Secretary reviews factors including—

(1) The adequacy of the applicant's plan to determine the effectiveness of the project in achieving measurable changes in State policy, programs, and services that improve systems providing transition services for youth with disabilities.

(2) The adequacy of the applicant's plan to determine the effectiveness and timeliness in completion of the managerial procedures and objectives of the project's plan of operation; and

(3) The procedures for recording, reviewing, analyzing, and interpreting for relevant audiences, data generated through conducting project activities.

(Approved by the Office of Management and Budget under control number 1820-0028)

(Authority: 20 U.S.C. 1425(e))

Subpart D—What Conditions Must Be Met After a Grant?

§ 325.30 What other conditions must be met by a grantee under this program?

(a) The Secretary, if appropriate, requires grantees to prepare reports describing their procedures, findings, and other relevant information in a form that will maximize the dissemination and use of those procedures, findings, and information.

(b) The Secretary requires delivery of those reports, as appropriate, to—

(1) The regional and Federal resource centers, the clearinghouses, and the technical assistance to parents programs assisted under parts C and D of the Act;

(2) The National Diffusion Network;

(3) The ERIC Clearinghouse on the Handicapped and Gifted;

(4) The Child and Adolescent Service Systems Program (CASSP) under the National Institute of Mental Health;

(5) Appropriate parent and professional organizations;

(6) Organizations representing individuals with disabilities; and

(7) Such other networks as the Secretary may determine to be appropriate.

(c) Each grantee shall participate in the evaluation conducted by the institution of higher education or nonprofit public or private organization supported to implement Section 626(f)(3)(A) of the Act.

(Approved by the Office of Management and Budget under control number 1820-0028)

(Authority: 20 U.S.C. 1410(g), 1425(f)(3))

DEPARTMENT OF EDUCATION

[CFDA No. 84.158]

Secondary Education and Transitional Services for Youth With Disabilities Program; Notice Inviting Applications for New Awards for Fiscal Year (FY) 1992

Purpose of Program: The purpose of this program is to provide Federal assistance to States to develop, implement, and improve systems to provide transition services for youth with disabilities from age 14 through the age they exit school.

Eligible Applicants: Eligible applicants are State educational agencies, State vocational rehabilitation agencies, and other State agencies that provides transition services to individuals leaving school under the Individuals with Disabilities Education Act (IDEA) programs that submit a joint application.

Deadline for Transmittal of Applications: March 13, 1992.

Deadline for Intergovernmental Review: May 13, 1992.

Applications Available: December 20, 1991.

Available Funds: $4,169,000.

Estimated Range of Awards: $400,000–$500,000.

Estimated Size of Awards: $450,000.

Estimated Number of Awards: 9.

Project Period: Up to 60 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations, 34 CFR parts 75, 77, 79, 80, 81, 82, 85, and 86; and (b) the regulations for this program in 34 CFR part 325, as amended and published in this issue of the **Federal Register**.

For Applications or Information Contact: Joseph Clair, Division of Education Services, U.S. Department of Education, 400 Maryland Avenue, SW. (Switzer Building, room 4622), Washington, DC 20202. Telephone: (202) 732-4503 (voice) or (202) 732-1169 (TDD).

Program Authority: 20 U.S.C. 1425(e)

Dated: December 16, 1991.

Robert R. Davila,

Assistant Secretary, Office of Special Education and Rehabilitative Services.

Part IV

Department of Labor

Mine Safety and Health Administration

Fee Adjustments for Testing, Evaluation, and Approval of Mining Products; Notice

VOL 56 ISS 245 DEC 20 1991 UMI

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Fee Adjustments for Testing, Evaluation, and Approval of Mining Products

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice of fee adjustments.

SUMMARY: This notice revises the Mine Safety and Health Administration's (MSHA) user fees for testing, evaluation, and approval of certain products manufactured for use in underground mines. These fees are based on Fiscal Year 1991 data and reflect changes in approval processing operations as well as costs incurred to process approval actions.

DATES: These fee schedules are effective from January 1, 1992, through December 31, 1992. Approval applications postmarked before January 1, 1992, will be chargeable under the fee schedules as published on December 18, 1990.

FOR FURTHER INFORMATION CONTACT: Robert W. Dalzell, Chief, Approval and Certification Center, R.R. 1, Box 251, Triadelphia, West Virginia 26059.

SUPPLEMENTARY INFORMATION: In general, MSHA has computed the revised fees based on the cost to the government to provide testing, evaluation, and approval of products manufactured for use in underground mines. On May 8, 1987 (52 FR 17506), MSHA published a final rule, 30 CFR Part 5—Fees for Testing, Evaluation, and Approval of Mining Products, which established the specific procedures for fee calculation, administration, and revisions. This revised fee schedule is established in accordance with the procedures of that rule.

Two new approval programs introduced during Fiscal Year 1991 are Acceptances for Monitor and Power Systems (MAPS) and Equipment Covering Material. MAPS approvals are subject to the hourly rates under Other A&CC Services, Action 15 for MAPS, and equipment covering material approvals are subject to the hourly rates under part 18, Action 15. All multiple-shot blasting units must now be submitted under 30 CFR Part 7—Testing by Applicant or Third Party.

Dated: December 13, 1991.

William J. Tattersall,

Assistant Secretary of Mine Safety and Health.

FEE SCHEDULE EFFECTIVE 01-01-92 (BASED ON FY 1991 DATA)

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

List of Rejected Statute of Limitations Claims

Dated: December 16, 1991.

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of rejected claims.

SUMMARY: This notice lists certain potential pre-1966 Indian damage claims which have been rejected for litigation by the Secretary of the Interior pursuant to the Indian Claims Limitation Act of 1982. This notice also contains a list of claims which the Bureau of Indian Affairs considers resolved.

DATES: To file an action in court, on any claim contained on the list of rejected claims, tribes, groups, and individual Indians must file such action no later than December 20, 1992.

FOR FURTHER INFORMATION CONTACT:

Aberdeen Area Director, Bureau of Indian Affairs, 115 4th Avenue SE., Aberdeen, South Dakota 57401–4382, Telephone (605) 226–7343;

Albuquerque Area Director, Bureau of Indian Affairs, 615 1st Street NW., Box 26567, Albuquerque, New Mexico 87125–6567, Telephone (505) 766–3170;

Anadarko Area Director, Bureau of Indian Affairs, WCD Office Complex, Box 368, Anadarko, Oklahoma 73005–0368, Telephone (405) 247–6673;

Billings Area Director, Bureau of Indian Affairs, 316 North 26th Street, Billings, Montana 59101–1397, Telephone (406) 657–6315;

Eastern Area Director, Bureau of Indian Affairs, 3701 N. Fairfax Drive, suite 260/Mailroom, Arlington, VA 22203, Telephone (703) 235–2571;

Sacramento Area Director, Bureau of Indian Affairs, 2800 Cottage Way, Sacramento, California 95825–1884, Telephone (916) 978–4691.

SUPPLEMENTARY INFORMATION: The Indian Claims Limitation Act of 1982, Public Law 97–394 (96 Stat. 1966, 1976) extends the statute of limitations governing pre-1966 Indian damage claims (28 U.S.C. 2415) which was due to expire on December 31, 1982. A claim subject to the statute of limitations is an Indian claim for money damages which arose prior to July 18, 1966. Claims against the United States are not governed by this law, only money damage claims against persons, corporations, states, or any other entities except the Federal Government. Claims for title to land are also not governed by this statute of limitations. This notice is required by section 5(c) of the Act.

Pursuant to sections 3 and 4 of the Indian Claims Limitation Act of 1982, lists of all potential Indian damage claims, which had at any time been identified by or submitted to the Bureau of Indian Affairs under the Department of the Interior's Statute of Limitations Program, were published in the **Federal Register** at 48 FR 13698, on March 31, 1983, amended at 48 FR 15008, on April 6, 1983; and at 48 FR 51204, on November 7, 1983, amended at 49 FR 518, on January 4, 1984. Excluded from these lists were claims which were erroneously identified as claims and those which had no legal merit whatsoever.

When rejecting any claim or category of claims included on the published lists, the Secretary must send a report to the appropriate tribe whose rights or the rights of whose members could be affected by the rejection. The report must identify each separate claim being rejected, list the names of potential plaintiffs and defendants, if known or reasonably ascertainable, and briefly set forth the reason or reasons for rejection. A written notice of rejection must be sent to individual Indian claimants if their identities and addresses are known or reasonably ascertainable from Bureau of Indian Affairs records. After a report has been forwarded to a tribe, the Secretary must publish a notice in the **Federal Register** identifying the claims covered in the report. By the terms of the Indian Claims Limitation Act of 1982, any right of action on any claim appearing on the following list of claims, which have been rejected and reported accordingly by the Secretary, shall be barred unless a complaint is filed in accordance with the date established in the "**DATE**" section of this notice. A list of claims which the Bureau of Indian Affairs considers resolved follows the list of rejected claims.

This notice is published in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.

Eddie F. Brown,

Assistant Secretary—Indian Affairs.

DEPARTMENT OF ENERGY

[Docket No. FE-R-79-43B]

Office of Fossil Energy; Electric and Gas Utilities Covered in 1992 by Titles I and III of the Public Utility Regulatory Policies Act of 1978 and Requirements for State Regulatory Authorities to Notify the Department of Energy

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice.

SUMMARY: Sections 102(c) and 301(d) of the Public Utility Regulatory Policies Act of 1978 (PURPA) require the Secretary of Energy to publish a list, before the beginning of each calendar year, identifying each electric utility and gas utility to which Titles I and III of PURPA apply during such calendar year. The 1992 list is published here as two separate tabulations. Appendix A lists the covered utilities by State and appendix B lists them alphabetically.

Each State regulatory authority is required, pursuant to sections 102(c) and 301(d) of PURPA, to notify the Secretary of Energy of each electric utility and gas utility on the list for which such State regulatory authority has ratemaking authority. In addition, written comments are requested on the accuracy of the list of electric utilities and gas utilities.

DATES: Notifications by State regulatory authorities and written comments must be received by no later than 4:30 p.m. on February 15, 1992.

ADDRESSES: Notifications and written comments should be forwarded to: Department of Energy, Office of Coal and Electricity, FE-52, 1000 Independence Avenue, SW., room 3F-070, Docket No. FE-R-79-43B, Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT: Steven Mintz, Office of Coal and Electricity, Fossil Energy, Department of Energy, 1000 Independence Avenue SW., room 3F-070, FE-52, Washington, DC 20585, Telephone 202/586-9506.

SUPPLEMENTARY INFORMATION:

I. Background

Pursuant to sections 102(c) and 301(d) of PURPA, Public Law 95-617, 92 Stat. 3117 *et seq.* (16 U.S.C. 2601 *et seq.*), hereinafter referred to as the "Act," the Department of Energy (DOE) is required to publish a list of utilities to which titles I and III of PURPA apply in 1992.

State regulatory authorities are required by the Act cited above to notify the Secretary of Energy as to their ratemaking authority over the listed utilities. The inclusion or exclusion of any utility on or from the list does not affect the legal obligations of such utility or the responsible authority under the Act.

The term "State regulatory authority" means any State, including the District of Columbia and Puerto Rico, or a political subdivision thereof, and any agency or instrumentality, which has authority to fix, modify, approve, or disapprove rates with respect to the sale of electric energy or natural gas by any utility (other than such State agency). In the case of a utility for which the Tennessee Valley Authority (TVA) has ratemaking authority, the term "State regulatory authority" means the TVA.

Title I of PURPA sets forth ratemaking and regulatory policy standards with respect to electric utilities. Section 102(c) of title I requires the Secretary of Energy to publish a list, before the beginning of each calendar year, identifying each electric utility to which title I applies during such calendar year. An electric utility is defined as any person, State agency, or Federal agency that sells electric energy. An electric utility is covered by title I for any calendar year if it had total sales of electric energy for purposes other than resale in excess of 500 million kilowatt-hours during any calendar year beginning after December 31, 1975, and before the immediately preceding calendar year. An electric utility is covered in 1992 if it exceeded the threshold in any year from 1976 through 1990.

Title III of PURPA addresses ratemaking and other regulatory policy standards with respect to natural gas utilities. Section 301(d) of title III requires the Secretary of Energy to publish a list, before the beginning of each calendar year, identifying each gas utility to which title III applies during each calendar year. A gas utility is defined as any person, State agency, or Federal agency, engaged in the local distribution of natural gas and the sale of natural gas to any ultimate consumer of natural gas. A gas utility is covered by title III if it had total sales of natural gas for purposes other than resale in excess of 10 billion cubic feet during any calendar year beginning after December 31, 1975, and before the immediately preceding calendar year. A gas utility is covered in 1992 if it exceeded the threshold in any year from 1976 through 1990.

In compiling the list published today, the DOE revised the 1991 list (55 FR 52016, December 18, 1990) upon the assumption that all entities included on the 1991 list are properly included on the 1992 list unless the DOE has information to the contrary. In doing this, the DOE took into account information included in public documents regarding entities which exceeded the PURPA thresholds for the first time in 1990. The DOE believes that it will become aware of any errors or omissions in the list published today by means of the comment process called for by this Notice. The DOE will, after consideration of any comment and other information available to the DOE, provide written notice of any further additions or deletions to the list.

II. Notification and Comment Procedures

No later than 4:30 p.m. on February 15, 1992, each State regulatory authority must notify the Department of Energy in writing of each utility on the list over which it has ratemaking authority. Five copies of such notification should be submitted to the address indicated in the "**ADDRESSES**" section of this Notice and should be identified on the outside of the envelope and on the document with the designation "Docket No. FE-R-79-43B." Such notification should include:

1. A complete list of electric utilities and gas utilities over which the State regulatory authority has ratemaking authority;

2. Legal citations pertaining to the ratemaking authority of the State regulatory authority; and

3. For any listed utility known to be subject to other ratemaking authorities within the State for portions of its service area, a precise description of the portion to which such notification applies.

All interested persons, including State regulatory authorities, are invited to comment in writing, no later than 4:30 p.m. on February 15, 1992, on any errors or omissions with respect to the list. Two copies of such comments should be sent to the address indicated in the "**ADDRESSES**" section of this Notice and should be identified on the outside of the envelope and on the document with the designation "Docket No. FE-R-79-43B." Written comments should include the commenter's name, address and telephone number.

All notifications and comments received by the DOE will be made available, upon request, for public inspection in the Freedom of Information Reading Room, room 1E-190, 1000 Independence Avenue, SW., Washington, DC 20585, between the hours of 9 a.m. and 4 p.m. Monday through Friday, except Federal holidays.

III. List of Electric Utilities and Gas Utilities

Appendices A and B contain two different tabulations of the utilities that meet PURPA coverage requirements. As stated above, the inclusion or exclusion of any utility on or from the lists does not affect its legal obligations or those of the responsible State regulatory authority under PURPA.

Appendix A contains a list of utilities which are covered by PURPA. These utilities are grouped by State and by the regulatory authority within each State. Also included in this list are utilities which are covered by PURPA but which are not regulated by the State regulatory authority. This tabulation, including explanatory notes, is based on information provided to the DOE by State regulatory authorities in response to the December 18, 1990, **Federal Register** notice (55 FR 52016) requiring each State regulatory authority to notify the DOE of each utility on the list over which it has ratemaking authority, public comments received with respect to that notice, and information subsequently made available to the DOE.

The utilities classified in appendix A as not regulated by the State regulatory authority in fact may be regulated by local municipal authorities. These municipal authorities would be State agencies as defined by PURPA and thus have responsibilities under PURPA identical to those of the State regulatory authority. Therefore, each such municipality is to notify the DOE of each utility on the list over which it has ratemaking authority.

In appendix B, the utilities are listed alphabetically, subdivided into electric utilities and gas utilities, and further subdivided by type of ownership: Investor-owned utilities, publicly-owned utilities, and rural cooperatives.

The changes to the 1991 list of electric and gas utilities are as follows:

Additions:

- Arkansas Valley Electric Cooperative Corp. (AR)
- City of Bryan (TX)
- Cajun Electric Power Cooperative (LA)
- Carroll Electric Cooperative Corporation (AR)
- Clinton Utilities Board (TN)
- Cullman Electric Cooperative (AL)
- Linn County RECA (IA)
- Mississippi County Electric Cooperative Corp. (AR)
- Oregon Trail Electric (OR)
- Tri-County Electric Cooperative, Inc. (TX)

(Public Utility Regulatory Policies Act of 1978, Pub. L. 95-617, 92 Stat. 3117 *et seq.* (16 U.S.C. 2601 *et seq.*)).

Issued in Washington, DC on December 12, 1991.

Clifford P. Tomaszewski,

Acting Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

Appendix A

All gas utilities listed below had natural gas sales, for purposes other than resale, in excess of 10 billion cubic feet in any year from 1976–1990.

All electric utilities listed below had electric energy sales, for purposes other than resale, in excess of 500 million kilowatt-hours in any year from 1976–1990.

State: Alabama

Regulatory Authority: Alabama Public Service Commission.

Gas Utilities

Pedernales Electric Cooperative, Inc.
Sam Houston Electric Cooperative, Inc.
Tri-County Electric Cooperative, Inc.

The governing body of each Texas municipally exercises exclusive original jurisdiction over electric utility rates, operations and services provided by an electric utility (whether privately owned or publicly owned), within its city or town limits, unless the municipality has surrendered this jurisdiction to the Texas Public Utility Commission. The Commission hears *de novo* appeals from the decision of such municipalities. These municipal authorities would be State agencies as defined by PURPA, and thus have responsibilities under

VOL 56 ISS 245 DEC 20 1991 UMI

PURPA identical to those of a State regulatory authority.

The municipality owned electric utilities listed below are not under the commission's original ratemaking jurisdiction:

Electric Utilities

Publicly-Owned:
Austin Electric Department
Bryan, City of
Garland Electric Department
Lubbock Power and Light
San Antonio City Public Service Board

State: Texas

Regulatory Authority: Railroad Commission of Texas.

Gas Utilities

Investor-Owned:
Atmos Energy Corporation
Entex, Inc.
Lone Star Gas Company, a division of ENSEARCH Corporation
Southern Union Company

The governing body of each Texas municipality exercises exclusive original ratemaking jurisdiction over gas utility rates, operations, and services provided by a gas utility within its city or town limits subject to appellate review by the Railroad Commission of Texas. These municipal authorities would be State agencies as defined by PURPA and thus have responsibilities under PURPA identical to those of a State regulatory authority.

The following covered utilities within the State of Texas are not regulated by the Railroad Commission of Texas. (The Railroad Commission's appellate authority does not extend to municipally owned gas utilities.)

Coast Guard

33 CFR Part 117

CGD-90-064

RIN 2115-AD71

Drawbridge Operation Regulations; Potomac River, District of Columbia

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: At the request of the Federal Highway Administration, the Maryland and Virginia Departments of Transportation, and the District of Columbia Department of Public Works, the Coast Guard proposes to change the regulations that govern operation of the Woodrow Wilson Memorial Bridge across the Potomac River, mile 103.8, at Alexandria, Virginia. This change would further restrict the hours during which the drawbridge may open for vessel traffic. The proposed changes to these regulations are intended to provide for regularly scheduled openings for the reasonable needs of navigation, while reducing traffic congestion related to the openings.

DATES: Comments must be received on or before February 3, 1992.

A public hearing will be held on January 28, 1992, at 7 p.m.; requests to present oral testimony must be received on or before January 24, 1992.

ADDRESSES: Comments should be mailed to Commander (ob), Fifth Coast Guard District, 431 Crawford Street, Portsmouth, Virginia 23704-5004. The comments and other materials referenced in this notice will be available for inspection and copying at the above address, room 507 between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays. Comments may be hand-delivered to this address.

A public hearing will be held at Thomas A. Edison High School Auditorium, 5801 Franconia Road, Alexandria, Virginia.

FOR FURTHER INFORMATION CONTACT: Ms. Ann B. Deaton, Bridge Administrator, Fifth Coast Guard District, at 804-398-6222.

SUPPLEMENTARY INFORMATION:

Request for Comments and Notice of Public Hearing

Interested persons are invited to participate in this rulemaking by submitting written comments or data. Persons submitting comments should include their names and addresses, identify this rulemaking (CGD-90-064), and give reasons for concurrence with or any recommended changes to the proposal. Persons wanting acknowledgment of receipt of comments should enclose a stamped, self-addressed postcard or envelope.

A public hearing will be held to give the bridge owner, waterway users, the motoring public and other interested parties the opportunity to present data, views, and comments verbally or in writing concerning a proposed permanent change to the regulations governing the operation of the Woodrow Wilson Memorial Bridge across the Potomac River at Alexandria, Virginia.

The hearing will be informal. Representatives from the Coast Guard will preside at the hearing, make a brief opening statement and announce the procedures to be followed. Speakers are encouraged to provide written copies of their verbal comments to the hearing officer at the time of the hearing. A verbatim transcript of the hearing, as well as written comments received outside of the hearing will be available for public review at the offices of the Fifth Coast Guard District, room 507, approximately 30 days after the hearing date. Transcripts of the hearing will be made available for purchase upon request to the court reporting services at the conclusion of the hearing. All comments, whether received in writing or presented verbally at the hearing will be fully considered before final agency action is taken.

The Commander, Fifth Coast Guard District, will evaluate all communications received and recommend a final course of action based on comments and data received.

Drafting Information

The drafters of this notice are Ann B. Deaton, Project Officer, and CAPT M.K. Cain, Project Attorney.

Background and Purpose

The current published regulations for the Woodrow Wilson bridge are found in 33 CFR 117.255 and provide that the bridge will not open for any vessel (except large commercial vessels needing tidal considerations) from 6 a.m. to 10 a.m. and from 3 p.m. to 8 p.m., Monday through Friday. The few larger commercial vessels needing tidal considerations are allowed openings between 6 a.m. and 6:30 a.m., between 9 a.m. and 10 a.m., between 3 p.m. and 4 p.m. and between 6:30 p.m. and 8 p.m. This existing regulation results in periods of no openings on weekdays from 6:30 a.m. to 9 a.m. and from 4 p.m. to 6:30 p.m. In addition, the existing regulation allows openings at any time for all vessels on weekends and Federal holidays. This regulation has been in effect since August 2, 1988. There were no requests to change it until the fall of 1990 when the bridge was operating under a temporary schedule to allow repairs to the bridge.

The formal request to permanently change these regulations was received from the Maryland and Virginia Departments of Transportation and the District of Columbia Department of Public Works, and would allow openings for all commercial ships only between 12 midnight and 4 a.m., 7 days a week. Their proposal would allow no openings for recreational boats at any time, and no consideration would be given for large commercial ships needing to transit the river at high tide stages due to their deeper drafts.

On August 2, 1990, a temporary deviation from the existing permanent regulations was published in the **Federal Register** (55 FR 31384) to facilitate emergency repairs to the bridge's electrical systems. That emergency deviation expired on September 21, 1990. On September 20, 1990, temporary regulations were issued which modified the restrictions on bridge openings authorized by the temporary deviation; they were effective on September 22, 1990. Those temporary regulations were published in the **Federal Register** October 1, 1990 (55 FR 39962) and they remained in effect until January 25, 1991. In conjunction with the temporary regulations that were effective on September 22, 1990, the Coast Guard published supplementary information on the temporary regulations with a request for comments in the October 1, 1990 **Federal Register** (55 FR 39963). Comments were received through October 16, 1990. Although many comments were received, the majority of them related to the matter of a change to the current published permanent regulations and not to the temporary regulations for which comments were being solicited. In general, there were no comments of a new or significant nature relating to the temporary regulations to cause the Coast Guard to amend the temporary regulations at issue. On December 21, 1990, temporary regulations were issued to allow the bridge owner to complete the ongoing repairs to the bridge. These temporary regulations were effective on January 25, 1991, and remained in effect until April 1, 1991. They were published in the **Federal Register** on January 8, 1991 (56 FR 635). On March 22, 1991, the Commander, Fifth Coast Guard District issued new temporary regulations to allow the bridge owner additional time needed to complete the extensive ongoing repairs to the bridge. These regulations became effective on April 1, 1991, and remained in effect until May 31, 1991 when repairs were completed.

Normally, upon completion of repairs, the bridge would revert to the permanent rule in 33 CFR 117.255. However, since the Coast Guard had received a formal request to severely restrict openings of the bridge due to the growing needs of today's vehicular traffic, the Coast Guard has issued temporary deviations from the permanent rules, with request for comments, under the provisions of 33 CFR 117.43. The first temporary rule was published on June 4, 1991 (56 FR 25369) to evaluate Alternative P of the opening schedules being considered for a permanent change in the regulations. It was effective from June 1, 1991, through July 30, 1991. A second temporary rule was published on July 29, 1991 (56 FR 35816) to evaluate Alternative NA. It was effective from July 31, 1991, through September 28, 1991. A third temporary rule was published on September 27, 1991 (56 FR 49145) to evaluate a slight modification to Alternative NA. This modification moved the noon opening opportunities for recreational vessels to 11 a.m. It was effective from September 29, 1991, through November 27, 1991. A further modification to Alternative NA, extending the opening periods for deep-draft commercial vessels, was published on November 26, 1991 (56 FR 59880) and is effective from November 28, 1991 through January 27, 1992. The Coast Guard anticipates publishing further temporary rules to evaluate alternative opening schedules, or re-evaluate the effect of schedules previously published when imposed at different times of the year, until permanent rules are adopted.

In addition to publication of the documents listed above, the Coast Guard and the Federal Highway Administration co-hosted a meeting on September 14, 1990, with all parties known to be interested in the operation of this bridge. The meeting was attended by representatives of state and local governments, highway users, commercial and recreational vessel operators, the Virginia Pilot Association, Robinson Terminals and local trade organizations. Although the purpose of the meeting was to discuss the temporary opening schedule of the bridge during repairs, many comments actually related to the attendees' positions concerning permanent changes to the bridge's operating schedule. On December 11, 1990, at the request of representatives of Robinson Terminals of Alexandria, Virginia, the Commander, Fifth Coast Guard District met with those representatives at his office in Portsmouth, Virginia to hear their views concerning the operation of the Wilson Bridge during the temporary repair period. Again, on August 1, 1991, at the request of representatives of Robinson Terminals of Alexandria, Virginia, the Commander, Fifth Coast Guard District met with those representatives at his office in Portsmouth, Virginia, to hear their views concerning the temporary rule that was in effect through July 30, 1991.

The Woodrow Wilson Bridge links Maryland, Virginia, and the District of Columbia. Originally, it was planned as part of a multi-lane freeway circling the Nation's Capital which was designated the "Capital Beltway". In 1964, the Woodrow Wilson Bridge, as part of the "Beltway", was a 6-lane bascule-span bridge which accommodated both highway and marine traffic. In 1976, Interstate 95 was routed along the eastern portion of the "Beltway" and across the Woodrow Wilson Bridge. During this time vehicular traffic increased and by 1988 the average daily traffic count across the bridge was 150,000.

Because of the growth in vehicular traffic, bridge openings for passage of vessels aggravate highway congestion on Interstate 95 (the Beltway) and connecting roads in the vicinity of the bridge. If an opening occurs during periods of heavy traffic, it can take considerable time before it is again flowing smoothly. The disruption of traffic can continue long after the bridge has been closed and vehicular traffic across the bridge has resumed. As a result, the Coast Guard has received a joint request from the Maryland and Virginia Departments of Transportation, and the District of Columbia Department of Public Works to permanently change the regulations governing operation of this bridge by severely limiting the hours during which the bridge may open for vessel traffic.

On the Potomac River, there are three major classes of vessel traffic that require draw openings. The largest class is termed "Sail/Pleasure" and includes sailboats and other pleasure craft. The second class termed "Freighter/Tug" includes freighters, tugboats and other commercial ships. The third class termed "Navy/Government" includes Navy and Coast Guard ships, survey ships, and other government vessels. For purposes of this rulemaking, the third class of vessels is considered to belong to the commercial classification, which results in two major classifications of vessels—commercial and recreational.

Vehicular traffic on the bridge is categorized by trip purpose and vehicle type. Vehicular traffic has been termed "commercial" and "non-commercial." "Commercial" vehicles mainly are trucks engaged in commercial activity. "Non-commercial" vehicles are those used for commuting, recreation, and business purposes.

The bridge currently opens for vessel traffic about 400 times per year. Of these openings, about 100 are for commercial and government vessels. The remainder are for recreational craft. Several of the commercial vessels have deeper drafts which require their occasional transit of the river through the Woodrow Wilson drawbridge at high tide stages due to shoaling at several points in the river downstream from the Woodrow Wilson Bridge.

Interstate 95 and the Woodrow Wilson Bridge serve as a commuting route for many, resulting in substantial peak usage periods during normal commuting hours. The bridge itself is a traffic constriction due to eight lanes of traffic merging onto a 6-lane bridge. Vehicle speeds decrease whenever there is more than moderate traffic, even in the absence of accidents, construction or other obstructions. Accidents or other obstructions have caused extensive traffic backups on a routine basis. In addition, extreme traffic congestion resulted twice during the summer of 1990 when the bridge malfunctioned and became stuck in the open position.

The bridge statutes require that all bridges over navigable waters of the United States provide for the reasonably free navigation of the waterway over which they are constructed (33 U.S.C. 494). Regulatory action is necessary for the Coast Guard to meet its responsibility for insuring that drawbridges are operated in a manner that is in the public interest. In discharging this responsibility, the Coast Guard strives to promulgate regulations that provide the best balance between the reasonable needs of marine and surface transportation using bridges.

In an effort to compile as much information on the impacts of different opening schedules on both highway and marine traffic as possible, the Coast Guard undertook an extensive study of various opening schedule options as part of its overall investigation of the facts to identify an opening schedule that would be as equitable as possible. Given the intense interest in the operation of this bridge, the Coast Guard contracted a consultant with expertise in transportation studies to conduct a detailed analysis of various alternative opening schedules to determine an appropriate balance between vessel and vehicular levels of

service, with consideration of social, economic, and environmental impacts.

Economic considerations are not the sole determining factor in developing a schedule that the Coast Guard considers to best balance the needs of both marine and highway traffic. In addition to economic factors such as total vessel and vehicular delay costs for various schedules, the Coast Guard must also consider other factors, some quantifiable, and some not. Among these other factors are: relative numbers of vessels transiting the waterway requiring openings of the bridge; actual numbers and times of bridge openings; the natural characteristics of the waterway which may present navigational limitations for certain vessels such as shoaling, water depth or tidal restrictions; protection of present and future commerce on the waterway; and the rights of vessels to use navigable waters of the United States. These factors also include numbers of vehicles crossing the bridge; peak vehicular traffic periods; demonstrated growth in vehicular traffic volumes; adequacy of bridge capacity for current traffic volumes; inherent vehicular traffic congestion in heavily populated metropolitan areas; and extraneous causes for traffic congestion other than bridge openings such as constriction caused by merging from a wider highway onto a narrower bridge, accidents, vehicle breakdowns, and roadway construction.

The bridge itself carries about 160,000 vehicle trips per day. Although the river is used by both commercial and recreational vessels, the volume of river traffic is small measured in numbers of vessel transits and especially as compared to vehicular traffic. During the relatively unrestricted period from October 1989 to September 1990, the bridge opened about 377 times to allow the passage of about 403 vessels, of which approximately 35% were commercial. This would indicate an average of slightly more than one opening a day, however, this could be misleading. A review of the bridge opening logs for the same period, revealed that for several periods, one in excess of two weeks, there were no openings at all. At another time, a maximum of ten openings occurred in a single day. As expected, the low number of openings occurred in the winter months and the frequent openings were for recreational vessels during the boating season. It appears that the timing of the openings is the critical issue. Designing a schedule for when openings for vessel traffic are permitted requires consideration of the competing needs of both vessels and motorists. The primary objective is to find an opening schedule that would help minimize the total delays to both while considering the other salient factors discussed above. An additional objective is to develop an alternative that will provide reasonable access to the river for commercial vessels while substantially reducing the number of openings for recreational vessels.

The Coast Guard recognizes the need to provide for periods when the bridge will not open for the passage of vessels in order to accommodate vehicular traffic during peak commuting hours, and similar, but less congested periods of weekend traffic. Balanced against motor vehicle needs are the requirement that commercial vessels have reasonable access to facilities upstream of the bridge and the requirement that recreational vessels requiring the bridge to open not be so restricted as to amount to virtual denial of access.

It is clear that the bridge creates a problem for both vehicle and vessel traffic, and no solution to the operating schedule problem will fully benefit both. The regulatory impact analysis concluded that avoiding bridge openings not only during the rush hours, 5–9 a.m. and 3–7 p.m., but also during the hour immediately prior to rush hours when traffic is building, will reduce vehicle delays. Restricting vessel transits to other than peak periods is clearly beneficial to highway traffic. Midday openings cause much less vehicle delay than peak openings.

The analysis also concluded that permitted opening intervals distributed around the clock, rather than concentrated in the middle of the night, will reduce vessel delay and its associated costs.

There are several alternatives which would strike a reasonable balance between vehicle and vessel needs. Two major issues in consideration of these alternatives were the need to avoid peak vehicular use period openings when possible and the need to give consideration to all marine traffic, including recreational and deep-draft vessels.

Initially, twenty-four alternatives were developed. Included in this initial list were the various temporary regulations which had been in effect to allow repairs to the bridge. Based upon current vehicular use of the bridge, it was considered infeasible to revert to a less restrictive opening schedule than currently exists as published in 33 CFR 117.255. Completely closing the drawbridge to marine navigation was considered unreasonable. Also considered unreasonable was any schedule which would not permit midday openings for both commercial and recreational boats, any schedule which would allow unlimited openings for vessel traffic, or a schedule which would not consider the special needs of deep-draft vessels transiting the river which require high-tide stages for transits.

Through successive refinements of the initial list, six alternatives were chosen for a preliminary analysis. Based upon the results of that preliminary analysis, eight additional alternatives were developed which, when combined with the original six alternatives, provide a range of fourteen alternatives. Through additional refinements, six of these alternatives were discarded because of their close similarity to other alternatives being analyzed or because the benefits gained by one mode of transportation were so minimal compared to the exorbitant costs levied on the other mode of transportation. This process narrowed the list of alternatives for detailed analysis to eight. An additional three alternatives were then developed. These eleven alternatives were referred to as Alternatives A, B, F, I, J, L, LA, LB, N, NA, and P. The letters designating the alternatives have no significance other than as reference keys.

Alternative A is the existing permanent regulation as listed in CFR, title 33, § 117.255. This is the alternative to which all other alternatives should be compared. Alternative B extends the time the drawbridge would remain closed during the rush hour traffic. Alternative F excludes openings for recreational vessels and only allows commercial vessels to open the bridge between midnight and 4 a.m. (This is the regulation proposed by the Maryland and Virginia Departments of Transportation, and the District of Columbia Department of Public Works). Alternatives I, J, L, LA, LB, N, NA, and P are all variations on the windows of bridge openings allowed throughout the day.

The following paragraphs describe these alternatives:

Alternative A. The bridge will open for recreational and commercial vessels with 1 hour notice Monday through Friday from 8 p.m. through 6 a.m. and from 10 a.m. to 3 p.m. The bridge will open for tidal commercial vessels with 1 hour notice Monday through Friday from 6:30 p.m. to 6:30 a.m. and from 9 a.m. to 4 p.m. The bridge will open for all vessels on Saturdays, Sundays, and Federal holidays with 1 hour notice at any time

Alternative B. The bridge will open for recreational and all commercial vessels with 1 hour notice Monday through Friday from 8 p.m. to 5 a.m. and from 10 a.m. to 2 p.m. The bridge will open for tidal commercial vessels with 1 hour notice Monday through Friday from 7 p.m. to 5 a.m. and from 10 a.m. to 2 p.m. The bridge will open for all vessels with 1 hour notice on Saturdays, Sundays and Federal holidays from 9 p.m. to 6 a.m. and from 10 a.m. to 2:30 p.m.

Alternative F. The bridge will open for all commercial vessels including tidal vessels 7 days a week from 12 midnight to 4 a.m. The bridge will not open for recreational vessels.

Alternative I. The bridge will open for recreational and all commercial vessels with 2 hours notice Monday through Friday from 8 p.m. to 5 a.m. The bridge will open for tidal commercial vessels with 2 hours notice Monday through Friday from 7 p.m. to 5 a.m. The bridge will open for all vessels with 2 hours notice on Saturdays, Sundays, and Federal holidays from 8 p.m. to 8 a.m.

Alternative J. The bridge will open for recreational vessels with 2 hours notice Monday through Friday from 8 p.m. to 5 a.m. and from 10 a.m. to 1 p.m. The bridge will open for all commercial vessels with 2 hours notice Monday through Friday from 7 p.m. to 5 a.m. and from 10 a.m. to 1 p.m. The bridge will open for recreational vessels with 2 hours notice on Saturdays, Sundays, and Federal holidays from 8 p.m. to 7 a.m. The bridge will open for all commercial vessels with 2 hours notice on Saturdays, Sundays and Federal holidays from 4 p.m. to 8 a.m.

Alternative L. The bridge will open for recreational vessels with 2 hours notice Monday through Friday from 8 p.m. to 5 a.m. and from 10 a.m. to 1 p.m. The bridge will open for all commercial vessels with 2 hours notice Monday through Friday from 7 p.m. to 5 a.m. and from 10 a.m. to 1 p.m. The bridge will open for all vessels with 2 hours notice on Saturdays, Sundays and Federal holidays from 8 p.m. to 8 a.m.

Alternative LA. The bridge will open for recreational vessels with 2 hours notice Monday through Friday from 8 p.m. to 5 a.m. and at 12 noon. the bridge will open for all commercial vessels with 2 hours notice Monday through Friday from 7 p.m. to 5 a.m. and from 10 a.m. to 1 p.m. The bridge will open for all vessels with 2 hours notice on Saturdays, Sundays and Federal holidays from 8 p.m. to 8 a.m.

Alternative LB. The bridge will open for recreational vessels with 2 hours notice Monday through Friday from 10 p.m. to 5 a.m. and from 10 a.m. to 1 p.m. The bridge will open for all commercial vessels with 2 hours notice Monday through Friday from 9 p.m. to 5 a.m. and from 10 a.m. to 1 p.m. The bridge will open for recreational vessels with 2 hours notice on Saturdays, Sundays and Federal holidays from 10 p.m. to 8 a.m. The bridge will open for all commercial vessels with 2 hours notice on Saturdays, Sundays and Federal holidays from 9 p.m. to 8 a.m.

Alternative N. The bridge will open for recreational vessels with 2 hours notice Monday through Friday from 12 midnight to 4 a.m. and at 12 noon. The bridge will open for all commercial vessels with 2 hours notice Monday through Friday from 9 p.m. to 5 a.m. and from 10 a.m. to 2:30 p.m. The bridge will open for recreational vessels with 2 hours notice on Saturdays, Sundays, and Federal holidays from 12 midnight to 6 a.m. and at 12 noon and 9 p.m. The bridge will open for all commercial vessels with 2 hours notice on Saturdays, Sundays and Federal holidays from 9 p.m. to 6 a.m. and from 10 a.m. to 2:30 p.m.

Alternative NA. The bridge will open for recreational vessels with 2 hours notice Monday through Friday from 12 midnight to 4 a.m. and at 12 noon. The bridge will open for all commercial vessels with 2 hours notice Monday through Friday from 12 midnight to 4 a.m., from 9 a.m. to 2 p.m., and from 7 p.m. to midnight. The bridge will open for recreational vessels with 2 hours notice on Saturdays, Sundays, and Federal holidays from 12 midnight to 6 a.m., at 12 noon, and at 9 p.m. The bridge will open for all commercial vessels with 2 hours notice on Saturdays, Sundays, and Federal holidays from 12 midnight to 2 p.m. and from 7 p.m. to 12 midnight.

Alternative P. The bridge will open for recreational vessels with 2 hours notice Monday through Friday from 12 midnight to 4 a.m. and if requested, one opening at 12 noon and one opening at 9 p.m. The bridge will open for all commercial vessels with 2 hours notice Monday through Friday from 9 a.m. to 2 p.m. and from 7 p.m. to 4 a.m. The bridge will open for recreational vessels with 2 hours notice on Saturdays, Sundays, and Federal holidays from 12 midnight to 6 a.m., and if requested, one opening at 10 a.m., one opening at 1 p.m., and one opening at 9 p.m. The bridge will open for all commercial vessels with 2 hours notice on Saturdays, Sundays, and Federal holidays from 12 midnight to 6 a.m., 9 a.m. to 2 p.m., and from 7 p.m. to 12 midnight.

Alternative A was rejected because that is the existing permanent regulation, and it is clear that we cannot revert to that relatively less restrictive opening schedule under current circumstances. This alternative results in higher vehicle delays and lower vessel delays than any of the other alternatives. It provides the least reasonable balance between vehicles being delayed for bridge openings and delay costs to vessels transiting the bridge.

Alternative F was rejected because it severely restricts vessel traffic on the river producing an unreasonable balance between vessel and vehicle delay costs. This alternative would also require annual dredging costs of $117,000 which could have adverse environmental impacts and excludes the larger recreational vessels from transiting the bridge. The Coast Guard considers it unreasonable to deny access to waterfront areas of Virginia and the District of Columbia by recreational vessels unable to transit the bridge in a closed position.

Alternatives I, J, L, LA, and LB all were rejected as unreasonable because each schedule provides no midday opening for commercial or recreational vessels on weekends. Alternative I provides no opening on weekdays either. Alternatives J, L, and LB also provide three hour midday windows of opening opportunity for recreational vessels on weekdays. These windows can result in multiple openings within a short time period causing severe and undesirable vehicle traffic disruption. Since the vast majority of openings of the Woodrow Wilson Bridge have been shown to be for recreational vessels, multiple opening opportunities for these vessels during windows of time as opposed to point openings at one specified hour would be far more disruptive to vehicular traffic. Resumption of normal traffic flow can take many more hours to occur under a multiple opening scenario, as opposed to the time required with a single predetermined opening time.

Alternative B was rejected because it also provides window openings for recreational vessels on weekdays and weekends.

Alternative N avoided peak traffic hours and allowed for midday openings for both recreational and commercial (including deep draft commercial) vessels. However, it provided for opening windows up to 5 a.m. on weekdays which is when peak traffic has already begun. Additionally, Alternative N restricted vessels in the evenings between 7 p.m. and 9 p.m. when traffic was declining and on weekends between 6 a.m. and 9 a.m. when traffic density was low. These

1991
UMI

restrictions added substantially to vessel delay costs which resulted in rejection of Alternative N.

Discussion of Proposed Regulations

This elimination process left Alternatives NA and P for consideration. While each of these alternatives strikes a balance between highway and vessel needs, the Coast Guard has chosen to propose Alternative NA as being the most equitable balance of openings in this give and take situation. Both alternatives allow midday openings weekdays and weekends and windows of openings only up to 4 a.m. on weekdays, thereby avoiding openings during and just prior to peak morning traffic hours. However, Alternative P provides five point openings for recreational vessels as opposed to three point openings under Alternative NA. Although the majority of openings of the Woodrow Wilson Bridge are for recreational vessels, Alternative NA is preferred over Alternative P because it substantially reduces potential vehicular delay costs caused by additional openings while still providing reasonable access for recreational vessels.

Since the number of commercial vessels transiting the river on a yearly basis (freighters, tugs, Navy, Coast Guard, etc.) is known to remain low and fairly constant from year-to-year, any schedule that allows reasonable access to the river for these vessels to conduct their business while avoiding peak vehicular periods should have little effect on highway traffic. Alternative NA doubles the length of no opening periods provided by the current published regulations on weekdays from 2½ hours to 5 hours during both morning and afternoon/evening peak traffic periods. Under the current published regulations, unlimited openings are available on signal for all vessels on Saturdays, Sundays, and Federal holidays twenty-four hours a day. Alternative NA will reduce the number of hours available for openings for recreational vessels on weekends from twenty-four to eight, a 66% decrease; for commercial vessels a reduction in the number of hours from 24 to 19, approximately a 21% decrease. As compared to the present permanent rule and many of the alternatives considered, Alternative NA will reduce the number of opening opportunities for recreational vessels which have been shown to cause the majority of openings, while still providing these vessels reasonable access to the river and keeping available opening times well away from peak traffic hours.

Alternative NA appears to meet all the Coast Guard's criteria for a regulation that reasonably balances the needs of both highway and vessel traffic, and should substantially improve vehicular traffic problems directly attributable to bridge openings. Alternative NA has two distinct advantages over other alternatives considered. First, due to the recreational vessel point openings, the total number of openings will be greatly reduced, probably about 50% or more. Second, the remaining openings will occur during less disruptive times than in the past.

During the period from June 1, 1991 through July 30, 1991, a temporary schedule identical to that of Alternative P was placed in effect for the Woodrow Wilson Bridge to see if that schedule resulted in substantial improvements in vehicular traffic flow without unreasonably restricting marine traffic. A review of the bridgetender's logs from the period June 1, 1991, through June 30, 1991, showed approximately a 50% decrease in the number of bridge openings compared to the number of bridge openings during the same period in 1990 when the existing permanent regulation was in effect. This data also showed approximately a 60% decrease in the number of openings for recreational boats under the temporary rule compared to the permanent rule in effect last June.

On July 31, 1991 a temporary schedule identical to Alternative NA was placed in effect for a period of 60 days. On September 29, 1991 a slight modification of the temporary schedule effective on July 31, 1991 was placed into effect for a period of 60 days. This schedule is essentially Alternative NA except that the noon opening opportunities for recreational vessels were moved to 11 a.m. The Coast Guard will evaluate all the temporary schedules placed in effect after June 1, 1991 as data becomes available.

Regulatory Evaluation

This proposal is not a major under Executive Order 12291 but is considered significant under the Department of Transportation Regulatory Policies and Procedures (44 FR 11040; February 26, 1979) due to the high level of public interest in the operation of the drawbridge.

A draft Regulatory Impact Analysis is available in the docket for inspection or copying where indicated under **ADDRESSES.** Under Alternative A which is the current published regulation, the delay cost to vehicular traffic is estimated to be $1,327,000. Under Alternative NA, delay costs to vehicular traffic would be $981,000, an estimated savings of $346,000 in delay costs for vehicular traffic in comparison to the existing regulation. The Coast Guard considers this a conservative estimate. Others have estimated the savings in delay costs to be as great as $1,500,000. Under Alternative NA, estimated delay costs for vessels would be $134,000, an estimated net increase of $94,000 in delay costs for vessels incomparison to the existing permanent regulation (Alternative A). Highway accident costs associated with the bridge openings are estimated to be $110,000 annually under Alternative NA, a decrease of $40,000 from the existing regulation. The Coast Guard is cooperating with the responsible highway agencies to implement accident avoidance strategies that are anticipated to further reduce accidents and their related costs.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the U.S. Coast Guard must consider whether proposed rules will have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632). The impact of the commercial vessel delays will not affect small entities. The impact of the vehicle delays is spread over such a large number of vehicles that the impact on any small entity is minimal.

Because it expects the impact of this proposal to be minimal, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposal, if adopted, will not have a significant economic impact on a substantial number of small entities.

Collection of Information

This proposal contains no collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Federalism

The Coast Guard has analyzed this proposal in accordance with the principles and criteria contained in Executive Order 12612 and has determined that this proposal does not raise sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environment

The Coast Guard considered the environmental impact of this proposal and concluded that preparation of an environmental impact statement is not necessary. An environmental assessment was prepared in accordance with Commandant Instruction M16475.1B and is in compliance with the National Environmental Policy Act of 1969 (Pub. L. 91–190) and the Council on Environmental Quality Regulations dated November 29, 1978. All of the alternative have negligible, if any, impacts on the environment. None of the proposed bridge opening alternative are expected to have a significant effect on the human environment. The Environmental Assessment and a Finding of No Significant Impact are available for inspection or copying where indicated under **ADDRESSES.**

List of Subjects in 33 CFR Part 117

Bridge.

For the reasons set out in the preamble, the Coast Guard proposes to amend 33 CFR part 117, to read as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g).

2. Section 117.255, paragraph (a)(2) is revised to read as follows:

§ 117.255 Potomac River.

(a) * * *

(1) * * *

(2) Need not open:

(i) Except as provided in paragraph (a)(1) of this section, for the passage of any vessel unless at least two hours advance notice is given to the bridgetender at (202) 727–5522.

(ii) For the passage of any vessel from 4 a.m. to 9 a.m. and from 2 p.m. to 7 p.m., on Mondays through Fridays other than Federal holidays.

(iii) For the passage of any vessel from 2 p.m. to 7 p.m. on Saturdays, Sundays, and Federal holidays.

(iv) For the passage of recreational vessels from 4 a.m. to 12 midnight with the exception of one opening at 12 noon, if requested, on Mondays through Fridays other than Federal holidays.

(v) For the passage of recreational vessels from 6 a.m. to 12 midnight with the exception of one opening at 12 noon, if requested, and one opening at 9 p.m., if requested, on Saturdays, Sundays, and Federal holidays.

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

31 CFR Part 550

LIBYA SANCTIONS REGULATIONS

AGENCY: Office of Foreign Assets Control, Department of the Treasury.

ACTION: Final rule, amendments.

SUMMARY: The Office of Foreign Assets Control is amending the Libyan Sanctions Regulations by revoking a general license which authorized transfers to the Government of Libya between offshore third-country banks to be cleared through domestic banks in the United States. With the revocation of this general license, any transfer instructions indicating a direct or indirect interest of the Government of Libya, including routing through a Libyan government-controlled financial institution to persons or companies in Libya, require the U.S. bank holding the instructions to deposit the funds into a blocked account. All funds in which a direct or indirect Libyan government interest is indicated and which come into the possession or control of any

of law regardless of their origin or destination unless licensed by the Office of Foreign Assets Control. This action is being taken to further tighten sanctions against Libya due to continuing Libyan support for terrorism.

EFFECTIVE DATE: 10:00 p.m., EST, December 19, 1991

FOR FURTHER INFORMATION CONTACT: William B. Hoffman, Chief Counsel, tel.: (202) 535-6020, or Steven I. Pinter, Chief of Licensing, tel.: (202) 535-9449, Office of Foreign Assets Control, Department of the Treasury, Washington, D.C. 20220.

SUPPLEMENTARY INFORMATION: The Libyan Sanctions Regulations, 31 C.F.R. Part 550 (the "Regulations"), were issued by the Treasury Department in implementation of Executive Order 12543 of January 7, 1986 (51 FR 865, January 9, 1986) and Executive Order 12544 of January 8, 1986 (51 FR 1235, January 10, 1986). Section 550.514 of the Regulations, revoked by this final rule, permitted transfers between two non-Libyan foreign banks located outside of the United States to clear through accounts located in the United States for ultimate credit to the Government of Libya.

VOL
56
ISS
245
DE
20
1991
UMI

Effective at 10:00 p.m., EST, December 19, 1991, instructions held or received by domestic banks for unlicensed transactions involving property in which a Libyan government interest is indicated must result in the deposit of the funds into a blocked account pursuant to §§ 550.209 and 550.511 of the Regulations. Similarly, where the transfer instructions indicate an unlicensed transfer through a Government of Libya-controlled financial institution, regardless of the remitter or ultimate beneficiary, the funds are blocked by operation of law pursuant to Executive Order 12544 and § 550.209 of the Regulations. The blocking requirements apply to all domestic banks, including U.S. branches and subsidiaries of foreign banks, and foreign branches of banks organized under the laws of any U.S. jurisdiction, and to all other U.S. persons. Regulations, §§ 550.209, 550.308, 550.317. The action taken in this final rule will impede Libya's ability to use U.S. dollars as the primary currency for oil trading and other purposes.

Because the Regulations involve a foreign affairs function, Executive Order 12291 and the provisions of the Administrative Procedure Act, 5 U.S.C. 553, requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date, are inapplicable. Because no notice of proposed

rulemaking is required for this rule, the Regulatory Flexibility Act, 5 U.S.C. 601 et seq., does not apply.

List of Subjects in 31 C.F.R. Part 550: Banks and banking, Blocking of assets, Libya, Reporting and recordkeeping requirements

For the reasons set forth in the preamble, 31 CFR chapter V, part 550, is amended as set forth below:

PART 550--LIBYAN SANCTIONS REGULATIONS

1. The "Authority" citation for part 550 continues to read as follows:

Authority: 50 U.S.C. 1701 et seq.; E.O. 12543, 51 FR 875, January 9, 1986; E.O. 12544, 51 FR 1235, January 10, 1986.

LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 202–523–6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–2470).

S. 1193/Pub. L. 102–238

Technical Amendments to Various Indian Laws Act of 1991. (Dec. 17, 1991; 105 Stat. 1908; 4 pages) Price: $1.00

S. 1891/Pub. L. 102–239

To permit the Secretary of Health and Human Services to waive certain recovery requirements with respect to the construction or remodeling of facilities, and for other purposes. (Dec. 17, 1991; 105 Stat. 1912; 2 pages) Price: $1.00

Last List December 18, 1991

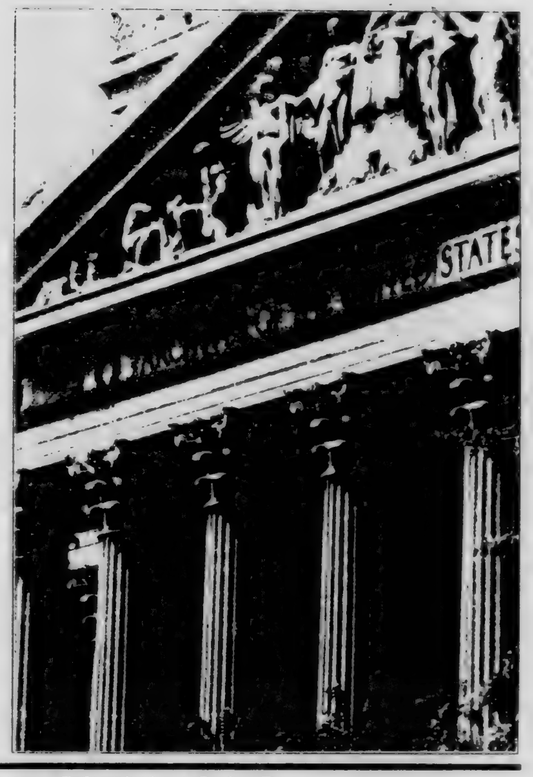
Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected



The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected. $21.00 per year

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references. $19.00 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers
FR Indexes and the LSA (List of CFR Sections Affected) are mailed automatically to regular FR subscribers.

The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**

Administration of George Bush

This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, personnel appointments and nominations, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue contains an Index of Contents and a Cumulative Index to Prior Issues.

Separate indexes are published periodically. Other features include lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements.

Published by the Office of the Federal Register, National Archives and Records Administration.

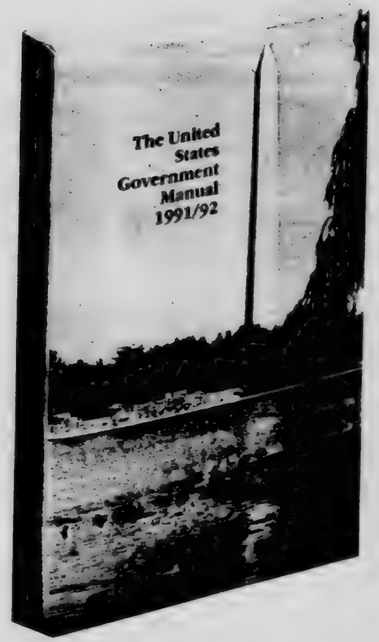
The United States Government Manual 1991/92



As the official handbook of the Federal Government, the *Manual* is the best source of information on the activities, functions, organization, and principal officials of the agencies of the legislative, judicial, and executive branches. It also includes information on quasi-official agencies and international organizations in which the United States participates.

Particularly helpful for those interested in where to go and who to see about a subject of particular concern is each agency's "Sources of Information" section, which provides addresses and telephone numbers for use in obtaining specifics on consumer activities, contracts and grants, employment, publications and films, and many other areas of citizen interest. The *Manual* also includes comprehensive name and agency/subject indexes.

Of significant historical interest is Appendix C, which lists the agencies and functions of the Federal Government abolished, transferred, or changed in name subsequent to March 4, 1933.

The *Manual* is published by the Office of the Federal Register, National Archives and Records Administration.

New edition .... Order now !

For those of you who must keep informed about **Presidential Proclamations and Executive Orders,** there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period April 13, 1945, through January 20, 1989, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1945–1989 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

Published by the Office of the Federal Register, National Archives and Records Administration

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 56 FR 12345.

Title 3—

The President

Executive Order 12784 of December 19, 1991

Delegation of Authority Regarding the Naval Petroleum and Oil Shale Reserves

By the authority vested in me as President by the Constitution and the laws of the United States of America, including section 301 of title 3 and sections 7427 and 7428 of title 10 of the United States Code, and in order to meet the goals and requirements of the Naval Petroleum and Oil Shale Reserves, it is hereby ordered as follows:

Section 1. The functions vested in the President by sections 7427 and 7428 of title 10 of the United States Code are delegated to the Secretary of Energy.

Sec. 2. On or before June 30, 1994, the Secretary of Energy shall prepare and submit to the President a comprehensive report of the agreements and programs executed under the authority granted under this order. The authority delegated herein expires on October 2, 1994.

Rules and Regulations

Federal Register
Vol. 56, No. 246
Monday, December 23, 1991

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 907

[Navel Orange Regulation 725]

Navel Oranges Grown in Arizona and Designated Part of California

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of California-Arizona navel oranges that may be shipped to domestic markets during the period from December 20 through December 26, 1991. Consistent with program objectives, such action is needed to establish and maintain orderly marketing conditions for fresh California-Arizona navel oranges for the specified week. Regulation was recommended by the Navel Orange Administrative Committee (Committee), which is responsible for local administration of the navel orange marketing order.

EFFECTIVE DATES: Regulation 725 (7 CFR part 907) is effective for the period from December 20 through December 26, 1991.

FOR FURTHER INFORMATION CONTACT: Christian D. Nissen, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, room 2523–S, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 720–1754.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Order No. 907 (7 CFR part 907), as amended, regulating the handling of navel oranges grown in Arizona and designated part of California. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended, hereinafter referred to as the "Act."

This final rule has been reviewed by the Department of Agriculture (Department) in accordance with Departmental Regulation 1512–1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of the use of volume regulations on small entities as well as larger ones.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 130 handlers of California-Arizona navel oranges subject to regulation under the navel orange marketing order and approximately 4,000 navel orange producers in California and Arizona. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.601) as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. The majority of handlers and producers of California-Arizona navel oranges may be classified as small entities.

The California-Arizona navel orange industry is characterized by a large number of growers located over a wide area. The production area is divided into four districts which span Arizona and part of California. The largest proportion of navel orange production is located in District 1, Central California, which represented about 79 percent of the total production in 1990–91. District 2 is located in the southern coastal area of California and represented almost 18 percent of 1990–91 production; District 3 is the desert area of California and Arizona, and it represented slightly less than 3 percent; and District 4, which represented slightly less than 1 percent, is northern California. The Committee's revised estimate of 1991–92 production is 64,600 cars (one car equals 1,000 cartons at 37.5 pounds net weight each), as compared with 32,895 cars during the 1990–91 season.

The three basic outlets for California-Arizona navel oranges are the domestic fresh, export, and processing markets. The domestic fresh (regulated) market is a preferred market for California-Arizona navel oranges while the export market continues to grow. The Committee has estimated that about 68 percent of the 1991–92 crop of 64,600 cars will be utilized in fresh domestic channels (43,650 cars), with the remainder being exported fresh (14 percent), processed (16 percent), or designated for other uses (2 percent). This compares with the 1990–91 total of 16,675 cars shipped to fresh domestic markets, about 51 percent of that year's crop. In comparison to other seasons, 1990–91 production was low because of a devastating freeze that occurred during December 1990.

Volume regulations issued under the authority of the Act and Marketing Order No. 907 are intended to provide benefits to producers. Producers benefit from increased returns and improved market conditions. Reduced fluctuations in supplies and prices result from regulating shipping levels and contribute to a more stable market. The intent of regulation is to achieve a more even distribution of oranges in the market throughout the marketing season.

Based on the Committee's marketing policy, the crop and market information provided by the Committee, and other information available to the Department, the costs of implementing the regulations are expected to be more than offset by the potential benefits of regulation.

Reporting and recordkeeping requirements under the navel orange marketing order are required by the Committee from handlers of navel oranges. However, handlers in turn may require individual producers to utilize certain reporting and recordkeeping practices to enable handlers to carry out their functions. Costs incurred by handlers in connection with recordkeeping and reporting requirements may be passed on to growers.

Major reasons for the use of volume regulations under this marketing order are to foster market stability and

VOL
56
ISS
246
DE
23
1991
UMI

enhance producer revenue. Prices for navel oranges tend to be relatively inelastic at the producer level. Thus, even a small variation in shipments can have a great impact on prices and producer revenue. Under these circumstances, strong arguments can be advanced as to the benefits of regulation to producers, particularly smaller producers.

The Committee adopted its marketing policy for the 1991–92 season on June 25, 1991. The Committee reviewed its marketing policy at district meetings as follows: Districts 1 and 4 on September 24, 1991, in Visalia, California; and District 2 and 3 on October 1, 1991, in Ontario, California. The Committee subsequently revised its marketing policy at a meeting on October 15, 1991. The marketing policy discussed, among other things, the potential use of volume and size regulations for the ensuing season. The Committee considered the use of volume regulation for the season. This marketing policy is available from the Committee or Mr. Nissen. The Department reviewed that policy with respect to administrative requirements and regulatory alternatives in order to determine if the use of volume regulations would be appropriate.

The Committee met publicly on December 17, 1991, in Newhall, California, to consider the current and prospective conditions of supply and demand and recommended, with 7 members voting in favor, 3 opposing, and 1 abstaining, that 800,000 cartons is the quantity of navel oranges deemed advisable to be shipped to fresh domestic markets during the specified week. The marketing information and data provided to the Committee and used in its deliberations was compiled by the Committee's staff or presented by Committee members at the meeting. This information included, but was not limited to, price data for the previous week from Department market news reports and other sources, preceding week's shipments and shipments to date, crop conditions and weather and transportation conditions.

The Department reviewed the Committee's recommendation in light of the Committee's projections as set forth in its 1991–92 marketing policy. The recommended amount of 800,000 cartons compares to the 900,000 specified in the Committee's shipping schedule. However, the Department, based on its independent analysis, and information provided by the Committee, has revised the recommendation and established volume regulation in the amount of 950,000 cartons. Of the 950,000 cartons, 91.11 percent or 865,545 cartons are allotted for District 1, and 8.89 percent or 84,455 cartons are allocated for District 3. Handlers in Districts 2 and 4 will not be regulated as they are not shipping a sufficient quantity of navel oranges to warrant volume regulation at this point in the season.

During the week ending on December 12, 1991, shipments of navel oranges to fresh domestic markets, including Canada, totaled 2,030,000 cartons compared with 2,252,000 cartons shipped during the week ending on December 13, 1990. Export shipments totaled 151,000 cartons compared with 220,000 cartons shipped during the week ending on December 13, 1990. Processing and other uses accounted for 356,000 cartons compared with 489,000 cartons shipped during the week ending on December 13, 1990.

Fresh domestic shipments to date this season total 6,372,000 cartons compared with 9,527,000 cartons shipped by this time last season. Export shipments total 833,000 cartons compared with 1,035,000 cartons shipped by this time last season. Processing and other use shipments total 1,236,000 cartons compared with 2,042,000 cartons shipped by this time last season.

For the week ending December 12, 1991, regulated shipments of navel oranges to the fresh domestic market were 2,017,000 cartons on a adjusted allotment of 2,077,000 cartons which resulted in net undershipments of 60,000 cartons. Regulated shipments for the current week (December 13 through December 19) are estimated at 1,900,000 cartons on an adjusted allotment of 1,829,000 cartons. Thus, overshipments of 71,000 cartons could be carried forward into the week ending on December 26, 1991.

The average f.o.b. shipping point price for the week ending on December 12, 1991, was $10.08 per carton based on a reported sales volume of 1,619,000 cartons. The season average f.o.b. shipping point price to date is $10.47 per carton. The average f.o.b. shipping point prices for the week ending on December 13, 1990, was $8.58 per carton; the season average f.o.b. shipping point price at this time last year was $9.24.

The Department's Market News Service reported that, as of December 17, demand for first grade 72–88s sizes is moderate, very good for other sizes. Prices for first grade 56s are slightly higher, while prices for other sizes are reported as about steady.

Committee members discussed implementing volume regulation at this time, as well as different levels of allotment. It was reported that poor weather conditions are hampering harvesting in District 1, and that maturity problems are continuing to affect some districts. Due to these problems, several members stated they expected carryovers from the week ending December 19. Another member stated that demand will be limited due to Christmas. It was also recommended that Districts 2 and 4 remain open in light of the relatively small early maturity requests. Three Committee members favored open movement at this time, while the majority of Committee members favored the issuance of general maturity allotment.

According to the National Agricultural Statistics Service, the 1990–91 season average fresh equivalent on-tree price for California-Arizona navel oranges was $7.75 per carton, 119 percent of the season average parity equivalent price of $6.52 per carton.

Based upon fresh utilization levels indicated by the Committee and an econometric model developed by the Department, the 1991–92 season average fresh on-tree price is estimated at $6.33 per carton, about 85 percent of the estimated fresh on-tree parity equivalent price of $7.44 per carton.

Limiting the quantity of navel oranges that may be shipped during the period from December 20, through December 26, 1991, would be consistent with the provisions of the marketing order by tending to establish and maintain, in the interest of producers and consumers, an orderly flow of navel oranges to market.

Based on considerations of supply and market conditions, and the evaluation of alternatives to the implementation of this volume regulation, the Administrator of the AMS has determined that this final rule will not have a significant economic impact on a substantial number of small entities and that this action will tend to effectuate the declared policy of the Act.

A proposed rule regarding the implementation of volume regulation and a proposed shipping schedule for California-Arizona navel oranges for the 1991–92 season was published in the September 30, 1991, issue of the **Federal Register** (56 FR 49432). The Department is currently in the process of analyzing comments received in response to this proposal and, if warranted, may finalize that action this season. However, issuance of this final rule implementing volume regulation for the regulatory week ending on December 26, 1991, does not constitute a final decision on that proposal.

Pursuant to 5 U.S.C. 553, it is further found and determined that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register**. This is because there is insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the Act.

In addition, market information needed for the formulation of the basis for this action was not available until December 17, 1991, and this action needs to be effective for the regulatory week which begins on December 20, 1991. Further, interested persons were given an opportunity to submit information and views on the regulation at an open meeting, and handlers were apprised of its provisions and effective time. It is necessary, therefore, in order to effectuate the declared purposes of the Act, to make this regulatory provision effective as specified.

List of Subjects in 7 CFR Part 907

Marketing agreements, Oranges, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 907 is amended as follows:

PART 907—[AMENDED]

1. The authority citation for 7 CFR part 907 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 907.1025 is added to read as follows:

Note: This section will not appear in the Code of Federal Regulations.

§ 907.1025 Navel Orange Regulation 725.

The quantity of navel oranges grown in California and Arizona which may be handled during the period from December 20 through December 26, 1991, is established as follows:

(a) District 1: 865,545 cartons;
(b) District 2: unlimited cartons;
(c) District 3: 84,455 cartons;
(d) District 4: unlimited cartons.

Dated: December 18, 1991.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division.

DEPARTMENT OF TRANSPORATION

Federal Aviation Administration

14 CFR Parts 71 and 73

[Airspace Docket No. 90-AWP-2]

Establishment of Restricted Areas R-2535A and R-2535B; San Nicolas Island, CA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action establishes Restricted Areas R-2535A and R-2535B San Nicolas Island, CA. Currently, Warning Area W-289 overlies San Nicolas Island. Because the U.S. Government owns the Island, and the Navy controls it, the airspace over and within 12 miles of San Nicolas Island is U.S. domestic airspace. A restricted area is, therefore, the appropriate airspace designation. The Continental Control Area is also amended to include both areas.

VOL

UMI

EFFECTIVE DATE: 0901 U.T.C., March 5, 1992.

FOR FURTHER INFORMATION CONTACT: Linda Ullom, Military operations Program Office (ATM–420), Office of Air Traffic System Management, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267–7683.

SUPPLEMENTARY INFORMATION:

History

On July 31, 1990, the FAA proposed to amend parts 71 and 73 of the Federal Aviation Regulations (14 CFR parts 71 and 73) to establish restricted areas R–2535A and R–2535B and to amend the Continental Control Area to include both areas (55 FR 31066). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, these amendments are the same as those proposed in the notice. Sections 71.151 and 73.25 of parts 71 and 73 of the Federal Aviation Regulations were republished in FAA Handbook 7400.7 and FAA Handbook 7400.8 dated November 1, 1991.

The Rule

These amendments to parts 71 and 73 of the Federal Aviation Regulations establish Restricted Areas R–2535A and R–2535B, San Nicolas Island, CA. Currently, warning area W–289 overlies San Nicolas Island. The U.S. Government owns the island, and the U.S. Navy controls the land. Therefore, the airspace over and within 12 miles of San Nicolas Island is domestic airspace and a restricted area is the appropriate airspace designation. Activities to be conducted in the restricted areas are the same as those currently being conducted in the warning area. They include simulated weapons deliveries, bombing profiles, ground based missile intercept missions, special meteorological sampling rocket launches, and ground and airborne based laser weapons tests. The Continental Control Area is amended to include R–2535A and R–2535B. Additionally, W–289 is amended by separate action to exclude the airspace which coincides with R–2535A and R–2535B.

Environmental Review

In compliance with the National Environmental Policy Act of 1969 (NEPA), the U.S. Navy evaluated the environmental impacts resulting from the establishment of Restricted Areas R–2535A and R–2535B. The Navy determined the impacts to be negligible, and also determined that the action qualified for a categorical exclusion from environmental review under the Navy's procedures. Accordingly, the reasons for the categorical exclusion were documented, and further environmental assessment was not accomplished. The activities to be conducted in the new restricted areas are identical to the activities currently conducted in the same airspace. The action will have no effect other than maintenance of the status quo, either on the airspace included in the restricted areas, or on surrounding airspace and air routes used for the handling of civil air traffic by ATC. The controlling agency, the Los Angeles Air Route Traffic Control Center, does not routinely route traffic through the area. Accordingly, the establishment of the restricted areas will have no effect on current air traffic procedures or on the routing or altitude of civil aircraft operations in the area.

Based upon the environmental documentation developed by the Navy, no change in the Navy's activities in the area resulting from the establishment of R–2535A and R–2535B, and the FAA's review of the ATC procedures in effect in the area before and after adoption of the two restricted areas, the FAA finds that there will be no significant impact on the environment as a result of this action.

Conclusion

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Aviation safety, Continental control area, and Restricted areas.

Adoption of the Amendments

Accordingly, pursuant to the authority delegated to me, parts 71 and 73 of the Federal Aviation Regulations (14 CFR parts 71 and 73) are amended, as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, REPORTING POINTS, JET ROUTES, AND AREA HIGH ROUTES

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. App. 1348(a), 1354(a), 1510; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

§ 71.151 [Amended]

2. § 71.151 is amended as follows:

R–2535A San Nicolas Island, CA [New]

R–2535B San Nicolas Island, CA [New]

PART 73—SPECIAL USE AIRSPACE

3. The authority citation for part 73 continues to read as follows:

Authority: 49 U.S.C. App. 1348(a), 1354(a), 1510, 1522; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

§ 73.25 [Amended]

4. § 73.25 is amended as follows:

R–2535A San Nicolas Island, CA [New]

Boundaries: Beginning at lat. 33°20'10" N., long. 119°31'10" W.; to lat. 33°18'18" N., long. 119°26'29" W.; to lat. 33°10'10" N., long. 119°31'10" W.; to lat. 33°12'00" N., long 119°35' 30" W.; to lat. 33°14'20" N.; long. 119°37'40" W.; to lat. 33°16'40" N., long. 119°36'10" W.; to lat. 33°19'10" N., long. 119°37'10" W.; to the point of beginning.

Designated altitudes: Surface to 100,000 feet MSL.

Time of designation: 0600–2200 local time Monday–Friday; other times by NOTAM at least 24 hours in advance.

Controlling agency: FAA, Los Angeles ARTCC.

Using agency: U.S. Navy, Commander, Pacific Missile Test Center, Point Mugu, CA.

BILLING CODE 4910–13–M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 30

Foreign Futures and Option Transactions

AGENCY: Commodity Futures Trading Commission.

ACTION: Order.

SUMMARY: The Commodity Futures Trading Commission ("Commission") and the French Commission des Operations de Bourse ("COB") have amended the side letter dated June 6, 1990 between the Commission and the COB, which facilitates the operation of the Mutual Recognition Memorandum of Understanding between the Commission and the COB. Specifically, the Commission and COB have agreed to revise paragraph 2 of the Side Letter to reflect the use of subordinated debt to fulfill net equity requirements for French firms.

EFFECTIVE DATE: December 23, 1991.

FOR FURTHER INFORMATION CONTACT: Jane C. Kang Esq., or Robert H. Rosenfeld, Esq., Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Telephone: (202) 254–8955.

SUPPLEMENTARY INFORMATION: On June 6, 1990, the Commodity Futures Trading Commission and the French Commission des Operation de Bourse entered into a Mutual Recognition Memorandum of Understanding ("MRMOU"). See 55 FR 23902 (June 13, 1990). This arrangement generally will permit all products of one jurisdiction to be offered to customers located in the other jurisdiction, subject to certain conditions specified in the MRMOU. Further, the arrangement will permit brokers licensed in one jurisdiction to sell the products of that jurisdiction to customers located in the other jurisdiction, generally by complying with the rules of the licensing jurisdiction, and with requirements agreed to by the Commission and the COB.

The Commission and COB also entered into a Side Letter dated June 6, 1990 ("Side Letter"), see 55 FR 23907, for the purpose of facilitating the operation of the MRMOU and to further clarify certain conditions imposed for the implementation of the MRMOU. Paragraph 2 of the Side Letter articulates certain requirements applicable to French and United States firms concerning prudential requirements which are a condition to the recognition of firms under the MRMOU. Among other matters, paragraph 2(a) of the Side Letter as agreed on June 6, 1990 stated that a member of the Marche a Terme International de France ("MATIF") firm must maintain net equity as required under the Conseil du Marche a Terme ("CMT") General Regulation provided that, according to such regulation, no subordinated debt or guarantee may be substituted for such net equity in order to meet the minimum capital requirements. See 55 FR at 23908.

By letter dated September 17, 1991 the COB notified the Commission that the CMT General Regulation establishing the French capital requirements (CMT Rule R86–01) had been amended by CMT Rule R91–20, July 23, 1991. Consistent with CMT rules, members of MATIF may use subordinated debt as regulatory capital.

The Commission believes that there is no reason why French firms may not, consistent with the MRMOU, utilize subordinated debt as regulatory capital as permitted under CMT rules, and has agreed with the COB to amend the Side Letter.

Accordingly, by this Order the Commission, consistent with Article VI of the MRMOU, the Commission is amending paragraph 2 of the Side Letter to the MRMOU to read as follows:

2. Prudential Requirements

(a) In the case of an Authorized Person, such Person will maintain net equity as required under the CMT General Regulation, provided that, according to such regulation, no guarantee may be substituted for such net equity in order to fulfill the minimum capital requirements, *i.e.*, (currently) FF 7.5 million for non clearing members, FF 50 million for individual clearing members, and FF 375 million for general clearing members, and provided, further, that, if a more stringent financial requirement is imposed by the European Economic Community on European investment firms, the Authorized Person will meet such requirement;

Commodity futures; commodity options; foreign futures and foreign options.

PARTS 30 [AMENDED]

17 CFR part 30 is amended as follows:

1. The authority citation for part 30 continues to read as follows:

Authority: Secs. 2(a)(1)(A), 4, 4c, and 8a of the Commodity Exchange Act, 7 U.S.C. 2, 6, 6c, and 12a.

APPENDIX C TO PART 30 [AMENDED]

2. Appendix C to part 30 is amended by revising the existing entry concerning Annex E to the Mutual Recognition Memorandum of Understanding in its entirety to read as follows:

Authorized Persons as designated in Annex E to the Mutual Recognition Memorandum of Understanding

FR date and citation: June 13, 1990, 55 FR 2390; December 23, 1991.

Issued in Washington, DC on December 17, 1991.

Jean A. Webb,

Secretary to the Commission.

BILLING CODE 6351–01–M

17 CFR Part 30

Foreign Futures and Option Transactions

AGENCY: Commodity Futures Trading Commission.

ACTION: Order.

SUMMARY: The Commodity Futures Trading Commission ("Commission") is issuing this Order pursuant to which option contracts on the Notional Bond, 3-month PIBOR and the 3-month EURODEM futures contracts traded on the Marche a Terme International de France ("MATIF") may be offered or sold to persons located in the United States. This Order is issued pursuant to: (1) Commission rule 30.3(a), 17 CFR 30.3(a) (1991), which makes it unlawful for any person to engage in the offer or sale of a foreign option product until the Commission, by order, authorizes such foreign option to be offered or sold in the United States; and (2) the procedures established in the Commission's Order issued on June 6, 1990, 55 FR 23902 (June 13, 1990) (Mutual Recognition Memorandum of Understanding ("MRMOU") with the French Commission des Operations de Bourse).

EFFECTIVE DATE: January 22, 1992.

FOR FURTHER INFORMATION CONTACT: Robert Rosenfeld, Esq., Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Telephone: (202) 254–8955.

SUPPLEMENTARY INFORMATION: The Commission has issued the following order:

VOL 56 ISS 246 DEC 23 1991 UMI

Order Pursuant to the Mutual Recognition Memorandum of Understanding with the French Commission des Operations de Bourse and Rule 30.3(a), Under Which Certain Option Contracts Traded on the Marche a Terme International de France may be Offered or Sold in the United States Thirty Days after Publication of this Notice in the Federal Register.

Pursuant to sections 2(a)(1), 4(b) and 4c of the Commodity Exchange Act ("Act"), 7 U.S.C. 2, 6(b) and 6c (1988), and part 30 of the Commission's Rules and Regulations, the Commission has entered into a Mutual Recognition Memorandum of Understanding ("MRMOU") with the French Commission des Operations de Bourse ("COB"). 55 FR 23902 (June 13, 1990). Among other things, this arrangement provides a mechanism pursuant to which certain option products traded on the Marche a Terme International de France ("MATIF") may be offered or sold to customers resident in the United States thirty days after publication in the Federal Register of a notice specifying the particular option contracts to be offered or sold.

By letters dated September 17 and October 2, 1991, respectively, the COB and MATIF requested that option contracts based on the Notional Bond, 3-month PIBOR and the 3-month EURODEM futures contracts be approved pursuant to the MRMOU for offer or sale in the United States. Based upon the foregoing, and pursuant to the terms of the MRMOU, the Commission hereby publishes this Order in the Federal Register pursuant to which the particular option contracts specified herein may be offered or sold thirty days after the publication of this Order.

Accordingly, pursuant to Commission rule 30.3(a), 17 CFR 30.3(a) (1991), and article II, paragraph 2(b) and article V, paragraph 8 of the MRMOU signed by the Commission on June 6, 1990 (55 FR 23902 (June 13, 1990)), and subject to the terms and conditions specified in the MRMOU, the Commission hereby issues this Order pursuant to which option contracts based on the Notional Bond, 3-month PIBOR and the 3-month EURODEM futures contracts traded on the MATIF may be offered or sold to persons located in the United States thirty days after publication of this Order in the Federal Register.

Lists of Subjects in 17 CFR Part 30

Commodity futures, Commodity options, Foreign commodity options.

Amendment of Appendix B

Accordingly, 17 CFR part 30 is amended as set forth below:

PART 30—FOREIGN FUTURES AND FOREIGN OPTIONS TRANSACTIONS

1. The authority citation for part 30 continues to read as follows:

Authority: Secs. 2(a)(1)(A), 4, 4c, and 8a of the Commodity Exchange Act, 7 U.S.C. 2, 6, 6c and 12a.

2. Appendix B to part 30 is amended by revising the following entry to read as follows:

APPENDIX B—OPTION CONTRACTS PERMITTED TO BE OFFERED OR SOLD IN THE U.S. PURSUANT TO § 30.3(a)

Exchange	Type of contract	FR date and citation
Marche a Terme International de France	Option Contracts on Notional Bond, 3-month PIBOR and 3-month EURODEM Futures Contracts.	December 23, 1991; 56 FR ____

Issued in Washington, DC on December 17, 1991.

Joan A. Webb,

Secretary of the Commission.

Editorial note: This contract will not appear in the Code of Federal Regulations.

Traded Option Contract on the Notional Bond

Option Type:

—American options.

—Buy options (calls) and sell options (puts).

Type of Operators:

In addition to the usual operators, there are "market-makers" who undertake to:

—quote the buy and sell premiums for each strike price open.

—issue upon request up to 20 option contracts for each quoted price.

Underlying Contract: A "notional bond" future.

Premium:

—The option price or premium is expressed as a percentage of the contract's nominal value to two decimal places.

—The premium is paid by the option buyer and is collected by the option seller.

Trading Unit: An option bears on one futures contract.

Quotation: Premium quotation.

Example: a premium of 2.15 is equivalent to 2.15%×500,000=10,750 FRF.

Minimum Price Movement (Tick): 0.01%×5,000,000=50 FRF.

Strike Price:

—When a delivery month begins trading, 9 strike prices are initially listed: the round strike price that is closest to the price of the underlying contract as well as the four immediately higher prices and the four immediately lower prices.

—The difference between two strike prices is set at 100 basis points.

Example: 87.00/88.00/89.00 . . .

Expiration Dates:

—The expiration dates correspond to the 4 quarterly delivery months of the notional bond futures contract (March, June, September and December).

—The close (or last quotation day) occurs on the last Friday of the month preceding the corresponding delivery month of the notional bond. (The last Thursday starting with the March 1991 delivery month.)

—A delivery month on the option contract is opened simultaneously with a delivery month on the futures contract.

Exercise Procedure:

—In case of exercise, the option seller must buy from (in the case of a put) or sell to (in the case of a call) the buyer a firm futures contract, at the option strike price.

—Options that are in-the-money on the option expiration date are automatically exercised.

—Options that are at-the-money and out-of-the-money on their expiration dates are automatically abandoned.

Trading Procedure: Open outcry: from 9:04 am to 4:30 pm.

There Is No Price Fluctuation Limit

Initial Margin:

MATIF S.A. has the option seller set aside an amount as initial margin corresponding to the loss that would result from the most unfavorable change in the liquidation of its overall net position in one trading day. This initial margin is revised on a daily basis.

NB: The characteristics described in this document were applicable on January 1, 1991, but are subject to modification.

Option Contract on Three-Month Eurodem

Option Type:

—American options.

—Buy options (calls) and sell options (puts).

Type of Operators:

In addition to the usual operators, there are some market-makers who undertake to:

—quote the buy and sell premiums for each open strike price,

—issue upon request up to 50 option contracts for each quoted price.

Underlying Contract: A "3-month Eurodem" future.

Premium:

—The option price, or premium, is expressed as a percentage of the nominal contract value, to three decimal places, by reference to the deposit duration, *i.e.*, 90 days.

—The premium is paid by the option buyer and is collected by the option seller.

Trading Unit: An option bears on one futures contract.

Quotation: Quotation of the premium.

Example: A premium of 0.655% is worth 0.00655×1,000,000×90/360=1,637.5 DM.

Minimum Price Movement (Tick): 0.005%×1,000,000×90/360=12.5 DM.

Strike Price:

—When a delivery month begins trading, 15 strike prices are initially listed: the strike price that is closest to the price of the underlying contract, the 7 immediately lower strike prices and the 7 immediately higher strike prices.

—The difference between two strike prices is set at 10 basis points.

Example: . . . 91.60/91.70/91.80/ . . .

Expiration Dates:

—The expiration dates correspond to the 4 quarterly delivery months of the 3-month Eurodem futures contract: March, June, September and December.

—Delivery months for options open and close simultaneously with delivery months for the underlying futures contract.

Exercise Procedure.

—If an option is exercised, the option seller must buy from (in the case of a put) or sell to (in the case of a call) the buyer a firm futures contract, at the option strike price

—Options that are "in-the-money" on the option expiration date are automatically exercised.

—Options that are "at-the-money" and "out-of-the-money" on their expiration dates are automatically abandoned.

Trading Procedure: Open outcry from 9:10 a.m. to 3:50 p.m.

No Daily Price Fluctuation Limit

Initial Margin:

MATIF S.A. has the option seller set aside, as initial margin, a sum corresponding to the loss that would result from the most unfavorable change in the liquidation value of the option seller's overall net-position for one trading day. This initial margin is revised daily.

NB: The characteristics described in this document are those applying on June 1, 1990, but they are subject to modification.

3-Month Pibor Traded Option Contract

Option Type:

—American options.

—Buy options (calls) and sell options (puts).

Type of Operators:

In addition to the usual operators, there are some market-makers who undertake to:

—Quote the buy and sell premiums for each open strike price,

—Issue upon request up to 20 option contracts for each quoted price.

Underlying Contract: A "3-month PIBOR" future.

Premium:

—The option price, or premium, is expressed as a percentage of the nominal contract value, to three decimal places, with reference to the deposit duration, *i.e.*, 90 days.

—The premium is paid by the option buyer and is collected by the option seller.

Trading Unit: An option bears on one futures contract.

Quotation: Premium quotation.

Example: a premium of 0.200% is worth 0.002%×5,000,000×90/360=2,500 FRF

Minimum Price Movement (Tick): 0.005%×5,000,000×90/360=62.50 FRF

Strike Price:

—When delivery month begins trading, 15 strike prices are initially listed: the strike price that is closest to the price of the underlying contract, as well as the 7 immediately lower prices and the 7 immediately higher.

—The difference between two strike prices is 10 basis points.

Example: . . . 92.00/92.10/92.20 . . .

Expiration Dates:

—The expiration dates of the options correspond to the four quarterly delivery months of the 3-month PIBOR futures contract: March, June, September and December.

—The opening and the closing of a delivery month for PIBOR options are simultaneous with those of the underlying futures contract.

Exercise Procedure:

—If an option is exercised, the option seller must buy from (in the case of a put) or sell to (in the case of a call) the buyer a firm futures contract at the option strike price.

—Options that are "in-the-money" on the option expiration date are automatically exercised.

—Options that are "at-the-money" and "out-of-the-money" on their expiration dates are automatically abandoned.

Trading Procedure: Open outcry from 9 am to 3:30 pm.

There is no Daily Price Fluctuation Limit

Initial Margin:

MATIF S.A. calls from the option seller an amount corresponding to the loss that would result from the most unfavorable change in the liquidation value of the seller's overall net position in one trading day. This initial margin is revised daily.

NB: The characteristics described in this document are those applying on June 1, 1990, but are subject to modification.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 3

[Docket No. 91N-0257]

Assignment of Agency Component for Review of Premarket Applications; Extension

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule; extension of comment period.

SUMMARY: The Food and Drug Administration (FDA) is extending to February 21, 1992, the period for submission of comments on the final rule for assignment of agency component for review of premarket applications (56 FR 58754, November 21, 1991). FDA is taking this action in response to a request to extend the comment period for an additional 60

VOL
56
ISS
246
DEC
23
1991
UMI

days to allow more time to comment on this rule.

DATES: Written comments by February 21, 1992.

ADDRESSES: Submit written comments to the Docket Management Branch (HFA–305), Food and Drug Administration, Rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Edwin V. Dutra, Jr., Office of the Commissioner (HF–7), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–1306.

SUPPLEMENTARY INFORMATION: In the Federal Register of November 21, 1991 (56 FR 58754), FDA issued a final rule describing how the agency will determine which component within FDA will have primary jurisdiction for the premarket review and regulation of: (1) A combination drug, device, or biologic product or (2) any drug, device, or biologic product where the center with primary jurisdiction is unclear or in dispute. This rule describes how to identify the agency's assigned review component which will, in most cases, eliminate the need for a sponsor to obtain approval from more than one FDA component for a combination product. The rule became effective on the date of publication, however, comments could be submitted on the rule through December 23, 1991.

On December 10, 1991, the Health Industry Manufacturers Association (HIMA) requested a 60-day extension in which to file written comments. HIMA contended that the extension was necessary because the final rule has widespread ramifications and it will take the additional time to assemble the interested parties and provide meaningful comments. HIMA's membership includes many firms that will be directly affected by the final rule.

FDA has carefully considered the request by HIMA. The agency believes that the additional time for the preparation and submission of meaningful comments from affected firms is in the public interest. The agency also notes that, because this is a final rule already in effect, the additional time for comments will not delay implementation of the Congressionally mandated procedures contained in the rule. Therefore, interested persons may, on or before February 21, 1992, submit to the Dockets Management Branch (address above) written comments on this rule. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Comments received may be seen in the office above between 9 a.m. and 4 p.m., Monday though Friday.

Dated: December 17, 1991.

Michael R. Taylor,

Deputy Commissioner for Policy.

Treatment of Partnership Liabilities

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations and removal of temporary regulations.

SUMMARY: This document contains final regulations relating to the treatment of partnership liabilities. The final regulations reflect changes to the applicable tax law made by section 79 of the Tax Reform Act of 1984. The regulations affect partnerships and their partners, and are necessary to provide them with guidance needed to comply with the applicable tax law.

EFFECTIVE DATE: These regulations are effective December 28, 1991, and generally apply to liabilities incurred or assumed by a partnership on or after December 28, 1991.

FOR FURTHER INFORMATION CONTACT: Mary A. Berman at (202) 566–3440 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in these final regulations has been reviewed and approved by the Office of Management and Budget in accordance with the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)) under control number 1545–1090. The estimated annual burden per respondent varies from 3 minutes to 8 minutes, depending on individual circumstances, with an estimated average of 5 minutes.

The estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents may require greater or less time, depending on their particular circumstances.

Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be directed to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, T:FP, Washington, DC 20224 and to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503.

Introduction

This document adds new regulation §§ 1.752–0 through 1.752–5 to the Income Tax Regulations (26 CFR part 1) under section 752 of the Internal Revenue Code of 1986 and removes existing §§ 1.752–0T through 1.752–4T.

Background

Proposed and temporary regulations under section 752 were published on December 30, 1988, and amended on November 21, 1989, and July 26, 1991, ("temporary regulations"). This document removes the temporary regulations effective December 27, 1991. On July 26, 1991, the Internal Revenue Service published proposed regulations simplifying the temporary regulations and addressing several issues raised by commentators with respect to the temporary regulations. Written comments were received and a public hearing was held on September 17, 1991.

Explanation of Provisions

I. Sharing Recourse Liabilities

The final regulations provide that a partnership liability is a recourse liability to the extent that any partner bears the economic risk of loss for that liability, and a partner's share of any recourse liability of the partnership equals the portion, if any, of the economic risk of loss for the liability that is borne by the partner. The final regulations also provide that a partner bears the economic risk of loss for partnership liability to the extent that the partner or related person would be obligated to make a contribution or payment with respect to a partnership liability (and would not be entitled to be reimbursed for the contribution or payment by another partner, a person related to another partner, or the partnership) if the partnership constructively liquidates. In a constructive liquidation the following events are deemed to occur: (A) All of the partnership's liabilities become due and payable in full, (B) with the exception of property contributed to secure a partnership liability, all of the partnership's assets (including money) become worthless, (C) the partnership disposes of all of its assets in a fully taxable transaction for no consideration (other than relief from certain liabilities), (D) the partnership allocates its items of income, gain, loss, deduction, and credit for the year among the partners, and (E) the partnership completely liquidates. The constructive liquidation approach is used to determine who bears the economic risk of loss for a partnership liability taking into account the manner in which the partners have agreed to share economic losses and taking into account all arrangements among the partners, related persons, and the partnership.

II. Sharing Nonrecourse Liabilities

The final regulations provide that, if no partner bears the economic risk of loss for a partnership liability, the liability is a nonrecourse liability of the partnership. The partners generally share nonrecourse liabilities in accordance with their interests in partnership profits. However, the final regulations require that the nonrecourse liabilities of a partnership be allocated among the partners first to reflect the partners' shares of any partnership minimum gain (within the meaning of section 704(b)) and any gain that would be allocated to the partners under section 704(c) (or in the same manner as section 704(c) in connection with a revaluation of partnership property) if the partnership disposed of (in a taxable transaction) all partnership property subject to one or more nonrecourse liabilities of the partnership in full satisfaction of the liabilities and for no other consideration.

III. Modifications To Proposed Regulations

After full consideration of the comments and the statements made at the public hearing, the following actions were taken with respect to the proposed regulations issued on July 26, 1991:

A. Guarantee of Interest Rule

Section 1.752–2(e) of the proposed and final regulations contains a guarantee of interest rule generally providing that if one or more partners guarantee the payment of more than 25 percent of the total interest that will accrue on an otherwise nonrecourse partnership liability during its term, the loan is deemed to be recourse to those partners to the extent of the present value of the guaranteed future interest payments. To the extent that the guarantee of interest is subject to a contingency, the principles of § 1.752–2(b)(4) apply.

The final regulations added a de minimis exception to the guarantee of interest rule that generally parallels the de minimis exception to the rule for a guarantee of a nonrecourse loan by a partner or related person.

B. Economic Risk of Loss Analysis

Section 1.752–2(b)(2) of the proposed regulations provides that, for purposes of the constructive liquidation analysis, gain or loss on the deemed disposition of the partnership's assets is computed as follows: (1) If the creditor's right to repayment of a partnership liability is limited solely to one or more assets of the partnership, gain or loss is recognized in an amount equal to the difference between the amount of the liability that is extinguished by the deemed disposition and the tax basis in those assets; and (2) a loss is recognized equal to the remaining tax basis of all of the partnership's assets not taken into account in (1). The final regulations clarify that the use of book value rather than tax basis for purposes of the constructive liquidation analysis is appropriate if tax basis and book value differ by reason of adjustments made under section 704(c) and the section 704(b) regulations.

C. Pledged Assets

Section 1.752–2(h)(1) of the proposed regulations provides that a partner is considered to bear the economic risk of loss for a partnership liability to the extent of the value of any of the partner's separate property (other than an interest in the partnership) that is pledged as security for the partnership liability. This provision has been clarified in the final regulations as applying to a related person's separate property that is pledged as security, as well as that of a partner.

Section 1.752–2(h)(2) of the proposed and final regulations provides that a partner is considered to bear the economic risk of loss for a partnership liability to the extent of the value of any property that the partner contributes to the partnership solely for the purpose of securing a partnership liability. The rule governing when property is contributed solely for the purpose of securing a partnership liability is modified in the final regulations. The purpose of the modification is to provide some flexibility in applying the rule in situations where allocations are mandated by the provisions of section 704 and the regulations thereunder.

D. Partner's Share of Nonrecourse Liabilities

The proposed and final regulations require that the nonrecourse liabilities of a partnership be allocated among the partners first to reflect the partners' shares of any partnership minimum gain, then to reflect any gain that would be allocated to the partners under section 704(c), and finally in accordance with the partners' interests in partnership profits. The partnership agreement may specify the partners' interests in partnership profits provided the interests so specified are reasonably consistent with allocations (which have substantial economic effect under the section 704(b) regulations) of some significant item of partnership income or gain. Alternatively, nonrecourse liabilities in excess of those allocated to reflect partnership minimum gain and section 704(c) gain ("excess nonrecourse liabilities") may be allocated among the partners in accordance with the manner in which it is reasonably expected that the deductions attributable to those nonrecourse liabilities will be allocated. The final regulations provide that excess nonrecourse liabilities need not be allocated under the same method each year.

E. De Minimis Rules

Section 1.752–2(d) of the proposed and final regulations provides de minimis exceptions to the general economic risk of loss analysis in certain situations when a partner is the lender or guarantor. One of the requirements of the de minimis rules in the proposed regulations was that a partner maintain a 10 percent or less interest in each item of partnership income, gain, loss, deduction, and credit for any taxable year of the partnership. The final regulations clarify that the de minimis rules apply only as long as the partner maintains a 10 percent or less interest in each item of partnership income, gain, loss, deduction, or credit for every taxable year that the partner is a partner in the partnership.

Some commentators suggested that the 10 percent requirement of the de minimis rule be eliminated. After full consideration of the comments, the requirement has not been eliminated. The legislative history of section 752 indicates that regulations under this section should apportion partnership liabilities based on the manner in which the partners, and persons related to the partners, share the economic risk of loss for the liabilities (other than bona fide nonrecourse liabilities). H.R. Rep. No. 861, 98th Cong., 2d Sess. 869 (1984). The de minimis rule is a narrow exception to the general risk of loss analysis, applying only when a partner who is in the business of lending money and whose relationship to the partnership is primarily that of a lender also owns a small equity interest in the partnership. Because it is limited to these narrow

VOL
56
ISS
246
DE
23
1991
UMI

circumstances, the exception provided by the de minimis rule does not distort the economic risk of loss analysis.

F. Effective Dates

The final regulations are effective for liabilities incurred or assumed by the partnership on or after December 28, 1991. The final regulations provide a partnership with an election to apply the regulations to all of its liabilities to which the provisions of §§ 1.752–1 through 1.752–4 do not otherwise apply as of the beginning of the first taxable year of the partnership ending on or after December 28, 1991. Several commentators have suggested that there is some confusion regarding the treatment of certain situations under the effective date rules of the temporary and final regulations. The following addresses the comments received and is not intended to be a complete restatement of the effective date provisions.

First, regulations under section 752 are generally effective based on the date liabilities are incurred. As a result, a partnership with liabilities incurred in different periods may allocate basis to its partners under different sets of regulations: (1) § 1.751–1 (TD 6175 and TD 6500) (the "old" regulations); (2) § 1.752–0T to § 1.752–4T (TD 8237, TD 8274, and TD 8355) (the "temporary" regulations); and (3) the final regulations contained in this document.

Second, if a grandfathered partnership liability is materially modified, it loses its grandfathering and becomes subject to a different set of regulations, depending on when the material modification occurs. Third, a nonrecourse liability incurred or assumed by a partnership prior to March 1, 1984, is not governed by the temporary or final regulations unless an election has been made to apply the temporary or final regulations to the liability or unless a material modification of the liability has occurred. If a liability incurred or assumed by the partnership prior to March 1, 1984, is guaranteed by a partner after March 1, 1984, the liability is not governed by the temporary or final regulations. Similarly, if a third-party nonrecourse liability incurred or assumed by a partnership prior to January 30, 1989, is guaranteed by a related person after January 30, 1989, and again assuming no election is made to apply the temporary or final regulations to the liability, the liability is not governed by the temporary or final regulations. In addition, the subsequent guarantee by a partner of a liability incurred or assumed by the partnership prior to March 1, 1984, or the subsequent guarantee by a related person of a liability incurred or assumed by the partnership prior to January 30, 1989, is not considered a material modification of the liability for purposes of applying the regulations under section 752.

Special Analyses

These final regulations are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required.

It is hereby certified that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations.

It is hereby certified that these rules do not have a significant impact on a substantial number of small entities. Therefore, a final Regulatory Flexibility Analysis under the Regulatory Flexibility Act (5 U.S.C. chapter 6) is not required.

Pursuant to section 7805(f) of the Code, the notice of proposed rulemaking for the regulations was submitted to the Small Business Administration for comment on the impact of the rules on small business.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR parts 1 and 602 are amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority for part 1 continues to read in part as follows:

Authority: Sec. 7805, 68A Stat. 917; 26 U.S.C. 7805 * * *.

Par. 2. Sections 1.752–0T through 1.752–4T are removed.

Par. 3. Sections 1.752–0 through 1.752–5 are added to read as follows:

§ 1.752–0 Table of Contents.

This section lists the captions that appear in §§ 1.752–1 through 1.752–5.

§ 1.752–1 Treatment of partnership liabilities.

(a) Definitions.
(1) Recourse liability defined.
(2) Nonrecourse liability defined.
(3) Related person.
(b) Increase in partner's share of liabilities.
(c) Decrease in partner's share of liabilities.
(d) Assumption of liability.
(e) Property subject to a liability.
(f) Netting of increases and decreases in liabilities resulting from same transaction.
(g) Example.
(h) Sale or exchange of partnership interest.
(i) Bifurcation of partnership liabilities.

(a) In general.
(b) Election.
(1) In general.
(2) Time and manner of election.
(c) Effect of section 708(b)(1)(B) termination on determining date liabilities are incurred or assumed.

§ 1.752–1 Treatment of Partnership Liabilities.

(a) *Definitions.* For purposes of section 752, the following definitions apply:

(1) *Recourse liability defined.* A partnership liability is a recourse liability to the extent that any partner or related person bears the economic risk of loss for that liability under § 1.752–2.

(2) *Nonrecourse liability defined.* A partnership liability is a nonrecourse liability to the extent that no partner or related person bears the economic risk of loss for that liability under § 1.752–2.

(3) *Related person.* Related person means a person having a relationship to a partner that is described in § 1.752–4(b).

(b) *Increase in partner's share of liabilities.* Any increase in a partner's share of partnership liabilities, or any increase in a partner's individual liabilities by reason of the partner's assumption of partnership liabilities, is treated as a contribution of money by that partner to the partnership.

(c) *Decrease in partner's share of liabilities.* Any decrease in a partner's share of partnership liabilities, or any decrease in a partner's individual liabilities by reason of the partnership's assumption of the individual liabilities of the partner, is treated as a distribution of money by the partnership to that partner.

(d) *Assumption of liability.* Except as otherwise provided in paragraph (e) of this section, a person is considered to assume a liability only to the extent that:

(1) The assuming person is personally obligated to pay the liability; and

(2) If a partner or related person assumes a partnership liability, the person to whom the liability is owed knows of the assumption and can directly enforce the partner's or related person's obligation for the liability, and no other partner or person that is a related person to another partner would bear the economic risk of loss for the liability immediately after the assumption.

(e) *Property subject to a liability.* If property is contributed by a partner to the partnership or distributed by the partnership to a partner and the property is subject to a liability of the transferor, the transferee is treated as having assumed the liability, to the extent that the amount of the liability does not exceed the fair market value of the property at the time of the contribution or distribution.

(f) *Netting of increases and decreases in liabilities resulting from same transaction.* If, as a result of a single transaction, a partner incurs both an increase in the partner's share of the partnership liabilities (or the partner's individual liabilities) and a decrease in the partner's share of the partnership liabilities (or the partner's individual liabilities), only the net decrease is treated as a distribution from the partnership and only the net increase is treated as a contribution of money to the partnership. Generally, the contribution to or distribution from a partnership of property subject to a liability or the termination of the partnership under section 708(b) will require that increases and decreases in liabilities associated with the transaction be netted to determine if a partner will be deemed to have made a contribution or received a distribution as a result of the transaction.

(g) *Example.* The following example illustrates the principles of paragraphs (b), (c), (e), and (f) of this section.

Example. Property contributed subject to a liability; netting of increase and decrease in partner's share of liability. B contributes property with an adjusted basis of $1,000 to a general partnership in exchange for a one-third interest in the partnership. At the time of the contribution, the partnership does not have any liabilities outstanding and the property is subject to a recourse debt of $150 and has a fair market value in excess of $150. After the contribution, B remains personally liable to the creditor and none of the other partners bears any of the economic risk of loss for the liability under state law or otherwise. Under paragraph (e) of this section, the partnership is treated as having assumed the $150 liability. As a result, B's individual liabilities decrease by $150. At the same time, however, B's share of liabilities of the partnership increases by $150. Only the net increase or decrease in B's share of the liabilities of the partnership and B's individual liabilities is taken into account in applying section 752. Because there is no net change, B is not treated as having contributed money to the partnership or as having received a distribution of money from the partnership under paragraph (b) or (c) of this section. Therefore B's basis for B's partnership interest is $1,000 (B's basis for the contributed property).

(h) *Sale or exchange of a partnership interest.* If a partnership interest is sold or exchanged, the reduction in the transferor partner's share of partnership liabilities is treated as an amount realized under section 1001 and the regulations thereunder. For example, if a partner sells an interest in a partnership for $750 cash and transfers to the purchaser the partner's share of partnership liabilities in the amount of $250, the seller realizes $1,000 on the transaction.

(i) *Bifurcation of partnership liabilities.* If one or more partners bears the economic risk of loss as to part, but not all, of a partnership liability represented by a single contractual obligation, that liability is treated as two or more separate liabilities for purposes of section 752. The portion of the liability as to which one or more partners bear the economic risk of loss is a recourse liability and the remainder of the liability, if any, is a nonrecourse liability.

§ 1.752–2 Partner's share of resources liabilities.

(a) *In general.* A partner's share of a recourse partnership liability equals the portion of that liability, if any, for which the partner or related person bears the economic risk of loss. The determination of the extent to which a partner bears the economic risk of loss for a partnership liability is made under the rules in paragraphs (b) through (j) of this section.

(b) *Obligation to make a payment.* (1) *In general.* Except as otherwise provided in this section, a partner bears the economic risk of loss for a partnership liability to the extent that, if the partnership constructively liquidated, the partner or related person would be obligated to make a payment to any person (or a contribution to the partnership) because that liability becomes due and payable and the partner or related person would not be entitled to reimbursement from another partner or person that is a related person to another partner. Upon a constructive liquidation, all of the following events are deemed to occur simultaneously:

(i) All of the partnership's liabilities become payable in full;

(ii) With the exception of property contributed to secure a partnership liability (see § 1.752–2(h)(2)), all of the partnership's assets, including cash, have a value of zero;

(iii) The partnership disposes of all of its property in a fully taxable transaction for no consideration (except relief from liabilities for which the creditors's right to repayment is limited solely to one or more assets of the partnership);

(iv) All items of income, gain, loss, or deduction are allocated among the partners; and

(v) The partnership liquidates.

(2) *Treatment upon deemed disposition.* For purposes of paragraph (b)(1) of this section, gain or loss on the deemed disposition of the partnership's assets is computed in accordance with the following:

(i) If the creditor's right to repayment of a partnership liability is limited solely to one or more assets of the partnership, gain or loss is recognized in an amount

VOL 56 ISS 246 DEC 23 1991 UMI

equal to the difference between the amount of the liability that is extinguished by the deemed disposition and the tax basis (or book value to the extent section 704(c) or § 1.701–1(b)(4)(i) applies) in those assets.

(ii) A loss is recognized equal to the remaining tax basis (or book value to the extent section 704(c) or § 1.704–1(b)(4)(i) applies) of all the partnership's assets not taken into account in paragraph (b)(2)(i) of this section.

(3) *Obligations recognized.* The determination of the extent to which a partner or related person has an obligation to make a payment under paragraph (b)(1) of this section is based on the facts and circumstances at the time of the determination. All statutory and contractual obligations relating to the partnership liability are taken into account for purposes of applying this section, including:

(i) Contractual obligations outside the partnership agreement such as guarantees, indemnifications, reimbursement agreements, and other obligations running directly to creditors or to other partners, or to the partnership;

(ii) Obligations to the partnership that are imposed by the partnership agreement, including the obligation to make a capital contribution and to restore a deficit capital account upon liquidation of the partnership; and

(iii) Payment obligations (whether in the form of direct remittances to another partner or a contribution to the partnership) imposed by state law including the governing state partnership statute.

To the extent that the obligation of a partner to make a payment with respect to a partnership liability is not recognized under this paragraph (b)(3), paragraph (b) of this section is applied as if the obligation did not exist.

(4) *Contingent obligations.* A payment obligation is disregarded if, taking into account all the facts and circumstances, the obligation is subject to contingencies that make it unlikely that the obligation will ever be discharged. If a payment obligation would arise at a future time after the occurrence of an event that is not determinable with reasonable certainty, the obligation is ignored until the event occurs.

(5) *Reimbursement rights.* A partner's or related person's obligation to make a payment with respect to a partnership liability is reduced to the extent that the partner or related person is entitled to reimbursement from another partner or a person who is a related person to another partner.

(5) *Deemed satisfaction of obligation.* For purposes of determining the extent to which a partner or related person has a payment obligation and the economic risk of loss, it is assumed that all partners and related persons who have obligations to make payments actually perform those obligations, irrespective of their actual net worth, unless the facts and circumstances indicate a plan to circumvent or avoid the obligation. See § 1.752–2(j).

(c) *Partner or related person as lender*—(1) *In general.* A partner bears the economic risk of loss for a partnership liability to the extent that the partner or a related person makes (or acquires an interest in) a nonrecourse loan to the partnership and the economic risk of loss for the liability is not borne by another partner.

(2) *Wrapped debt.* If a partnership liability is owed to a partner or related person and that liability includes (*i.e.*, is "wrapped" around) a nonrecourse obligation encumbering partnership property that is owed to another person, the partnership liability will be treated as two separate liabilities. The portion of the partnership liability corresponding to the wrapped debt is treated as a liability owed to another person.

(d) *De minimis exceptions*—(1) *Partner as lender.* The general rule contained in paragraph (c)(1) of this section does not apply if a partner or related person whose interest (directly or indirectly through one or more partnerships including the interest of any related person) in each item of partnership income, gain, loss, deduction, or credit for every taxable year that the partner is a partner in the partnership is 10 percent or less, makes a loan to the partnership which constitutes qualified nonrecourse financing within the meaning of section 465(b)(6) (determined without regard to the type of activity financed).

(2) *Partner as guarantor.* The general rule contained in paragraph (b)(1) of this section does not apply if a partner or related person whose interest (directly or indirectly through one or more partnerships including the interest of any related person) in each item of partnership income, gain, loss, deduction, or credit for every taxable year that the partner is a partner in the partnership is 10 percent or less, guarantees a loan that would otherwise be a nonrecourse loan of the partnership and which constitute qualified nonrecourse financing within the meaning of section 465(b)(6) (without regard to the type of activity financed) if the guarantor had made the loan to the partnership.

(e) *Special rule for nonrecourse liability with interest guaranteed by a partner*—(1) *In general.* For purposes of this section, if one or more partners or related persons have guaranteed the payment of more than 25 percent of the total interest that will accrue on a partnership nonrecourse liability over its remaining term, and it is reasonable to expect that the guarantor will be required to pay substantially all of the guaranteed future interest if the partnership fails to do so, then the liability is treated as two separate partnership liabilities. If this rule applies, the partner or related person that has guaranteed the payment of interest is treated as bearing the economic risk of loss for the partnership liability to the extent of the present value of the guaranteed future interest payments. The remainder of the stated principal amount of the partnership liability constitutes a nonrecourse liability. Generally, in applying this rule, it is reasonable to expect that the guarantor will be required to pay substantially all of the guaranteed future interest if, upon a default in payment by the partnership, the lender can enforce the interest guaranty without foreclosing on the property and thereby extinguishing the underlying debt. The guarantee of interest rule continues to apply even after the point at which the amount of guaranteed interest that will accrue is less than 25% of the total interest that will accrue on the liability.

(2) *Computation of present value.* The present value of the guaranteed future interest payments is computed using a discount rate equal to either the interest rate stated in the loan documents, or if interest is imputed under either section 483 or section 1274, the applicable federal rate, compounded semi-annually. The computation takes into account any payment of interest that the partner or related person may be required to make only to the extent that the interest will accrue economically (determined in accordance with section 446 and the regulations thereunder) after the date of the interest guarantee. If the loan document contains a variable rate of interest that is an interest rate based on current values of an objective interest index, the present value is computed on the assumption that the interest determined under the objective interest index on the date of the computation will remain constant over the term of the loan. The term "objective interest index" has the meaning given to it in section 1275 and the regulations thereunder (relating to variable rate debt instruments). Examples of an objective interest index include the prime rate of a designated financial institution, LIBOR (London Interbank Offered Rate), and the applicable federal rate under section 1274(d).

(3) *Safe harbor.* The general rule contained in paragraph (e)(1) of this section does not apply to a partnership nonrecourse liability if the guarantee of interest by the partner or related person is for a period not in excess of the lesser of five years or one-third of the term of the liability.

(4) *De minimis exception.* The general rule contained in paragraph (e)(1) of this section does not apply if a partner or related person whose interest (directly or indirectly through one or more partnerships including the interest of any related person) in each item of partnership income, gain, loss, deduction, or credit for every taxable year that the partner is a partner in the partnership is 10 percent of less, guarantees the interest on a loan to that partnership which constitutes qualified nonrecourse financing within the meaning of section 465(b)(6) (determined without regard to the type of activity financed). An allocation of interest to the extent paid by the guarantor is not treated as a partnership item of deduction or loss subject to the 10 percent or less rule.

(f) *Examples.* The following examples illustrate the principles of paragraphs (a) through (e) of this section.

Example 1. Determining when a partner bears the economic risk of loss. A and B form a general partnership with each contributing $100 in cash. The partnership purchases an office building on leased land for $1,000 from an unrelated seller, paying $200 in cash and executing a note to the seller for the balance of $800. The note is a general obligation of the partnership, *i.e.*, no partner has been relieved from personal liability. The partnership agreement provides that all items are allocated equally except that tax losses are specially allocated 90% to A and 10% to B and that capital accounts will be maintained in accordance with the regulations under section 704(b), including a deficit capital account restoration obligation on liquidation. In a constructive liquidation, the $800 liability becomes due and payable. All of the partnership's assets, including the building, are deemed to be worthless. The building is deemed sold for a value of zero. Capital accounts are adjusted to reflect the loss on the hypothetical disposition, as follows:

	A	B
Initial contribution	$100	$100
Loss on hypothetical sale	(900)	(100)
	($800)	$0

Other than the partners' obligation to fund negative capital accounts on liquidation, there are no other contractual or statutory payment obligations existing between the partners, the partnership and the lender. Therefore, $800 of the partnership liability is classified as a recourse liability because one or more partners bears the economic risk of loss for non-payment. B has no share of the $800 liability since the constructive liquidation produces no payment obligation for B. A's share of the partnership liability is $800 because A would have an obligation in that amount to make a contribution to the partnership.

Example 2. Recourse liability; deficit restoration obligation. C and D each contribute $500 in cash to the capital of a new general partnership, CD. CD purchases property from an unrelated seller for $1,000 in cash and a $9,000 mortgage note. The note is a general obligation of the partnership, *i.e.*, no partner has been relieved from personal liability. The partnership agreement provides that profits and losses are to be divided 40% to C and 60% to D. C and D are required to make up any deficit in their capital accounts. In a constructive liquidation, all partnership assets are deemed to become worthless and all partnership liabilities become due and payable in full. The partnership is deemed to dispose of all its assets in a fully taxable transaction for no consideration. Capital accounts are adjusted to reflect the loss on the hypothetical disposition, as follows:

	C	D
Initial contribution	$500	$500
Loss on hypothetical sale	(4,000)	(6,000)
	($3,500)	($5,500)

C's capital account reflects a deficit that C would have to make up to $3,500 and D's Capital account reflects a deficit that D would have to make up of $5,500. Therefore, the $9,000 mortgage note is a recourse liability because one or more partners bear the economic risk of loss for the liability. C's share of the recourse liability is $3,500 and D's share is $5,500.

Example 3. Guarantee by limited partner; partner deemed to satisfy obligation. E and F form a limited partnership. E, the general partner, contributes $2,000 and F the limited partner, contributes $8,000 in cash to the partnership. The partnership agreement allocates losses 20% to E and 80% to F until F's capital account is reduced to zero, after which all losses are allocated to E. The partnership purchases depreciable property for $25,000 using its $10,000 cash and a $15,000 recourse loan from a bank. F guarantees payment of the $15,000 loan to the extent the loan remains unpaid after the bank has exhausted its remedies against the partnership. In a constructive liquidation, the $15,000 liability becomes due and payable. All of the partnership's assets, including the depreciable property, are deemed to be worthless. The depreciable property is deemed sold for a value of zero. Capital accounts are adjusted to reflect the loss on the hypothetical disposition, as follows:

	E	F
Initial contribution	$2,000	$8,000
Loss on hypothetical sale	(17,000)	(8,000)
	($15,000)	$0

E, as a general partner, would be obligated by operation of law to make a net contribution to the partnership of $15,000. Because E is assumed to satisfy that obligation, it is also assumed that F would not have to satisfy F's guarantee. The $15,000 mortgage is treated as a recourse liability because one or more partners bear the economic risk of loss. E's share of the liability is $15,000, and F's share is zero. This would be so even if E's net worth at the time of the determination is less than $15,000, unless the facts and circumstances indicate a plan to circumvent or avoid E's obligation to contribute to the partnership.

Example 4. Partner guarantee with right of subrogation. G, a limited partner in the GH partnership, guarantees a portion of a partnership liability. The liability is a general obligation of the partnership, *i.e.*, no partner has been relieved from personal liability. If under state law G is subrogated to the rights of the lender, G would have the right to recover the amount G paid to the recourse lender from the general partner. Therefore, G does not bear the economic risk of loss for the partnership liability.

Example 5. Bifurcation of partnership liability; guarantee of part of nonrecourse liability. A partnership borrows $10,000, secured by a mortgage on real property. The mortgage note contains an exoneration clause which provides that in the event of default, the holder's only remedy is to foreclose on the property. The holder may not look to any other partnership asset or to any partner to pay the liability. However, to induce the lender to make the loan, a partner guarantees payment of $200 of the loan principal. The exoneration clause does not apply to the partner's guarantee. If the partner paid pursuant to the guarantee, the partner would be subrogated to the rights of the lender with respect to $200 of the mortgage debt, but the partner is not otherwise entitled to reimbursement from the partnership or any partner. For purposes of section 752, $200 of the $10,000 mortgage liability is treated as a recourse liability of the partnership and $9,800 is treated as a nonrecourse liability of the partnership. The partner's share of the recourse liability of the partnership is $200.

Example 6. Wrapped debt. I, an individual, purchases real estate from an unrelated seller for $10,000, paying $1,000 in cash and giving a $9,000 purchase mortgage note on which I has no personal liability and as to which the seller can look only to the property for satisfaction. At a time when the property is worth $15,000, I sells the property to a partnership in which I is a general partner. The partnership pays for the property with a partnership purchase money mortgage note of $15,000 on which neither the partnership nor any partner (or person related to a partner) has personal liability. The $15,000 mortgage

VOL 56 ISS 246 DEC 23 1991 UMI

note is a wrapped debt that includes the $9,000 obligation to the original seller. The liability is a recourse liability to the extent of $6,000 because I is the creditor with respect to the loan and I bears the economic risk of loss for $6,000. I's share of the recourse liability is $6,000. The remaining $9,000 is treated as a partnership nonrecourse liability that is owed to the unrelated seller.

Example 7. Guarantee of interest by partner treated as part recourse and part nonrecourse. On January 1, 1992, a partnership obtains a $4,000,000 loan secured by a shopping center owned by the partnership. Neither the partnership nor any partner has any personal liability under the loan documents for repayment of the stated principal amount. Interest accrues at a 15 percent annual rate and is payable on December 31 of each year. The principal is payable in a lump sum on December 31, 2006. A partner guarantees payment of 50 percent of each interest payment required by the loan. The guarantee can be enforced without first foreclosing on the property. When the partnership obtains the loan, the present value (discounted at 15 percent, compounded annually) of the future interest payments is $3,508,422, and of the future principal payment is $491,578. If tested on that date, the loan would be treated as a partnership liability of $1,754,211 ($3,508,422 × .5) for which the guaranteeing partner bears the economic risk of loss and a partnership nonrecourse liability of $2,245,789 ($1,754,211 + $491,578).

Example 8. Contingent obligation not recognized. J and K form a general partnership with cash contributions of $2,500 each. J and K share partnership profits and losses equally. The partnership purchases an apartment building for its $5,000 of cash and a $20,000 nonrecourse loan from a commercial bank. The nonrecourse loan is secured by a mortgage on the building. The loan documents provide that the partnership will be liable for the outstanding balance of the loan on a recourse basis to the extent of any decrease in the value of the apartment building resulting from the partnership's failure properly to maintain the property. There are no facts that establish with reasonable certainty the existence of any liability on the part of the partnership (and its partners) for damages resulting from the partnership's failure properly to maintain the building. Therefore, no partner bears the economic risk of loss, and the liability constitutes a nonrecourse liability. Under § 1.752-3, J and K share this nonrecourse liability equally because they share all profits and losses equally.

(g) *Time-value-of-money considerations*—(1) *In general.* The extent to which a partner or related person bears the economic risk of loss is determined by taking into account any delay in the time when a payment or contribution obligation with respect to a partnership liability is to be satisfied. If a payment obligation with respect to a partnership liability is not required to be satisfied within a reasonable time after the liability becomes due and payable, or if the obligation to make a contribution to the partnership is not required to be satisfied before the later of—

(i) The end of the year in which the partner's interest is liquidated, or

(ii) 90 days after the liquidation,

the obligation is recognized only to the extent of the value of the obligation.

(2) *Valuation of an obligation.* The value of a payment or contribution obligation that is not required to be satisfied within the time period specified in paragraph (g)(1) of this section equals the entire principal balance of the obligation only if the obligation bears interest equal to or greater than the applicable federal rate under section 1274(d) at the time of valuation, commencing on—

(i) In the case of a payment obligation, the date that the partnership liability to a creditor or other person to whom the obligation relates becomes due and payable, or

(ii) In the case of a contribution obligation, the date of the liquidation of the partner's interest in the partnership.

If the obligation does not bear interest at a rate at least equal to the applicable federal rate at the time of valuation, the value of the obligation is discounted to the present value of all payments due from the partner or related person (*i.e.*, the imputed principal amount computed under section 1274(b)). For purposes of making this present value determination, the partnership is deemed to have constructively liquidated as of the date on which the payment obligation is valued and the payment obligation is assumed to be a debt instrument subject to the rules of section 1274 (*i.e.*, the debt instrument is treated as if it were issued for property at the time of the valuation).

(3) *Satisfaction of obligation with partner's promissory note.* An obligation is not satisfied by the transfer to the obligee of a promissory note by a partner or related person unless the note is readily tradeable on an established securities market.

(4) *Example.* The following example illustrates the principle of paragraph (g) of this section.

Example. Value of obligation not required to be satisfied within specified time period. A, the general partner, and B, the limited partner, each contributes $10,000 to partnership AB. AB purchases property from an unrelated seller for $20,000 in cash and a $70,000 recourse purchase money note. The partnership agreement provides that profits and losses are to be divided equally. A and B are required to make up any deficit in their capital accounts. While A is required to restore any deficit balance in A's capital account within 90 days after the date of liquidation of the partnership, B is not required to restore any deficit for two years following the date of liquidation. The deficit in B's capital account will not bear interest during that two-year period. In a constructive liquidation, all partnership assets are deemed to become worthless and all partnership liabilities become due and payable in full. The partnership is deemed to dispose of all its assets in a fully taxable transaction for no consideration. Capital accounts are adjusted to reflect the loss on the hypothetical disposition, as follows:

	A	B
Initial contribution	$10,000	$10,000
Loss on hypothetical sale	(45,000)	(45,000)
	(35,000)	(35,000)

A's and B's capital accounts each reflect deficits of $35,000. B's obligation to make a contribution pursuant to B's deficit restoration obligation is recognized only to the extent of the fair market value of that obligation at the time of the constructive liquidation because B is not required to satisfy that obligation by the later of the end of the partnership taxable year in which B's interest is liquidated or within 90 days after the date of the liquidation. Because B's obligation does not bear interest, the fair market value is deemed to equal the imputed principal amount under section 1274(b). Under section 1274(b), the imputed principal amount of a debt instrument equals the present value of all payments due under the debt instrument. Assume the applicable federal rate with respect to B's obligation is 10 percent compounded semiannually. Using this discount rate, the present value of the $35,000 payment that B would be required to make two years after the constructive liquidation to restore the deficit balance in B's capital account equals $28,795. To the extent that B's deficit restoration obligation is not recognized, it is assumed that B's obligation does not exist. Therefore, A, as the sole general partner, would be obligated by operation of law to contribute an additional $6,205 of capital to the partnership. Accordingly, under paragraph (g) of this section, B bears the economic risk of loss for $28,795 and A bears to economic risk of loss for $41,205 ($35,000 + $6,205).

(h) *Partner providing property as security for partnership liability*—(1) *Direct pledge.* A partner is considered to bear the economic risk of loss for a partnership liability to the extent of the value of any the partner's or related person's separate property (other than a direct or indirect interest in the partnership) that is pledged as security for the partnership liability.

(2) *Indirect pledge.* A partner is considered to bear the economic risk of loss for a partnership liability to the extent of the value of any property that the partner contributes to the partnership solely for the purpose of securing a partnership liability. Contributed property is not treated as contributed solely for the purpose of securing a partnership liability unless substantially all of the items of income, gain, loss, and deduction attributable to the contributed property are allocated to the contributing partner, and this allocation is generally greater than the partner's share of other significant items of partnership income, gain, loss, or deduction.

(3) *Valuation.* The extent to which a partner bears the economic risk of loss as a result of a direct pledge described in paragraph (h)(1) of this section or an indirect pledge described in paragraph (h)(2) of this section is limited to the fair market value of the property at the time of the pledge or contribution.

(4) *Partner's promissory note.* For purposes of paragraph (h)(2) of this section, a promissory note of the partner or related person that is contributed to the partnership shall not be taken into account unless the note is readily tradeable on an established securities market.

(i) *Treatment of recourse liabilities in tiered partnerships.* If a partnership (the "upper-tier partnership") owns (directly or indirectly through one or more partnerships) an interest in another partnership (the "lower-tier partnership"), the liabilities of the lower-tier partnership are allocated to the upper-tier partnership in an amount equal to the sum of the following—

(1) The amount of the economic risk of loss that the upper-tier partnership bears with respect to the liabilities; and

(2) Any other amount of the liabilities with respect to which partners of the upper-tier partnership bear the economic risk of loss.

(j) *Anti-abuse rules*—(1) *In general.* An obligation of a partner or related person to make a payment may be disregarded or treated as an obligation of another person for purposes of this section if facts and circumstances indicate that a principal purpose of the arrangement between the parties is to eliminate the partner's economic risk of loss with respect to that obligation or create the appearance of the partner or related person bearing the economic risk of loss when, in fact, the substance of the arrangement is otherwise.

Circumstances with respect to which a payment obligation may be disregarded include, but are not limited to, the situations described in paragraphs (j)(2) and (j)(3) of this section.

(2) *Arrangements tantamount to a guarantee.* Irrespective of the form of a contractual obligation, a partner is considered to bear the economic risk of loss with respect to a partnership liability, or a portion thereof, to the extent that:

(i) The partner or related person undertakes one or more contractual obligations so that the partnership may obtain a loan;

(ii) The contractual obligations of the partner or related person eliminate substantially all the risk to the lender that the partnership will not satisfy its obligations under the loan; and

(iii) One of the principal purposes of using the contractual obligations is to attempt to permit partners (other than those who are directly or indirectly liable for the obligation) to include a portion of the loan in the basis of their partnership interests.

The partners are considered to bear the economic risk of loss for the liability in accordance with their relative economic burdens for the liability pursuant to the contractual obligations. For example, a lease between a partner and a partnership which is not on commercially reasonable terms may be tantamount to a guarantee by the partner of a partnership liability.

(3) *Plan to circumvent or avoid the obligation.* An obligation of a partner to make a payment is not recognized if the facts and circumstances evidence a plan to circumvent or avoid the obligation.

(4) *Example.* The following example illustrates the principle of paragraph (j)(3) of this section.

Example. Plan to circumvent or avoid obligation. A and B form a general partnership. A, a corporation, contributes $20,000 and B contributes $80,000 to the partnership. A is obligated to restore any deficit in its partnership capital account. The partnership agreement allocates losses 20% to A and 80% to B until B's capital account is reduced to zero, after which all losses are allocated to A. The partnership purchases depreciable property for $250,000 using its $100,000 cash and a $150,000 recourse loan from a bank. B guarantees payment of the $150,000 loan to the extent the loan remains unpaid after the bank has exhausted its remedies against the partnership. A is a subsidiary, formed by a parent of a consolidated group, with capital limited to $20,000 to allow the consolidated group to enjoy the tax losses generated by the property while at the same time limiting its monetary exposure for such losses. These facts, when considered together with B's guarantee, indicate a plan to circumvent or avoid A's obligation to contribute to the partnership. The rules of section 752 must be applied as if A's obligation to contribute did not exist. Accordingly, the $150,000 liability is a recourse liability that is allocated entirely to B.

§ 1.752-3 Partner's share of nonrecourse liabilities.

(a) *In general.* A partner's share of the nonrecourse liabilities of a partnership equals the sum of paragraphs (a)(1) through (a)(3) of this section as follows—

(1) The partner's share of partnership minimum gain determined in accordance with the rules of section 704(b) and the regulations thereunder;

(2) The amount of any taxable gain that would be allocated to the partner under section 704(c) (or in the same manner as section 704(c) in connection with a revaluation of partnership property) if the partnership disposed of (in a taxable transaction) all partnership property subject to one or more nonrecourse liabilities of the partnership in full satisfaction of the liabilities and for no other consideration; and

(3) The partner's share of the excess nonrecourse liabilities (those not allocated under paragraphs (a)(1) and (a)(2) of this section) of the partnership as determined in accordance with the partner's share of partnership profits. The partner's interest in partnership profits is determined by taking into account all facts and circumstances relating to the economic arrangement of the partners. The partnership agreement may specify the partners' interests in partnership profits for purposes of allocating excess nonrecourse liabilities provided the interests so specified are reasonably consistent with allocations (that have substantial economic effect under the section 704(b) regulations) of some other significant item of partnership income or gain. Alternatively, excess nonrecourse liabilities may be allocated among the partners in accordance with the manner in which it is reasonably expected that the deductions attributable to those nonrecourse liabilities will be allocated. Excess nonrecourse liabilities are not required to be allocated under the same method each year.

(b) *Examples.* The following examples illustrate the principles of paragraph (a) of this section.

Example 1. Partner's share of nonrecourse liabilities. The AB partnership purchases depreciable property for a $1,000 purchase money note that is nonrecourse liability under the rules of this section. Assume that this is the only nonrecourse liability of the partnership, and that no principal payments are due on the purchase money note for a year. The partnership agreement provides that all items of income, gain, loss, and deduction are allocated equally. Immediately after purchasing the depreciable property, the partners share the nonrecourse liability equally because they have equal interests in partnership profits. A and B are each treated as if they contributed $500 to the partnership to reflect each partner's increase in his or her share of partnership liabilities (from $0 to $500). The minimum gain with respect to an

VOL 56 ISS 246 DEC 23 1991 UMI

item of partnership property subject to a nonrecourse liability equals the amount of gain that would be recognized if the partnership disposed of the property in full satisfaction of the nonrecourse liability and for no other consideration. Therefore, if the partnership claims a depreciation deduction of $200 for the depreciable property for the year it acquires that property, partnership minimum gain for the year will increase by $200 (the excess of the $1,000 nonrecourse liability over the $800 adjusted tax basis of the property). See section 704(b) and the regulations thereunder. A and B each have a $100 share of partnership minimum gain at the end of that year because the depreciation deduction is treated as a nonrecourse deduction. See section 704(b) and the regulation thereunder. Accordingly, at the end of that year, A and B are allocated $100 each of the nonrecourse liability to match their shares of partnership minimum gain. The remaining $800 of the nonrecourse liability will be allocated equally between A and B ($400 each).

Example 2. Excess nonrecourse liabilities allocated consistently with reasonably expected deductions. The facts are the same as in *Example 1* except that the partnership agreement provides that depreciation deductions will be allocated to A. The partners agree to allocate excess nonrecourse liabilities in accordance with the manner in which it is reasonably expected that the deductions attributable to those nonrecourse liabilities will be allocated. Assuming that the allocation of all of the depreciation deductions to A is valid under section 704(b), immediately after purchasing the depreciable property, A's share of the nonrecourse liability is $1,000. Accordingly, A is treated as if A contributed $1,000 to the partnership.

§ 1.752-4 Special rules.

(a) *Tiered partnerships.* An upper-tier partnership's share of the liabilities of a lower-tier partnership (other than any liability of the lower-tier partnership that is owed to the upper-tier partnership) is treated as a liability of the upper-tier partnership for purposes of applying section 752 and the regulations thereunder to the partners of the upper-tier partnership.

(b) *Related person definition.*—(1) *In general.* A person is related to a partner if the person and the partner bear a relationship to each other that is specified in section 267(b) or 707(b)(1), subject to the following modifications:

(i) Substitute "80 percent or more" for "more than 50 percent" each place it appears in those sections;

(ii) A person's family is determined by excluding brothers and sisters; and

(iii) Disregard sections 267(e)(1) and 267(f)(1)(A).

(2) *Person related to more than one partner.*—(i) *In general.* If, in applying the related person rules in paragraph (b)(1) of this section, a person is related to more than one partner, paragraph (b)(1) of this section is applied by treating the person as related only to the partner with whom there is the highest percentage of related ownership. If two or more partners have the same percentage of related ownership and no other partner has a greater percentage, the liability is allocated equally among the partners having the equal percentages of related ownership.

(ii) *Natural persons.* For purposes of determining the percentage of related ownership between a person and a partner, natural persons who are related by virtue of being members of the same family are treated as having a percentage relationship of 100 percent with respect to each other.

(iii) *Related partner exception.* Notwithstanding paragraph (b)(1) of this section (which defines related person), persons owning interests directly or indirectly in the same partnership are not treated as related persons for purposes of determining the economic risk of loss borne by each of them for the liabilities of the partnership. This paragraph (iii) does not apply when determining a partner's interest under the de minimis rules in §§ 1.752-2 (d) and (e).

(iv) *Special rule where entity structured to avoid related person status.*—(A) *In general.* If—

(*1*) A partnership liability is owed to or guaranteed by another entity that is a partnership, an S corporation, a C corporation, or a trust;

(*2*) A partner or related person owns (directly or indirectly) a 20 percent or more ownership interest in the other entity; and

(*3*) A principal purpose of having the other entity act as a lender or guarantor of the liability was to avoid the determination that the partner that owns the interest bears the economic risk of loss for federal income tax purposes for all or part of the liability;

then the partner is treated as holding the other entity's interest as a creditor or guarantor to the extent of the partner's or related person's ownership interest in the entity.

(B) *Ownership interest.* For purposes of paragraph (b)(2)(iv)(A) of this section, a person's ownership interest in:

(*1*) A partnership equals the partner's highest percentage interest in any item of partnership loss or deduction for any taxable year;

(*2*) An S corporation equals the percentage of the outstanding stock in the S corporation owned by the shareholder;

(*3*) A C corporation equals the percentage of the fair market value of the issued and outstanding stock owned by the shareholder; and

(*4*) A trust equals the percentage of the actuarial interests owned by the beneficial owner of the trust.

(C) *Example. Entity structured to avoid related person status.* A, B, and C form a general partnership, ABC. A, B, and C are equal partners, each contributing $1,000 to the partnership. A and B want to loan money to ABC and have the loan treated as nonrecourse for purposes of section 752. A and B form partnership AB to which each contributes $50,000. A and B share losses equally in partnership AB. Partnership AB loans partnership ABC $100,000 on a nonrecourse basis secured by the property ABC buys with the loan. Under these facts and circumstances, A and B bear the economic risk of loss with respect to the partnership liability equally based on their percentage interest in losses of partnership AB.

(c) *Limitation.* The amount of an indebtedness is taken into account only once, even though a partner (in addition to the partner's liability for the indebtedness as a partner) may be separately liable therefor in a capacity other than as a partner.

(d) *Time of determination.* A partner's share of partnership liabilities must be determined whenever the determination is necessary in order to determine the tax liability of the partner or any other person. See § 1.705-1(a) for rules regarding when the adjusted basis of a partner's interest in the partnership must be determined.

§ 1.752-5 Effective dates and transition rules.

(a) *In general.* Unless a partnership makes an election under paragraph (b)(1) of this section to apply the provisions of §§ 1.752-1 through 1.752-4 earlier, §§ 1.752-1 through 1.752-4 apply to any liability incurred or assumed by a partnership on or after December 28, 1991, other than a liability incurred or assumed by the partnership pursuant to a written binding contract in effect prior to December 28, 1991 and at all times thereafter. For liabilities incurred or assumed by a partnership prior to December 28, 1991 (or pursuant to a written binding contract in effect prior to December 28, 1991 and at all times thereafter), unless an election to apply these regulations has been made, see §§ 1.752-0T to 1.752-4T, set forth in 26 CFR 1.752-0T through 1.752-4T as contained in 26 CFR edition revised April 1, 1991, (TD 8237, TD 8274, and TD 8355) and § 1.752-1, set forth in 26 CFR 1.752-1 as contained in 26 CFR edition revised April 1, 1988 (TD 6175 and TD 6500).

(b) *Election.*—(1) *In general.* A partnership may elect to apply the provisions of §§ 1.752-1 through 1.752-4

to all of its liabilities to which the provisions of those sections do not otherwise apply as of the beginning of the first taxable year of the partnership ending on or after December 28, 1991.

(2) *Time and manner of election.* An election under this paragraph (b) is made by attaching a written statement to the partnership return for the first taxable year of the partnership ending on or after December 28, 1991. The written statement must include the name, address, and taxpayer identification number of the partnership making the statement and contain a declaration that an election is being made under this paragraph (b).

(c) *Effect of section 708(b)(1)(B) termination on determining date liabilities are incurred or assumed.* For purposes of applying this section, a termination of the partnership under section 708(b)(1)(B) will not cause partnership liabilities incurred or assumed prior to the termination to be treated as incurred or assumed on the date of the termination.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par. 4. The authority for part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 5. Section 602.101(c) is amended by removing the citation "1.752-4T . . . 1545-1090" and adding the following citation to read as follows: "1.752-5 . . . 1545-1090."

Fred T. Goldberg, Jr.,
Commissioner of Internal Revenue.

Approved: December 5, 1991.

Kenneth W. Gideon,
Assistant Secretary of the Treasury.

BILLING CODE 4830-01-M

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Part 2603

Freedom of Information Act; Exemption (4)

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: On October 30, 1991, the Pension Benefit Guaranty Corporation ("PBGC") published an interim final rule amending its Freedom of Information Act ("FOIA") regulations to include designation and notification procedures for records containing information that, pursuant to exemption (4), the PBGC may not be required to make available to the public. These supplementary provisions assure that submitters of trade secrets and privileged or confidential business information have an opportunity to explain to the PBGC why the information should not be made available in response to a request under the FOIA. The PBGC invited the public to submit comments on its designation and notification procedures until November 29, 1991, the effective date of the interim final rule. The agency received no comments during this period, and it now is republishing the amendments as a final rule.

EFFECTIVE DATE: December 23, 1991.

FOR FURTHER INFORMATION CONTACT: Judith Neibrief, Attorney, Office of the General Counsel (Code 22500), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006, 202-778-8850, or E. William FitzGerald, PBGC Disclosure Officer, Communication and Public Affairs Department (Code 3800), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006, 202-778-8839 (202-778-8859 for TTY and TTD). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: The Pension Benefit Guaranty Corporation ("PBGC") administers the pension plan termination insurance program under title IV of the Employee Retirement Income Security Act of 1974, as amended, 29 U.S.C. 1001 *et seq.* As a Government corporation, the PBGC is subject to the Freedom of Information Act ("FOIA"), 5 U.S.C. 552, which, among other things, establishes requirements for making agency records available to the public. Part 2603 of the PBGC's regulations (29 CFR part 2603), Examination and Copying of Pension Benefit Guaranty Corporation Records, implements the FOIA and the agency's policy to disseminate information to the public and, insofar as is compatible with the discharge of its responsibilities and consistent with law, to disclose information in its records upon request to members of the public.

These regulations set forth, in § 2603.8, the PBGC's policy of disclosure and, in §§ 2603.15 through 2603.23, restrictions on the disclosure of various records. The restrictions implement paragraphs (1) through (9) of section 552(b), which specify matters to which the FOIA does not apply. [Paragraphs (1) through (9) of section 552(b) are referred to, here and in the regulations, as exemptions (1) through (9), in that order.]

Where requests involve records to which access may be refused under an FOIA exemption and § 2603.15 of the regulations does not prohibit making the information available, the PBGC's policy is to disclose information, but only to the extent that an authorized agency officer determines disclosure will further the public interest and will not impede the discharge of any PBGC function. Under § 2603.16(b) of the regulations, the factors that must be considered in making such a determination include the public interest in protecting citizens against the dissemination of information concerning them which is privileged or has been submitted by them on a confidential basis and in preventing the disclosure of information which would handicap, obstruct, or jeopardize effective performance of the PBGC's functions.

The regulations for particular FOIA exemptions include § 2603.16, which addresses exemption (4): Matters that are "trade secrets and commercial or financial information obtained from a person and privileged or confidential * * *." Insofar as denial of access is not mandatory under the Trade Secrets Act or other restrictions set forth in § 2603.15, paragraph (a) of § 2603.16 requires that, in applying the policy expressed in §§ 2603.8 and 2603.16, there be a balancing of the right of the public to know how the Government operates against the Government's need to keep information in confidence and the right of a person from which information was obtained to have privileges and confidences respected.

On October 29, 1991 (56 FR 55817), the PBGC published an interim final rule (effective November 29, 1991) that expanded the guidance previously provided in § 2603.16. Paragraph (f) of that section now further explains the considerations that pertain to information protected by exemption (4) and describes the practices PBGC employs when requests for records may involve such information. In particular, the amended regulations specify procedures by which persons and entities can assert that they are "submitter(s)" of "confidential commercial information" (as defined in § 2603.2 (d) and (e) of the regulations) and can object to PBGC disclosure of arguably protected information in response to an FOIA request (§ 2603.16(f) (2) and (3), respectively).

As the PBGC stated when it issued the interim final rule (56 FR 55817-18), the PBGC's practices in this area have evolved over time. In 1982, the PBGC adopted guidance issued by the Office of Information and Privacy of the U.S. Department of Justice as a matter of policy. Since then it has assured that whenever the agency may be required to

VOL 56 ISS 246 DE 23 1991 UMI

release arguably protected information, the submitter first has an opportunity to explain why disclosure could cause substantial competitive harm. The PBGC subsequently reviewed its practices for conformity with the procedures mandated by Executive Order 12600 (52 FR 23781, June 25, 1987). The interim final rule codified PBGC practices by specifying designation and notification procedures which assure informed consideration of requests for information that arguably is protected from disclosure under exemption (4).

Based on its experience in implementing exemption (4), the PBGC concluded that the provisions it adopted accommodate the interests of both those submitting and those requesting material in agency records. As amended, the PBGC's procedures provide a structure that is sufficiently flexible to enable the agency to continue to resolve many issues informally. As previously noted (56 FR 55818), to the extent permitted by law, the agency intends to provide sufficient time, under the circumstances, to respond to its notifications. However, in view of the time limit provisions of the FOIA (see section 552(a)(6)) and its regulations (see §§ 2603.45 through 2603.47), the amended regulations do not assure a minimum number of days (but do provide for reasonable time) for objecting to disclosure or before disclosure after a decision to grant a request.

The amendments made by the interim final rule further elaborated agency policy and practices for processing certain records and requests. Nevertheless, the PBGC provided an opportunity for interested members of the public to comment on its designation and notification procedures for implementing exemption (4) of the FOIA, and it committed itself to the issuance of a superseding final rule to incorporate any modifications found appropriate in response to comments received by November 29, 1991 (the effective date of the interim final rule). Having received no comments during this period, the PBGC is now adopting, as a final rule without change, the amendments issued on October 29, 1991. Since this action merely adopts as a final rule amendments previously made (and already in effect), the PBGC finds, for good cause, that further notice and procedure is unnecessary, and it is effective immediately. (5 U.S.C. 553 (b) and (d).)

E.O. 12291

The PBGC previously determined that this is not a "major rule" for purposes of Executive Order 12291 because it will not have an annual effect on the economy of $100 million or more; create a major increase in costs for consumers, individual industries, or geographic regions; or have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Freedom of information.

PART 2603—EXAMINATION AND COPYING OF PENSION BENEFIT GUARANTY CORPORATION RECORDS

In consideration of the foregoing, the interim final rule amending 29 CFR part 2603 which was published at 56 FR 55818 on October 30, 1991, is adopted as a final rule without change.

Authority: 5 U.S.C. 552; 29 U.S.C. 1302(b)(3); E.O. 12600, 52 FR 23781.

Issued in Washington, DC, this 17th day of December 1991.

James B. Lockhart III,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708-01-M

DEPARTMENT OF THE INTERIOR

Minerals Management Service

30 CFR Parts 202, 203, and 206

Oil and Gas Product Valuation Regulations

December 16, 1991.

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of training seminars.

SUMMARY: The Minerals Management Service (MMS) hereby gives notice that it will present training seminars at the locations and dates identified below, on oil and gas transportation and gas processing allowance regulations that were published in the **Federal Register** on January 15, 1988 (53 FR 1184 and FR 1230, respectively). The seminars will address specific issues regarding transportation and processing allowances, the reporting requirements, billing, and reporting problems encountered since the regulations became effective March 1, 1988.

DATES: See Supplementary Information.

ADDRESSES: See Supplementary Information.

FOR FURTHER INFORMATION CONTACT: Mr. James P. Morris, Chief, Allowance Accounting Section, Transportation and Processing Branch, Royalty Valuation and Standards Division (303) 231-3729, or (FTS) 326-3729.

SUPPLEMENTARY INFORMATION: The oil and gas product valuation regulations that were published in the **Federal Register** on January 15, 1988, amended and clarified existing regulations governing the valuation of oil and gas for royalty computation purposes. The regulations govern the methods by which value is determined when computing oil or gas royalties under Federal (onshore or Outer Continental Shelf) and Indian (tribal and allotted) oil and gas leases (except leases on the Osage Indian Reservation, Osage County, Oklahoma).

The training seminars will include discussions on the following topics:

Day 1:

- Specific issues contained in the transportation and processing allowance regulations.
- The reporting problems encountered.
- Systems development and billing procedures.
- Appeal procedures.

Day 2:

- Information collection requirements and reporting forms (MMS-4109, "Gas Processing Allowance Summary Report;" MMS-4110, "Oil Transportation Allowance Report;" and MMS-4295 "Gas Transportation Allowance Report") required to support oil and gas transportation and processing allowance deductions from royalties due.
- Instructions on how to properly complete the forms.

Location and Dates

The seminars will be held from 8:30 a.m. to 4:30 p.m. on Day 1 and from 8:30 a.m. to 12 p.m. on Day 2 on the dates and at the locations shown below:

Dates	Locations
January 15-16, 1992	Sheraton Hotel & Conference Center, 3600 Union Boulevard, Lakewood, Colorado 80228, (303) 987-2000.

Dates	Locations
February 5-6, 1992	Embassy Suites Hotel, 9090 Southwest Freeway, Houston, Texas 77074, (713) 995-9123.
February 11-12, 1992	Dallas Marriott Park Central, 7750 L.B.J. Freeway at Coit Road, Dallas, Texas 75251, (214) 233-4421.
February 19-20, 1992	Sheraton Century Center Hotel, 1 North Broadway, Oklahoma City, Oklahoma 73102, (405) 235-2780.
February 26-27, 1992	Best Western Sally Port Inn, 2000 N. Main, Roswell, New Mexico 88201, (505) 622-7430.

Registration and Reservations

Persons interested in attending one of these seminars should contact Ms. Anna Aytes of our office at (303) 231-3396 or (FTS) 326-3396 at least 1 week prior to the date of the session you wish to attend. Due to space limitations, the number of attendees may be limited at each seminar location and will be provided on a first-come-first-serve basis. Persons interested in hotel reservations should contact the hotel directly at the telephone number(s) identified above.

If insufficient interest is shown in attending any of the individual training sessions, such sessions may be canceled and alternate arrangements will be made for those who expressed interest.

Dated: December 17, 1991.

Jimmy W. Mayberry,

Acting Associate Director for Royalty Management.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 91-30508 Filed 12-20-91; 8:45 am]

BILLING CODE 3810-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR PARTS 260 AND 265

[FRL-4063-9]

Hazardous Waste Management System: Amendments to Interim Status Standards for Downgradient Ground-Water Monitoring Well Locations at Hazardous Waste Facilities

AGENCY: U.S. Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: On January 18, 1991, the Environmental Protection Agency ("EPA" or "the Agency") proposed to amend 40 CFR § 265.91 to allow alternate placement of hydraulically downgradient monitoring wells at interim status facilities where existing physical obstacles prevent installations at the limit of the waste management area. EPA is today promulgating a final rule implementing amendments to §§ 260.10 and 265.91. Today's rule is necessary to allow facilities to install alternate ground-water monitoring wells in certain circumstances where they are unable to avoid existing physical obstacles. Today's rule provides that the owner or operator of an existing facility may demonstrate that an alternate hydraulically downgradient monitoring well location will meet several criteria. This demonstration must be certified by a qualified ground-water scientist. Today's rule also promulgates a definition of "qualified ground-water scientist."

EFFECTIVE DATE: These regulations become effective June 23, 1992.

ADDRESSES: The official docket for this rulemaking (Docket No. F-91-DGWF-FFFFF) is located in room M2427, U.S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, and is available for viewing from 9:30 a.m. to 3:30 p.m., Monday through Friday, excluding federal holidays. The public must make an appointment to review docket materials, and should call the docket clerk at (202) 260-9327 for appointments. The public may copy, free of charge, a maximum of one hundred pages of material from any one regulatory docket. Additional copies are $0.15 per page.

FOR FURTHER INFORMATION CONTACT: For general information about this rulemaking, contact the RCRA Hotline, Office of Solid Waste (OS-305), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (800) 424-9346 (toll free) or (703) 920-9810 in the Washington, DC metropolitan area. For technical information contact Hugh R. Davis, Office of Solid Waste (OS-341), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (202) 260-7656.

SUPPLEMENTARY INFORMATION:

Preamble Outline

I. Authority
II. Background
III. Summary of Today's Final Rule
IV. Public Comments on NPRM
V. State Authorizations
VI. Regulatory Requirements

I. Authority

These regulations are issued under the authority of sections 1006, 2002(a), 3001, 3004, 3005, and 3015 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended by the Hazardous and Solid Waste Amendments of 1984, (42 U.S.C. 6905, 6912(a), 6921-6927, 6924, 6925, 6930, 6934, 6935, 6937-6939, and 6974).

II. Background

On May 19, 1980, EPA promulgated comprehensive standards under 40 CFR part 265 for owners and operators of hazardous waste treatment, storage, and disposal facilities (TSDFs) that qualify for interim status (45 FR 33153). A facility owner or operator who has fully complied with the requirements for interim status specified in section 3005(e) of RCRA and 40 CFR 270.70 may comply with the part 265 regulations in lieu of part 264 pending final disposition of the permit application. Part 265, subpart F contains ground-water monitoring requirements applicable to owners and operators of interim status landfills, surface impoundments, and land treatment facilities.

Several challenges to the 1980 interim status regulations are currently pending before the United States Court of Appeals for the District of Columbia Circuit, including a challenge to the ground-water monitoring requirements of 40 CFR 265.91(a)(2) (*Shell Oil Co.* v. *EPA*, D.C. Cir. No. 80-1532 and consolidated cases). Petitioners in Shell Oil have requested review of whether the requirement in § 265.91(a)(2) to locate hydraulically downgradient wells "at the limit of the waste management area" is arbitrary and capricious or otherwise not in accordance with law. They have explained to the Agency that they believe § 265.91(a) should be amended to allow alternate placement of hydraulically downgradient monitoring wells where existing physical obstacles prevent well installation at the limit of the waste management area. The Agency entered

VOL
56
ISS
246
DE
23
1991
UMI

into a settlement agreement requiring it to make best efforts to propose and promulgate this change. Pursuant to the agreement, the Agency proposed to amend the well placement requirements for interim status facilities on January 18, 1991 (56 FR 2108). This proposal was consistent with the amendments to the well location requirements for permitted facilities (§ 264.95) proposed in the Federal Register on July 26, 1988 (53 FR 21860).

III. Summary of Today's Final Rule

The following is a summary of the amendments made in today's rule. The details of these amendments are discussed in section IV of this preamble "Public Comments on NPRM" and supporting background documents. With the exceptions noted below, the final rule generally adopts the amendments proposed.

Sections 265.91(a) (1) and (2) currently require interim status facility owners and operators to install and operate a ground-water monitoring system consisting, in part, of at least three hydraulically downgradient monitoring wells located at the limit of the waste management area. The number, locations, and depths of these wells must ensure detection as early as possible of any statistically significant amounts of hazardous waste or hazardous waste constituents that migrate from the waste management area to the uppermost aquifer.

The EPA proposed on January 18, 1991 (56 FR 2108) to amend the well placement requirements for interim status facilities to a form consistent with the proposed amendments to § 264.95 for permitted TSDFs. The Agency received comments on this proposed rule and is today publishing the final rule adding § 265.91(a)(3) in response to those comments. Detailed responses to major comments are given below in Section IV of this preamble.

Specifically, § 265.91(a)(3) provides that the owner or operator of an existing facility may demonstrate that an alternate hydraulically downgradient monitoring well location will meet several criteria outlined below. The demonstration must be in writing and kept at the facility. The demonstration must be certified by a qualified ground-water scientist (discussed below) and establish that: (1) An existing physical obstacle prevents monitoring well installation at the hydraulically downgradient limit of the waste management area; (2) the selected alternate downgradient location is as close to the waste management area as practical; and (3) the location ensures detection that is as early as possible, given the alternate location, of any statistically significant amounts of hazardous waste or hazardous constituents that migrate from the waste management area to the uppermost aquifer. EPA believes that alternate locations for downgradient wells meeting these criteria will protect human health and the environment by continuing to ensure the earliest possible detection of any migrating contaminants.

In addition to geologic features, buildings, highways, or railroads, the Agency believes that factors affecting the safety of personnel may also qualify as "physical obstacles". For example, the presence of overhead or underground electrical cables and wires, underground storage tanks and associated piping, and underground pipelines may prevent a safe well installation at the hydraulically downgradient limit of the waste management area at some sites. In these cases an alternate well location should be selected that insures detection of any statistically significant increases in constituent concentrations in the uppermost aquifer as early as possible.

Alternate locations of downgradient wells are not appropriate when physical obstacles at the limit of the waste management area may be avoided. For example, moving a well laterally from a physical obstacle, to a position still adjacent to the waste management area, may avoid the need for an alternate well location. However, the Agency does not intend to require placement of monitoring wells where installation or sampling would substantially raise the level of risk posed to individuals involved in those activities or where placement would require an extreme disruption to normal facility operations.

Today's rule also limits the availability of alternate locations of downgradient wells to units existing on the effective date of this amendment and to units subsequently made subject to interim status by new listings or expansions of the characteristics. Owners or operators of new, expanding or replacement units are not eligible to select alternate downgradient monitoring well locations as a result of physical obstacles. New, expanding, or replacement units can and should be designed to ensure that physical obstacles do not impede monitoring well placement at the downgradient limit of the waste management area. The Agency believes that wells placed at the hydraulically downgradient limit of the waste management area generally provide the greatest assurance of immediate detection.

In the proposed rule, demonstrations of the need for and location of alternate hydraulically downgradient monitoring wells must have been certified by a "qualified geologist or geotechnical engineer." Certifications by qualified geologists or geotechnical engineers are currently required under two interim status provisions: Section 260.90(c) demonstrations for waiver of ground-water monitoring requirements, and ground-water assessment plans submitted to the Regional Administrator under § 265.93(d)(2). Given the largely self-implementing interim status program, certification is necessary to provide the oversight to ensure technically sound decision-making with regard to hydrogeologic conditions. Several commenters, as is discussed in more detail below, felt that a "qualified geologist or geotechnical engineer" may not be appropriate for certifying alternate well demonstrations. The Agency agrees in general with these comments and is requiring in this rule that demonstrations of the necessity and location of alternate hydraulically downgradient monitoring wells must be certified by a "qualified ground-water scientist." This rule also promulgates a definition of "qualified ground-water scientist" in § 260.10. This definition is essentially the same, and is used for similar purposes as the definition of "qualified ground-water scientist" promulgated for solid waste disposal facilities (56 FR 50978).

IV. Public Comments on NPRM

EPA received comments in response to the notice of proposed rulemaking (NPRM) issued on January 18, 1991 (56 FR 2108). This section summarizes the major comments received and discusses how the Agency addressed specific concerns in the final rule. Additional discussion of comments received is provided in a separate response to comment document available in the docket for this rule.

A. Future Interim Status Units

Several commenters stated that some existing units that are not currently managing hazardous waste may be drawn into interim status because they are managing a waste that is identified as hazardous in the future. The commenters felt that these units, as well as units existing as of the date of the final rule, may be subject to physical constraints that necessitate alternative well placement. EPA agrees with the commenters that units existing as of the date of the final rule and those units that obtain interim status through future

rulemakings are eligible for alternate downgradient well placement.

B. New, Expanding and Replacement Units

The Agency received comments both in favor and against applying the alternate well location standard to new, expanding and replacement units. Several commenters argued that alternate downgradient well placement should be allowed for new, replacement and lateral expansions of existing units. These commenters argued that facilities may not be able to avoid physical obstacles which impede the placement of monitoring wells at the downgradient limit of the waste management area of new or expanding units.

The Agency continues to believe that alternate downgradient monitoring wells must be limited to existing units with existing physical barriers. Flexibility is necessary to address conditions existing prior to the effective date of this or future rulemakings. The Agency believes that planning on the part of the owner or operator will enable them to meet the performance standard of installing, operating, and maintaining a ground-water monitoring system capable of detecting releases of hazardous constituents. The Agency continues to believe that wells placed at the hydraulically downgradient limit of the waste management area have the highest probability of meeting this standard.

This rule, by only allowing alternate well locations for existing units, will not prevent the construction of new, expanding, or replacement units. Nor will it significantly impede the design of such units where physical obstacles are present. New, expanding, and replacement units can and must be designed with adequate space between the edge of the unit and any physical obstacle such that well installation equipment can be driven and operated in that space. In general, wells can be drilled in narrow spaces, such as has been done in the area between two existing surface impoundments. A facility replacing a unit with alternate well locations will be able to install new wells at the limit of the waste management area without losing a significant portion of the unit's waste management capacity. Additional design changes, such as increasing the depth of the waste management unit, may be made during the excavation and construction of the replacement unit to enable the owner/operator to recoup any capacity lost to well placement.

C. Professional Certification

In the proposed rule, the facility owner or operator must obtain certification of the alternate well location demonstration by a "qualified geologist" or "qualified geotechnical engineer." The proposed rule described the Agency's view of the qualifications of a "qualified geologist" and "qualified geotechnical engineer". Several commenters felt that a "qualified geologist or geotechnical engineer" may not be appropriate for certifying alternate well demonstrations. Commenters cited that certain geologists and geotechnical engineers are not qualified to perform hydrogeological assessments, to install ground-monitoring wells or to perform other ground-water related work. Commenters also felt that qualified hydrogeologists may not meet either of the Agency's definitions. One commentor suggested that the appropriate title for the individual certifying an alternate well demonstration was a "qualified ground water professional."

We agree in general with these comments and have modified the final rule in response. The final rule requires that alternate downgradient well location demonstrations be certified by a "qualified ground-water scientist", instead of a "qualified geologist or geotechnical engineer." This new definition is broader than the two definitions in the proposed rule. Thus, qualified individuals more clearly include hydrogeologists as well as geologists and geotechnical engineers. As commenters noted, a geologist or geotechnical engineer with a baccalaureate may not be qualified to perform hydrogeological assessments. The definition of "qualified ground-water scientist" in the final rule gives criteria, such as additional courses, that may render such an individual qualified. The Agency believes that specialized coursework and training should include physical geology, ground-water hydrology or hydrogeology, and pertinent environmental chemistry (e.g., organic chemistry, inorganic chemistry, soil chemistry, aquatic chemistry, or low temperature geochemistry).

The Agency agrees with commenters that the Agency description of the certifying individual should be defined in the regulations. In this rule, EPA is adding the following definition of "qualified ground-water scientist" to § 260.10. "A qualified ground-water scientist means a scientist or engineer who has received a baccalaureate or post-graduate degree in the natural sciences or engineering, and has sufficient training and experience in ground-water hydrology and related fields as may be demonstrated by state registration, professional certification, or completion of accredited university courses that enable that individual to make sound professional judgments regarding ground-water monitoring and contaminant fate and transport." The Agency replaced the term "hydrogeological processes" from the proposed rule with "ground-water monitoring" in the final definition because the latter term more accurately describes the expertise required for the purposes of this definition.

The Agency believes that as the ground-water profession is multidisciplinary, this definition is not overly prescriptive and provides necessary flexibility. The Agency plans to revise other ground-water related certification provisions in 40 CFR part 265 so that they are consistent with the § 260.10 definition for qualified ground-water scientist in a future rulemaking.

Commenters also recommended specific certifying organizations. While the Agency does include professional certification in its definition of a qualified ground-water scientist, it does not agree that this definition must include certification by any specific organizations. The definition provides that the certification (or other experience) must demonstrate that the individual has sufficient training and experience in ground-water hydrology to make professional judgements regarding ground-water issues. Although the Agency does not endorse any specific organizations that provide certifications, it included certification as one of the methods to demonstrate the qualifications of the certifying individual.

D. Immediate Detection

The proposed rule required that an alternate location be as close to the downgradient limit of waste management area as possible while ensuring immediate detection of releases. Several commentors argued that an alternate well location, which is at a distance from the downgradient limit of the waste management area, will not be able to immediately detect releases. The Agency agrees with this comment. The Agency continues to believe that wells placed at the downgradient limit of the waste management area are optimally located to detect releases. The goal of today's rule is to require monitoring wells with alternate locations to detect releases as soon as possible. Accordingly, the final rule does not contain the phrase "immediate detection" and instead,

VOL 56 ISS 246 DEC 23 1991 UMI

requires that the "* * * location ensures detection that, given the alternative location, is as early as possible * * *"

Commentors also requested clarification of the use of the word "practical" in the phrase, "the selected alternate downgradient location is as close to the limit of waste management area as practical." There are various circumstances, many site specific, that determine how close a well may be installed to an obstacle. No generic regulatory standard could provide meaningful guidance on all of the factors that might be relevant to an individual, site-specific decision. In general, EPA believes that a well should be installed as close to the obstacle as physically possible without (1) affecting the performance of the well; (2) damaging the obstacle; and, (3) endangering the installation or sampling crews. For example, a well should not be installed so close to a pipeline that it might damage the pipeline or cause contamination of the well. Similarly, a drilling crew must maintain a distance during well installation from obstacles, such as buried product storage tanks or electrical cables, that ensures their safety. The owner or operator should discuss any factors that influence the positioning of the well in his or her certified demonstration.

V. State Authorizations

A. Applicability of Rules in Authorized States

Under section 3006 of RCRA, EPA may authorize qualified States to administer and enforce the RCRA program within the State. (See 40 CFR part 271 for the standards and requirements for authorization.) Following authorization, EPA retains enforcement authority under sections 3008, 7003, and 3013 of RCRA, although authorized States have independent enforcement authority.

Prior to the Hazardous and Solid Waste Amendments of 1984 (HSWA), a State with final authorization administered its hazardous waste program entirely in lieu of EPA administering the Federal program in that State. The Federal requirements no longer applied in the authorized State, and EPA could not issue permits for any facilities in the State which the State was authorized to permit. When new, more stringent Federal requirements were promulgated or enacted, the State was obliged to enact equivalent authority within specified time frames. New Federal requirements did not take effect in an authorized State until the State adopted the requirements as State law.

In contrast, under section 3006(g) of RCRA, 42 U.S.C. 6926(g), new requirements and prohibitions imposed by HSWA take effect in authorized States at the same time that they take effect in nonauthorized States. EPA is directed to carry out those requirements and prohibitions in authorized States, including the issuance of permits, until the State is granted authorization to do so. While States must still adopt HSWA-related provisions as State law to retain final authorization, the HSWA requirements apply in authorized States in the interim.

B. Effect on State Authorizations

Today's rule is not effective in authorized States since the requirements are not being imposed pursuant to the Hazardous and Solid Waste Amendments of 1984. Thus, the requirements will be effective only in those States that do not have final authorization. In authorized States, the requirements will not be applicable until the State revises its program to adopt equivalent requirements under State law.

Section 271.21(e)(2) requires that States that have final authorization must modify their programs to reflect more stringent Federal program changes, and must subsequently submit the modification to EPA for approval. Generally, these authorized State programs must be revised to adopt those changes in a Federal program that are more stringent or broader in scope than existing Federal standards.

For those Federal program changes that are less stringent or reduce the scope of the Federal program, Sates are not required to modify their programs (see § 271.1(k)). Today's rule reduces the stringency of § 265.91(a). Therefore, authorized States may, but are not required, to modify their programs to adopt requirements equivalent or substantially equivalent to those in today's rule. Because today's requirements are less stringent than the existing Federal requirements, it is unlikely that any authorized State has equivalent requirements.

VI. Regulatory Requirements

A. Regulatory Impact Analysis

Exexcutive Order 12291 requires EPA to determine whether a new regulation will be "major" and, if so, that a Regulatory Impact Analysis be conducted. A major rule is defined as a regulation that is likely to result in:

1. An annual effect on the economy of $100 million or more;

2. A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions; or

3. Significant adverse effects on competition, employment, investment, productivity, innovation or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Agency has determined that today's rule is not a major rule, because it does not meet the above criteria. Today's action adds flexibility to the current interim status ground-water monitoring requirements, and does not impose further resource burdens on the regulated community.

B. Paperwork Reduction Act

The information collection and recordkeeping requirements in this proposed rule have been submitted for approval to the Office of Management and Budget under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* Recordkeeping burden on the public for this proposal is estimated at 1800 hours for the respondents, with an average of 20 hours per response. These burden estimates include all aspects of the recordkeeping effort and may include time for reviewing instructions, searching existing data sources, and gathering and maintaining necessary data.

List of Subjects in 40 CFR Parts 260 and 265

Administrative practice and procedure, Ground-water monitoring, Hazardous materials, Hazardous waste, and Reporting and recordkeeping requirements.

Dated: December 9, 1991.

F. Henry Habicht II,

Acting Administrator.

For the reasons set out in the preamble, chapter I of title 40 of the Code of Federal Regulations is amended as follows:

PART 260—HAZARDOUS WASTE MANAGEMENT SYSTEM: GENERAL

1. The authority citation for part 260 continues to read as follows:

Authority: 42 U.S.C. 6905, 6912(a), 6921–6927, 6930, 6934, 6935, 6937, 6938, 6939, and 6974.

2. In § 260.10 by adding in alphabetical order the following definition:

§ 260.10 Definitions.

* * * * *

Qualified Ground-Water Scientist means a scientist or engineer who has received a baccalaureate or post-graduate degree in the natural sciences or engineering, and has sufficient training and experience in ground-water hydrology and related fields as may be demonstrated by state registration, professional certifications, or completion of accredited university courses that enable that individual to make sound professional judgements regarding ground-water monitoring and contaminant fate and transport.

* * * * *

PART 265—INTERIM STATUS STANDARDS FOR OWNERS AND OPERATORS OF HAZARDOUS WASTE TREATMENT, STORAGE, AND DISPOSAL FACILITIES

1. The authority citation for part 265 continues to read as follows:

Authority: 42 U.S.C. 6905, 6912(a), 6924, 6925, and 6935.

2. In § 265.91 by adding paragraph (a)(3) to read as follows:

§ 265.91 Ground-water monitoring system.

(a) * * *

(3) The facility owner or operator may demonstrate that an alternate hydraulically downgradient monitoring well location will meet the criteria outlined below. The demonstration must be in writing and kept at the facility. The demonstration must be certified by a qualified ground-water scientist and establish that:

(i) An existing physical obstacle prevents monitoring well installation at the hydraulically downgradient limit of the waste management area; and

(ii) The selected alternate downgradient location is as close to the limit of the waste management area as practical; and

(iii) The location ensures detection that, given the alternate location, is as early as possible of any statistically significant amounts of hazardous waste or hazardous waste constituents that migrate from the waste management area to the uppermost aquifer.

(iv) Lateral expansion, new, or replacement units are not eligible for an alternate downgradient location under this paragraph.

BILLING CODE 6560-50-M

40 CFR Part 280

[FRL-4086-5]

Underground Storage Tanks Containing Petroleum; Financial Responsibility Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is today promulgating a rule to amend the financial responsibility requirements for underground storage tanks (USTs) containing petroleum that appeared in the **Federal Register** on October 26, 1988 (53 FR 43322), as amended October 31, 1990 (55 FR 46022). Specifically, this rule modifies the compliance dates under 40 CFR 280.91(d). Under the modification, all petroleum marketing firms owning 1 to 12 USTs at more than one facility or fewer than 100 USTs at a single facility and non-marketers with net worth of less than $20 million are required to comply with the requirements of 40 CFR part 280 subpart H—Financial Responsibility—by December 31, 1993. Today's rule extends the deadline from the previous date of October 26, 1991. This change will provide additional time for the development of financial assurance mechanisms (especially State assurance funds) to enable this group to comply.

EFFECTIVE DATE: The amendment to 40 CFR 280.91(d) contained in this rulemaking is effective December 23, 1991.

ADDRESSES: The public docket for this rule is in room M2427, U.S. EPA, 401 M St., SW., Washington, DC 20460. Call (202) 260-9327 for an appointment to review docket materials.

FOR FURTHER INFORMATION CONTACT: The RCRA/Superfund Hotline at (800) 424-9346 (toll free) or (703) 920-9810 in Virginia. For technical questions, contact Andrea Osborne in the Office of Underground Storage Tanks at (703) 308-8883.

SUPPLEMENTARY INFORMATION: On October 26, 1988, EPA promulgated financial responsibility requirements applicable to owners and operators of underground storage tanks (USTs) containing petroleum (53 FR 43322). In the final rule, EPA established a phased schedule of compliance for owners and operators of petroleum USTs. Petroleum marketing firms with 1 to 12 USTs at more than one facility or fewer than 100 USTs at a single facility, local government entities, and non-marketers whose net worth is less than $20 million were required to comply with the financial responsibility requirements by October 26, 1990. The principal reason for adopting the phased compliance approach was to provide the time necessary for providers (including private insurance companies and States intending to establish State assurance funds) of financial assurance mechanisms to develop new policies and programs or conform their policies and programs with EPA requirements. (See 53 FR 43324.)

On October 31, 1990, EPA published regulations (55 FR 46022) extending for one year (to October 26, 1991) the compliance deadline for marketers with 1 to 12 USTs at more than one facility or fewer than 100 USTs located at a single facility and non-marketers whose net worth is less than $20 million. The compliance deadline for local governments was extended until one year after the promulgation of a final rule providing additional mechanisms for local governments. Additional mechanisms for local governments were proposed on June 18, 1990 (55 FR 24892).

Since October 1990, EPA has continued to monitor the development of financial assurance markets, especially (1) insurance for corrective action and third party liability and (2) State assurance funds, to determine whether financial assurance mechanisms are becoming available to satisfy the needs of the regulated community. Based on this on-going review, EPA believes that tank owners required to comply by October 26, 1991, need additional time to meet insurers' standards for coverage. Also, States need additional time to develop State assurance funds, to submit them to EPA for review and approval as financial assurance mechanisms, and to make any modifications necessary for approval. Therefore, EPA is extending the compliance date for marketers with 1 to 12 USTs at more than one facility or fewer than 100 USTs at a single facility and non-marketers whose net worth is less than $20 million from October 26, 1991 to December 31, 1993. The Agency believes that this 26-month extension for Category IV tank owners will provide adequate time for tank owners and operators to obtain assurance. By October 1990, when the deadline was previously extended, EPA had approved 14 State assurance funds and had begun to review 11 State assurance funds that were submitted to EPA for approval. (It is important to note that upon submission of a State assurance fund, the fund is considered to be approved unless and until EPA disapproves it.) During the subsequent 12 months, an additional 13 State assurance funds

VOL
56
ISS
246
DE
23
1991
UMI

have been approved by EPA to serve as financial responsibility compliance mechanisms. Currently, 27 State assurance funds have been approved by EPA and an additional 9 State assurance funds have been submitted to EPA for approval. EPA expects State assurance fund development to continue during the 26-month extension. The Agency notes, however, that States are not required to develop assurance funds and that several States have indicated that they do not intend to develop State fund programs. Nevertheless, EPA anticipates that the extension will allow all States intending to develop State funds adequate time to do so.

Additionally, States will have more time to develop and implement financial assistance programs (e.g., direct loan programs, loan guarantee programs, grant programs) which help owners and operators pay for technical improvements such as tank upgrading, which, in turn, helps owners and operators qualify for insurance. Four States—Alaska, Hawaii, Maryland, and Washington—indicated that they have or are developing State financial assistance programs, and that an extension would provide more time for qualified owners and operators to obtain financial assistance to upgrade their UST facilities to meet insurance underwriting criteria. Finally, extension of the compliance deadline to December 31, 1991 will relate the compliance deadline for Category IV owners and operators to the final compliance date for implementation of release detection. Implementation of a release detection program is a critical element of the underwriting criteria for many insurers, and the ability to demonstrate that tanks are not leaking will allow more owners and operators to obtain insurance. Under EPA's phased schedule for release detection, all owners and operators must implement release detection no later than December 23, 1993.

I. Authority

These regulations are issued under the authority of Sections 2002, 9001, 9002, 9003, 9004, 9005, 9006, 9007, and 9009 of the Solid Waste Disposal Act, as amended (42 U.S.C. 6912, 6991, 6991a, 6991b, 6991c, 6991d, 6991e, 6991f, and 6991h).

II. Effective Date

This rule will be effective on December 23, 1991 pursuant to 5 U.S.C. 553(d). This rule may be made effective immediately because it extends a deadline for compliance in existing regulations and therefore is a "substantive rule which grants or recognizes an exemption or relieves a restriction." 5 U.S.C. 553(d)(1). The Agency also finds that there is good cause to make the rule effective immediately because the regulated community does not need time to come into compliance. 5 U.S.C. 553(d)(3).

III. Background

When devising the phased compliance approach, the Agency wanted to achieve the best balance between the need to demonstrate financial responsibility for UST releases and the time necessary for owners and operators to obtain assurance mechanisms. The Agency attempted to establish compliance dates that were as early as possible, considering the type of assurance different types of facilities were likely to obtain. Petroleum marketers owning or operating 1,000 or more USTs and non-marketers with more than $20 million in tangible net worth were required to comply by January 24, 1989, based primarily on their ability to qualify for self-insurance. Petroleum marketers with 100 to 999 USTs were required to comply by October 26, 1989. These marketers were estimated to be relatively more likely to be able to obtain insurance; some of them were also expected to qualify as self-insurers. Petroleum marketers owning 13 to 99 USTs at more than one facility were originally required to comply by April 26, 1990. However, on May 2, 1990, the Agency published a rule (55 FR 18568) extending this compliance date to April 26, 1991. These marketers were thought to be less likely to be able to obtain insurance than members of the October 26, 1989, compliance group. Petroleum marketers owning or operating fewer than 13 USTs at more than one facility or owning or operating only one facility with fewer than 100 USTs, and UST owners and operators who were not petroleum marketers (including local government entities) were required to comply by October 26, 1990. This group was expected to rely primarily on State assurance funds for compliance. On October 31, 1990, EPA extended the compliance deadline for one year for small marketers (marketers with fewer than 13 USTs or fewer than 100 USTs at a single facility) and small non-marketers (non-marketers with less than $20 million in net worth). This extension was based on the rate of development of State assurance funds. In addition, EPA extended the compliance deadline for local governments until one year after publication of a final rule with additional mechanisms for local governments to demonstrate compliance. Additional mechanisms for local governments were proposed on June 18, 1990 (55 FR 24692). The deadline for compliance by local governments is not affected by this rule.

Through monitoring the development of financial assurance mechanisms, the Agency has learned more about the way insurers operate in the UST insurance market. EPA now believes that the extended compliance date of October 26, 1991 for Category IV tank owners (marketers owning 1 to 12 USTs or fewer than 100 USTs at one facility and non-marketers whose net worth is less than $20 million) did not allow adequate time for compliance. When devising the original and revised phased compliance schedule, the Agency expected that members of this compliance group would rely on insurance and State assurance funds. The Agency had originally believed that 24 months from promulgation of the final financial responsibility rule would provide adequate time for owners and operators to upgrade their USTs to meet insurers' requirements and for States to develop and submit assurance funds to EPA. Since promulgation of the 1988 final rule, however, EPA has learned that tank owners and operators require additional time to comply with conditions imposed on them by the insurance industry. Some of these conditions include operation of only tanks younger than 15 years of age, clean site conditions, a reliable method of leak detection, etc. For example, some insurers have informed EPA that they have rejected UST coverage applications because of existing contamination, poor tank management, and inadequate leak detection monitoring. Many members of this compliance group may not be able to meet these standards by October 26, 1991, and thus would be required to seek an alternative financial assurance mechanism.

On August 14, 1991, EPA proposed to extend the compliance deadline for this group (56 FR 40292). EPA based the proposal on its understanding that more members of this compliance group than the Agency had originally projected must rely on State assurance funds, rather than on insurance, to demonstrate compliance with the financial responsibility requirements. EPA believed that, in order for owners and operators to rely on State assurance funds as compliance mechanisms, States must have more time to submit their State assurance funds to EPA for approval.

At this time, EPA has approved 27 State assurance funds to serve as financial responsibility compliance mechanisms that provide full or partial coverage; 9 more have formally

submitted their State assurance funds to EPA for approval.

In addition to State assurance funds, which serve as financial responsibility compliance mechanisms, some States, such as Alaska, Hawaii, Oregon, Washington, and Maryland, are developing financial assistance programs, such as grant programs and loan programs, to assist UST owners in upgrading their facilities to meet insurance underwriting standards. The State of Washington has also implemented a reinsurance program, under which the State relies on private insurers to sell insurance but provides reinsurance coverage to limit the insurers' risk and reduce premium costs.

Comments on the proposed rule were received from 57 commenters. A Response to Comments Document is in the public docket for the rule. Most commenters supported the extension of the compliance deadline for Category IV owners and operators. Commenters asserted that the proposed extension would allow the time needed for owners and operators seeking insurance to meet insurers' standards for coverage. They also stated that an extension would allow the time necessary for States that do not have State assurance funds or financial assistance programs to develop such funds and programs; whereas in States where these funds and programs exist, the extension would provide States with more time to develop outreach programs, and would provide owners and operators with more time to participate.

Some commenters argued against extending the compliance deadline, however, stating that affordable private insurance is available to both marketers and nonmarketers, and that an extension would discourage UST owners from taking the necessary steps toward compliance and would undermine the credibility of the UST program. Some of the comments regarding the availability and affordability of insurance in certain States were countered directly by comments from UST owners in those States that they were able to obtain only minimal pollution liability coverage, with high deductibles, and that the costs for this coverage were prohibitive. Some of the commenters opposing a general extension acknowledged that an extension was justified in States without State assurance funds.

One commenter, who removed tanks before the proposal to extend the compliance deadline, argued that an additional extension places those who have already complied with the regulations at a competitive disadvantage with respect to those who have not. The Agency believes that this situation is an unfortunate result of the regulatory development process, but is not indicative of the potential effects on the majority of the regulated community. The Agency is unable to determine whether an extension is necessary until near the deadline for compliance, however, and so is unable to provide more advanced notice of the extension. This difficulty is exacerbated by statutory requirements to obtain public participation in the rulemaking process, which further restricts EPA's ability to provide definitive answers about forthcoming changes in the regulations. The Agency regrets any problems experienced by specific UST owners and operators as a result of the changes in the regulatory deadline.

Regarding the length of an extension, many commenters supported the proposal to extend the compliance deadline to December 31, 1992. One commenter proposed a shorter extension of the deadline to allow States more time to develop State assurance funds, yet not undermine the financial responsibility requirements through excessive delay of compliance deadlines. Several commenters favored an extension until December 31, 1993. These included the Hawaii Department of Health, which requested the extra time to implement its loan program for UST owners, and the National Air Transportation Association, which advocated synchronizing the compliance schedule for financial responsibility requirements with that for release detection requirements. Other commenters also suggested longer extensions; two of these requested an indefinite extension.

Based on a review of the comments, EPA has decided to extend the compliance date to December 31, 1993, for small petroleum marketing firms (those with fewer than 13 USTs or fewer than 100 USTs at a single facility) and nonmarketers with net worth of less than $20 million. This 26-month extension will allow all States that intend to develop State assurance funds or financial assistance programs to do so, and will allow UST owners and operators in these States to participate. It will also delay the need for meeting financial responsibility requirements until after the December 22, 1993 compliance deadline for release detection under 40 CFR 280.40. Installing release detection may be a requirement for obtaining insurance in some areas; this extension will assure that all UST owners seeking insurance would have already complied with Federal release detection requirements. The Agency notes that the extension provided by this rule does not preclude States from adopting an earlier deadline; in those States where a State assurance fund exists, States may find it appropriate to maintain the previous deadlines for compliance with financial responsibility requirements. This final rule applies to the Federal compliance date only, and does not preclude different State compliance deadlines.

Several commenters requested that the extension be broadened to include owners and operators in compliance Category III, which were required to have complied by April 26, 1991. Commenters argued that these owners and operators are also having difficulty obtaining insurance or otherwise demonstrating financial responsibility, and that extending the compliance deadline for owners and operators in Category IV only would place owners and operators in Category III at a competitive disadvantage. EPA believes, however, that owners and operators with financial assurance mechanisms may have an advantage over competitors without these mechanisms since the infrequent, unknown and possibly large costs associated with a leak may be greater than the regular, known, and possibly smaller costs of the financial assurance mechanism. In addition, EPA analysis suggests that up to 80% of the owners and operators in Category III have already obtained assurance mechanisms through State funds and private insurance. The Agency emphasizes that its intention has been and continues to be to require demonstration of financial responsibility at the earliest date reasonably achievable, which for Category III has already passed. UST owners and operators in Category III were required to have demonstrated compliance with the financial responsibility requirements more than six months ago. The Agency believes that "extending" the deadline at this time would penalize those owners and operators who have made a good faith effort to comply with the requirements.

Several commenters argued for special treatment for USTs owned by Indian Tribes and for USTs located on tribal lands. The commenters claimed that these USTs are not covered by State assurance funds, are not eligible for coverage by the LUST Trust Fund, are located in geographic regions that offer a low potential for contamination of groundwater supplies, and have limited access to insurance. While Indian Tribes cannot get State program grants or LUST Trust Fund Cooperative Agreements (as States can), they are eligible to receive LUST Trust Fund

VOL 56 ISS 246 DEC 23 1991 UMI

dollars from EPA under certain circumstances. State financial assurance funds do not necessarily exclude tribally-owned tanks; however, since States do not have taxing powers over tribal lands, States cannot collect the taxes and fees that are usually required for participation and access to these State funds unless the Tribe or individual owner opts to pay the fee voluntarily to participate in the fund.

The Agency anticipates that the extension will provide additional time for many owners and operators of USTs located on tribal lands to obtain financial assurance mechanisms. Nevertheless, EPA acknowledges the concerns expressed by these commenters. As discussed below, EPA intends to continue to monitor the development of financial assurance mechanisms during the extension period to determine whether specific groups of UST owners and operators, including owners and operators of USTs located on tribal lands, may require additional consideration.

USTs directly owned or operated by Tribal governments are not within the scope of this rule because the Agency treats them as local governments for the purposes of the financial responsibility requirements. Tribal governments will be eligible to use the new mechanisms being developed for local governments by the Agency and will be required to comply within 12 months of publication of the new mechanisms for demonstrating financial responsibility.

IV. Discussion of Options Considered But Not Proposed

In addition to the proposed rule, EPA considered, but did not propose, two additional options to grant relief to UST owners and operators. Under the first option, a subset of those entities currently required to comply by October 26, 1991 would be granted an additional extension. Under the second option, any UST facility meeting certain Federally-specified conditions as determined by the States would receive an extension.

Under the first option, retail marketers in Category IV that provided essential services such as being the sole source of petroleum products for a rural community and whose tanks posed minimal environmental risks would be granted an extension of the compliance deadline of up to 90 days following the final date for compliance with the technical standards for new tanks (i.e., March 22, 1999). Owners and operators must generally meet these technical requirements (which include tank upgrading, leak detection, etc.) to qualify for private insurance.

If EPA were to adopt the second option, EPA would extend the federal deadline for any facility, regardless of its compliance category, if the State made certain findings based on federally determined criteria. The extension would last up to 90 days following the final date for compliance with the technical standards for new tanks (March 22, 1999). The specified criteria could include facilities that (1) had been identified by States as entities in need of an extension, (2) sold petroleum products on a retail basis, (3) were the sole provider of a class of petroleum transportation fuels (e.g., gasoline or diesel fuel) within a 25-mile radius, and (4) met certain environmental criteria such as that the underground storage tank not be too close to groundwater or that the percentage of the local population that relies on groundwater as their drinking water source not exceed a certain number. Under this option, the federal extension could be granted to local governments, especially those in isolated rural areas that provide essential community services (e.g., public health and safety). Additionally, EPA could allow extensions for Indian tribes owning and operating USTs on Indian lands or to owners and operators of USTs on Indian lands that provided essential services.

Most commenters opposed Option 1. Some claimed that the definitions of "rural" or "sole source provider" would prove unworkable. Others claimed that non-marketers have an equivalent need for an extended compliance deadline. A few commenters stated that the definitions could provide some firms with unfair competitive advantages. A few commenters supported Option 1. Commenters in favor of Option 1 stated that current UST regulations are reducing the retail availability of petroleum products in rural areas where retail outlets for these products may already be scarce. Commenters also proposed definitions of "rural area" for EPA to consider if the Agency were to propose Option 1.

Many more commenters supported Option 2, under which any facility unable to comply with the financial responsibility deadline, or having difficulty in obtaining financial assurance, could be granted an extension in States where certain findings are made based on Federally-determined criteria. Others advocated extensions when neither State assurance funds, financial assistance programs, nor affordable insurance were available. Some commenters challenged the use of "sole provider" as a criterion, while others suggested definitions for "sole provider" for EPA's consideration if the Agency were to propose Option 2. Commenters also proposed environmental criteria to be considered for use under Options 1 or 2.

Three commenters requested that EPA review the special circumstances of tribal governments and of UST owners and operators on tribal lands. The commenters noted that Indian tribes do not impose taxes and therefore do not have the financial resources to self-insure. At the same time, they said that State assurance funds generally do not apply to tribes, because States do not have the authority to levy and collect taxes on Indian lands. EPA acknowledges the concerns expressed by these commenters. EPA intends to use the time available during this extension period to continue to monitor the development of financial assurance mechanisms and to determine whether specific groups of UST owners and operators, including owners and operators of USTs located on tribal lands, may require additional consideration. Under today's rule, however, category IV USTs on Tribal lands that are not owned by Tribal governments must demonstrate financial responsibility by December 31, 1993.

USTs directly owned or operated by Tribal governments are not within the scope of today's rule. The Agency treats Indian Tribes as local governments for the purposes of the financial responsibility requirements. Consequently, USTs owned by Tribal governments will be required to comply within one year of the publication of the final rule providing additional mechanisms for local governments to demonstrate financial responsibility; these mechanisms were proposed on June 18, 1990 (55 FR 24692).

EPA appreciates the efforts of commenters in providing information relative to Options 1 and 2. These comments suggest that some specific classes or categories of UST owners or facilities may face exceptional or unique difficulty in complying with the financial responsibility requirements by December 31, 1993. Although neither option is being adopted in today's rule, EPA is continuing to review how and whether some variation of Option 2 should be adopted. EPA will use the 26 month period provided by today's rule to continue to monitor the development of programs to assist the most affected segments of the regulated community and to determine whether additional relief may be necessary. If further relief is determined to be appropriate, after considering all statutory, environmental, economic, and programmatic concerns, EPA will determine the best method, if any, to provide the relief. The Agency believes, however, that more information will be necessary to characterize fully the segments that may require further assistance and to develop appropriate criteria. To obtain this information, EPA intends to continue its dialogue with States and the regulated community.

V. Economic Impacts

This section provides an estimate of the economic impacts of the proposed rule. Because the proposed rule will not cause an annual impact on the economy of $100 million or more and will not cause an increase in the costs of production or the prices charged by the affected community, a Regulatory Impact Analysis is not required. Instead, EPA has prepared an economic impact analysis to estimate the number of affected facilities and the costs to affected facilities under the proposed and alternate options, and has evaluated the impacts on small entities as required by the Regulatory Flexibility Act.

A. Economic Impact Analysis

The economic analysis examines the potential economic effects of extending the compliance deadline. It provides an estimate of the number of potentially affected entities, a comparison of the financial condition of affected entities with and without a State assurance fund, and an analysis of rural stations.

EPA analyses have suggested that a large number of USTs and UST-owning entities are subject to the October 26, 1991 deadline. Of the approximately 1.7 million USTs subject to the technical and financial responsibility standards, about 790,000 are owned by petroleum marketers with 12 or fewer USTs, by marketers that own or operate fewer than 100 USTs at a single facility, or by non-marketers with net worth of less than $20 million. These USTs are located at about 216,000 facilities, and are owned by about 213,000 firms (for an average of 3.8 USTs per owner). As a result, the extension of the compliance deadline will affect a significant proportion of the UST-owning population.

The development of State assurance funds and State financial assistance programs provides relief to UST owners and operators, particularly those with fewer facilities and USTs. Small service stations (including single-outlet stations) required to obtain private insurance or otherwise cope with cleanup costs without State aid face potentially severe impacts. EPA estimates that 45 percent of small stations could suffer severe financial distress, and 41 percent could fail. (The figure for severe financial distress includes those firms that would fail; thus, about 90 percent of those firms suffering financial distress would fail.) Small stations in rural areas may be even more heavily affected, because they tend to have a smaller revenue base and are less financially robust than stations in metropolitan areas.

In general, State assurance funds can reduce instances of failure over the next ten years if their deductibles are small enough. State assurance funds with $10,000 deductibles can reduce failures from 41 percent to only 14 percent. State assurance funds with $50,000 deductibles are predicted to reduce failures by a much smaller amount. State financial assistance programs that help firms upgrade their USTs can also help by alleviating some of the burden associated with obtaining insurance.

B. Regulatory Flexibility Analysis

The Regulatory Flexibility Act generally requires all federal agencies to review the impact of their regulations to determine whether the regulations will have a significant economic impact on a substantial number of small entities. If so, the Agency must prepare a Regulatory Flexibility Analysis. EPA believes that this rule will not, if promulgated, have a significant economic impact on a substantial number of small entities. The proposed extension of the compliance date will provide relief to members of this compliance group by allowing them additional time to comply with the financial responsibility requirements. Accordingly, the Agency has concluded that the law does not require a Regulatory Flexibility Analysis, and certifies that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 40 CFR Part 280

Administrative practice and procedure, Environmental protection, Hazardous materials insurance, Oil pollution, Penalties, Petroleum, Reporting and recordkeeping requirements, State program approval, Surety bonds, Underground storage tanks, Water pollution control.

Dated: December 16, 1991.

William K. Reilly,

Administrator.

For the reasons set out in the preamble, part 280 of title 40, chapter I of the Code of Federal Regulations is amended as follows:

PART 280—TECHNICAL STANDARDS AND CORRECTIVE ACTION REQUIREMENTS FOR OWNERS AND OPERATORS OF UNDERGROUND STORAGE TANKS (UST)

1. The authority citation for part 280 continues to read as follows:

Authority: 42 U.S.C. 6912, 6991, 6991(a), 6991(b), 6991(c), 6991(d), 6991(e), 6991(f), and 6991(h).

2. Section 280.91 is amended by revising paragraph (d) to read as follows:

§ 280.91 Compliance dates.

* * * * *

(d) All petroleum UST owners not described in paragraphs (a), (b), or (c) of this section, excluding local government entities: December 31, 1993.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

45 CFR Part 205

RIN 0970-AA81

Aid to Families With Dependent Children and Adult Assistance Programs; Computer Matching and Privacy Protection Act

AGENCY: Administration for Children and Families (ACF), HHS.

ACTION: Interim final rule.

SUMMARY: This interim final rule applies to State agencies administering the Aid to Families with Dependent Children (AFDC) Program under title IV-A and the Adult Assistance Programs under titles I, X, XIV, and XVI (Aid to the Aged, Blind, or Disabled) of the Social Security Act. It implements provisions of the Computer Matching and Privacy Protection Act of 1988 and the Computer Matching and Privacy Protection Amendments of 1990, amending the requirement for independent verification of computer match findings before imposing any adverse action(s).

DATES: Comments must be received on or before January 22, 1992.

EFFECTIVE DATE: December 23, 1991.

ADDRESSES: Comments should be submitted in writing to the Assistant Secretary for Children and Families, Attention: Mr. Mack A. Storrs, Director, Division of Policy, Office of Family Assistance, Fifth Floor, 370 L'Enfant

VOL 56 ISS 246 DEC 23 1991 UMI

Promenade, SW., Washington, DC 20447. Comments may be inspected between 8 a.m. and 4:30 p.m. during regular business days by making arrangements with the contact person identified below.

FOR FURTHER INFORMATION CONTACT: Mr. Mack Storrs, Director of Policy, Office of Family Assistance, Fifth Floor, 370 L'Enfant Promenade, SW., Washington, DC 20447, telephone (202) 401-9289.

SUPPLEMENTARY INFORMATION: The Computer Matching and Privacy Protection Act of 1988 (CMPPA) defines a matching program as

"• • • any computerized comparison of—(i) two or more automated systems of records or a system or records with non-Federal records for the purpose of—(I) establishing or verifying the eligibility of, or continuing compliance with statutory and regulatory requirements by, applicants for, recipients or beneficiaries of, participants in, or providers or services with respect to cash, on in-kind assistance or payments under Federal benefit programs • • •"

Current Federal-State computer matching activities, as well as any proposed Federal matches to be performed by State agencies for the purpose of establishing or verifying the eligibility of applicants for and recipients of AFDC and Adult Assistance, meet the criteria of a "matching program" as described in the CMPPA. State-developed matching activities involving a comparison with other State or non-Federal records are exempt from the verification requirements set forth in these rules.

Regulatory Provisions

Prior to the Omnibus Budget Reconciliation Act of 1990 (OBRA-90), the CMPPA required States to provide a 30-day notice before adverse actions (i.e., denying, reducing, suspending, or terminating assistance payments) could be taken as a result of the findings of a computer match. The OBRA-90 amendments authorize programs that have in their statute or regulations a different time period for notification (e.g., a 10 day timely notice period) to substitute that other period. If no such notice requirement is provided, the program must adopt a 30-day notice period before adverse action can be taken as a result of the findings of a computer match. Since the AFDC and Adult Assistance programs are bound by the 10-day timely notice requirement at § 205.10(a)(4)(i)(A), this 10-day period will apply to adverse actions based on computer match findings.

The CMPPA requires State agencies to independently verify the computer match information in order to confirm its accuracy. It expressly prohibits a recipient agency from taking an adverse action(s) against an individual prior to independently verifying the accuracy of the information. The OBRA-90 amendments also preclude the imposition of an adverse action against an individual until the agency has independently verified the findings of the computer match. However, the amendments also provide for a waiver procedure where a State can accept the match information without prior independent verification provided that the applicable Federal Data Integrity Board determines, in accordance with guidelines by the Office of Management and Budget, that: (1) Information provided by certain identified agencies is restricted to identification and amount of benefits paid by the source agency under a Federal benefit program; and (2) that there is a high degree of confidence in the accuracy of the information provided. The regulations at § 205.56(b) have been amended to reflect these new requirements.

The provisions currently found at § 205.56(b) pertaining to unearned income information for the Internal Revenue Service (IRS) have also been revised. Specific procedures for the verification of IRS information will be set forth in agreements developed by IRS.

The CMPPA also requires that the appropriate verification procedures be set out in agreements negotiated between matching agencies and matching providers. Such agreements must then be approved by the Federal agency Data Integrity Boards. Section 205.56 has been revised to incorporate this requirement.

Regulatory Procedures

Justification for Dispensing with Notice of Proposed Rulemaking

The amendments to the regulation are being published in interim final form. The Administrative Procedure Act, 5 U.S.C. 553(b)(B), provides that, if the Department for good cause finds that Notice of Proposed Rulemaking is unnecessary, impractical or contrary to the public interest, it may dispense with such notice if it incorporates a brief statement in the interim final regulation of the reasons for doing so.

The Department finds that there is good cause to dispense with Notice of Proposed Rulemaking with respect to these changes. We find that publication of this regulation in proposed form would be unnecessary. This regulation is procedural and generally implements the statutory provisions. While Notice of Proposed Rulemaking is being waived, we are interested in comments regarding any changes which should be made to these interim rules. We will review any comments that are received within 30 days from the date of publication of this interim final rule and, if appropriate, we will publish final rules with any necessary changes.

Executive Order 12991

These interim final rules have been reviewed under Executive Order 12291 and do not meet any of the criteria for a major regulation. Therefore, a regulatory impact analysis is not required because these regulations will not: (1) Have an annual effect on the economy of $100 million or more; (2) impose a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies or geographic regions; or (3) result in significant adverse effects on competition, employment, investment, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Paperwork Reduction Act

This rule does not require any information collection activities and therefore, no approval is necessary under the Paperwork Reduction Act.

Regulatory Flexibility Act

The Regulatory Flexibility Act (Pub. L. 96-354) requires the Federal government to anticipate and reduce the impact of regulations and paperwork requirements on small businesses. The primary impact of these proposed rules is on State governments and individuals. Therefore, we certify that these rules, if promulgated, will not have a significant economic impact on a substantial number of small entities because they affect benefits to individuals and payments to States. Thus, a regulatory flexibility analysis is not required.

List of Subjects in 45 CFR Part 205

Computer technology, Grant programs—social programs, Privacy, Public assistance programs, Reporting and recordkeeping requirements, Wages.

Dated: August 28, 1991.

Jo Anne B. Barnhart,

Assistant Secretary for Children and Families.

Approved: October 22, 1991.

Louis W. Sullivan,

Secretary of Health and Human Services.

Part 205 of chapter II, title 45, Code of Federal Regulations is amended as set forth below:

PART 205—GENERAL ADMINISTRATION—PUBLIC ASSISTANCE PROGRAMS

1. The authority citation for part 205 is revised to read as follows:

Authority: 5 U.S.C. 552a note; 42 U.S.C. 602, 603, 606, 607, 611, 1302, 1306(a), and 1320b-7

2. Section 205.56 is amended by revising paragraph (b) to read as follows:

§ 205.56 Requirements governing the use of income and eligibility information.

• • • • •

(b)(1) State agencies shall not take any adverse action to terminate, deny, suspend or reduce benefits to an applicant or recipient, based on information produced by a Federal computer matching program that is subject to the requirements in the Computer Matching and Privacy Protection Act (CMPPA) unless:

(i) The information has been independently verified in accordance with the independent verification requirements set out in the State agency's written agreement as required by § 205.58 or

(ii) The independent verification requirement has been waived by the Department's Data Integrity Board.

(2) The CMPPA defines a matching program as any computerized comparison of:

(i) Two or more automated systems of records or a system of records with non-Federal records for the purpose of:

(A) Establishing or verifying the eligibility of, or continuing compliance with statutory and regulatory requirements by, applicants for, recipients or beneficiaries of, participants in, or providers of services with respect to, cash or in-kind assistance or payments under Federal benefit programs, or

(B) Recouping payments or delinquent debts under such Federal benefit programs, or

(ii) Two or more automated Federal personnel or payroll system of records or a system of Federal personnel or payroll records with non-Federal records.

• • • • •

3. Section 205.58 is amended by revising paragraphs (a) and (b)(4) to read as follows:

§ 205.58 Income and eligibility information; specific agreements required between the State agency and the agency supplying the information.

(a) A State plan under title I, IV-A, X, XIV, or XVI (AABD) of the Social Security Act must provide that, in carrying out the requirements of §§ 205.55 and 205.56, the State agency will enter into specific written agreements as described in paragraph (b) of this section with those agencies providing income and eligibility information. Agreements with Federal agencies are subject to the approval by the appropriate Federal Data Integrity Boards. The agreements will contain the procedure to be used in requesting and providing information.

(b) • • •

(4) The type of information and reporting periods for which information will be provided and the verification methodologies to be used;

• • • • • •

BILLING CODE 4150-04-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 556

[Docket No. 75-21; Notice 3]

RIN 2127-AE30

Exemption for Inconsequential Defect or Noncompliance

AGENCY: National Highway Safety Administration (NHTSA), DOT.

ACTION: Final rule.

SUMMARY: A manufacturer which determines that its motor vehicle or motor vehicle equipment fails to comply with a Federal motor vehicle safety standard or contains a safety-related defect may, under part 556, Exemption for inconsequential defect or noncompliance, petition to be exempted from the obligation under the National Traffic and Motor Vehicle Safety Act to notify owners and remedy the noncompliance or defect, upon a showing that the noncompliance or defect is inconsequential as it relates to motor vehicle safety. Under part 573, Defect and noncompliance reports, a manufacturer making a noncompliance or defect determination must, within 5 working days of that determination, file a report with NHTSA. The final rule adopted by this notice requires a manufacturer petitioning under part 556 to attach a copy of its part 573 report with its petition.

DATES: The effective date of the final rule is January 22, 1992.

FOR FURTHER INFORMATION CONTACT: Taylor Vinson, Office of Chief Counsel, NHTSA [202-366-5263].

SUPPLEMENTARY INFORMATION: Under 49 CFR 573.5(a), "Each manufacturer shall furnish a report to the NHTSA" for each noncompliance with a Federal motor vehicle safety standard or each safety related defect in the vehicles or motor vehicle equipment that he manufactures "that he or the Administrator determines to exist." Section 573.5(b) requires that the manufacturer submit the report "not more than 5 working days after" a noncompliance or safety related defect "has been determined to exist." A manufacturer making such a determination is required by the National Traffic and Motor Vehicle Safety Act to notify its purchasers and to remedy the noncompliance or the safety related defect. However, under 49 CFR 556.4(a), the manufacturer may file a petition with the Administrator for a determination that the noncompliance or safety related defect is inconsequential as it relates to motor vehicle safety. Such petition must be filed within 30 days after the determination. If the petition is granted, the manufacturer is excused from the obligation to notify and remedy.

It is clear that if a noncompliance or safety related defect does not exist, the obligation to notify and remedy does not arise. Thus § 556.4(a) extends the right to petition only to "A manufacturer who has determined the existence, in a motor vehicle or item of replacement equipment that he produces, of a defect related to motor vehicle safety or a noncompliance with an applicable Federal motor vehicle safety standard • • •". In other words, the right extends only to a manufacturer which has the related obligation to file a part 573 report.

On occasion, the fact that a manufacturer must determine the existence of a noncompliance before the manufacturer can file a part 556 petition does not appear clear to manufacturers seeking an inconsequentiality determination. When the agency receives a petition, but no part 573 report relating to the noncompliance or defect forming the basis for the petition, the agency must take time to obtain the manufacturer's determination of noncompliance before it can consider the petition. This delay is not in the

VOL
56
ISS
246
DEC
23
1991
UMI

interest of safety in those instances in which the Administrator ultimately denies the petition because it is important that notification and remedy begin as soon as practicable after the denial. Although the agency believes that the relationship between part 573 and part 556 is presently unambiguous, it wishes to make the relationship even clearer by explicitly providing in part 556 that a petitioning manufacturer is required to submit a copy of its part 573 report as part of its petition. It is therefore adding that requirement as § 556.4(b)(6) (the regulation already requires the manufacturer to submit its petition in three copies; thus, three copies of the report will also be required).

In accordance with 5 U.S.C. 553(b)(3)(A) and (B), because the amendment is procedural in nature and does not alter the existing requirement to submit part 573 reports containing defect or noncompliance determinations, it is hereby found for good cause shown that notice and public procedure thereon are unnecessary, and the amendment is effective thirty days after its publication in the **Federal Register**.

Rulemaking Analyses

A. Executive Order 12291 (Federal Regulation) and DOT Regulatory Policies and Procedures

After considering the impacts of this rulemaking action, NHTSA has determined that the action is not major within the meaning of Executive Order 12291 "Federal regulation", nor significant under Department of Transportation regulatory policies and procedures. The action does not involve any substantial public interest or controversy. There is no substantial effect upon State and local governments. There is no substantial impact upon a major transportation safety program. Therefore, a full regulatory evaluation analyzing the economic impact of the final rule has not been prepared.

B. Regulatory Flexibility Act

The agency has also considered the effects of this action in relation to the Regulatory Flexibility Act. I certify that this action will not have a significant economic impact upon a substantial number of small entities. The economic impact of providing additional copies of a report that is already required, is not significant. This action will also not affect the price of new motor vehicles or motor vehicle equipment.

C. Executive Order 12612 (Federalism)

The agency has analyzed the action in accordance with the principles and criteria contained in Executive Order 12612 "Federalism" and determined that the action does not have sufficient Federalism implications to warrant the preparation of a federalism Assessment.

D. National Environmental Policy Act

NHTSA has analyzed this action for purposes of the National Environmental Policy Act. The action will not have a significant effect upon the environment.

List of Subjects in 49 CFR Part 556

Motor vehicle safety, motor vehicles, motor vehicle equipment.

In consideration of the foregoing, 49 CFR part 556 is amended as follows:

PART 556—[AMENDED]

1. The authority citation for part 556 continues to read as follows:

Authority: 15 U.S.C. 1417; delegation of authority at 49 CFR 1.50.

§ 556.4 [Amended]

2. In Section 556.4, new paragraph (b)(6) is added to read as follows:

* * * * *

(b) * * *

(6) Be accompanied by three copies of the report the manufacturer has submitted, or is submitting, to NHTSA in accordance with part 573 of this chapter, relating to its determination of the existence of safety related defect or noncompliance with an applicable safety standard that is the subject of the petition.

* * * * *

Issued on December 10, 1991.

Proposed Rules

Federal Register
Vol. 56, No. 246
Monday, December 23, 1991

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

7 CFR Part 1435

Sugar and Crystalline Fructose Marketing Allotment Regulations for Fiscal Years 1992 Through 1996

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Proposed rule; extension of comment period.

SUMMARY: This document announces a 30-day extension of time, until February 3, 1992, for comments on the proposed rule published in the **Federal Register** on December 2, 1991 (56 FR 61191). The proposed rule set forth proposed regulations for standby marketing allotments on sugar and crystalline fructose.

DATES: All comments on the proposed rule must be submitted on or before February 3, 1992 in order to be assured of consideration.

ADDRESSES: Comments should be mailed or delivered to Dean Ethridge, Deputy Administrator for Program Planning and Development (DAPPD), Agricultural Stabilization and Conservation Service (ASCS), room 3090, South Agriculture Building, P.O. Box 2415, U.S. Department of Agriculture, Washington, DC 20250. Comments received may also be inspected at room 3741, South Agriculture Building, U.S. Department of Agriculture, 14th Street and Independence Avenue SW., Washington, DC between 9 a.m. and 4:30 p.m., Monday through Friday except holidays.

FOR FURTHER INFORMATION CONTACT: Robert D. Barry, Assistant to the Deputy Administrator for Program Planning and Development, ASCS; telephone (202) 720-3391.

SUPPLEMENTARY INFORMATION: Part VII of subtitle B of title III of the Agricultural Adjustment Act of 1938, as amended by the Food, Agriculture, Conservation, and Trade Act of 1990, provided for the imposition of marketing allotments on sugar processed from domestically produced sugarcane and sugar beets and on crystalline fructose manufactured from corn, during the fiscal years 1992 through 1996, if imports of sugar would otherwise be less than 1.25 million short tons, raw value. On December 2, 1991 the Commodity Credit Corporation published a proposed rule setting forth proposed regulations to implement these "standby" marketing allotments.

The proposed rule provided for a 30-day period for public comments; such comments were required to be received on or before January 2, 1992 in order to be assured of consideration. Representatives of the sugar and crystalline fructose industries have requested that this comment period be extended by 30 days, to February 3, 1992, due to the pending revision of several marketing allotment provisions by the Food, Agriculture, Conservation, and Trade Act Amendments of 1991, the recent intensification of negotiations on agricultural policy reforms in the Uruguay Round of multilateral trade negotiations under the General Agreement on Tariffs and Trade (GATT), and the onset of the holiday season. In the interests of receiving the fullest possible public comment on the proposed regulations, CCC will grant this request.

Notice

Notice is hereby given that the period of time for submitting comments on the proposed rule published on December 2, 1991 (56 FR 61191) is extended to February 3, 1992.

Signed the 17th day of December, 1991, in Washington, DC.

Keith D. Bjerke,

Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410-05-M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

[Docket No. PRM-50-56]

Richard P. Grill; Filing of a Petition for Rulemaking

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of receipt of petition for rulemaking.

SUMMARY: Mr. Richard P. Grill requests that the Nuclear Regulatory Commission (NRC) amend its regulations that establish general design criteria for nuclear power plants, as necessary, to add lightning induced and other electrical transients to the required list of phenomena that licensed nuclear power plants and other nuclear facilities must be designed to withstand safely. The petitioner requests that the NRC require licensees of nuclear power plants and other nuclear facilities to consider the effect of electrical transients on the operability and reliability of nuclear safety related systems and potential accident scenarios analyses.

DATES: Submit comments by February 21, 1992. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before this date.

ADDRESSES: Submit comments to: Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Attention: Docketing and Service Branch. For a copy of the petition, write: Rules Review Section, Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, Washington, DC 20555.

FOR FURTHER INFORMATION CONTACT: Michael T. Lesar, Chief, Rules Review Section, Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, Washington, DC 20555, Telephone: (301) 492-7758 or Toll Free: 800-368-5642.

VOL 56 ISS 246 DEC 23 1991 UMI

SUPPLEMENTARY INFORMATION:

Background

The NRC has received a petition for rulemaking submitted by Richard P. Grill. The petition was assigned Docket No. PRM–50–56 on August 19, 1991. The petitioner has requested that the NRC amend appendix A to 10 CFR part 50, "General Design Criteria for Nuclear Power Plants," to add lightning induced and other electrical transients to the required list of phenomena that licensed nuclear power plants and other nuclear facilities must be designed to withstand. The petitioner has requested that the NRC modify Design Criteria 2, 13, 14, 17, 18, 19, 21, 22, 23, 24, 29, 63 and 64 of appendix A to 10 CFR part 50 to require licensees of nuclear power plants and other nuclear facilities to consider the effect of electrical transients on the operability and reliability of nuclear safety related systems and potential accident scenarios analyses. The requested amendment would also require licensees to take whatever actions are necessary to assure that electrical transients cannot compromise the safety of the facility and the health and safety of the public. The petitioner requests that these design requirements be mandatory for all new license applications as well as for license renewal for operating plants. The petitioner requests that the Commission first conduct the research necessary to develop a technical basis for issuing the regulations and for supplying guidance to its licensees.

The Petitioner

The petitioner was formerly the Chief, Site Safety Branch, Division of Reactor Licensing, U.S. Atomic Energy Commission in the late 1960's and early 1970's. In 1976, petitioner accepted a position with the NRC, in the Environmental Standards Branch.

The petitioner contends that some members of the staff of the Atomic Energy Commission and the Nuclear Regulatory Commission have urged that a comprehensive study be conducted to quantify the potential risk and consequences from electrical transients since the late 1960's. As the Branch Chief responsible for analysis of the hazards posed by natural phenomena on nuclear power plants, the petitioner actively sought to have the electrical transient issue addressed. After joining the NRC in 1976, the petitioner renewed efforts to have the issue addressed. These efforts included a direct appeal to the Commission. As a result, a Draft Regulatory Guide and Value/Impact Statement, entitled "Lightning Protection for Nuclear Power Plants," was issued for public comment by the Commission in August 1979. The draft guide was submitted to the Advisory Committee on Reactor Safeguards (ACRS) for review and a final draft version was submitted to the ACRS in February 1981. The guide (which had not received NRC Staff consensus) was discussed at the February 5–7, 1981, ACRS meeting. The ACRS returned the regulatory guide to the staff for further action and recommended that the NRC Staff utilize consultants to provide the necessary expertise for this specialized subject. A final version of this Regulatory Guide was never published.

The petitioner contends that the draft Regulatory Guide was weak on justification because the studies necessary to show whether or not electrical transients posed a threat had not been done. In fact, page 10 of the guide states "The staff has not reviewed the surge protection aspects of nuclear power plants and, therefore, is not thoroughly familiar with the present practices used for the protection of systems important to safety from transient overvoltages."

Need for the Suggested Amendments

The petitioner believes that potential effects of transient electrical surges on the integrity of safety related control and monitoring systems have not been rigorously analyzed nor have any implications for safety been factored into preventative design conservatisms. The petitioner states that, to his knowledge, no commercial nuclear power plant design in the United States has ever been thoroughly studied to see what effect the range of electrical transients from lightning strikes, switching surges, or other sources, might have on the facility. The petitioner asserts that a complete analysis of this issue has never been conducted by the NRC.

The petitioner contends that because the effects of lightning and other electrical transients have not been analyzed, the effects were not considered in the development of General Design Criteria or Safety Class 1 specifications. Therefore, the design or electrical safety sensing and control systems may not have utilized equivalent levels of conservatism now found in the remainder of the facility.

According to the petitioner, lightning strikes and switching surges are relatively common occurrences at or near electrical generating stations and their associated transmission lines. Generating station designers have long known electrical transients could damage generators or other equipment and interrupt electrical service. All generating stations are protected to some level against a transient's gross effects as a matter of prudent economics. Lightning arresters, for example, are provided to decouple massive electrical surges on a transmission line resulting from a lightning strike. Protective devices, however, do not assure protection of more delicate control circuits or instrumentation from the pulse the arrester allows to pass before interrupting the transient.

The petitioner states that transients can also enter the circuitry by any number of alternate paths from outside or inside the plant. These transients can enter directly on electrical supply and instrumentation lines from direct contact with a source of electricity or by induced currents generated by electromagnetic impulse (EMP) phenomena in the atmosphere (lightning, nuclear detonations), switching procedures, ferromagnetic effects or electromagnetic emission from other adjacent equipment, i.e., radio or radar transmitters, arc welders, thyristor dimmer switches, radio frequency heaters, electric motors, etc. These transients are not considered crucial for conventional generating stations as the maximum consequence is plant shutdown and a resultant loss of revenue. The transients could be extremely important for a nuclear powered station, however, as the bottom line in this case could be the health and safety of the public, not dollars.

The petitioner also states that as safety related control systems at nuclear facilities have become more complex and sophisticated, their vulnerability to electrical transients has increased. Relatively sturdy vacuum tubes used in earlier plants have been replaced, first by transistors and more recently by solid state integrated logic systems. These later systems can be disrupted by quite small fluctuations of current.

The petitioner contends that industry standards have been developed for protection of conventional electrical and electronic circuits because of the vulnerability of these electronic systems. According to the petitioner, the NRC does not require the use of even these conventional standards much less require more rigorous standards commensurate with the safety consequences of failure of nuclear power plant protective systems. Therefore, the petitioner doubts that the electrical/electronic definition of "Safety Class 1" is as equally rigorous and reassuring as that for other design parameters.

The petitioner contends that members of the NRC Staff have indicated that they are aware of several incidents which have occurred in nuclear power plants that can be attributed to lightning effects such as the shut down of the Humbolt Bay plant and the explosion in the off-gas system of Vermont Yankee.

The Solution

The petitioner requests that the NRC amend its regulations pertaining to General Design Criteria for Nuclear Power Plants, as necessary, to add lightning induced and other electrical transients to the required list of phenomena that licensed nuclear power plants and other nuclear facilities must be designed to safely withstand. The petitioner requests licensees be required to take whatever actions are necessary to assure such transients cannot compromise the safety of the facility and the health and safety of the public.

According to the petitioner, other Government agencies, such as the Defense Nuclear Agency and the Defense Communications Agency, have devoted significant resources to investigation of surge disruption in similarly complex electronic circuitry. While the transients investigated in these studies originate from sources other than natural phenomena, such as EMP from postulated nuclear explosions, the effects on circuitry are similar. The petitioner further states that the analytical tools already developed by these agencies could be modified for use by the NRC and the commercial nuclear industry to determine the magnitude of this potential threat and to suggest remedial courses of action, should they be necessary.

Petitioner suggests that the NRC answer a simple question posed over 20 years ago "Do electrical transients produced by lightning or other causes present a significant hazard to the safety of nuclear facilities? Specifically, the petitioner suggests that the NRC take the following actions:

1. Initiate a research study to determine the current state of knowledge of lightning and other electrical surge protection. Assemble the results of this study into a comprehensive reference report.

2. Initiate another study to identify and quantify potential consequences of all types of electrical transiets on licensed nuclear power plants and other nuclear facilities.

3. Prepare and publish a rule in the Federal Register to require that each relevant NRC licensee analyze and modify, if necessary, its facility to assure safety related nuclear systems will not be compromised by electrical transients.

4. Utilizing these studies, licensee experience and analysis, and relevant industry standards, develop electrical transient protection guidance specifically tailored to the exceptionally high reliability requirements of nuclear facility safety related control systems.

5. In order to assure prompt resolution of other nuclear safety issues, determine why the NRC was so reluctant to address this issue.

The Petitioner's Suggested Amendments

The petitioner has requested a generic amendment to the general design criteria provisions for nuclear power plants, 10 CFR Part 50.

I. The amendment would—

1. Revise Design Criteria 2, 13, 14, 17, 18, 19, 21, 22, 23, 24, 29, 63 and 64 of appendix A, to require licensees of nuclear power plants and other nuclear facilities to consider the effect of electrical transients on the operability and reliability of nuclear safety related systems and potential accident scenario analyses.

2. Require licensees to take whatever actions are necessary to assure such transients cannot compromise the safety of the facility or the health and safety of the public; and

3. Be mandatory for all new license applications as well as for license renewals of existing plants.

II. The petitioner suggests that prior to proceeding with the suggested amendments the Commission must first conduct the research necessary to develop a technical basis for issuing the regulations and for supplying guidance to its' licensees.

Request for Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing discussion.

Authority: Secs. 102, 103, 104, 105, 161, 182, 183, 186, 189, 68 Stat. 936, 937, 938, 948, 953, 954, 955, 956, as amended, sec. 234, 83 Stat. 1244, as amended (42 U.S.C. 2132, 2133, 2134, 2135, 2201, 2232, 2233, 2236, 2239, 2282); secs. 201, as amended, 202, 206, 88 Stat. 1242, as amended, 1244, 1246 (42 U.S.C. 5841, 5842, 5846).

Dated at Rockville, Maryland, this 17th day of December 1991.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

BILLING CODE 7590–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 91–CE–90–AD]

Airworthiness Directives; Beech 90, 99, and 100 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD) that would supersede AD 91–12–12, which currently requires a one-time inspection of the rudder trim tab drainage area for proper drainage provisions on certain Beech 90, 99, and 100 series airplanes, and subsequent modification if correct drainage provisions do not exist. The Federal Aviation Administration has determined that the actions specified by AD 91–12–12 should also apply to other serial numbered airplanes currently not affected by this AD. The actions specified by the proposed AD are intended to prevent structural damage or imbalance to the rudder caused by improper drainage of water from the rudder trim tab.

DATES: Comments must be received on or before February 3, 1992.

ADDRESSES: Beech Service Bulletin No. 2365, Revision 1, dated December 1991, may be obtained from the Beech Aircraft Corporation, P.O. Box 85, Wichita, Kansas 67201–0085. This information also may be examined at the Rules Docket at the address below. Send comments on the proposal in triplicate to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 91–CE–90–AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

FOR FURTHER INFORMATION CONTACT: Mr. Don Campbell, Aerospace Engineer, Wichita Aircraft Certification Office, FAA, 1801 Airport Road, Mid-Continent Airport, Wichita, Kansas 67209; Telephone (316) 946–4128; Facsimile (316) 946–4407.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the

proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 91-CE-90-AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

Airworthiness Directive (AD) 91-12-12, Amendment 39-7023 (56 FR 26020, June 6, 1991), currently requires a one-time inspection of the drainage area of the rudder trim tab for proper drainage provisions on certain Beech 90, 99, and 100 series airplanes, and subsequent modification if correct drainage provisions do not exist. The actions are accomplished in accordance with Beech Service Bulletin No. 2365, dated January 1991.

The ending serial number on the Model C90A airplanes in the applicability of AD 91-12-12 is LJ-1244. Since the AD has become effective (May 21, 1991), the Federal Aviation Administration (FAA) has determined that the actions specified by AD 91-12-12 should apply to all Model C90A airplanes up to and including serial number LJ-1280. The manufacturer (Beech) has since issued Service Bulletin No. 2365, Revision 1, dated December 1991, which incorporates the revised serial number applicability.

The FAA has examined the above situation, reviewed all available information related to the circumstances described above, and has decided that further AD action should be taken to incorporate all Model C90A airplanes up to and including serial number LJ-1280 into the current AD action. Since the condition described is likely to exist or develop in other Beech 90, 99, and 100 series airplanes of the same type design, the proposed AD would retain the requirements of AD 91-12-12, but would expand the applicability of the Model C90A airplanes. The proposed actions would be accomplished in accordance with the instructions in Beech Service Bulletin No. 2365, Revision 1, dated December 1991. It would supersede AD 91-12-12, Amendment 39-7023.

It is estimated that 2,068 airplanes in the U.S. registry would be affected by the proposed AD, that it would take approximately 1 hour per airplane to accomplish the proposed action, and that the average labor rate is approximately $55 an hour. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $113,740. However, AD 91-12-12 required the same actions as the proposed AD on 2,032 airplanes. The proposed AD would pose an additional cost impact of $1,980 (36 airplanes times 1 hour at $55) than that already required by AD 91-12-12.

The regulations proposed herein would not have substantial direct effects on the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES".

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposed to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing AD 91-12-12, Amendment 39-7023 (56 FR 26020, June 6, 1991), and adding the following new AD:

Beech: Docket No. 91-CE-90-AD.

Applicability: Models 65-90, 65-A90, 65-A90-1, 65-A90-2, 65-A90-3, 65-A90-4, B90, and C90 airplanes (all serial numbers (S/N)); Model C90A airplanes (S/N LJ-1063 through LJ-1280); Models E90, H90, 99, 99A, A99A, B99, C99, 100, A100, and B100 airplanes (all S/N), certificated in any category.

Compliance: Required within the next 150 hours time-in-service after the effective date of this AD, unless already accomplished (AD 91-12-12, Amendment 39-7023).

To prevent structural damage or imbalance to the rudder caused by improper drainage of water from the rudder trim tab, accomplish the following:

(a) Inspect the rudder trim tab for proper moisture drainage provisions in accordance with the instructions in Beech Service Bulletin No. 2365, Revision 1, dated December 1991. If the correct drainage provisions do not exist, prior to further flight, modify the rudder trim tab in accordance with the instructions in the referenced service bulletin.

Note: Except for a change in the applicability paragraph, the requirements of this AD are the same as AD 91-12-12, Amendment 39-7023, which is superseded by this action.

(b) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a location where the requirements of this AD can be accomplished.

(c) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Wichita Aircraft Certification Office, FAA, 1801 Airport Road, Mid-Continent Airport, Wichita, Kansas 67209. The request should be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Wichita Aircraft Certification Office.

(d) All persons affected by this directive may obtain copies of the document referred to herein upon request of Beech Aircraft Corporation, P.O. Box 85, Wichita, Kansas 67201-0085; or may examine this document at the FAA, Central Region Office of the Assistant Chief Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Issued in Kansas City, Missouri, on December 17, 1991.

Barry D. Clements,

Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 220

Collection From Third Party Payers of Reasonable Costs of Healthcare Services

AGENCY: Office of the Secretary, DoD.

ACTION: Proposed rule.

SUMMARY: This proposed rule would amend the DoD regulation that implements 10 U.S.C. 1095. This statute generally provides for collection by the United States from third party payers of reasonable costs of healthcare services provided in facilities of the Uniformed Services to DoD beneficiaries who are also beneficiaries under the third party payer's plan. This proposed rule would implement recent legislative amendments to section 1095 that expanded the third party collection authority to cover outpatient services, automobile liability and no-fault insurance policies, and Medicare supplemental insurance plans. Active duty members are included in collections from automobile liability and no-fault insurance carriers. The proposed rule would also revise methods for determining reasonable costs for inpatient care services.

DATES: Comments must be received by February 21, 1992.

ADDRESSES: Comments should be sent to: Office of the Deputy Assistant Secretary of Defense (Health Services Operations), Attn: Operations and Management Support, room 3E343, The Pentagon, Washington, DC 20301-1600.

FOR FURTHER INFORMATION CONTACT: CDR Steven D. Olson, MSC, USN at (703) 693-2570.

SUPPLEMENTARY INFORMATION:

I. Background

Congress enacted 10 U.S.C. 1095 as part of the Consolidated Omnibus Budget Reconciliation Act of 1985, Public Law 99-272, section 2001(a)(1), to permit the Department of Defense to collect from third party payers reasonable inpatient hospital care costs incurred on behalf of most DoD health care beneficiaries. This legislation was based on the premise that private health care plans should not avoid payment for inpatient healthcare services provided to their beneficiaries solely because those beneficiaries also happen to be entitled to space available care in military facilities. To implement this statute, DoD issued a proposed rule October 8, 1986, and a final rule September 25, 1987.

After several years of experience, Congress indicated its disappointment regarding the relatively low level of collections being made under the program. As one step to address this, in 1989, Congress amended the statute to provide that funds collected, rather than being turned over to the general treasury, would be credited to the appropriations account supporting the facility that provided the care. Public Law 101-189, section 727. The intent of this amendment was to provide an incentive for facilities of the Uniformed Services to aggressively implement this program.

Improved implementation was also the objective of regulatory revisions promulgated by DoD in 1990. A proposed rule was issued January 16, 1990, 55 FR 1473, and a final rule, May 29, 1990, 55 FR 21,742. The result was a significantly revised regulation setting forth DoD's interpretations of key statutory provisions and related requirements and procedures.

Two government reports in 1990 are also noteworthy as background. The DoD Inspection General released an exhaustive audit report calling for a much more active collection program. I.G. Audit No. 9PR-0031. Draft versions of this report stimulated much of the 1990 rule making activity. On a related front, the General Accounting Office issued a report entitled, "Military Health Care: Recovery of Medical Care Costs From Liable Third Parties Can Be Improved." This report addressed collections in tort liability cases, such as automobile accident cases, under the Federal Medical Care Recovery Act (FMCRA), and recommended expanding that authority to cover no-fault automobile insurance policies and to permit retention of collected funds at the facility that provided the care.

These two reports stimulated further Congressional action in 1990. In the National Defense Authorization Act for Fiscal Year 1991, Public Law 101-510, section 713, Congress made three significant changes to 10 U.S.C. 1095. First, Congress expanded the collection authority to cover outpatient services. The original statute only covered impatient hospital care. Second, based on the GAO report, Congress supplemented current legal authority to collect in tort liability cases with new authority to also collect from no-fault insurance carriers. Congress folded both the pre-existing tort liability case authority and the new no-fault authority under the framework of section 1095, thus allowing retention of funds collected at the facility in both types of cases. Third, reacting to one of the Inspector General's recommendations, Congress expanded section 1095 to cover Medicare supplemental insurance plans. Similar statutory changes (but not including the outpatient care provision) were made in the Department of Defense Appropriations Act of FY 1991, Public Law 101-511, section 8075.

The Senate Appropriations Committee explained its proposed provision, which was enacted, as one which:

> Would allow the Department of Defense to collect from Medicare supplemental insurance policy carriers and from automobile liability and no-fault insurance carriers for treatment of eligible patients in military hospitals. As an incentive for military hospitals to make these collections, net proceeds would remain at the collecting medical facility. (S. Rept. 101-521, p. 48.)

In making these statutory revisions, Congress clearly expressed its intent regarding the operation of the third party collection program. The Conference Committee Report on the Authorization Act said "the conferees are disappointed to note" the "major flaws" in the program identified by the Inspector General, which if not corrected, could result in a failure "to collect approximately $318 million from primary health insurance plans for fiscal years 1990 through 1994." The Conference Report concluded:

> The conferees expect that the Department of Defense will correct these deficiencies, and will aggressively implement the expanded authority provided in this section. (H. Conf. Rept. 101-923, p. 618.)

This proposed rule is to implement the expanded authority. It is important to note that Active Duty beneficiaries are excluded from third party collections except in cases involving automobile liability and no-fault insurance. In addition, the proposed rule will revise current methods for calculating reasonable costs of inpatient hospital care services.

II. Provisions of the Proposed Rule

A. Outpatient Services

1. Expansion of Authority

The recent statutory amendment added outpatient services to the section 1095 collection program by replacing the previous references to "inpatient hospital care" with the new authority to collect for all "healthcare services." We

VOL 56 ISS 246 DEC 23 1991 UMI

propose to make a comparable revision to the regulation at various places. Specifically, this change would be made in the heading for part 220, §§ 220.1, 220.2, 220.8 and 220.9.

2. Per Visit Rate

Another proposed revision to § 220.8 involves the calculation of reasonable costs for outpatient services. Congress addressed this by authorizing "all-inclusive per visit rates" as the basis for outpatient services collections section 1095(f)(2). Based on this authority, DoD proposes to adopt this method for computing reasonable costs for most outpatient care. Thus, collections for most outpatient services will be based on a standard per visit fee, representing the average cost in facilities of the Uniformed Services of an outpatient visit. Multiple outpatient visits on the same day to different clinics will result in one charge for each clinic visit. Multiple visits on the same day to the same clinic will only have one charge. As a general rule, the standard per visit amount will be all-inclusive. No additional charge will be made for routine laboratory, radiology, pharmacy or other services provided in conjunction with an outpatient visit. A separate charge for same day/ambulatory surgery will be published annually.

However, when the provision of services is at the request of a provider outside of the Military Health Service System (MHSS) rather than in conjunction with an outpatient visit at a military medical treatment facility (MTF), charges shall be made for certain high cost ($100 or more) ancillary services and procedures such as laboratory, radiology, pharmacy, pulmonary function, cardiac catheterization, hemodialysis, hyperbaric medicine, electrocardiography, electroencephalography, electroneuromyography, pulmonary function, inhalation and respiratory therapy and physical therapy services. For example, patients seen by civilian practitioners under the CHAMPUS program often obtain prescribed laboratory and radiology tests as well as prescription drugs from a local MTF. DoD Partnership Program providers acting in their MHSS role are not considered outside providers for this purpose.

The per visit rate, described above, will not vary based on the precise medical procedures involved in the visit. The rate for certain outside provider requested high cost ancillary services, however, will be based on the cost of the type of service provided. The particular high cost services, drugs or procedures covered by the special rule will be published annually, along with the rate applicable to each service.

The adoption of this method of computing costs of third party collection conforms to the method currently followed in cases in which private payment is required, including automobile accident cases under the Federal Medical Care Recovery Act. In addition, it will rely upon the same data and computation systems as were used to establish the per diem rates that have been used for inpatient hospital services collections under this program. Also, this method provides a simple, economical method for third party collections. As in the case of the per diem amounts, the applicable visit charge, the same day/ambulatory surgery charge, and the rates for externally requested high cost ancillary services shall be updated and published annually. For treatment rendered in fiscal year 1992, the standard per visit amount is $77.

3. Effective Date

A new § 220.6(d) is proposed to reflect the Congressional effective date for the expansion of the third party collection program to outpatient care. It would not apply to plans that have been in continuous effect without amendment or renewal since prior to the effective date of the statutory amendment (November 5, 1990), to the extent that such plans clearly exclude payment to the Federal government for care in military facilities.

4. Timetable for Actual Billings

In issuing this proposed rule, our purpose is to establish all regulatory requirements that will be needed to carry out this expansion to the program. However, with respect to outpatient services billings, we note that for most facilities of the Uniformed Services, a number of internal systems adjustments are not completed that are necessary to the operation of the program. Therefore, in some areas of the country, actual billings for outpatient services will not promptly follow completion of the rule making activity. Activities are permitted to back bill for care provided between the effective date of this rule and the provision of internal systems to implement the program.

B. Medicare Supplemental Insurance Plans

1. Extension of Collection Authority

The current § 220.6(b) excludes Medicare supplemental insurance plans from section 1095. Based on the recent Congressional action, we propose to include such plans in the program by amending § 220.6 and the definition section (to be redesignated as § 220.12). In addition, we propose to add a new § 220.10 concerning special rules applicable to Medicare supplemental insurance plans.

2. Services Covered

Because Medicare is excluded as a third party payer under this program, and because Medicare supplemental insurance plans generally define themselves relative to the primary Medicare coverage, there is a need for a special rule for third party collections from Medicare supplemental plans for care provided in facilities of the Uniformed Services. Congress provided the special rule. The House Armed Services Committee, which originated this provision, explained:

> In authorizing collection from Medicare supplemental policies, the committee intends that the right of the United States to collect would be comparable to the obligation that the third party payer would incur if the healthcare services were provided under Medicare.

H. Rept. 101–665, p. 214; see also H. Conf. Rept. 101–923, p. 618. Similarly, the Appropriations Act general provision states that in connection with Medicare supplemental policies:

> The facility of the uniformed services shall be treated as if it were a Medicare eligible provider and the services provided as if they were Medicare-covered services.

Public Law 101–511, section 8075.

The basic policy Congress wants to put in place is that Medicare supplemental plans should be no better or worse off when their insured beneficiaries receive care in a facility of the Uniformed Services than those plans are when their insured beneficiaries receive care from civilian providers. In this way, these plans do not enjoy a windfall when their insured beneficiaries receive care in a facility of the Uniformed Services. Our proposed § 220.10(a) adopts a general policy consistent with this Congressional intent.

3. Inpatient Charges

The proposed rule goes on to apply the above general philosophy in the context of inpatient hospital care. To do so, notice must be taken of the liability of a Medicare supplemental insurance carrier in the usual civilian hospital context, which is to pay the inpatient deductible amount for hospital services under Medicare Part A and the 20% cost share for professional services under Medicare Part B. The Medicare inpatient deductible is an initial amount, set by statute at $520 in 1987 and updated annually thereafter (the 1991 amount is $628), followed by additional amounts beginning on the 61st day of care in long-stay cases. Based on this, in the typical case, the Medicare supplemental insurance carrier would be responsible for the initial inpatient deductible amount for hospital services, 20% of the professional services provided, and additional amounts after the 61st day. The proposed § 220.10(b), consistent with the Congressional policy, establishes this as the maximum liability of the Medicare supplemental insurance carrier.

4. Outpatient Charges

Similarly, the proposed § 220.10(c) would establish the rule that a Medicare supplemental policy would be responsible for the Medicare Part B professional deductible amount (the first $100 per year), plus 20% of the outpatient charges for remaining services that are within the Medicare program's scope of services. The normal outpatient charges would apply with respect to services not covered by Medicare but within the scope of the supplemental policy. Under Medicare, after the deductible is met, the beneficiary cost share for outpatient care is 20%; this then becomes the responsibility of the Medicare supplemental plan. Thus, as an example based on this provision, in FY 1992, the amount that would be collected from a Medicare supplemental insurance plan for a normal visit, after the $100 deductible has been met, would be 20% of the $77 per visit cost, or $15.

The amount payable from a Medicare supplemental insurance plan for ancillary services and procedures ordered by an outside provider would be based on 20% of the charges for that service or procedure.

5. Medicare Claim not Required

In regard to claims procedures, another special rule is necessary to accomplish the outcome intended by Congress. The usual procedure for Medicare supplemental carriers is to accept claims only after the primary claim has been processed and paid by Medicare. In this way, the remaining liability, which becomes the responsibility of the supplemental policy, is apparent. However, a different process is required in section 1095 cases because there will be no claim to Medicare. Instead, the third party payer is statutorily required to accept the claim as involving Medicare covered services from an authorized provider.

This is not a significant imposition because the nature of the liability and the amount involved are readily apparent or determined, based on standard, pre-set per diem or per visit amounts and the standard Medicare inpatient deductible. Thus, the third party payer's liability is not a function of complex calculations that can only be made after action by the primary payer; it is straightforward and easily determined based on information presented with the claim.

6. Effective Date

Proposed § 220.10(e) reflects the statutory effective date of the expansion of the § 1095 authority to cover Medicare supplemental plans. The provision is similar to that mentioned above in connection with outpatient services.

C. Automobile Liability and No-Fault Automobile Insurance Policies

1. Extension of Collection Authority

In the recent statutory amendments, Congress amended the definition of "third party payer" to include policies issued by "an automobile liability insurance or no-fault insurance carrier" section 1095(h)(1). We propose to make a comparable amendment in proposed § 220.12. Most of the normal rules and procedures of part 220 will apply to these types of cases. However, as with Medicare supplemental plans, some special rules are needed in connection with automobile liability and no-fault policies.

2. Active Duty Members Covered

The first special rule is that the third party collection authority in automobile cases applies to active duty members. The usual rule of section 1095 is that active duty members are excluded. This is likely based on the fact that active duty members typically do not have other health insurance. However, under the Federal Medical Care Recovery Act, automobile liability cases have long followed a different rule, which Congress has now adopted for automobile cases under the third party collection program. Section 1095(i)(1). Thus, under proposed § 220.11(a), medical services provided in a facility of the Uniformed Services to an active duty member in cases in which a third party automobile liability insurance or no-fault insurance carrier is a responsible payer, the carrier has a duty to pay.

3. Relation to Federal Medical Care Recovery Act

Under the Federal Medical Care Recovery Act (FMCRA), Public Law 87–693 (42 U.S.C. 2651 *et seq.*), the United States has a right to collect in cases "creating a tort liability upon some third person." 42 U.S.C. 2651(a). In the recent amendments, Congress intended to expand collection authority to no-fault insurance cases and to bring both tort liability and no-fault cases under the framework of section 1095. However, in cases based on tort liability, Congress did not intend to reinvent a new body of law on determining tort liability. Tort liability is determined by state law. The House Armed Services Committee stated that the statutory amendment "would not affect the current tort liability recovery authority governed by the Medical Care Recovery Act." H. Rept. 101–665, p. 214. Similarly, the Appropriations Act general provision makes clear that in automobile insurance cases, "should tort liability be a basis for payment, the standards of the Federal Medical Care Recovery Act * * * shall apply." Public Law 101–511, section 8075.

Proposed § 220.11(b) sets forth our proposed interpretation that in tort liability cases, section 1095 and the FMCRA provide concurrent authority and that in such section 1095 cases, matters regarding the determination of tort liability shall be governed by the same substantive standards as would be applied under the FMCRA (i.e., state law). In addition, the Department of Justice FMCRA regulations, 28 CFR part 43, shall apply to these concurrent authority cases. The FMCRA, however, has no relevance to section 1095 collections involving no-fault insurance carriers. Finally, in both types of cases under section 1095, other matters and procedures, such as the amount billed, billing procedures, etc., are governed by part 220.

4. Effective Date

Proposed § 220.11(c) reflects the effective date enacted by Congress for the extension of section 1095 collection authority to automobile liability insurance and no-fault insurance carriers. It is the same as that referenced above for Medicare supplemental policies and outpatient services.

D. Inpatient Services

1. Rate Structure

DoD has historically used a single rate for reimbursement for various healthcare services. The rate has taken the form of a single per diem charge, per visit charge or procedure charge and has been based on the actual costs of rendering healthcare services as reflected in the Medical Expense and Performance Reporting System

VOL
56
ISS
246
DE
23
1991
UMI

(MEPRS). MEPRS is the standard expense reporting system for all fixed medical treatment facilities (MTFs) within the Department of Defense (DoD) and is the accepted source of healthcare information for Congress and offices and agencies of the Executive Branch. A single rate has the advantage of administrative simplicity and enables use by all MTFs including those with limited automated capabilities. Although a single rate based on the average cost of healthcare services results in some paying more than actual cost, others pay less and the assumption is that the over and under payments offset each other and collections approximate costs.

It is DoD's intent to transition to a multiple rate structure. The proposed multiple rates will result in charges that more closely approximate the actual costs of delivering specific categories of medical services, such as surgical care, obstetrical care, pediatric care, etc., while maintaining the simplicity still needed by most MTFs because of limited automated support. The movement to multiple rates is an interim step toward patient level rates based on a classification system such as Diagnosis Related Groups.

As with the single rate, data to support computation of multiple rates will be obtained from MEPRS data consolidated from all DoD MTFs. Cost data will be aggregated for each of the clinical services identified below and an average cost computed for each clinical service. This average cost shall form the basis for the rates established for reimbursement for healthcare services under the provisions of the TPC program. Patients treated in an intensive care unit any time during the 24 hour nursing period shall be charged the intensive care per diem charge in lieu of a charge for the clinical service to which the patient is currently assigned.

a. *Medical Care Services:* Includes Internal Medicine, Cardiology, Dermatology, Endocrinology, Gastroenterology, Hematology, Nephrology, Neurology, Oncology, Pulmonary and Upper Respiratory Disease, Rheumatology, Physical Medicine, Clinical Immunology, HIV III—Acquired Immune Deficiency Syndrome (AIDS), Infectious Disease, Allergy, and Medial Care Not Elsewhere Classified.

b. *Surgical Care Services:* Includes General Surgery, Cardiovascular and Thoracic Surgery, Neurosurgery, Ophthalmology, Oral Surgery, Otolaryngology, Pediatric Surgery, Plastic Surgery, Proctology, Urology, Peripheral Vascular, Trauma Service, Head and Neck Service and Surgical Care Not Elsewhere Classified.

c. Obstetrical and Gynecological Care.

d. Pediatric Care: Includes Pediatrics, Nursery, Adolescent Pediatrics and Pediatric Care Not Elsewhere Classified.

e. Orthopaedic Care: Includes Orthopaedics, Podiatry and Hand Surgery.

f. Psychiatric Care and Substance Abuse Rehabilitation.

g. Family Practice Care.

h. Burn Unit Care.

i. Medical Intensive Care/Coronary Care.

j. Surgical Intensive Care.

k. Neonatal Intensive Care.

l. Organ and Bone Marrow Transplants.

In accordance with current practice, the per diem rate for each of the above categories of care shall be subdivided into three categories: Hospital charges, Professional charges, and Ancillary charges.

The effective date for implementation of a multiple rate schedule shall be April 1, 1992.

E. Standard Billing Forms

DoD has elected to follow the generally accepted practice of standardizing the use of billing forms to prepare bills for both inpatient and outpatient medical care and services rendered to dependents and retirees. The MTF shall use the DD Form 2502, "Uniform Billing for Inpatient Hospital Costs" (UB82), to prepare bills for inpatient and outpatient care to third party payers. UB82 data element usage shall be consistent with the standards defined by the National Uniform Billing Committee. If updated versions of the UB82 become nationally accepted, the DoD will update their version of the form.

F. Definitions

Proposed § 220.12 would revise current § 220.10 in connection with the definition of several key terms used in part 220. These proposed definitions are straightforward and self-explanatory.

III. Regulatory Procedures

This proposed rule is not a major rule under Executive Order 12291. It would not have a impact of $100 million or other significant economic impacts. Similarly, the rule does not significantly affect a substantial number of small entities within the meaning of the Regulatory Flexibility Act. As stated above, for the most part, this proposed rule would simply incorporate into the third party collection program regulation the recently enacted statutory requirements and establish basic procedures for their implementation.

This is a proposed rule. We invite public comments on all matters covered by this proposal.

List of Subjects in 32 CFR Part 220

Claims, Health insurance, Medical records.

For the reasons stated in the preamble, 32 CFR part 220 is proposed to be amended as follows:

PART 220—COLLECTION FROM THIRD PARTY PAYERS OF REASONABLE COSTS OF HEALTHCARE SERVICES

1. The authority citation for part 220 is proposed to be revised to read as follows:

Authority: 5 U.S.C. 301; 10 U.S.C. 1095.

2. The heading for part 220 is revised as set forth above.

3. Section 220.1 is proposed to be revised to read as follows:

§ 220.1 Purpose and applicability.

This part implements the provisions of 10 U.S.C. 1095. In general, 10 U.S.C. 1095 establishes the statutory obligation of third party payers to reimburse the United States the reasonable costs of healthcare services provided by facilities of the Uniformed Services to most Uniformed Services medical care beneficiaries who are also covered by a third party payer's plan. This part establishes the Department of Defense interpretations and requirements applicable to all healthcare services subject to 10 U.S.C. 1095.

4. Section 220.2 is proposed to be amended by revising paragraph (a) to read as follows:

§ 220.2 Statutory obligation of third party payer to pay.

(a) *Basic rule.* Pursuant to 10 U.S.C. 1095(a)(1), a third party payer has an obligation to pay the United States the reasonable costs of healthcare services provided in any facility of the Uniformed Services to a Uniformed Services beneficiary who is also a beneficiary under the third party payer's plan. The obligation to pay is to the extent that the beneficiary would be eligible to receive reimbursement or indemnification from the third party payer if the beneficiary were to incur the costs on the beneficiary's own behalf.

* * * * *

5. Section 220.3 is proposed to be amended by revising paragraph (b)(1) to read as follows:

§ 220.3 Exclusions impermissible.

* * * * *

(b) *General rules.* * * *

(1) Express exclusions or limitations in third party payer plans that are inconsistent with 10 U.S.C. 1095(b) are inoperative.

* * * * *

6. Section 220.6 is proposed to be amended by revising paragraph (b) and adding a new paragraph (d) to read as follows:

§ 220.6 Certain payers excluded.

* * * * *

(b) *Supplemental plans.* CHAMPUS (see 32 CFR part 199) supplemental plans and income supplemental plans are excluded from any obligation to pay under 10 U.S.C. 1095.

* * * * *

(d) *Third party payer plans prior to November 5, 1990, in connection with outpatient care.* The provisions of 10 U.S.C. 1095 and this section concerning outpatient services are not applicable to third party payer plans:

(1) That have been in continuous effect without amendment or renewal since prior to November 5, 1990; and

(2) For which the facility of the Uniformed Services or other authorized representative of the United States makes a determination, based on documentation provided by the third party payer, that the policy or plan clearly excludes payment for such services. Plans entered into, amended or renewed on or after November 5, 1990, are subject to this section, as are prior plans that do not clearly exclude payment for services covered by this section.

7. Section 220.8 is proposed to be revised to read as follows:

§ 220.8 Reasonable costs.

(a) *Per diem rates—In general.* As authorized by 10 U.S.C. 1095(f)(1), the computation of reasonable costs for purposes of collections for inpatient hospital care under 10 U.S.C. 1095 and this part shall be based on per diem rates. The per diem charge shall be equal to the inpatient full reimbursement rate, as provided in paragraphs (b) and (c) of this section. Per diem rates shall be updated and published annually. For purposes of billing third party payers other than automobile liability and no-fault insurance carriers, per diem rates shall be subdivided into three categories:

(1) Hospital charges.

(2) Professional charges.

(3) Ancillary charges.

(b) *Unified per diem rates for care provided prior to April 1, 1992.* For inpatient hospital care provide prior to April 1, 1992, the computation of reasonable costs shall be based on the unified per diem full reimbursement rate for all clinical categories of hospital care. For purposes of this paragraph (and paragraph (c) of this section), charges for patients hospitalized before and after the April 1 start date shall be based on the determination method in effect for the respective periods of hospitalization.

(c) *Clinical groups per diem rates for care provided on or after April 1, 1992.* For inpatient hospital care provided on or after April 1, 1992, the computation of reasonable costs shall be based on the per diem full reimbursement rate applicable to the clinical category of services involved. Patients treated in an intensive care unit any time during the 24 hour nursing period shall be charged the intensive care per diem charge in lieu of a charge to the clinical service to which the patient is currently assigned. For this purpose, the clinical groups are as follows:

(1) Medical Care Services. This includes internal medicine, cardiology, dermatology, endocrinology, gastronenterology, hematology, nephrology, neurology, oncology, pulmonary and upper respiratory disease, rheumatology, physical medicine, clinical immunology, HIV III—Acquired Immune Deficiency Syndrome (AIDS), infectious disease, allergy, and medical care not elsewhere classified.

(2) Surgical Care Services. This includes general surgery, cardiovascular and thoracic surgery, neurosurgery, ophthalmology, oral surgery, otolaryngology, pediatric surgery, plastic surgery, proctology, urology, peripheral vascular, trauma service, head and neck service and surgical care not elsewhere classified.

(3) Obstetrical and Gynecological Care.

(4) Pediatric Care. This includes pediatrics, nursery, adolescent pediatrics and pediatric care not elsewhere classified.

(5) Orthopaedic Care. This includes orthopaedics, podiatry and hand surgery.

(6) Psychiatric Care and Substance Abuse Rehabilitation.

(7) Family Practice Care.

(8) Burn Unit Care.

(9) Medical Intensive Care/Coronary Care.

(10) Surgical Intensive Care.

(11) Neonatal Intensive Care.

(12) Organ and Bone Marrow Transplants.

(d) *Medical services and subsistence charges included.* Medical services charges pursuant to 10 U.S.C. 1078 or subsistence charges pursuant to 10 U.S.C. 1075 are included in the claim filed with the third party payer pursuant to 10 U.S.C. 1095. For any patient of a facility of the Uniformed Services who indicates that he or she is a beneficiary of a third party payer plan, the usual medical services or subsistence charge will not be collected from the patient to the extent that payment is received from the payer. Thus, except in cases covered by § 220.8(j), payment of the claim made pursuant to 10 U.S.C. 1095 will satisfy all of the third party payer's obligation arising from the inpatient hospital care provided by the facility of the Uniformed Services on that occasion.

(e) *Per visit rates.* As authorized by 10 U.S.C. 1095(f)(2), the computation of reasonable costs for purposes of collections for most outpatient services shall be based on an all-inclusive per visit rate. The per visit charge shall be equal to the outpatient full reimbursement rate and includes all routine ancillary services. A separate charge will be calculated for cases that are considered same day/ambulatory surgeries. These rates shall be updated and published annually.

(f) *Same day/ambulatory surgery rate.* The same day/ambulatory rate will be established pursuant to paragraph (c)(2) of this section.

(g) *Special rule for services ordered and paid for by a facility of the Uniformed Services but provided by another provider.* In cases where a facility of the Uniformed Services purchases ancillary services or procedures, from a source other than a Uniform Services facility, the cost of the purchased services will be added to the per diem or per visit rate. Examples of ancillary services and other procedures covered by this special rule include (but are not limited to): Laboratory, radiology, pharmacy, pulmonary function, cardiac catheterization, hemodialysis, hyperbaric medicine, electrocardiography, electroencephalography, electroneuromyography, pulmonary function, inhalation and respiratory therapy and physical therapy services.

(h) *Special rule for certain high cost ancillary services ordered by outside providers and provided by a facility of the Uniformed Services.* (1) If a Uniformed Services facility provides certain high cost ancillary services, prescription drugs or other procedures based on a request from a source other than Uniformed Services facility and are not incident to any outpatient visit or inpatient services, the reasonable cost will not be based on the usual per visit or per diem rate. Rather, a separate standard rate shall be established based on the cost of the particular high-cost service, drug or procedure provided.

VOL
56
ISS
246
DE
23
1991
UMI

(2) This special rule applies only to services, drugs or procedures having a cost of at least $100. The reasonable cost for the services, drugs or procedures to which this special rule applies shall be calculated and published annually.

(i) *Special rule for PRIMUS and NAVCARE clinics.* The Uniformed Services maintain certain contracts clinics called PRIMUS clinics by the Army and Air Force and NAVCARE clinics by the Navy. These are outpatient clinics which provide only primary care services. Services provided by these clinics are paid for by a facility of the Uniformed Service, of which the PRIMUS or NAVCARE clinic is considered operationally to be an extension. A separate, uniform per visit charge, representing the average cost to the Department of Defense for a visit in all PRIMUS and NAVCARE clinics shall be the basis of the charge for these clinics. This rate shall be calculated and published annually.

(j) *Special rule for former Public Health Service facilities.* In connection with the former Public Health Service facilities described in § 220.12(c), the computation of reasonable costs for purposes of collections under 10 U.S.C. 1095 and this part may differ from such computations under § 220.8. Reasonable costs for such facilities shall be determined by the Department of Defense based on approximate government costs for similar services under CHAMPUS.

(k) *Special rule for Partnership Program providers.* In cases in which the professional provider services are provided under the Partnership Program (or similar program operated under the authority of 10 U.S.C. 1096), the professional charges component of the total per diem rate will be deleted, as applicable, from the claim from the facility of the Uniformed Services. The third party payer will receive a claim for professional services directly from the individual healthcare provider, who is not an employee or agent of the Department of Defense. Such claims are not covered by 10 U.S.C. 1095 or this part, but are governed by statutory and regulatory requirements of the CHAMPUS program (see 32 CFR part 199). The same is true for professional services provided on an outpatient basis under the Partnership Program.

(l) *Alternative determination of reasonable costs.* Any third party payer that can satisfactorily demonstrate a prevailing rate of payment in the same geographic area for the same or similar aggregate groups of services that is less than the per diem or per visit rate (or other amount as determined under paragraphs (f) through (k) of this section) of the facility of the Uniformed Services may, with the agreement of the facility of the Uniformed Services (or other authorized representatives of the United States), limit payments under 10 U.S.C. 1095 to that prevailing rate for that aggregate category of services. The determination of the third party payer's prevailing rate shall be based on a review of valid contractual arrangements with other facilities or providers constituting a majority of the services for which payment is made under the third party payer's plan. This paragraph does not apply to cases covered by § 220.11.

8. Section 220.9 is proposed to be amended by revising paragraph (b) to read as follows:

§ 220.9 Rights and obligations of beneficiaries.

* * * * *

(b) *Availability of healthcare services unaffected.* The availability of healthcare services in any facility of the Uniformed Services will not be affected by the participation or nonparticipation of a Uniformed Services beneficiary in a health care plan of a third party payer. Whether or not a Uniformed Services beneficiary is covered by a third party payer's plan will not be considered in determining the availability of healthcare services in a facility of the Uniformed Services.

* * * * *

9. Section 220.10 is proposed to be redesignated as § 220.11 and revised and new §§ 220.10 and 220.12 are proposed to be added to read as follows:

§ 220.10 Special rules for Medicare supplemental plans.

(a) *Statutory obligation of Medicare supplemental plans to pay.* The obligation of a Medicare supplemental plan to pay shall be determined as if the facility of the Uniformed Services were a Medicare-eligible provider and the services provided as if they were Medicare-covered services. In general, Medicare supplemental plans are responsible for amounts comparable to beneficiary out-of-pocket costs under normal operation of the Medicare program.

(b) *Inpatient hospital care charges.* Notwithstanding the provisions of § 220.8 of this part, charges to Medicare supplemental plans for inpatient hospital care services provided to beneficiaries of such plans shall not, for any admission, exceed the sum of:

(1) The Medicare inpatient hospital deductible amount.

(2) The Medicare inpatient hospital coinsurance amount (if any); and

(3) 20 percent of the professional charge subdivision of the applicable per diem rate, multiplied by the number of days of care provided.

Only one deductible charge shall be made per hospital admission, except that in the case of an admission that occurs within 60 days of the discharge from a prior admission, no second deductible charge shall be made.

(c) *Outpatient care charges.* Notwithstanding the provisions of § 220.8, the payment responsibility of Medicare supplemental plans for outpatient care services shall be as follows:

(1) For outpatient services within the Medicare program's scope of services, the responsibility of Medicare supplemental plans shall be to pay the amounts charged pursuant to § 220.8, up to the beneficiary's annual Part B professional deductible amount.

(2) After reaching the beneficiary's annual Part B deductible, the amount for remaining outpatient services within the Medicare program's scope of services, the responsibility of Medicare supplemental plans shall be to pay 20 percent of the rates established pursuant to § 220.8.

(3) For outpatient services not within the Medicare program's scope of services but covered by the Medicare supplemental plan, the responsibility of Medicare supplemental plan shall be to pay the amounts charged pursuant to § 220.8.

(d) *Medicare claim not required.* Notwithstanding any requirement of the Medicare supplemental plan policy, a Medicare supplemental plan may not refuse payment to a claim made pursuant to this section on the grounds that no claim has previously been submitted by the provider or beneficiary for payment under the Medicare program.

(e) *Exclusion of Medicare supplemental plans prior to November 5, 1990.* This section is not applicable to Medicare supplemental plans:

(1) That have been in continuous effect without amendment since prior to November 5, 1990; and

(2) For which the facility of the Uniformed Services (or other authorized representative of the United States) makes a determination, based on documentation provided by the Medicare supplemental plan, that the plan agreement clearly excludes payment for services covered by this section. Plans entered into, amended or renewed on or after November 5, 1990, are subject to this section, as are prior plans that do not clearly exclude payment for services covered by this section.

§ 220.11 Special rules for automobile liability insurance and no-fault automobile insurance.

(a) *Active duty members covered.* In addition to Uniformed Services beneficiaries covered by other provisions of this part, this section also applies to active duty members of the Uniformed Services. As used in this section, "beneficiaries" includes active duty members.

(b) *Effect of concurrent applicability of the Federal Medical Care Recovery Act.*

(1) *In general.* In many cases covered by this section, the United States has a right to collect under both 10 U.S.C. 1095 and the Federal Medical Care Recovery Act (FMCRA), Public Law 87–693 (42 U.S.C. 2651 et seq.). In such cases, the authority is concurrent and the United States may pursue collection under both statutory authorities.

(2) *Cases involving tort liability.* In cases in which the right of the United States to collect from the automobile liability insurance carrier is premised on establishing some tort liability on some third person, matters regarding the determination of such tort liability shall be governed by the same substantive standards as would be applied under the FMCRA including reliance on state law for determinations regarding tort liability. In addition, the provisions of 28 CFR part 43 (Department of Justice regulations pertaining to the FMCRA) shall apply to claims made under the concurrent authority of the FMCRA and 10 U.S.C. 1095. All other matters and procedures concerning the right of the United States to collect shall, if a claim is made under the concurrent authority of the FMCRA and this section, be governed by 10 U.S.C. 1095 and this part.

(c) *Exclusion of automobile liability insurance and no-fault automobile insurance plans prior to November 5, 1990.* This section is not applicable to automobile liability insurance and no-fault automobile insurance plans:

(1) That have been in continuous effect without amendment since prior to November 5, 1990; and

(2) For which the facility of the Uniformed Services (or other authorized representative of the United States) makes a determination, based on documentation provided by the third party payer, that the policy or plan clearly excludes payment for services covered by this section. Plans entered into, amended or renewed on or after November 5, 1990, are subject to this section, as are prior plans that do not clearly exclude payment for services covered by this section.

§ 220.12 Definitions.

(a) *Automobile liability insurance.* Automobile liability insurance means insurance against legal liability for health and medical expenses resulting from personal injuries arising from operation of a motor vehicle. Automobile liability insurance includes:

(1) Circumstances in which liability benefits are paid to an injured party only when the insured party's tortious acts are the cause of the injuries; and

(2) Uninsured and underinsured coverage, in which there is a third party tortfeasor who caused the injuries (i.e., benefits are not paid on a no-fault basis), but the insured party is not the tortfeasor.

(b) *CHAMPUS supplemental plan.* A CHAMPUS supplemental plan is an insurance, medical service or health plan exclusively for the purpose of supplementing an eligible person's benefit under CHAMPUS. (For information concerning CHAMPUS, see 32 CFR part 199.) The term has the same meaning as set forth in the CHAMPUS regulation (32 CFR 199.2).

(c) *Facility of the Uniformed Services.* A facility of the Uniformed Services means any medical or dental treatment facility of the Uniformed Services (as the term is defined in 10 U.S.C. 101(43)). Contract facilities such as Navy NAVCARE clinics and Army and Air Force PRIMUS clinics that are funded by a facility of the Uniformed Services are considered to operate as an extension of the local military treatment facility and are included within the scope of this program. Facilities of the Uniformed Services also include several former Public Health Services facilities that are deemed to be facilities of the Uniformed Services pursuant to section 911 of Public Law 97–99 (often referred to as "Uniformed Services Treatment Facilities" or "USTFs").

(d) *Healthcare services.* Healthcare services include inpatient, outpatient, and designated high-cost ancillary services.

(e) *Insurance, medical service or health plan.* Any plan or program that provides compensation or coverage for expenses incurred by a beneficiary for health or medical services and supplies. It includes:

(1) Plans or programs offered by insurers, corporations, organized health care groups or other entities.

(2) Plans or programs for which the beneficiary pays a premium to an issuing agent as well as those plans or programs to which the beneficiary is entitled as a result of employment or membership in, or association with, an organization or group; and

(3) Medicare supplemental insurance plans.

(f) *Medicare supplemental insurance plan.* A Medicare supplemental insurance plan is an insurance, medical service or health plan exclusively for the purpose of supplementing an eligible person's benefit under Medicare. The term has the same meaning as "Medicare supplemental policy" under Medicare program regulations (42 CFR 403.205).

(g) *No-fault insurance.* No-fault insurance means an insurance contract providing compensation for health and medical expenses relating to personal injury arising from the operation of a motor vehicle in which the compensation is not premised on who may have been responsible for causing such injury. No-fault insurance includes personal injury protection and medical payments benefits in cases involving personal injuries resulting from operation of a motor vehicle.

(h) *Third party payer.* A third party payer is an entity that provides an insurance, medical service or health plan by contract or agreement. It includes:

(1) State and local governments that provide such plans.

(2) Insurance underwriters and private employers (or employer groups) offering self-insured or partially self-insured and/or partially underwritten health insurance plans; and

(3) Automobile liability insurance and no-fault insurance carriers.

(i) *Third party payer plan.* A third party payer plan is any plan provided by a third party payer, but not an income supplemental plan or workers compensation plan.

(j) *Uniformed Services beneficiary.* For purposes of this part, a Uniformed Services beneficiary is any person who is covered by 10 U.S.C. 1074(b), 1076(a), or 1076(b). For purposes of § 220.11 (but not for other sections), a Uniformed Services beneficiary also includes active duty members of the Uniformed Services.

Dated: December 18, 1991.

L.M. Bynum,

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Parts 261 and 290

RIN 0596-AB02

Cave Resources Management

AGENCY: Forest Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would implement the Federal Cave Resources Protection Act of 1988 which requires the identification, protection, and maintenance, to the extent practical, of significant caves on National Forest System lands. The proposed rule would establish criteria to be considered in identification of significant caves. It would also integrate cave management into existing forest planning and management processes, protect cave resource information to prevent vandalism and disturbance of significant caves, and establish general prohibitions to protect cave resources from abuse and degradation. Public comment is invited on the proposed rule.

DATES: Comments must be received in writing by March 23, 1992.

ADDRESSES: Send written comments to F. Dale Robertson, Chief (2350), Forest Service, USDA, P.O. Box 96090, Washington, DC 20090-6090.

The public may inspect comments received on this proposed rule in the Office of the Director, Recreation, Cultural Resources, and Wilderness Management Staff, fourth floor, central wing, Auditors Building, 201 Fourteenth Street SW., Washington, DC between the hours of 8:30 a.m. and 4:30 p.m. Those wishing to inspect comments are encouraged to call ahead (202-205-1313) to facilitate entry into the building.

FOR FURTHER INFORMATION CONTACT: Susan Rutherford, Recreation, Cultural Resources, and Wilderness Management Staff, (202) 205-1313.

SUPPLEMENTARY INFORMATION:

Background

The Federal Cave Resources Protection Act of 1988 (16 U.S.C. 4301-4309; 102 Stat. 4546), hereafter referred to as the "Act", seeks to secure, protect, and preserve significant caves on Federal lands for the perpetual use, enjoyment, and benefit of all people. The Act also seeks to foster increased cooperation and exchange of information between governmental authorities and those who utilize caves located on Federal lands for scientific, educational, or recreational purposes. The Act establishes the policy that Federal lands be managed in a manner which protects and maintains, to the extent practicable, significant caves. Finally, the Act requires the Secretary of Agriculture to issue such regulations as he deems necessary to achieve the purposes of the Act on National Forest System lands. The regulations are required to include, but need not be limited to, criteria for the identification of significant caves.

This proposed rulemaking would establish criteria to be considered in the identification of significant caves located on National Forest System lands and for carrying out other provisions of the Act relating to protecting significant caves and fostering cooperation and exchange of information between governmental authorities and those who utilize caves.

An advance notice of proposed rulemaking was published in the **Federal Register** on March 3, 1989 (54 FR 9066), inviting comments on what should be included in a proposed rule, and particularly requesting suggestions as to criteria for determining what constitutes a significant cave. A total of nine comments were received in response to that notice: four from agencies of State government, two from business entities, two from individuals, and one from a Federal agency.

Respondents identified resource values that they felt should be considered in determining the significance of caves. These included the presence and type of water; archaeological, cultural, and historic resources; biological resources, including bat guano; recreational values; and the amount and degree of past use or evidence of vandalism. Others urged that the concept of "significance" be carefully circumscribed, that care should be taken to make sure that not all caves be labeled significant, that surface uses and particularly mineral exploration and development not be unduly restricted by cave regulations, and that access to significant caves not be limited to just special interest groups. Some respondents addressed the need for sufficient funding to maintain caves that are used for recreation; others suggested the establishment of a permit system for regulating access to significant caves, while others urged that access not be regulated at all.

All of these comments were carefully considered during the preparation of this proposed rulemaking, except those comments that addressed funding which is beyond the scope of this rulemaking.

Proposed Rule

During consideration of rules that might be needed to implement the Federal Cave Resources Protection Act, the Forest Service has carefully examined the provisions of the Act in the context of existing agency cave management policy as well as existing Federal regulations governing administration of National Forest System lands.

Prior to passage of the Act, the Forest Service managed caves in accordance with general authorities established by the Organic Act of 1897 (16 U.S.C. 551), the Antiquities Act of 1906 (16 U.S.C. 431 *et seq.*), the Archaeological Resources Protection Act of 1979 (16 U.S.C. 470aa *et seq.*), the Federal Water Pollution Control Act Amendments of 1972 (33 U.S.C. 1251 *et seq.*), and the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*). Agency cave management policy focused on managing caves as nonrenewable resources to maintain their values; balancing surface resource management and cave use with protection of cave values; and incorporating cave management activities, considerations, and prescriptions in Forest Plans. These policies are generally consistent with the Act and will be revised and strengthened as necessary to accord with the Act and regulations issued pursuant to the Act.

There are currently no regulations for the determination of significant caves on National Forest System lands. The current mechanism for protecting cave resources from destruction and damage is found in 36 CFR part 261—Prohibitions, which sets forth acts and conduct prohibited on National Forest System lands and areas where persons are subject to civil or criminal penalty.

In considering implementing regulations, the Forest Service has placed a high priority on coordinating its approach with the U.S. Department of the Interior (USDI) agencies and on reaching agreement with USDI agencies on an interagency approach to identification of significant cave resources.

Based on its review of existing regulation and policy, consideration of comments received in response to the advance notice and consultation with other agencies and cave interests, the Forest Service proposes to establish a new part 290 and amend part 261 in title 36 of the Code of Federal Regulations for the issuing of cave resource protection rules. A discussion of the major provisions of the proposed rules follows.

Section 290.1—Purpose and Scope

This section states that the purpose of the rule is to implement the Act and, in conjunction with rules at part 261, to provide the basis for managing and protecting cave resources on National Forest System lands.

Section 290.2—Definitions

This section is an alphabetical listing of terms and definitions used in the proposed rule. These definitions are needed for consistency in the interpretation of cave-related terms. The definitions came from a variety of sources including the Act, the existing policy in the Forest Service Manual, and from consultation with interested publics and other agencies. These definitions are essentially the same as those being proposed for adoption by USDI.

Section 290.3—Determining Significant Caves

The Secretary of Agriculture will cooperate and consult with the Secretary of the Interior to devise similar procedures for the listing of significant caves. Proposed procedures to nominate, evaluate, and determine significant caves for listing are available for public review and comment. A copy of the proposed procedures may be obtained by writing or calling the person listed under **FOR FURTHER INFORMATION.** A call for nominations will be published in a **Federal Register** notice.

For caves located on National Forest System lands, determination of significance would be made by the Regional Forester and incorporated into forest plans. Nomination and evaluation after the initial listing of significant caves would be accomplished on a continuing basis through forest plan amendments and revisions.

(a) *Criteria for the Identification of Significant Caves.* The identification of the criteria for determining significance is required by the Act. Six criteria are proposed to be considered in the determination of whether a cave should be listed as significant. These criteria are the cave's biota, cultural resources, hydrology, geologic/mineralogic/paleontologic resources, educational/scientific value, and recreational value. These proposed criteria reflect recommendations received in response to the advance notice of proposed rulemaking (54 FR 9066) and are essentially the same as those being proposed by USDI.

(b) *Records and documentation.* This paragraph would require a written document for each significant cave be made by the appropriate official and retained as a permanent record. The minimum documentation is described. A list of significant caves on National Forest System lands would be maintained as an appendix to individual forest plans. The specific location of cave(s) would be confidential pursuant to section 5 of the Act and under the provisions of § 290.4 of this rule.

Section 290.4—Confidentiality of Cave Information

In order to protect cave resources, the Forest Service shall not make the specific location of any significant cave available to the public under the Freedom of Information Act (5 U.S.C. 552) unless certain conditions are met. This section describes the extent of the information that would be confidential, conditions that must be met for the release of locational information, who would make the decision, and the informational requirements for gaining access to confidential data about significant caves or caves for which determination of significance is pending. Based upon the authority found at section 5 of the Act, decisions to disclose confidential cave information would be made at the sole discretion of the authorized officer, as identified in § 290.2 of this rule, and would not be subject to further administrative review or appeal.

The provisions of this section use essentially the same language as the statute except that confidentiality of cave location would be extended to caves which have been nominated but for which final determination is pending. This extension would ensure that cave information given to the Forest Service during the cave nomination process would remain confidential and the cave's resources would be protected until a determination of significance is made.

The Act limits access to confidential cave data to Federal and State governmental agencies, or to bona fide educational and research institutions. This section prescribes these limits but also includes individuals or organizations involved in assisting the Forest Service in cave management activities. This is proposed to strengthen and promote individual and organization cooperative efforts in management of caves on National Forest System lands.

To provide protection of cave resources as required by section 7(a) of the Act, the Forest Service also proposes to revise the general prohibitions at 36 CFR part 261, Subpart A as follows:

Section 261.2—Definitions

This section would be amended to include the definitions for "cave" and "cave resources".

Section 261.6—Fish and Wildlife

The prohibitions relating to fish and wildlife would be amended to prohibit altering the free movement of any animal or plant life into or out of a cave.

Section 261.9—Property

The prohibitions relating to property would be amended to prohibit certain activities affecting cave resources without a special use authorization.

Section 261.10—Occupancy and Use

The prohibitions against discharging firearms in existing areas would be expanded to prohibit discharging a firearm into or within any cave.

Subpart B of part 261 authorizes forest officers to prohibit specific acts by written, posted order. To protect cave resources, it is proposed to amend the rules of subpart B as follows:

Section 261.58—Occupancy and Use

When provided by an order, it would be prohibited to deposit any bodily waste in caves except into receptacles provided for that purpose.

Environmental Impact

Based on environmental analysis, this proposed rule would not have a significant effect on the human environment; therefore, an environmental impact statement will not be prepared. Copies of the environmental assessment and finding of no significant impact may be obtained by writing or calling the persons or offices listed under **ADDRESSES** and **FOR FURTHER INFORMATION CONTACT.**

Controlling Paperwork Burdens on the Public

The information required by the proposed rule constitutes new information collection requirements as defined in 5 CFR part 1320, Controlling Paperwork Burdens on the Public. In accordance with those rules and the Paperwork Reduction Act of 1980 (44 U.S.C. 3507), the Forest Service has requested Office of Management and Budget review and approval of the information requirements for submitting nominations for significant cave determinations and for requesting access to confidential cave information. The agency estimates that each person will spend an average of one hour preparing and submitting the information required to gain access to confidential cave information. Reviewers wishing to comment on the proposed information requirements in §§ 290.3 and 290.4 of this proposed rule are encouraged to send their written

views to the Forest Service and to: Regulatory Desk Officer (FS), Office of Information and Regulatory Affairs, Attention: Docket Library, room 3201 NEOB, Washington, DC 20503.

Regulatory Impact

This proposed rule has been reviewed under USDA procedures and Executive Order 12291 on Federal Regulations. It has been determined that this is not a major rule. The rule will not have an effect of $100 million or more on the economy, substantially increase prices or costs for consumers, industry, or State or local governments, nor adversely affect competition, employment, investment, productivity, innovation or the ability of United States-based enterprises to compete in foreign markets. In short, little or no effect on the National economy will result from this rule, since this action consists primarily of technical and administrative changes to the rules to accommodate provisions of the Federal Cave Resources Protection Act.

Moreover, this rule has been considered in light of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), and it has been determined that this action will not have a significant economic impact on a substantial number of small entities.

Finally, this proposed rule has been considered in light of Executive Order 12630 which requires the preparation of a Takings Implication Assessment, or TIA, for agency actions which may present the risk of a taking of private property. Since this proposed rule governs the administration of federally owned lands, private property rights will not be affected and neither a TIA nor further analysis under the Executive Order is necessary.

List of Subjects

36 CFR Part 261

Crime, Law enforcement, and National forests.

36 CFR Part 290

Caves, National forests.

Therefore, for the reasons set forth in the preamble, it is proposed to amend chapter II of title 36 of the Code of Federal Regulations as follows:

1. Add a new part 290 to read as follows:

PART 290—CAVE RESOURCES MANAGEMENT

Sec.
290.1 Purpose and scope.
290.2 Definitions.
290.3 Determining significant caves.
290.4 Confidentiality of cave information.
290.5 Information requirements.

Authority: 16 U.S.C. 4300–4309; 102 Stat. 4546.

§ 290.1 Purpose and scope.

The rules of this part implement the requirements of the Federal Cave Resources Protection Act (16 U.S.C. 4301–4309), hereafter the "Act". The rules apply to cave management on lands owned in fee title by the United States which are administered as part of the National Forest System. These rules, in conjunction with rules at 36 CFR part 261, provide the basis for identifying and protecting significant caves on National Forest System lands in accordance with the Act.

§ 290.2 Definitions.

For the purposes of this subpart, the terms listed in this section have the following meaning:

Authorized officer means the Forest Service employee delegated the authority to approve an action described in this part. Generally, this will be a Regional Forester, Forest Supervisor, or District Ranger depending on the scope and level of the duty to be performed.

Cave means any naturally occurring void, cavity, recess, or system of interconnected passages which occurs beneath the surface of the earth or within a cliff or ledge (including any cave resource therein, but not including any vug, mine tunnel, aqueduct, or other manmade excavation) and which is large enough to permit an individual to enter, whether or not the entrance is naturally formed or manmade. Such term shall include any natural pit, sinkhole, or other feature which is an extension of a cave entrance.

Cave resources mean any materials or substances occurring naturally in caves on National Forest System lands, such as animal life, plant life, paleontological resources, historical resources, sediments, minerals, speleogens, and speleothems.

Secretary means the Secretary of Agriculture.

Significant cave means a cave located on National Forest System lands that have been evaluated by the authorized officer and determined to have biotic, cultural, mineralogic, paleontologic, geologic, hydrologic, or other resources that have important value for scientific, educational, or recreational purposes.

Vug means a small cavity in a vein or in rock, usually lined with crystals.

§ 290.3 Determining significant caves.

(a) *Nominations for initial and subsequent listings.* The Secretary of Agriculture shall cooperate and consult with the Secretary of the Interior to devise a similar nomination process for the initial listing of significant caves and shall give public notice of the nomination process. Subsequent determinations shall be made through the forest plan amendment or revision process (36 CFR part 219).

(b) *Criteria for the Identification of Significant Caves.* A significant cave on National Forest System lands shall possess one or more of the following features, characteristics, or values, which are deemed by the authorized officer to be unusual, significant, or otherwise meriting special management.

(1) *Biota.* The cave provides habitat for cave-dependent organisms or animals. The cave contains species or subspecies of flora or fauna native to caves, that occur in large numbers or variety, are sensitive to disturbance, or are found on State or Federal sensitive, threatened, or endangered species lists.

(2) *Cultural.* The care contains historical properties or archeological resources (as described in 36 CFR 800.2) which are eligible for or listed on the National Register of Historic Places.

(3) *Geologic/Mineralogic/Paleontologic.* The cave possesses one or more of the following features:

(i) Fragile or outstanding examples of geologic or mineralogic features or features useful for study.

(ii) Deposits of sediments or features useful for evaluating past events.

(iii) Paleontologic resources with potential to contribute important scientific knowledge.

(4) *Hydrologic.* The cave is a part of a hydrologic system or contains water which is important to humans, biota, or development of cave features.

(5) *Recreational.* The cave provides or could provide recreational opportunities by virtue of challenge or scenic values.

(6) *Educational or Scientific.* The cave offers opportunities for educational or scientific use; or the cave is virtually in a pristine state, lacking evidence of human disturbance or impact; or the length, volume, total depth, pit depth, height, or similar measurements are worthy of note.

(c) *Records and documentation.* The authorized officer shall evaluate the criteria in (b) above in making a determination as to whether a cave is significant. If deemed significant, the authorized officer shall document the significant cave's location, resource values which justified the significant classification, and other pertinent data. This documentation shall be retained as a permanent record in accordance with the confidentiality provision in Section 5 of the Act. The listing of significant caves for a forest will be maintained in that forest's management plan, except that information concerning the specific location of a significant cave may not be made available to the public unless the provisions of § 290.4 of this rule are satisfied.

§ 290.4 Confidentiality of cave information.

(a) No Forest Service employee shall disclose the specific location of a significant cave or a cave which has been nominated but final determination is pending, unless the authorized officer determines that disclosure will further the purposes of the Act and will not create a substantial risk of harm, theft, or destruction to cave resources.

(b) Notwithstanding subsection (a) above, the authorized officer may make confidential cave information available to employees of a Federal or State governmental agency having a direct programmatic interest in such information, or a bona fide educational or research institute having a demonstrated need for information pursuant to cave program activities. For the purposes of this Act, "employees of a Federal or State governmental agency" shall include individuals or organizations assisting with cave management activities under State or Federal Government auspices. To request information, such entities shall make a written request to the authorized officer which includes the following:

(1) A legal description of the area for which the information is sought;

(2) A statement of the purpose for which the information is sought; and

(3) Written assurances that the requesting party will maintain the confidentiality of the information and protect the cave and its resources.

(c) Decisions to permit or deny access to confidential cave information are made at the sole discretion of the authorized officer and are not subject to further administrative review or appeal under 5 U.S.C. 552 or 36 CFR part 217 or § 251.82.

§ 290.5 Information requirements.

The information required to obtain access to confidential cave information represents a new information requirement as defined in 5 CFR part 1320, Controlling Paperwork Burdens on the Public. In accordance with those rules and the Paperwork Reduction Act of 1980 as amended (44 U.S.C. 3507), the Forest Service has requested Office of Management and Budget review and approval of the information required to be addressed to obtain access to confidential cave information (§ 290.4). Preparation of a request to access confidential cave information is estimated to take one hour. Reviewers who wish to comment on this information requirement should submit their views to the Chief of the Forest Service at the address listed earlier in this document as well as to the Forest Service Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

PART 261—PROHIBITIONS

2. Revise the authority citation for part 261 to read as follows:

Authority: 16 U.S.C. 551; 16 U.S.C. 472; 7 U.S.C. 1011(f); 16 U.S.C. 1246(i); 16 U.S.C. 1133(c)–(d)(1); 16 U.S.C. 4300, 4307.

Subpart A—General Prohibitions

3. Revise § 261.2 by adding the following definitions alphabetically to read as follows:

§ 261.2 Definitions.

* * * * *

Cave means any naturally occurring void, cavity, recess, or system of interconnected passages which occurs beneath the surface of the earth or within a cliff or ledge (including any cave resource therein, but not including any vug, mine tunnel, aqueduct, or other manmade excavation) and which is large enough to permit an individual to enter, whether or not the entrance is naturally formed or manmade. Such term shall include any natural pit, sinkhole, or other feature which is an extension of a cave entrance.

Cave resources means any materials or substances occurring naturally in caves on National Forest System lands, such as animal life, plant life, paleontological resources, historical resources, sediments, minerals, speleogens, and speleothems.

* * * * *

4. Revise § 261.8 by adding by adding a new paragraph (e) to read as follows:

§ 261.8 Fish and Wildlife.

* * * * *

(e) Curtail the free movement of any animal or plant life into or out of a cave.

* * * * *

5. Revise § 261.9 by adding a new paragraph (j) to read as follows:

§ 261.9 Property.

* * * * *

(j) Excavating, damaging, or removing any cave resource from a cave without a special use authorization.

6. Revise paragraph (d) of § 261.10 to read as follows:

§ 261.10 Occupancy and use.

* * * * *

(d) Discharging a firearm or any other implement capable of taking human life, causing injury, or damaging property as follows:

(1) In or within 150 yards of a residence, building, campsite or occupied area;

(2) Across or on a Forest Development road or body of water adjacent thereto, or in any manner or place whereby any person or property is exposed to injury or damage as a result in such discharge; or

(3) Into or within any cave.

* * * * *

Subpart B—Prohibitions in Areas Designated by Order

7. Revise § 261.58 by adding a new paragraph (dd) to read as follows:

§ 261.58 Occupancy and use.

* * * * *

(dd) Depositing any body waste in caves except into receptacles provided for that purpose.

* * * * *

Dated: December 17, 1991.

George M. Leonard,
Associate Chief.

BILLING CODE 3410-11-M

POSTAL RATE COMMISSION

39 CFR Part 3001

[Docket No. RM91–1]

Rules of Practice and Procedure

AGENCY: Postal Rate Commission.

ACTION: Proposed Rulemaking; Establishing Date for Additional Comments.

SUMMARY: The Commission has solicited suggestions from interested persons for improvements in the Commission's rules of practice. At the request of a party, the Commission is establishing January 29, 1992, as the date for additional comments.

DATES: Additional comments responding to the advance notice of proposed rulemaking must be submitted on or before January 29, 1992.

ADDRESSES: Comments and correspondence should be sent to Charles L. Clapp, Secretary of the Commission, suite 300, 1333 H Street, NW., Washington, DC 20268–0001 (telephone: 202/789–6840).

VOL 56 ISS 246 DEC 23 1991 UMI

FOR FURTHER INFORMATION CONTACT: David F. Stover, General Counsel, Postal Rate Commission, Suite 300, 1333 H Street, NW., Washington, DC 20268–0001 (telephone: 202/789–6820).

SUPPLEMENTARY INFORMATION: The Commission issued an advance notice of proposed rulemaking on June 14, 1991, inviting interested parties to submit comments on possible ways of improving the Commission's rules of practice. 56 FR 28850 (June 25, 1991). The Commission has granted two requests from the Postal Service for extensions of time for comments. 56 FR 4213–14 (Aug. 29, 1991); 56 FR 42713–14 (Oct. 29, 1991). The date that has been established for comments is December 30, 1991.

On December 11, 1991, Advertising Mail Marketing Association (AMMA) filed a motion requesting that the date for filing comments be extended to January 29, 1992. AMMA says that the time needed for parties' consideration of a report by the Institute of Public Administration (referenced by the Commission at 56 FR 56955 (Nov. 7, 1991)) warrants an extension of time.

The Commission understands the parties' requirements for adequate time to consider the issues involved in this proceeding. The comments will be more helpful if the parties give careful consideration when making their suggestions. A number of parties, including AMMA,[1] have already presented comments, which the Commission is using in its ongoing consideration of the issues involved in this proceeding. We believe that, independent of the parties' further evaluation and subsequent comments on the topics noted by AMMA in its motion for an extension, work may proceed on the suggestions already presented and those submitted by the December 30, 1991, deadline. The practical problem before us is to balance the need for further evaluation with the equally important need to make progress in this docket.

In order to give AMMA and other parties the time AMMA believes is necessary, we will accept additional comments through January 29, 1992. However, we strongly encourage all parties to observe the December 30, 1991, deadline. Parties who have filed comments before the January 29, 1992, deadline are welcome to file additional comments on that date.

[1] AMMA was called Third Class Mail Association when it filed Comments on October 25, 1991.

Issued by the Commission on December 17, 1991.

Cyril J. Pittack,

Acting Secretary.

BILLING CODE 7710–FW–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Parts 440 and 441

[MB–41–P]

RIN 0938–AF12

Medicaid Program; Required Coverage of Nurse Practitioner Services

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed rule.

SUMMARY: This proposed rule—

- Requires State Medicaid agencies to furnish nurse practitioner services to categorically needy recipients;
- Gives State Medicaid agencies the option of furnishing nurse practitioner services to all medically needy recipients;
- Requires State Medicaid agencies to cover the services regardless of whether the nurse practitioner is under the supervision of, or associated with, a physician or other health care provider;
- Sets forth the requirements that a nurse practitioner must meet in order to qualify as a pediatric and family nurse practitioner; and
- Provides for the Medicaid agency to pay the nurse practitioner directly under an independent provider agreement or through the employing provider.

This proposed rule is necessary to confirm Medicaid regulations to the provisions of sections 1905(a)(21) and 1902(a)(10)(A) of the Social Security Act, as amended by section 6405 of the Omnibus Budget Reconciliation Act of 1989.

The purpose of the amendments is to ensure that nurse practitioner services are made available to all or most Medicaid recipients.

DATES: Comments will be considered if we receive them at the appropriate address, as provided below, no later than 5 p.m. on February 21, 1992.

ADDRESSES: Mail written comments to the following address: Health Care Financing Administration, Department of Health and Human Services Attention: MB–41–P, P.O. Box 26676, Baltimore, Maryland 21207

If you prefer, you may deliver your comments to one of the following addresses:

Room 309–G, Hubert H. Humphrey Building, 200 Independence Ave., SW., Washington, DC or

Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

Due to staffing and resource limitations, we cannot accept audio or video comments on facsimile (FAX) copies of comments. In commenting, please refer to file code MB–41–P. Comments received timely will be available for public inspection as they are received, beginning approximately 3 weeks after publication of this document, in room 309–G of the Department's offices at 200 Independence Ave., SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (phone: 202–245–7890).

SUPPLEMENTARY INFORMATION:

I. Background

Title XIX of the Social Security Act (the Act) provides authority for States to establish Medicaid programs to provide medical assistance to needy individuals. Section 1902(a)(10) of the Act describes most of the groups of individuals to whom medical assistance may be provided under two broad classifications: The categorically needy (section 1902(a)(10)(A)) and the medically needy (section 1902(a)(10)(C)). The categorically needy classification is further divided in two subgroups: The mandatory categorically needy which, generally, States with Medicaid programs must cover (section 1902(a)(10)(A)(i)); and the optional categorically needy which States, at their option, may cover (section 1902(a)(10)(A)(ii)). Coverage of the medically needy group is also at States' option. Section 1905 of the Act defines medical assistance and specifies the services that constitute medical assistance.

Nurse practitioners are recognized as important contributors in meeting the nation's health care needs by (1) improving the quality and accessibility of health care services; (2) increasing the productivity of medical practices and institutions; and (3) lessening the load on physicians, particularly in underserved areas. These practitioners have been accepted in a wide range of settings under many different payment methods, have the potential to reduce health care costs, and play legitimate

roles in the health care system. Nurse practitioner services furnished by certified pediatric nurse practitioners (CPNPs) or certified family nurse practitioners (CFNPs) can be especially useful for certain groups for whom health care services are currently inaccessible or inadequate. These include—

- Persons living in medically underserved rural and inner-city areas, or in group homes or nursing homes;
- Well children and pregnant women; and
- The chronically ill.

II. Statutory Provisions

In order to increase the availability and accessibility of nurse practitioner services to eligible Medicaid recipients, Congress enacted on December 19, 1989 the Omnibus Budget Reconciliation Act of 1989 (Pub. L. 101–239). Specifically, section 6405 of Public Law 101–239 added section 1905(a)(21) to the Act, and made a conforming amendment to section 1902(a)(10)(A) of the Act, which requires that a State plan for medical assistance must provide services furnished by CPNPs and CFNPs to the categorically needy.

Nurse practitioner services are mandated for all categorically needy eligibility groups except certain groups of aged, blind and disabled, that is, qualified Medicare beneficiaries and qualified working disabled individuals who are only entitled to Medicare Part A and Part B premiums, deductible, and coinsurance, or only Part A or only Part B premiums.

In addition, under section 1902(a)(10)(C), States may provide nurse practitioner services to the medically needy. The medically needy option allows States to provide Medicaid to individuals and families who have too much income and, in some instances, too many resources to be eligible as categorically needy.

Section 6405 of Public Law 101–239 amended section 1905(a)(21) of the Act to require States to pay nurse practitioners for their services, whether or not those practitioners are under the supervision of, or associated with, a physician or other health care provider. The statute has the effect of requiring that States offer "direct" payment to CPNPs and CFNPs as one of the payment options. In other words, the State plan must provide that the CPNP and CFNP may enter into an independent provider agreement with the State Medicaid agency. As an alternative method of payment, the State plan must provide that the CPNP and CFNP be paid through the employing provider.

Payment levels for nurse practitioner services are not specifically provided for in Public Law 101–239 or in these proposed regulations. General rules on payment levels for Medicaid services, including those furnished by nurse practitioners are set forth in 42 CFR part 447—Payment for Services; therefore, additional regulations are not necessary.

States have previously had the option to pay nurse practitioners directly for their services. Most States have the legislative authority to implement this option; however, only a few States have actually done so. There are a few States that do not have the legislative authority or have restricted authority.

Under section 6405 of Public Law 101–239, States are required to offer nurse practitioners the option of direct payment with State Medicaid agencies for services furnished. These statutory provisions became effective July 1, 1990 and were implemented throughout manual instructions. The instructions were published in the State Medicaid Manual, Part 4, Services, in August 1990 (Transmittal Number 48). Therefore, since July 1, 1990, States have been required to offer direct payment to nurse practitioners for their services as the statute requires.

The House Budget Committee report (H.R. Rep. No. 247, 101st Cong., 1st Sess. (1989)) that accompanied Public Law 101–239 did not provide any further explanatory or clarifying information regarding required coverage of nurse practitioner services. There are no current Medicaid regulations specifying how States may pay for nurse practitioners' services.

III. Provisions of the Proposed Regulations

In accordance with sections 1902(a)(10)(A) and 1905(a)(21) of the Act, we would amend 42 CFR parts 440 and 441. Part 440 sets forth the general provisions for all services. Part 441 sets forth the requirements and limits applicable to particular services.

We propose to add a new § 440.166 to define "nurse practitioner services" as including those services that are furnished within the scope of practice authorized by State law or regulations, by a practitioner who meets the requirements for a CPNP or a CFNP, regardless of whether the nurse practitioner is under the supervision of, or associated with, a physician or other health care provider.

We would require a certified pediatric nurse practitioner to meet all of the following requirements:

- Be currently licensed to practice in the State as a registered professional nurse;
- In the State in which he or she furnishes the services, meets the State requirements for qualification of pediatric nurse practitioners or nurse practitioners; and
- Be currently engaged in a pediatric nurse practice within the scope of applicable State law.

We would require a certified family nurse practitioner to meet all of the following requirements:

- Be currently licensed to practice in the State as a registered professional nurse;
- In the State in which he or she furnishes the services, meets the State requirements for qualification of family nurse practitioners or nurse practitioners; and
- Be currently engaged in a family nurse practice within the scope of applicable State law.

We would give States discretion in defining "currently engaged." In this way, States can tailor the definition to suit their individual needs.

Section 1905(a)(21) of the Act authorizes the Secretary to define "certified pediatric nurse practitioner" and "certified family nurse practitioner". To expand access to children in all States, we have elected to consider a CPNP or a CFNP to be any nurse practitioner licensed by State law and engaged in pediatric or family practice, respectively, consistent with the State law. We believe these requirements would increase accessibility to health care while assuring the delivery of quality services.

Section 440.166(d) would permit a certified nurse practitioner to be paid by the Medicaid agency, under an independent provider agreement, or through the employing provider, as set forth in § 441.22(c).

Current manual instructions establish more stringent standards than these proposed regulations in that they require nurse practitioners to be certified by national accrediting bodies. Pediatric nurse practitioners must be certified by the American Nurses' Association (ANA) or by the National Board of Pediatric Nurse Practitioners and Associates (NBPNP). Family nurse practitioners must be certified by the ANA. Several States do not require accreditation by national groups in order to practice as a CPNP or CFNP. The ANA and the NBPNP would prefer that we require their certification of pediatric and family nurse practitioners. However, the proposed rule would give States the flexibility to decide whether to require that pediatric or family nurse practitioners be certified by national accrediting organizations such as the

VOL
56
ISS
246
DE
23
1991
UMI

ANA, or the NBPNP, or be recognized by the States' Boards of Nursing to ensure that the necessary, formal education and training from an accredited nursing program has been satisfactorily completed. This flexibility is offered since some States' Boards of Nursing specify certain criteria, other than testing, that nurse practitioners must meet to practice in the State.

We would revise § 440.210 to include nurse practitioner services, to the extent they are authorized under State law or regulations, as a required service for the categorically needy.

We propose to add a new § 440.225 to specify that any service that is not required as a mandatory service for the categorically needy (§ 440.210) or the medically needy (§ 440.220) may be furnished under the State plan at the State's option.

We would amend part 441, subpart A, which sets forth the requirements and limits applicable to particular services. We propose to amend § 441.10 to cite sections 1902(a)(10)(A) and 1905(a)(21) of the Act as the authority for furnishing nurse practitioner services. In addition, we propose to make technical changes to § 441.10 that are unrelated to the nurse practitioner provision.

We propose to add a new § 441.22 to require that, to the extent nurse practitioners are authorized to practice under State law or regulations, the State plan must meet the following requirements:

- Provide that nurse practitioner services are furnished to the categorically needy.
- Specify whether those services are furnished to the medically needy.
- Provide that the nurse practitioner—

  May enter into an independent provider agreement; or

  Be paid through the employing provider.

As noted above, the requirements of the law have been implemented through manual instructions (State Medicaid Manual, Part 4—Services). In accordance with the statute, States have been required to offer direct payment for nurse practitioner services since July 1, 1990. We will issue revised manual instructions if we publish these proposed requirements as a final rule.

IV. Response to Comments

Because of the large number of items of correspondence we normally receive on a proposed rule, we are notable to acknowledge or respond to them individually. However, we will consider all comments that we receive by the date and time specified in the "Dates" section of this preamble, and, if we proceed with the final rule, we will respond to the comments in the preamble of the final rule.

V. Information Collection Requirements

This rule contains no information collection requirements. Consequently, this rule need not be reviewed by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1980.

(44 U.S.C. 3501 et seq.)

VI. Regulatory Impact Statement

Executive Order 12291 (E.O. 12291) requires us to prepare and publish a regulatory impact analysis for any proposed rule that meets one of the E.O. 12291 criteria for a "major rule"; that is, that would be likely to result in—

- An annual effect on the economy of $100 million or more;
- A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or
- Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises to compete with foreign-based enterprises in domestic or export markets.

In addition, we generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612) unless the Secretary certifies that a proposed rule would not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, physicians and all nurse practitioners who work on a consulting basis or are self-employed are considered to be small entities.

Also, section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis if a proposed rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 603 of the RFA. For purposes of section 11029(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 50 beds.

This proposed rule would require State Medicaid agencies to make direct payment available to CPNPs and CFNPs. This means that the State plan must provide that the nurse practitioner may enter into an independent provider agreement with the State Medicaid agency, for those services furnished which the CPNP and CFNP are legally authorized to perform under State laws or regulations, regardless of whether the nurse practitioner is under the supervision of, or associated with, a physician or other health care provider. This proposed rule is designed to increase access to certain services for children by mandating direct payment for CPNP and CFNP services even when they are not furnished under the direct supervision of a physician. This may happen particularly in rural and inner city areas where there is a shortage of doctors. We estimate that the impact on program costs due to this proposed rule would be minimal for several reasons. Initially, the total number of these types of nurse practitioners is small. In addition, we believe many of the nurse practitioners currently employed by physicians, hospitals, and clinics may not elect to bill directly for their services because States often pay nurse practitioners at a lower rate than they pay physicians for the same services, so the total fiscal effect on program costs appears to be negligible.

This proposed rules would not meet the $100 million criterion nor would it meet the other E.O. 12291 criteria. Therefore, this proposed rule is not a major rule under E.O. 12291, and an initial regulatory impact analysis is not required.

For similar reasons, we are not preparing analyses for either the RFA of section 1102(b) of the Act since we have determined, and the Secretary certifies, that this proposed rule would not result in a significant economic impact on a substantial number of small entities and would not have a significant economic impact on the operations of a substantial number of small rural hospitals.

List of Subjects

42 CFR Part 440

Grant programs-health, Medicaid.

42 CFR Part 441

Family planning, Grant programs-health, Infants and children, Medicaid, Penalties, Prescription drugs, Reporting and recordkeeping requirements.

42 CFR chapter IV would be amended as follows:

PART 440—SERVICES: GENERAL PROVISIONS

A. Part 440 is amended as follows:

1. The authority citation for part 440 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302).

Subpart A—Definitions

2. A new § 440.166 is added to read as follows:

§ 440.166 Nurse practitioner services.

(a) *Definition of nurse practitioner services. Nurse practitioner services* means services that are furnished within the scope of practice authorized by State law or regulations, by a practitioner who meets the requirements for a certified pediatric nurse practitioner or a certified family nurse practitioner, regardless of whether the nurse practitioner is under the supervision of, or associated with, a physician or other health care provider.

(b) *Requirements for certified pediatric nurse practitioner.* The practitioner must be a registered professional nurse who meets all of the following requirements:

(1) Is currently licensed to practice in the State as a registered professional nurse.

(2) In the State in which he or she furnishes the services, meets the State requirements for qualification of pediatric nurse practitioners or nurse practitioners.

(3) Is currently engaged in a pediatric nurse practice within the scope of applicable State law.

(c) *Requirements for certified family nurse practitioner.* The practitioner must be a registered professional nurse who meets all of the following requirements:

(1) Is currently licensed to practice in the State as a registered professional nurse.

(2) In the State in which he or she furnishes the services, meets the State requirements for qualification of family nurse practitioners or nurse practitioners.

(3) Is currently engaged in a family nurse practice within the scope of applicable State law.

(d) *Payment for nurse practitioner services.* In accordance with § 441.22(c) of this subchapter, which concerns payment for nurse practitioner services, the Medicaid agency may pay for nurse practitioner services by paying the—

(1) Nurse practitioner under an independent provider agreement; or

(2) Provider employing the nurse practitioner.

Subpart B—Requirements and Limits Applicable to All Services

3. In § 440.210, paragraphs (a) introductory text and (a)(1) are revised to read as follows:

§ 440.210 Required services for the categorically needy.

(a) A State plan must specify that, at a minimum, categorically needy recipients are furnished the following services:

(1) The services defined in §§ 440.10 through 440.50, 440.70, and (to the extent nurse-midwives and nurse practitioners are authorized to practice under State law or regulation) the services defined in §§ 440.165 and 440.166, respectively.

* * * * *

4. A new § 440.225 is added to read as follows:

§ 440.225 Optional services.

Any of the services defined in subpart A of this part, that are not required under §§ 440.210 and 440.220 may be furnished under the State plan at the State's option.

PART 441—SERVICES: REQUIREMENTS AND LIMITS APPLICABLE TO SPECIFIC SERVICES

B. Part 441 is amended as follows:

1. The authority citation for part 441 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302).

Subpart A—General Provisions

2. Section 441.10 is revised to read as follows:

§ 441.10 Basis.

This subpart is based on the following sections of the Act which state requirements and limits on the services specified or provide Secretarial authority to prescribe regulations relating to services:

Section 1102 for end-stage renal disease (§ 441.40).

Section 1138(b) for organ procurement organization services (§ 441.13(c)).

Section 1902(a)(10)(A) and 1905(a)(21) for nurse practitioner services (§ 441.22).

Section 1902(a)(10)(D) and 1907(a)(7) for home health services (§ 441.15).

Section 1903(i)(1) for organ transplant procedures (§ 441.35).

Section 1903(i)(5) for certain prescribed drugs (§ 441.25).

Section 1903(i)(6) for prohibition (except in emergency situations) of FFP in expenditures for inpatient hospital tests that are not ordered by the attending physician or other licensed practitioner (§ 441.12).

Section 1905(a)(4)(C) for family planning (§ 441.20).

Section 1905(a)(12) and (e) for optometric services (§ 441.30).

Section 1905(a)(17) and (m) for nurse-midwife services (§ 441.21).

Section 1905(a) (following (a)(18)), for prohibition of FFP in expenditures for certain services (§ 441.13).

3. A new § 441.22 is added to read as follows:

§ 441.22 Nurse practitioner services.

To the extent that nurse practitioners are authorized to practice under State law or regulations, the State plan must meet the following requirements:

(a) Provide that nurse practitioner services are furnished to the categorically needy.

(b) Specify whether those services are furnished to the medically needy.

(c) Provide that the nurse practitioner—

(1) May enter into an independent provider agreement and be paid directly through that agreement; or

(2) Be paid through the employing provider.

(Catalog of Federal Domestic Assistance Program No. 93.778, Medical Assistance Program).

Dated: August 23, 1991.

Gail R. Wilensky,

Administrator, Health Care Financing Administration.

Approved: October 23, 1991.

Louis W. Sullivan,

Secretary.

49 CFR Part 571

[Docket No. 91-65; Notice 1]

RIN 2127-AE15

Federal Motor Vehicle Safety Standards; Burnish Procedures and Recovery Requirements for Air Braked Vehicles

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice responds to a petition for rulemaking submitted by Rockwell International requesting that the agency amend two aspects of Standard No. 121, Air Brake Systems: the adjustment procedure for brake burnish during road testing and the recovery requirement for truck and bus front brakes.

As to brake burnish, the proposal would allow up to three brake adjustment during the burnish procedure at intervals specified by the vehicle manufacture and at the conclusion of burnishing. The agency tentatively concludes that this amendment would

VOL
56
ISS
246
DE
23
1991
UMI

bring the road test burnish procedures closer to conditions found in actual vehicle usage, particularly given the anticipated use of a new generation of non-asbestos brake block which may experience lining swell early in the burnish tests.

As to the recovery requirement, the proposal would no longer require front axle brakes on trucks and buses to comply with the minimum pressure requirements related to the brake chamber. The agency tentatively concludes that this amendment would improve brake performance by removing a regulation that prevents the use of larger brakes on front axles.

DATES: *Comments.* Comments must be received on or before March 9, 1992.

Proposed Effective Date. The proposed amendments would become effective 30 days after publication of a final rule in the **Federal Register**.

ADDRESSES: Comments should refer to the docket and notice numbers above and be submitted to: Docket Section, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590. Docket hours are 9:30 a.m. to 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Mr. Richard C. Carter, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590 (202–366–5274).

SUPPLEMENTARY INFORMATION:

Background

1. Burnish Requirements

Standard No. 121, Air Brake Systems (49 CFR 571.121), specifies road tests and dynamometer tests to measure whether air brakes on vehicles comply with the standard's performance requirements. Among the requirements applicable to vehicles with air brakes are "burnish" procedures conducted at the outset of both road testing and dynamometer testing. A burnish procedure consists of a series of brake applications (hereafter referred to as "snubs") that serve to break in the brakes on a new vehicle. The burnish procedures are intended to simulate the break-in of the brakes under normal driving conditions.

Under the current road test burnish procedures, two options, "a" and "b," are available until September 1, 1993 (see S6.1.8.1.) Brakes on vehicles manufactured on or after that date must be burnished under option "b." The burnish procedures in both options consist of 500 brake applications. In addition, both options specify that the brakes be adjusted during the burnish procedure, if necessary, in accordance with the manufacturer's recommendations, after the 125th, 250th, and 376th snubs and after burnish is completed.

There are two principal differences between the options. First, in option "a," the snubs are made to slow the vehicle to 20 miles per hour (mph) from speeds ranging from 40 mph to 60 mph; while all the snubs in option "b" slow the vehicle from 40 mph to 20 mph. Second, in option "a," the maximum temperature of the hottest brake on the vehicle is not permitted to exceed 550° F, while option "b" does not contain provisions about the maximum permissible brake temperature.

A dynamometer test to measure mechanical force is also specified in Standard No. 121 (see section S6.2.6). Before the dynamometer test, brakes are burnished by making 400 stops from 40 mph at a deceleration of 10 fsps. For these brake applications, the standard specifies that the "initial brake temperature" shall be within a stated range. "Initial brake temperature" is defined as "the average temperature of the service brakes on the hottest axle of the vehicle 0.2 mile before any brake application."

The current burnish procedures resulted from a rulemaking conducted in response to a petition from International Harvester (IH) that culminated in a final rule published on March 14, 1988 (49 FR 8191.) IH had petitioned the agency to amend the burnish procedures to take account of the differing characteristics of disc and drum brake systems. In considering new burnish procedures, the agency issued a notice of proposed rulemaking (NPRM) (48 FR 29560; June 27, 1983) and a supplemental notice of proposed rulemaking (SNPRM) (50 FR 21313; May 23, 1985) to amend the pre-road testing burnish procedures in Standard Nos. 105 and 121. The NPRM proposed that if the temperature of the hottest brake exceeded 550° F at a snub condition of 40 to 20 mph, then the remaining snubs would be run from 40 to 20 mph without regard to the brake temperature. The NPRM also proposed to specify brake adjustments at equal intervals during the burnish. For the road test burnishes, the adjustments would be made manually after the 125th, 250th, and 375th snubs, in accordance with the manufacturer's recommendation. For the dynamometer test burnishes, the brakes would be adjusted manually after the 100th, 200th, and 300th snubs. This proposal incorporated past agency interpretations and preambles stating that brake adjustments are permitted during burnish. Such adjustments are made to account for the effects of high temperature and for uneven wear on different brakes.

In response to comments and additional information available to the agency, the agency issued the SNPRM to set forth four alternative methods for amending the burnishing procedures. The approach that was ultimately adopted was based primarily on agency testing indicating that brakes on heavy duty vehicles should be burnished by 500 snubs slowing the vehicle from 40 to 20 mph, without regard to brake temperatures generated during the burnish. The agency again solicited comments about the need for manual adjustments, and proposed that such adjustments be made at specified intervals in accordance with the manufacturer's recommendations. In response to comments critical of specifying the adjustments at designated intervals, the agency explained that such an approach would result in more repeatable test results by standardizing the procedures to be followed by all parties.

The final rule adopted the SNPRM's proposal about brake adjustments, as proposed. In the final rule, the agency explained that standardizing intervals at which adjustments could be made would reduce a potential source of variability.

2. Brake Recovery During Dynamometer Testing

Section S5.4 specifies requirements that foundation brake assemblies must meet during dynamometer tests for retardation, brake power, and recovery. These requirements are specified to achieve the required deceleration. During brake recovery, the chamber pressure for non-antilock systems must be within the range of 85 to 20 psi. The purpose of the 85 psi requirement at the high end of the test specification is to ensure that the brakes can recover from the elevated test temperatures. These elevated temperatures can cause the brakes to fade and may also permanently alter the physical characteristics of the brake block material. This provision ensures that there has not been a permanent change in the physical condition of the brake block material which requires a higher pedal force or air pressure. The purpose of the 20 psi requirement at the low end of the test specification is to check for overly aggressive brake blocks with an unstable coefficient of friction resulting from the exposure to high temperature conditions.

Petition

On January 8, 1991, Rockwell International (Rockwell) submitted a petition for rulemaking, requesting that the agency amend two aspects of Standard No. 121: (1) The adjustment procedure for brake burnish during road testing, and (2) the recovery requirement for truck and bus front brakes.

In regard to brake burnish, Rockwell explained that it has experienced problems with dragging brakes during the early part of the burnish. The brake drag has resulted from overheating of the brake linings and drums to the extent that the test was stopped because of the concern due to excessive temperatures. These problems were caused by the automatic slack adjustors adjusting to the expanding hot drum and by the initial swell of the lining that occurs under testing. For Rockwell's brake design, which employs non-asbestos brake blocks, lining swell occurs early in burnish, typically around the 50th snub. While a manual adjustment would alleviate the problem of lining swell, the first manual adjustment is not allowed under the current requirements until the 125th snub. Accordingly, Rockwell requested that to permit readjustment at the time of the initial swell, the standard should not specify the exact snub numbers at which brakes can be manually adjusted. Instead, the requirements should allow four manual adjustments, if necessary. The petition did not request changes to the brake adjustment provisions in the dynamometer test.

In regard to brake recovery, Rockwell stated that the 20 psi requirement results in brake size and input power being limited because if a brake's performance level is too high, the pressure will be less than 20 psi. This limitation historically has had minor impact because recovery typically has fallen in the mid-range. However, this provision hampers the trend toward designing vehicles with larger front axle brakes, a trend which the agency has encouraged to improve brake performance. Rockwell requested that the standard be amended to exclude truck and bus front axle brakes from the minimum pressure requirements to allow use of larger brake sizes and input powers. The petitioner stated that the concern about early lock-up would generally not apply to front axle brakes because of the dynamic weight transfer to front axles during deceleration.

Agency Proposal

General

After conducting its initial review, NHTSA previously granted each part of the petition and, in this notice, has decided to propose amendments to Standard No. 121 to effectuate the petition.

First, the burnish requirements in the road test conditions and dynamometer test conditions would be amended to allow up to three brake adjustments during the burnish procedure, at intervals specified by the vehicle manufacturer, and a final adjustment at the conclusion of burnishing. This would modify the current burnish requirement which allows adjustments, but only at intervals specified in the regulation. The agency has also decided to propose amending the brake adjustment provisions for dynamometer tests to obtain consistency in its regulation, even though the petitioner did not request this change. This proposal also anticipates the potential need for future rulemaking on this issue.

Second, the brake recovery requirement would be amended to exclude front brakes of trucks and buses from the minimum pressure requirement. This proposal would remove a requirement that appears to impede the development of larger front brakes on heavy vehicles. Accordingly, this rulemaking would be consistent with the agency's policy of encouraging vehicles designed with front brakes that do a larger share of the total braking. This goal is explained in reports about the agency's testing of heavy vehicles at the Vehicle Research and Testing Center (VRTC) ("NHTSA Heavy Duty Vehicle Brake Research Program Report No. 1, "Stopping Capability of Air Braked Vehicles," (DOT HS 806 736, April 1985) and Report No. 9, "Stopping Distances of 1988 Heavy Vehicles.")

Burnish Procedure

As with all the Federal Motor Vehicle Safety Standards, Standard No. 121 is designed to evaluate the real-world experiences of motor vehicles. The agency established the burnish procedures to simulate the break-in that brakes get when they are initially used on the public roads. The 1988 amendments in large part succeeded in bringing the road test burnish procedure closer to conditions found in actual vehicle usage, especially for disc brakes.

After evaluating the Rockwell petition, the agency tentatively concludes that it may be necessary to modify the burnish procedures to account for the new generation of non-asbestos brake blocks. Unlike conventional asbestos brake blocks, these new types of brake blocks respond to elevated temperatures with increased swelling. One potential way to alleviate the problem of lining swell would be to allow manual brake adjustment during the burnish tests when swelling occurs. Accordingly, the agency is proposing to amend the adjustment schedule in S6.1.8.1 to permit adjustment at intervals specified by the vehicle manufacturer. The agency requests comments about the need for and appropriateness of this proposal.

In the 1988 rulemaking about burnish, NHTSA considered the timing for manual brake adjustment. At the time, the agency decided to specify the intervals at which manual adjustments could be made. Specifically, manual adjustments were permitted after the 125th, 250th, and 375th snubs and after completing the burnish, with each adjustment made in accordance with the manufacturer's recommendations. In specifying the adjustments at designated times, the agency was attempting to standardize the procedures to be followed by all parties. The agency was concerned that if it did not specify how often and when adjustment could be made, the standard might incorporate a potential source of variability.

In response to the problems identified by the Rockwell petitions, NHTSA has reevaluated the need to specify the intervals between snubs. The agency tentatively concludes that the standard need not specify the intervals at which such adjustments could be made. Specifying the adjustment intervals might provide somewhat greater uniformity among vehicles because all brakes that need adjustment during burnishing would be adjusted at the same time. However, such a procedure does not take into account the differences among brake systems, i.e., while the Rockwell system apparently needs adjustment early in the testing, a different system may need adjustments later in the process. Given that each brake system may need adjustment at different times (or not at all), the agency now tentatively concludes that it is not appropriate to specify a particular adjustment schedule for all brake designs. An alternative approach would be for the agency to propose the initial adjustment at an earlier point (e.g., the 50th snub) but retain the other adjustment intervals. The agency requests comments about how best to prescribe the adjustment schedule to allow flexibility to accommodate new brake designs, while ensuring that the agency can enforce the burnish requirements.

As mentioned above, Rockwell did not petition to change the adjustment cycle intervals specified in S6.2 "Dynamometer test conditions." In terms of adjustment during burnish, that

VOL 56 ISS 246 DEC 23 1991 UMI

provision states that "The brakes shall be adjusted three times during the burnish procedure, after 100, 200, and 300 stops, and at the conclusion of the burnishing, in accordance with the manufacturer's recommendation" (see S6.2.6.) The agency notes that the temperature rise during burnishing is not so significant a problem during the dynamometer test because the large cooling fans used with that stationary test provide greater cooling than the road test's ambient wind conditions. Nevertheless, the agency has decided to propose amending the brake adjustment provisions for dynamometer tests to obtain consistency between its provisions about burnish. This proposal also anticipates the potential need for future rulemaking on this issue.

The agency is also proposing to change the definition for "initial brake temperature." While the present definition is appropriate for road testing situations, it is not appropriate for dynamometer testing because the dynamometer test is a stationary test fixture rather than an over-the-road vehicle. The present definition which refers to initial brake temperature, as the average temperature of the service brakes on the hottest axle of the vehicle 0.2 mile before any brake application, is being extended to include the equivalent of 0.2 miles in terms of time (i.e., 12 seconds) on the dynamometer. The time of 12 seconds is equivalent to the distance of 0.2 miles at sixty miles per hour. The agency welcome comments about this proposed modification to the definition of initial brake temperature.

Brake Chamber Pressure During Recovery

Section S5.4.3. currently specifies provisions about a vehicle's brake recovery during the dynamometer testing. Within two minutes after completing the brake power tests, the brake of a vehicle (other than either front axle brake of a truck-tractor) must be capable of making 20 consecutive stops from 30 mph at a deceleration rate of 12 ft/s/s at one minute intervals. During these stops, the service line air pressure needed to attain the deceleration rate must not be more than 85 lb/in ^{2} and not less than 20 lb/in ^{2} for a non-anti-lock brake system. The lower limit is 12 lb/in ^{2} for brakes controlled by an antilock system.

These pressure requirements of the brake chamber during recovery serve two purposes. The 85 psi requirement at the high end of the test specification ensures that brakes can recover from the elevated temperatures which cause brakes to fade. Such high temperatures may also permanently alter the physical characteristics of the brake block material. Accordingly, this test ensures that there has not been a permanent change in the brake block material's physical condition requiring a higher pedal force of air pressure. The 20 psi requirement at the low end of the specification checks for overly aggressive brake blocks with an unstable coefficient of friction resulting from exposure to high temperature conditions. One effect of the 20 psi requirement is to prevent the use of larger brakes on the front axle because such systems may go below the fixed lower pressure limit. This is so because an inverse relationship exists between air pressure and brake size (i.e., a lower air pressure such as one under 20 psi is capable of activating a larger brake system.)

After reviewing the situation in light of Rockwell's petition, the agency has decided to propose amending the requirement so that front axle brakes on trucks and buses would no longer have to comply with the minimum pressure requirements for the brake chamber during the recovery tests. Such an amendment would remove a regulation that may impede the use of larger brakes on front axles. In terms of brake performance, a major agency priority has been to encourage large front brakes, a measure which results in improved braking performance through the ability of the front brakes to compensate for the forward transfer of weight that occurs during braking. This agency policy is set forth in the VRTC test studies cited above and the agency's report to Congress entitled "Improved Brake Systems for Commercial Vehicles" (PB91–182600). This report may be examined at the agency's Technical Reference Office, room 5108, at no charge. It is available from the National Technical Information Service (NTIS), Springfield, VA 22161 for a small charge. Along with the agency's interest in encouraging larger front brakes, vehicle manufacturers are increasingly equipping their vehicles with larger front axles, bearings, and brakes to improve their vehicles' overall durability and performance. The agency requests comments about the need for this amendment.

Rulemaking Analyses and Notices

Executive Order 12291 (Federal Regulation) and DOT Regulatory Policies and Procedures

NHTSA has analyzed this proposal and determined that it is neither "major" within the meaning of Executive Order 12291 nor "significant" within the meaning of the Department of Transportation's regulatory policies and procedures. The main effect of the burnish proposal would be to provide burnish procedures that are more representative of the actual "break-in" that vehicle brakes typically receive while in use on the nation's roads, without favoring any particular braking system design. In particular, allowing adjustment consistent with the manufacturer's recommended adjustment schedule would more fully account for differences among brake systems. The main effect of the proposal about recovery requirements would be to remove a restriction that prevented the installation of better performing front brakes.

The proposed amendment of the burnish procedures would not result in any significant cost increase because it serves to provide greater flexibility to manufacturers during the burnish testing. The agency anticipates that the rulemaking's costs would be less than $1.00 per vehicle. The agency estimates that it would take approximately one and one half hours in labor time to conduct the test: One hour to set up the test by plumbing the test gauges into the front axle brake system and another ½ hour for running and recording data. At a labor cost of $30 per hour and the testing of four units for each axle design, the agency expects the cost to be approximately $180 per test. This cost would be allocated among 200 to 1000 vehicles with a given axle design, resulting in a cost of $0.18 to $0.90 per vehicle. The proposed amendment to the recovery requirements would result in a cost savings because front axle brakes on trucks and buses would no longer have to comply with certain requirements. The agency welcomes comments about the costs associated with the test procedure.

Regulatory Flexibility Act

In accordance with the Regulatory Flexibility Act, NHTSA has evaluated the effects of this action on small entities. Based upon this evaluation, I certify that the proposed amendments would not have a significant economic impact on a substantial number of small entities. Few of the truck tractor manufacturers or brake manufacturers affected by this rulemaking are small entities. Some of the trailer manufacturers may qualify as small entities. However, as explained above, this rule would not significantly increase the production or certification costs for those manufacturers that do qualify as small entities. Small organizations and governmental jurisdictions which purchase these vehicles would not be affected since the cost impacts of this rule would be minimal, as described above. Accordingly, a regulatory flexibility analysis has not been performed.

Executive Order 12612 (Federalism)

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the proposed rule would not have sufficient Federalism implications to warrant preparation of a Federalism Assessment. No State laws would be affected.

National Environmental Policy Act

Finally, the agency has considered the environmental implications of this proposed rule in accordance with the National Environmental Policy Act of 1969 and determined that the proposed rule would not significantly affect the human environment.

Public Comments

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted.

All comments must not exceed 15 pages in length. (49 CFR 553.21). Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential business information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation. 49 CFR part 512.

All comments received before the close of business on the comment closing date indicated above for the proposal will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Comments received too late for consideration in regard to the final rule will be considered as suggestions for further rulemaking action. The NHTSA will continue to file relevant information as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the rules docket should enclose a self-addressed, stamped postcard in the envelope with their comments. Upon receiving the comments, the docket supervisor will return the postcard by mail.

List of Subjects in 49 CFR Part 571

Imports, Incorporation by reference, Motor vehicle safety, Motor vehicles, Rubber and rubber products, Tires.

In consideration of the foregoing, the agency proposes to amend Standard No. 121, Air Brake Systems, in title 49 of the Code of Federal Regulations at part 571 as follows:

PART 571—[AMENDED]

1. The authority citation for part 571 would continue to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

§ 571.121 [Amended]

2. In § 571.121, would be revised by amending the following definition as follows:

* * * * *

Initial brake temperature means the average temperature of the service brakes on the hottest axle of the vehicle 0.2 mile before any brake application in the case of road tests, or 12 seconds before any brake application in the case of dynamometer testing.

* * * * *

§ 571.121, S5.4.3 [Amended]

3. In § 571.121, S5.4.3 would be revised to read as follows:

S5.4.3 *Brake recovery.* Except as provided in S5.4.3(a) and (b), starting 2 minutes after completing the tests required by S5.4.2, the brake of a vehicle shall be capable of making 20 consecutive stops from 30 mph at an average deceleration rate of 12 ft/s/s, at equal intervals of 1 minute measured from the start of each brake application. The service line air pressure needed to attain a rate of 12 ft/s/s shall be not more than 85 lb/in^2 and not less than 20 lb/in^2, for a brake not subject to the control of an antilock system, or 12 lb/in^2 for a brake subject to the control of an antilock system.

S5.4.3(a) Notwithstanding S5.4.3, neither front axle brake of a truck-tractor is subject to the requirements set forth in S5.5.3.

S5.4.3(b) Notwithstanding S5.4.3, neither front axle brake of a bus or a truck other than a truck-tractor is subject to the requirement set forth in S5.4.3 prohibiting the service line air pressure from being less than 20 lb/in^2 for a brake not subject to the control of an antilock system.

§ 571.121, S6.1.8.1 [Amended]

4. In § 571.121, S6.1.8.1 would be revised to read as follows:

S6.1.8.1 Vehicles manufactured before September 1, 1993 may be burnished according to the procedures set forth in S6.1.8.1(a) or S6.1.8.1(b) of this section, at the manufacturer's option. vehicles manufactured on or after September 1, 1993 shall be burnished according to the procedures set forth in S6.1.8.1(b) of this section.

(a) With the transmission in the highest gear appropriate for the series given in Table IV, make 500 brake applications at a deceleration rate of 10 fsps, or at the vehicle's maximum deceleration rate if less than 10 fsps, in the sequence specified. Except where an adjustment is specified, after each brake application, accelerate to the next speed specified and maintain that speed until making the next brake application at a point 1 mile from the initial point of the previous brake application. If a vehicle cannot attain any speed specified in 1 mile, continue to accelerate until the specified speed is reached or until the vehicle has traveled 1.5 miles from the initial point of the previous brake application, whichever occurs first. If during any of the brake applications specified in Table IV, the hottest brake reaches 550 °F, make the remainder of the 500 brake applications from that snub condition, except that a higher or lower snub condition shall be used as necessary to maintain an after-stop temperature of 500 °F ± 50 F. However, if at a snub condition of 40 to 20 mph, the temperature of the hottest brake exceeds 550 °F, make the remainder of the 500 brake applications from that snub condition, without regard to brake temperature. The brakes may be adjusted up to three times during the burnish procedure, at intervals specified by the vehicle manufacturer, and may be adjusted at the conclusion of the burnishing, in accordance with the manufacturer's recommendation. Any automatic pressure limiting valve is in use to limit pressure as designed, except that any automatic front axle pressure limiting valve is bypassed if the temperature of the hottest brake on a rear axle exceeds the temperature of the hottest brake on a front axle by more than 125 °F. A bypassed valve is reconnected if the temperature of the hottest brake on a front axle exceeds

VOL 56 ISS 246 DEC 23 1991 UMI

the temperature of the hottest brake on a rear axle by 100 °F or more.

TABLE IV

Series	Snubs	Snub conditions (Highest speed indicated, miles per hour)
1	175	40-20.
2	25	45-20.
3	25	50-20.
4	25	55-20.
5	250	60-20.

(b) With the transmission in the highest gear appropriate for a speed of 40 mph, make 500 snubs between 40 mph and 20 mph at a deceleration rate of fsps, or at the vehicle's maximum deceleration rate if less than 10 fsps. Except where an adjustment is specified, after each brake application accelerate to 40 mph and maintain that speed until making the next brake application at a point 1 mile from the initial point of the previous brake application. If the vehicle cannot attain a speed of 40 mph in 1 mph, continue to accelerate until the vehicle reaches 40 mph or until the vehicle has traveled 1.5 miles from the initial point of the previous brake application, whichever occurs first. An automatic pressure limiting valve is in use to limit pressure as designed. The brakes may be adjusted up to three times during the burnish procedure, at intervals specified by the vehicle manufacturer, and may be adjusted at the conclusion of the burnishing, in accordance with the manufacturer's recommendation.

§§ 571.121, S6.2.6 [Amended]

5. In § 571.121, S6.2.6 would be revised to read as follows:

S6.2.6 Brakes are burnished before testing as follows: Place the brake assembly on an inertia dynamometer and adjust the brake as recommended by the brake manufacturer. Make 200 stops from 40 mph at a deceleration of 10 fsps, with an initial brake temperature on each stop of not less than 315 °F and not more than 385 °F. Make 200 additional stops from 40 mph at a deceleration of 10 fsps with an initial brake temperature on each stop of not less than 450 °F and not more than 550 °F. The brakes may be adjusted up to three times during the burnish procedure, at intervals specified by the vehicle manufacturer, and may be adjusted at the conclusion of the burnishing, in accordance with the manufacturer's recommendation.

Issued on: December 16, 1991.

Barry Felrice,

Associate Administrator for Rulemaking.

BILLING CODE 4910-59-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018-AB73

Endangered and Threatened Wildlife and Plants; Proposed Rule for Five Plants and Morro Shoulderband Snail from Western San Luis Obispo County, California

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The U.S. Fish and Wildlife Service (Service) proposes endangered status pursuant to the Endangered Species Act of 1973, as amended, (Act), for five plants and one land snail: *Arctostaphylos morroensis* (Morro manzanita), *Cirsium fontinale* var. *obispoense* (Chorro Creek bog thistle), *Clarkia speciosa* ssp. *immaculata* (Pismo clarkia), *Eriodictyon altissimum* (Indian Knob mountainbalm), *Suaeda californica* (California sea-blite), and Morro shoulderband snail (*Helminthoglypta walkeriana*). Morro manzanita and Indian Knob mountainbalm inhabit the maritime chaparral community primarily between the cities of Morro Bay and Arroyo Grande in San Luis Obispo County, California. Chorro Creek bog thistle is restricted to seep areas in serpentine soils primarily around San Luis Obispo. Pismo clarkia is found on pockets of dry sandy soils between San Luis Obispo and Arroyo Grande. California sea-blite is restricted to the upper intertidal marsh zone around Morro Bay. The five plant taxa are threatened by one or more of the following: Residential development, road maintenance activities, competition from alien plants, recreational activities, grazing, water diversions, dredging, and perhaps stochastic (i.e., random) extinction by virtue of the small, isolated nature of the remaining populations. Morro shoulderband is limited to pre-Flandrian sand dunes at the southern end of Morro Bay and is threatened by destruction of habitat, competition with the common garden snail, and perhaps stochastic extinction. The proposal, if made final, would implement the Federal protection and recovery provisions afforded by the Act for the plants and the snail. The Service seeks data and comments from the public on this proposal.

DATES: Comments from all interested parties must be received by February 21, 1992. Public hearing requests must be received by February 6, 1992.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Office Supervisor, U.S. Fish and Wildlife Service, Ventura Office, 2140 Eastman Avenue, suite 100, Ventura, California, 93003. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Dr. Steven Chambers, Office Supervisor, at the above address or at 805-644-1766 (commercial) or 983-6040 (FTS).

SUPPLEMENTARY INFORMATION:

Background

Morro manzanita, Chorro Creek bog thistle, Pismo clarkia, Indian Knob mountainbalm, California sea-blite, and Morro shoulderband are endemic to the western portion of San Luis Obispo County, California. Morro manzanita and Indian Knob mountainbalm occur as components of several coastal plant communities, referred to as central coastal scrub, central maritime chaparral, and coast live oak woodland by Holland (1986). Chorro Creek bog thistle is found primarily on more inland sites, near seeps associated with serpentine soils. Pismo clarkia is a component of grasslands that form a mosaic with chaparral and oak woodlands. California sea-blite is found in association with the northern coastal salt marsh community (Holland 1986) around Morro Bay. Morro shoulderband is found within the central coastal dune scrub community (Holland 1986) on the south end of Morro Bay. These communities have also been described by Holland and Keil (1990) and by MacDonald, Griffin, Hanes, Barbour and Johnson, and Mooney in Barbour and Major (1988).

The natural communities of western San Luis Obispo County have undergone a number of changes resulting from both human-caused activities and natural occurrences. The rapid urbanization of urban communities around Morro Bay, the San Luis Obispo area, and the Pismo Beach area has already eliminated the proposed plants and the snail in portions of their ranges. Starting in the 1940's, the configuration of Morro Bay itself was altered by construction of a breakwater that resulted in the connection of Morro Rock to the mainland north of the Bay, construction

of a marina, the deposition of sediments from two watersheds (Los Osos Creek and Chorro Creek), and the dredging of waterways within the Bay (Gerdes *et al.* 1974). Since 1935, the spit that envelops the southern portion of the Morro Bay has also been displaced 90 feet landward as a result of windblown sand into the interior of the Bay (Josselyn *et al.* 1989). Further urban development and other anthropogenic activities such as recreation, grazing, and utility construction threaten the remaining occurrences of these plants and the snail.

Discussion of the Six Species Proposed for Listing

Morro manzanita (*Arctostaphylos morroensis*) was first described by Albert E. Wieslander and Beryl O. Schreiber in 1939 (Wieslander and Schreiber 1939) based on a specimen collected in Hazard Canyon, south of Morro Bay, which is now within the boundaries of Montana de Oro State Park. This name has been conserved by McMinn (1939), Abrams (1951), Munz (1968), and Hoover (1970).

This handsome shrub of the heath family (Ericaceae) reaches 1.5 to 4 meters (m) (5 to 13 feet (ft)) high. Morro manzanita has oblong to ovate leaves that are grey-green to olive-green and 2.5 to 4 centimeters (cm) (1 to 1.5 inches (in)) long, with petioles 2 to 6 millimeters (mm) (0.08 to 0.20 in) long. The white to pinkish flowers are 5 to 8 mm (0.2 to 0.3 in) long and form orange-brown fruits 8 to 13 mm (0.3 to 0.5 in) in diameter. Morro manzanita is distinguished from other manzanitas in the area by the following characters: The bark of the trunk is a shaggy grey to brown and the leaf blades are cuneate to rounded or truncate at the base, with the lower surface paler and usually somewhat tomentose (bearing short, wooly hairs). Occasional specimens of Morro manzanita have exhibited an auriculate (ear-shaped appendage) leaf base and a leaf petiole short to lacking—characters more representative of the rare Arroyo de la Cruz manzanita (*Arctostaphylos cruzensis*). Recent work by Holland *et al.* (1990) has clarified the distinctness of the taxon and its relation to Arroyo de la Cruz manzanita.

The distribution of Morro manzanita has been tied to the presence of soils derived from ancient sand dunes, referred to as Baywood fine sands, which were deposited during the Pleistocene epoch when sea levels 300 feet lower than current levels allowed large volumes of sand to blow inland into the Los Osos Valley. Over half of the area covered by Baywood fine stands have been subject to urban development, primarily by the communities of Los Osos, Baywood Park, and Cuesta-by-the-Sea on the south and east sides of Morro Bay. The total number of individuals of Morro manzanita was recently estimated to be 2,000 (McLeod 1991).

Chorro Creek bog thistle (*Cirsium fontinale* var. *obispoense*) is one of two rare subspecies of *Cirsium fontinale*, which was first described by Edward L. Greene in 1886 as *Cnicus fontinalis*. Six years later, he transferred the plant to the genus *Carduus*, and in 1901 Jepson transferred the plant to the genus *Cirsium*. In 1938, J.T. Howell described the var. *obispense* based on plants collected at Chorro Creek 2 years earlier (Abrams and Ferris 1960).

Chorro Creek bog thistle is a rugged short-lived perennial herb of the aster family (Asteraceae). First year plants form a rosette that reaches up to a meter (3.3 ft) in diameter; in the second or third year, the plant produces a branching stalk up to 2 m (6.6 ft) in height and bearing numerous heads of whitish to pinkish-lavender tinged flowers. It is separated from other thistles that occur in the area on the basis of its nodding flower heads and glandular hairs on the leaves.

Chorro Creek bog thistle is restricted to open seep areas on serpentine soil outcrops. It is known from only eight locations; seven are to the south and west of San Luis Obispo, and one is 30 miles to the northwest near San Simeon. The type locality was surveyed for Chorro Creek bog thistle in 1985; the thistle was not located and is assumed to be extirpated, probably by cattle grazing (Rocco 1981). Extant populations are threatened by grazing and proposed water diversions, and may also be declining due to several years of drought conditions. At the time of the last surveys in 1986, the total number of individuals numbered less than 3,000 (Friedman 1987).

Indian Knob mountainbalm (*Eriodictyon altissimum*) was first collected on Indian Knob by Philip V. Wells in 1960, and was described by him 2 years later (Wells 1962). This diffusely branched evergreen shrub of the waterleaf family (Hydrophyllaceae) reaches a height of 2 to 4 m (6.6 to 13 ft). The sticky leaves are long (6 to 9 cm (2.4 to 3.5 in)) and narrow (2 to 4 mm (0.08 to 0.20 in)); the lavender flowers (1.1 to 1.5 cm (0.4 to 0.6 in) long) are arranged in coiled clusters, and produce numerous tiny (0.4 mm (0.02 in) long) seeds. As with other fire-adapted chaparral plants, Indian Knob mountainbalm produces new growth primarily from rhizomatous suckers. Only one other narrow-leaved *Eriodictyon* occurs in southern California; *E. angustifolium* occurs in the New York Mountains in the eastern Mojave Desert.

Indian Knob mountainbalm occurs within coastal maritime chaparral and oak woodlands and co-occurs with Morro manzanita in several locations. Vanderwier (1987) did a detailed study of the chaparral and woodland communities at the type locality for Indian Knob mountainbalm. Only six stands are known, which range from the south end of Morro Bay to Indian Knob, between San Luis Obispo and Arroyo Grande. Because the rugged character of the terrain in the Irish Hills (between Morro Bay and Indian Knob) has precluded extensive botanical surveying, there is the possibility that other strands of Indian Knob mountainbalm may occur in this area. With the discovery of an extension of the stand at Indian Knob 2 years ago, the largest known stand comprises 350 individuals (Lynn Dee Oyler, Botanical Consultant, pers. comm., 1991). Currently, the total number of individuals of Indian Knob mountainbalm is less than 600 (Bittman 1985; Oyler, pers. comm., 1991).

Pismo clarkia (*Clarkia speciosa* ssp. *immaculata*), a member of the four o'clock family (Onagraceae), was first collected in Carpenter Canyon by Frank Lewis and Margaret Ensign Lewis in 1947. They published a monograph on the genus *Clarkia* in 1955 (Lewis and Lewis 1955) in which they described the plant for the first time. The plant is an erect or decumbent herb, with branched stems up to 5 decimeters (dm) long; the petals are white or cream-colored at the base, streaking into pinkish or reddish-lavender in the upper part and 1.5 to 2.5 cm (0.6 to 1.0 in) long. It is distinguished from the subspecies *speciosa* by its larger flowers and the pattern of petal color. In his flora of San Luis Obispo County, Hoover (1970) notes the geographical separation between Pismo clarkia and the subspecies, the latter which occurs north of San Luis Obispo from the Santa Lucia range to the Salinas River drainage.

Pismo clarkia is found on pockets of dry sandy soils, possibly ancient sand dunes, within grassy openings in chaparral and oak woodlands. The 4 extant populations are located between San Luis Obispo and Arroyo Grande and together support less than 3,000 individuals of Pismo clarkia (Myers 1987). At least one historical population has been extirpated by residential development, and extant populations are threatened by continuing

UMI

development, road maintenance activities, and possibly grazing.

California sea-blite (*Suaeda californica*) is a succulent-leaved perennial plant of the goosefoot family (Chenopodiaceae). It was first described by Sereno Watson in 1874 based on a collection made in the salt marshes of San Francisco Bay. Amos Heller published the name *Dondia californica* in 1898, recognizing the genus name that had been used by Michel Adanson in 1763; however, the name *Suaeda* has been conserved by the International Rules of Nomenclature (Abrams 1944). Philip Munz (1959) recognized several previously recognized taxa as subspecies of *Suaeda californica*. With this treatment, he described the range of California sea-blite as extending from San Francisco Bay south to Lower (Baja) California. Ferren and Whitmore (1983) noted that much of what had been identified as *Suaeda californica* in southern California and Baja California, Mexico, is a distinct taxon, which they named *Suaeda esteroa*. While both species occur in the upper intertidal zone, *Suaeda californica* is a shrub with radially symmetrical flowers belonging to the section *Limbogermen*, and *Suaeda esteroa* is an herbaceous perennial with bilaterally symmetrical flowers belonging to the section *Heterosperma*. Further study revealed that the only extant populations of *Suaeda* that resemble the type specimen of *Suaeda californica* are those that occur in the vicinity of Morro Bay. In his pending revision of the genus, Ferren will restore full species status to the taxon to *Suaeda californica*.

California sea-blite is currently known to occur at three locations, all within Morro Bay, where it is restricted to the upper intertidal zone within coastal marsh habitat. The shrubs are discontinuously distributed in a narrow band around the Bay adjacent to other marsh plants including pickleweed (*Salicornia* sp.), saltgrass (*Distichlis* sp.), rush (*Juncus acutus*), Jaumea (*Jaumea carnosa*), and the federally endangered salt marsh birds-beak (*Cordylanthus maritimus* ssp. *maritimus*). Field surveys are planned for the spring of 1992 and will include the marsh at Elkhorn Slough in Monterey Bay, the only other location considered to be potential habitat for California sea-blite left on the coast of California (Dirk Walters, Botanical Consultant, pers. comm., 1991). Currently, the known extent of California sea-blite comprises less than 500 individuals.

The Morro shoulderband (*Helminthoglypta walkeriana*) is a member of the land snail family (Helminthoglyptidae). The Morro shoulderband was first described in 1911 as *Helix walkeriana* by Henry Hemphill (Hemphill 1911) based on collections he made "Near Morro, California"; he also described a subspecies of *Helix walkeriana*, *Helix* var. *morroensis*, from "near San Luis Obispo City" based on sculptural features in the shell (Roth 1985). Field (1930) transferred the taxon to the genus *Helminthoglypta*.

The Morro shoulderband appears to be most closely related to the surf shoulderband (*Helminthoglypta fieldi* Pilsbry, 1930), which occurs in coastal dune habitats south of the San Luis Range to Point Arguello and therefore is disjunct from the morro shoulderband. Shell features used to separate the two species include papillation over most of the body whorl, a more domed spire, and half or more of the umbilicus being covered by the apertural lip in the Morro shoulderband (Roth 1985).

The Morro shoulderband co-occurs with another helminthoglyptid snail, the Big Sur shoulderband (*Helminthoglypta umbilicata* Pilsbry, 1897). Its more globose shape and incised spiral grooves distinguish the Morro shoulderband from this species (Roth 1985). The brown garden snail (*Helix aspersa*) also occurs with the Morro shoulderband, but has a marbled pattern on its shell that distinguishes it from the Morro shoulderband, which has a single, narrow band.

Morro shoulderband is restricted to sandy soils of coastal dune and coastal sage scrub communities near Morro Bay. Surveys by Roth in 1985 resulted in the discovery of only six live Morro shoulderbands, while empty shells were much more numerous. While cautioning that not enough data were available to make a more accurate estimate, Roth speculated that at that time, there may have been as few as several hundred individuals in the remaining population of Morro shoulderband.

Previous Federal Action

Federal government actions on three of the five plants began as a result of section 12 of the Endangered Species Act of 1973, which directed the Secretary of the Smithsonian Institution to prepare a report on those plants considered to be endangered, threatened, or extinct. This report, designated as House Document No. 94–51, was presented to Congress on January 9, 1975, and included *Arctostaphylos morroensis* as threatened, *Eriodictyon altissimum* as endangered, and *Clarkia speciosa* ssp. *immaculata* as endangered. The Service published a notice in the July 1, 1975, **Federal Register** (40 FR 27823) of its acceptance of the report of the Smithsonian Institution as a petition within the context of section 4(c)(2) (petition provisions are now found in section 4(b)(3) of the Act) and its intention thereby to review the status of the plant taxa named therein. The above 3 taxa were included in the July 1, 1975 notice. On June 16, 1976, the Service published a proposal in the **Federal Register** (42 FR 24523) to determine approximately 1,700 vascular plant species to be endangered species pursuant to section 4 of the Act. *Eriodictyon altissimum* was included in the June 16, 1976, **Federal Register** document.

General comments received in relation to the 1976 proposal were summarized in an April 26, 1978, **Federal Register** publication (43 FR 17909). The Endangered Species Act Amendments of 1978 required that all proposals over 2 years old be withdrawn. A 1-year grace period was given to those proposals already more than 2 years old. In the December 10, 1979, **Federal Register** (44 FR 70796), the Service published a notice of withdrawal of the June 6, 1976, proposal, along with four other proposals that had expired.

The Service published an updated notice of review for plants on December 15, 1980 (45 FR 82480). This notice included *Arctostaphylos morroensis*, *Clarkia speciosa* ssp. *immaculata*, and *Eriodictyon altissimum* as category 1 species, and *Cirsium fontinale* var. *obispoense* as a category 2 species. Category 1 species are those for which the Service has on file substantial information on biological vulnerability and threats to support preparation of listing proposals, while category 2 species are those for which data in the Service's possession indicate listing is possibly appropriate, but for which substantial data on biological vulnerability and threats are not currently known or on file to support proposed rules. On November 28, 1983, the Service published in the **Federal Register** a supplement to the Notice of Review (48 FR 53640); the plant notice was again revised September 27, 1985 (50 FR 39526). *Arctostaphylos morroensis* and *Eriodictyon altissimum* were included in both of these revisions as category 1 species; *Clarkia speciosa* ssp. *immaculata* and *Cirsium fontinale* var. *obispoense* were included as category 2 species. On February 21, 1990, (55 FR 6184) the plant notice was again revised, and *Arctostaphylos morroensis*, *Clarkia speciosa* ssp. *immaculata*, and *Eriodictyon*

oltissimum were all included as category 1 species, and *Cirsium fontinale* var. *obispoense* was included as a category 2 species.

Section 4(b)(3)(B) of the Endangered Species Act, as amended in 1982, requires the Secretary to make certain findings on pending petitions within 12 months of their receipt. Section 2(b)(1) of the 1982 amendments further requires that all petitions pending on October 13, 1982, be treated as having been newly submitted on that date. This was the case for *Eriodictyon altissimum*, *Arctostaphylos morroensis*, and *Clarkia speciosa* ssp. *immaculata*, because the 1975 Smithsonian report had been accepted as a petition. In October of 1983, 1984, 1985, 1986, 1987, 1988, 1989, and 1990, the Service found that the petitioned listing of the above 3 taxa was warranted but precluded by other higher priority listing actions. Publication of this proposal constitutes the final finding for the petitioned action.

The portion of this proposal to list *Suaeda californica* (California sea-blite) is largely based on scientific and commercial information on the species, unpublished reports by Ferren, unpublished reports from the California Department of Fish and Game (CDFG) (1991), and information gathered from several botanists, including Mr. Dirk Walters and Mr. Malcolm McLeod.

A reevaluation of the existing data on the status of *Circium fontinale var. obispoense* (Chorro Creek bog thistle) and threats to its continued existence provides sufficient information to support proposing this species for listing as endangered.

The Service entered into a contract with the Sierra Club Foundation, San Francisco, California, to investigate the status of California land snails. A final report dated August 25, 1975, contained data indicating that several of the snails studied were imperiled species in need of protection. On April 28, 1976, the Service proposed endangered or threatened status for 32 land snails in the **Federal Register** (41 FR 17742); this proposal included the Morro shoulderband (under the common name "banded dune snail") as endangered. The proposed rulemaking that included proposed endangered status for the Morro shoulderband was withdrawn for procedural reasons on December 10, 1979 (44 FR 70796). This withdrawal was the result of the 1978 amendments to Act which substantially modified procedures for listing endangered and threatened species.

The Service undertook a status review of the mollusc in 1984, which resulted in the report by Roth (1985). Based on the new information contained in the status report, Morro shoulderband appeared as a category 1 species in the May 22, 1984, **Federal Register** Animal Notice of Review (40 FR 675), and the January 6, 1989, **Federal Register** Animal Notice of Review (54 FR 573).

Summary of Factors Affecting the Species

Section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1533) and regulations (50 CFR part 424) promulgated to implement the listing provisions of the Act set forth the procedures for adding species to the Federal Lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Arctostaphylos morroensis* Wies. & Schreib. (Morro manzanita), *Cirsium fontinale* var. *obispoense* J. T. Howell (Chorro Creek bog thistle), *Clarkia speciosa* Lewis & Lewis ssp. *immaculata* Lewis & Lewis (Pismo clarkia), *Eriodictyon altissimum* Wells (Indian Knob mountainbalm), *Suaeda californica* Wats. (California sea-blite), and Morro shoulderband (*Helminthoglypta walkeriana*) are as follows:

A. The Present or Threatened Destruction, Modification, or Curtailment of its Habitat or Range

Morro manzanita is scattered within coastal maritime chaparral and oak woodland communities, ranging from the northeast side of Morro Bay to the south end of Montana de Oro State Park, a distance of less than 10 miles. The distribution of Morro manzanita around Morro Bay has been tied to the distribution of Baywood fine sands (ancient wind-blown beach sands) that are also habitat for the endangered Morro Bay kangaroo rat. Approximately half the habitat for Morro manzanita is owned and managed by the State of California (Montana de Oro State Park) but is still subject to alteration. Groves of non-native *Eucalyptus* trees that were planted in the early 1900's are encroaching on nearby stands of Morro manzanita (Holland *et al.* 1990). Park management plans call for removal of at least portions of the Eucalyptus groves (California Department of Parks and Recreation 1988), but to date these plans have not been initiated. A current proposal to install a trans-Pacific telephone cable will likely extirpate Morro manzanita within Hazard Canyon (Army Corps of Engineers (ACOE) 1991). The remaining habitat for Morro manzanita is in private ownership on lands that surround the communities of Morro Bay, Baywood Park, and Los Osos. Expansion of these communities has already extirpated Morro manzanita habitat, and much of the remaining habitat is slated for residential development (LSA Associates 1990, Keil 1990, Holland 1990, San Luis Obispo County 1991) and sewage treatment ponds (Morro Group 1989).

Indian Knob mountainbalm, like Morro manzanita, is scattered within coastal maritime chaparral and oak woodland communities, primarily near Morro Bay. Five of six extant stands occur within a few square miles of each other, from the south side of the community of Los Osos to the north end of Montana de Oro State Park. Each of these stands comprises less than 50 plants. A sixth stand is found 15 miles to the southeast on Indian Knob, between San Luis Obispo and Arroyo Grande; at 350 individuals, it comprises the largest stand. Two of the Morro Bay stands are on lands owned and managed by Montana de Oro State Park, and co-occur with Morro manzanita in Hazard Canyon. Portions of these two stands may be extirpated by the installation of a trans-Pacific telephone cable (ACOE 1991). Other stands in the Morro Bay area occur on private land and are threatened by residential development. One stand occurs on a parcel that is used by the community of Los Osos to evaporate sewage sludge and apparently is being closely monitored by local botanists (Bittman 1985). Surface mining of tar sands was proposed for the Indian Knob area several years ago (Vanderwier 1987). While the proposal is currently not being pursued, there may be economic inventive to do so in the future. Currently, the parcel is being grazed by livestock. As with other members of this genus, Indian Knob mountainbalm is thought to be adapted to surface disturbance, specifically to periodic fire within the chaparral community. Field botanists have noted that most stands of Indian Knob mountainbalm are mature to senescent in age, and that appropriate management, including prescribed burns, may be needed to revitalize the stands (Bittman 1985).

Chorro Creek bog thistle is restricted to open seep areas in serpentine soil outcrops. Owing to its narrow habitat requirements, it probably has never been abundant. Most of Chorro Creek bog thistle is distributed between Morro Bay and San Luis Obispo. One of the two largest populations is found on Pennington Creek, a tributary of Chorro Creek, on lands managed as a biological reserve by California Polytechnic University, San Luis Obispo. Despite the

1991
UMI

University's objective to maintain the reserve in its natural state, illegal grazing from an adjacent cattle allotment apparently has occurred (V.L. Holland, Biological Sciences Department Chair, California Polytechnic University, San Luis Obispo, pers. comm., 1991). The type locality for Chorro Creek bog thistle was surveyed for the plant in 1986; no plants were found, and the population is presumed to be extirpated (Friedman 1987). The other large population is found near Laguna Lake in the upper Los Osos Valley watershed on lands partially owned by the City of San Luis Obispo. This population has been subjected to cattle grazing, and nearby urbanization has resulted in increased recreational use and an increase in alien plant species. Just recently, the city fenced off a small portion of the habitat to remove grazing pressures from the thistle (Tina Hall, The Nature Conservancy, pers. comm., 1991). Four other small populations occur within 5 miles of Laguna Lake. Two of these are remote enough that few human-induced threats currently exist, but the other two are on lands that are slated for development (Friedman 1987, Morro Group 1988). One small isolated population occurs along San Simeon Creek, approximately 30 miles northwest of the Pennington Creek population. This population occurs on private lands that are currently being grazed. Developments being proposed for adjacent parcels may remove water from the San Simeon Creek watershed (San Luis Obispo County 1991). Since Chorro Creek bog thistle depends on moisture from seeps, it would be threatened by any proposal to divert water from the watershed above the seeps.

Pismo clarkia is restricted to pockets of dry sandy soils within chaparral and oak woodlands south of San Luis Obispo, between the town of Edna and Arroyo Grande. All four extant populations are located on private lands. The most recent surveys revealed that the two largest populations, each supporting about 2,000 individuals, were subject to cattle grazing and to road grading where it occurs along roadsides (CDFG 1991). A third small population from the type locality consists of less than 100 individuals and is subject to the effects of roadside traffic, road grading, and herbicide spraying. A fourth population was partially extirpated by residential development and has been reduced to about 100 individuals. Of four other historical locations, two were extirpated by residential development, and two were extirpated by undetermined causes—most likely mowing and other secondary impacts associated with urban development (Myers 1987).

California sea-blite is discontinuously distributed around the upper intertidal zone of Morror Bay where it is concentrated in three stands. One stand is located on tidal flats within Morro Bay State Beach. A second stand, consisting of only six plants, is located within Sweet Springs Marsh. The third population is located within Montana de Oro State Park. All three stands are threatened by recreational activity on the tidal flats and erosion owing to changing hydrologic conditions in the intertidal zone. Sedimentation of the Bay from the Los Osos Creek and Chorro Creek watersheds has altered the abundance and distribution of marsh habitat on the east side of the bay. Dredging of the bay may also alter subsurface currents and affect shoreline stability. California sea-blite was collected from a fourth location just north of Morro Bay, but has not been seen there since 1929 (Ferren, pers. comm., 1991). The type locality, on Alameda Island in the San Francisco Bay, has long since been altered by urbanization as has much of coastal marsh habitat along the central California coast.

The following discussion of habitat and range of the Morro shoulderband is summarized from the report by Roth (1985). The Morro shouldberband formerly occupied primarily coastal dune scrub habitat along approximately 5 miles of dunes extending into Morro spit, at Baywood Park, San Luis Obispo, sites between Morro Bay and Cayucos, and probably along Morro Bay in the vicinity of Cuesta-by-the Sea. The snail and its habitat have been eliminated by residential and other development from Baywood Park, Cuesta-by-the-Sea, San Luis Obispo, and the sites between Cayucos and Morro Bay. Recent evidence of living Morro shoulderbands have been found only at a few sites within 2 miles of one another in coastal dune scrub habitat. This habitat has been degraded by off-road vehicle activity and maturation of the dune vegetation.

B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

Overutilization is not currently known to be a factor for the five plants, but unrestricted collecting for scientific or horticultural purposes or excessive visits by individuals interested in seeing rare plants could result from increased publicity as a result of this proposal. The Morror shoulderband's extremely limited range and numbers and its taxonomic distinctness make it highly vulnerable to recreational or scientific collectors.

C. Disease or Predation

In efforts to control alien species of thistle, the San Luis Obispo County Agriculture Department introduced the seed-head weevil (*Rhinocyllus conicus*) to several sites in San Luis Obispo County in the early 1980's. Initial reports from field botanists indicated that the seed-headed weevils were foraging upon Chorro Creek bog thistle. However, more recent observations indicate that since the length of the flowering season of the thistle far exceeds the egg-laying period of the weevil, predation probably accounts for only a small reduction in seed availability (Charles Turner, Research Botanist, Agricultural Research Services, U.S. Department of Agriculture, pers. comm., 1991). No data exist on the effects of disease on the other plant taxa.

Grazing by livestock is believed to have caused the extirpation of Chorro Creek bog thistle at the type locality on Chorro Creek (Rocco 1981). Of eight extant sites, half are on private lands that are being grazed. Pismo clarkia has been subject to livestock grazing at two of the four extant locations. Unlike Chorro Creek bog thistle, however, observations of field botanists indicate that Pismo clarkia may be able to sustain a certain amount of grazing by livestock (Dunn in litt. 1987).

During his survey for Morro shoulderband, Hill (1974) noted that many of the empty large subadult shells contained vacant sarcophagid fly puparia, which suggested to Roth (1985) that "mortality from parasitoid infestation often occurs before *Helminthoglypta walkeriana* reaches breeding condition" (Roth 1985). Roth also documented one freshly dead snail that had been killed by a rodent.

D. The Inadequacy of Existing Regulatory Mechanisms

Under the Native Plant Protection Act (chapter 1.5 section 1900 *et seq.* of the Fish and Game Code) and California Endangered Species Act (chapter 1.5 section 2050 *et seq.*), the California Fish and Game commission has listed Pismo clarkia and Indian Knob mountainbalm as endangered; Morro manzanita and Chorro Creek bog thistle will be considered for State listing in the near future (Sandra Morey, botanist, Endangered Plant Program, California Department of Fish and Game, pers. comm). Though both statutes prohibit the "take" of State-listed plants (chapter 1.5 section 1908 and section 2080), State law appears to exempt the taking of such plants via habitat modification or land use change by the landowner. After the California Department of Fish and Game notifies a landowner that a State-listed plant grows on his or her property, State law evidently requires only that the landowner notify the agency "at least 10 days in advance of changing the land use to allow salvage of such plant" (chapter 1.5 section 1913).

Morrow shoulderband is not specifically protected under State or local law and is thus not specifically included in State Park management plans. Collection of this species is prohibited, however, on State Park land except by permit. This protection applies only to individuals and does not prevent the effects of indirect human disturbance, such as recreational activities, from harming this species and its habitat.

E. Other Natural or Manmade Factors Affecting its Continued Existence

The introduction and invasion by alien plants of coastal sage scrub and maritime chaparral communities has adversely affected native flora and fauna, including the Morro manzanita and the Morro shoulderband. Williams and Williams (1984) tracked changes in abundance and frequency of 16 taxa in a coastal dune scrub community over a 10-year period on the sand spit of Morro Bay. They observed that differences in successional patterns in wind, lee, and ridge habitats were correlated with wind conditions, stabilization of dunes over time, and seed dispersal strategies of certain taxa. At the same time, they noted that seafig (*Mesembryanthemum chilense*) had increased in both wind and lee positions on the spit and suggested that over time seafig would supplant native species throughout the dune system.

Stands of Morro manzanita within Montana de Oro State Park are being overtopped by spreading *Eucalyptus* plantations that were planted in the early 1900's. Morro manzanita is not able to survive such encroachment, owing to reduction in available soil moisture, increased shading, and the effects of growth-inhibiting terpenes that are released from the *Eucalyptus* (Holland *et al.* 1990). The General Plan for Montana de Oro State Park (California Department of Parks and Recreation 1988) calls for the removal of exotic species, including *Eucalyptus*; however, a removal program has not yet been initiated.

As briefly mentioned above under Factor A, Chorro Creek bog thistle occurs in several areas grazed by livestock. Grazing and trampling by livestock, coupled with mesic to hydric conditions around seeps, favors growth of alien plants, once they have become established. Unlike alien thistle taxa, it is unlikely that the Chorro Creek bog thistle is able to compete with other alien plants.

The Morro shoulderband may be experiencing competition from the brown garden snail (*Helix aspersa*). The brown garden snail, presumed to be an escapee from an adjacent golf course and housing development, has established feral populations on the spit of Morro Bay. Roth (1985) discussed several factors that may be the basis for such competition. While estivation sites and food preferences for the two snails differ, competition for shelter sites may limit the numbers of Morro shoulderband. Apparently, the coastal dune scrub community within the survey area is mature to the point that lower limbs of the large older shrubs may be too far off the ground to offer good shelter. Roth found both snails occasionally using alien seafig as well as pieces of particleboard for shelter sites and suggested that more preferred shelter sites were unavailable. Increasing development surrounding the State Parks will increase threats from this and other exotic animals and plants that disperse from developed areas.

At least several Morro shoulderband individuals have been killed as a result of controlled burning of coastal scrub that was carried out to improve habitat for the endangered Morro Bay kangaroo rat within Montana de Oro State Park. Park staff are aware of the presence of the snails and have conducted pre-burn searches for them, but have not detected any in the areas that have been burned since Roth's first reported fire-caused mortalities (Vince Cicero, Park Ecologist, pers. comm., 1991). Drought and/or heat may have contributed to egg mortality in the Morro shoulderband (Roth 1985). Other snail taxa that occur within California's areas of Mediterranean climate copulate, oviposit, and undergo an active growth phase during the rainy season. Roth found intact but desiccated *Helminthoglypta* eggs "scattered in considerable numbers" within the survey area, though the species could not be determined. Roth suggested that this represented several years' accumulation of egg deposits whose viability may have been lowered by drought and/or heat conditions (Roth 1985).

Several of the plants and the Morro shoulderband are also threatened with stochastic (i.e., random) extinction due to the small size and isolation of the remaining populations. The limited gene pool may depress reproductive vigor, or a single human-caused or natural environmental disturbance could destroy a significant percentage of the individuals of these species. Depressed seed viability has recently been documented by Holland in some stands of Morro manzanita (Holland *et al.* 1990). Annual plants, such as Pismo clarkia, and short-lived perennial plants, such as Chorro Creek bog thistle, are subject to wide fluctuations in population numbers from year to year. Such taxa may have difficulty in maintaining a viable population size after a series of poor seed production years. While California sea-blite is a perennial plant, the low number of individuals and restricted range of the plant within the widely fluctuating hyrdrologic conditions in Morro Bay also subject it to stochastic extinction.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by these species in determining to propose this rule. These six taxa are vulnerable to one or more of the following threats: Habitat destruction, residential development, road maintenance activities, competition from alien plants or the common garden snail, recreational activities, grazing, water diversions, dredging, and perhaps stochastic extinction. Based on the Service's evaluation of the status and threats facing these species, the preferred action is to propose endangered status for Morro manzanita, Chorro Creek bog thistle, Pismo clarkia, Indian Knob mountainbalm, California sea-blite, and Morro shoulderband.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that, to the maximum extent prudent and determinable, the Secretary designate critical habitat at the time the species is determined to be endangered or threatened. The Service finds that designation of critical habitat is not presently prudent for these species. Because the five plants face numerous anthropogenic threats (see Factor A in "Summary of Factors Affecting the Species") and the five plants occur at least in part on private land, the publication of precise maps and descriptions of critical habitat in the **Federal Register** would make these plants more vulnerable to incidents of take or vandalism and, therefore, could contribute to the decline of these species and increase enforcement problems. The proper agencies have been notified of the locations and management needs of these plants. Landowners will be

VOL
56
ISS
246
DE
23
1991
UMI

notified of the location and importance of protecting habitat of these species.

As discussed under "Summary of Factors Affecting the Species," Morro shoulderband is vulnerable to several activities, some of which could be carried out by an individual or few people (e.g., the removal of specimens for scientific or personal collections). This activity can be difficult to regulate and control because it can be done in a fairly discreet manner. Its extremely restricted range, small population size, and lack of escape mechanisms make the Morro shoulderband extremely vulnerable to extinction as a result of even a limited collection effort. The precise pinpointing of localities that would result from publication of critical habitat descriptions and maps in the Federal Register would increase enforcement problems because this species would be more vulnerable to collection as well as vandalism to its habitat. The California Department of Parks and Recreation is already aware of the snail's presence.

Protection of these species' habitats will be addressed through the recovery process and through the section 7 consultation process. Therefore, the Service finds that designation of critical habitat for the five plants and the Morro shoulderband is not prudent at this time, because such designation likely would increase the degree of threat from vandalism, collecting, or other human activities.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain activities. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. The protection required of Federal agencies and the prohibitions against certain activities involving listed plants are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) of the Act requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) requires Federal agencies to insure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62, and 17.63 for endangered species set forth a series of general prohibitions and exceptions that apply to all endangered plants. All trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61, would apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export; transport in interstate or foreign commerce in the course of a commercial activity; sell or offer for sale in interstate or foreign commerce; remove and reduce to possession the species from areas under Federal jurisdiction; maliciously damage or destroy any such species on any area under Federal jurisdiction; or remove, cut, dig up, damage, or destroy any such endangered plant species on any other area in knowing violation of any State law or regulation or in the course of any violation of a State criminal trespass law. Certain exceptions apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered plant species under certain circumstances.

The Act and implementing regulations found at 50 CFR 17.21 set forth a series of general prohibitions and exceptions that apply to all endangered wildlife. With respect to Morro shoulderband, these prohibitions, in part, would make it illegal for any person subject to the jurisdiction of the United States to take (including harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, collect, or attempt any such conduct), import or export, transport in interstate or foreign commerce in the course of commercial activity, or sell or offer for sale in interstate or foreign commerce any listed wildlife species. It is also illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

The Act and 50 CFR 17.22 and 17.23 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered wildlife species under certain circumstances. Regulations governing permits for endangered wildlife are at 50 CFR 17.22 and 17.23. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, for incidental take in connection with otherwise lawful activities, and economic hardship under certain circumstances.

Requests for copies of the regulations on listed plants and wildlife and inquiries regarding them may be addressed to the Office of Management Authority, U.S. Fish and Wildlife Service, 4401 North Fairfax Drive, room 432, Arlington, Virginia 22203–3507 (703/358–2104 or FTS 921–2104).

Public Comments Solicited

The Service intends that any final action resulting from this proposal will be as accurate and as effective as possible. Therefore, comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning this proposed rule are hereby solicited. Comments particularly are sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to Morro manzanita, Pismo clarkia, Indian Knob mountainbalm, California sea-blite, Chorro Creek bog thistle, and Morro shoulderband;

(2) The location of any additional populations of these species and the reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(3) Additional information concerning the range, distribution, and population size of these species; and

(4) Current or planned activities in the subject area and their possible impacts on these species.

Any final decision on this proposal will take into consideration the comments and any additional information received by the Service, and such communications may lead to a final regulation that differs from this proposal.

The Endangered Species Act provides for a public hearing on this proposal, if requested. Requests must be received within 45 days of the date of publication of the proposal. Such requests must be made in writing and addressed to the Office Supervisor of the Ventura Office (see **ADDRESSES** section).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Notices

Federal Register
Vol. 56, No. 246
Monday, December 23, 1991

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ACTION

Information Collection Submitted to the Office of Management and Budget for Review

AGENCY: ACTION.

ACTION: Information collection submitted to the Office of Management and Budget for review.

SUMMARY: This notice sets forth certain information about an information collection proposal by ACTION, the Federal domestic volunteer agency. Under the Paperwork Reduction ACT (44 U.S.C., chapter 35), the Office of Management and Budget (OMB) reviews and acts upon proposals to collect information from the public or to impose record keeping requirements. ACTION has submitted two copies of the attached information collection proposal to OMB. OMB and ACTION will consider comments on the proposed collection of information and record keeping requirements. ACTION is requesting an expedited review by OMB with final action by January 15, 1992 so that the approved forms will be ready for data collection beginning January 15, 1992.

DATES: OMB and ACTION will accept comments received on or before January 22, 1992.

ADDRESSES: Send comments to both.

Janet A. Smith, Clearance Officer, ACTION, 1100 Vermont Ave, NW., Washington, DC 20525, Tel: 202/606-5245.

And

Daniel Chenok, Desk Officer for ACTION, Office of Management and Budget, 3002 New Executive Office Bldg., Washington, DC 20503, Tel: 202/395-7316.

SUPPLEMENTARY INFORMATION:

Office of Action Issuing Proposals: Program Analysis and Evaluation Division.

Title of Forms: Evaluation of VISTA Recruitment Campaign.

Need and Use: ACTION seeks to evaluate the success of its Congressionally mandated campaign to increase the number of recent college graduates applying the VISTA.

Type of Request: New.

Respondent's Obligation to Reply. Voluntary.

Frequency of Collection: The "Volunteering after College" Survey will be conducted twice, once in January, 1992 and again in April–June, 1992. The "Survey of Recent Applicants" will be sent to every recent college graduate (or graduate-to-be) who applies to VISTA between November 1, 1991 and August 1, 1992.

Estimated Number of Annual Responses: 3,950.

Average Burden Hours per Response: .25 hours.

Estimated Annual Reporting or Disclosure Burden: 987.5 hours.

Janet Smith,

Clearance Officer, ACTION.

Signed in Washington, DC, December 13, 1991.

Jane A. Kenny,

Director, ACTION.

SURVEY 1
COLLEGE JUNIORS AND SENIORS

SURVEY SERIAL #: ___ ___ ___ (1 2 3) INTERVIEWER #: ___ ___ ___ (4 5 6)

TELEPHONE # CALLED: ___ - ___ - _____ DATE: __/__/__ (MM DD YY)

IMPORTANT NOTE: ONLY TEXT IN lowercase LETTERS ARE TO BE READ TO RESPONDENTS. PROBES ARE IN PARENTHESES. MATERIAL NEVER READ TO RESPONDENTS IS IN UPPER CASE.

INTRODUCTION

Hello. My name is _____ and I am calling from ACTION, the Federal Domestic Volunteer Agency. We are a small agency in the U. S. Government that supports volunteer activities. We are conducting a national survey of college students to find out how much students know about full-time volunteer service opportunities that are open to college graduates. Let me assure you that I am not trying to recruit you, ask for donations, or try to sell you anything. We are only interested in getting information about your opinions.

SCREENING

Are you a junior or senior in college this year?

YES 1
NO 2

Is there a college junior or senior at this number?

WHEN SELECTED PERSON ANSWERS REPEAT INTRODUCTION AND CONTINUE WITH INTERVIEW

YES 1
NO. 2

TERMINATE WITH: Thank you. Sorry to have bothered you. Goodbye.

Your number was drawn in a random sample of students from the entire nation. Your answers are confidential. In addition, the information you furnish is voluntary; you do not have to answer any of my questions.

The survey will take no more than 5 to 15 minutes. I want to add that I would be happy to answer any questions you might have about the study, either now or later.

Do you have the time now to complete the survey?

YES 1
NO 2 May we schedule a time for me to call back when it will be more convenient for you?

YES 1
NO 2 Thank you. END THE INTERVIEW.

When may I call you back? RECORD AGREED UPON DATE, TIME, AND TERMINATE THIS SESSION.

DATE: __/__/__ (mm dd yy) TIME: _____

Thank you. I will call you back at (REPEAT TIME) on (REPEAT DATE).

Let me begin by saying thank you, in advance, for talking with me about volunteer service.

Now, let me start by asking a few general questions about what you know about opportunities for full-time volunteer service after college.

Q-1 Do you know the names of any programs that offer full-time volunteer service for recent college graduates?

YES 1
NO 2

Q-1A (IF YES) What names do you recall? CIRCLE THE NAMES IN COL. 1

(IF NO) There are several programs available. I am going to read you a list.

There are several other programs available. I will read you a list.

Q-2 Please tell me which ones you have ever seen or heard anything about? (READ LIST IN COL. 1, EXCLUDING ANY CIRCLED IN Q-1, AND CIRCLE ALL THAT APPLY IN COL. 2.)

IF RESPONDENT FAILS TO IDENTIFY ANY ON THE LIST, SKIP TO THE LAST PAGE AND COMPLETE THE BACKGROUND SECTION.

Q-3 Which ones did you see or hear something about recently, in the last 3 months? LIST THE NAMES CIRCLED IN COL. 2 AND CIRCLE ALL POSITIVE RESPONSES IN COL. 3

Q-4 Of the ones you have identified, which ones might you ask for information about opportunities for volunteers? LIST THE NAMES CIRCLED IN COLUMNS 1 AND 2 AND CIRCLE ALL POSITIVE RESPONSES IN COL. 4

CIRCLE ALL THAT APPLY IN EACH COLUMN

	(1) VOLUNTEER PROGRAMS (RECALL W/O PROMPT)	(2) HEARD ABOUT	(3 IN LAST 3 MONTHS	(4) ASK FOR INFO?

Q-10 We have now established how you learned about VISTA. I would like to ask you next about the information or messages, or any part of the messages, you have received about VISTA. By a message I mean a slogan, a catch phrase, an idea, or concept, something that you might identify with VISTA. Do you remember the content of the message, or any part of the message, you first saw or heard about VISTA?

YES 1
NO. . . . . 2 GO TO Q-14 AT BOTTOM OF PAGE

Q-11 What do you remember? WRITE IN THE SPACE BELOW A VERBATIM RECORD. USE PROBES, E.G.:Is there anything else you recall?

CONTENT OF THE MESSAGE:

Q-12 I would like to know how you responded to this message. Your feelings might have ranged from very positive to very negative. How did you feel about this message? Were your feelings

a) very positive, inspiring you to learn more about the program 1
b) positive, but not wanting more information 2
c) neutral, not positive or negative. 3
d) negative, but only mildly so 4
e) negative, causing feelings of revulsion or distaste 5

Q-12A Why? PROBE: What was it about the message that caused you to feel this way? RECORD ANSWER VERBATIM

REASON FOR REACTION:

Q-13 When did you first see or hear this message about VISTA? IF THEY CANNOT RECALL EXACTLY, PROBE: Was it before September, 1991 or since then?

BEFORE SEPTEMBER, 1991 1
BETWEEN SEPTEMBER, 1991 AND NOW. 2

DOESN'T REMEMBER WHEN 3

Q-14 Did you learn about VISTA in time to include it as an option for after your graduation from college?

YES. 1
NO 2

VOL 56 ISS 246 DE 23 1991 UMI

Q-15 Do you know what VISTA Volunteers do? PROBE FOR A RESPONSE BY, E.G.: This is not a true-false quiz. You may use whatever words you choose.

NO. . . . . 1 SKIP TO TOP OF NEXT PAGE
YES 2

RECORD VERBATIM RESPONSE

WHAT VISTA VOLUNTEERS DO:

Q-16 How likely are you to consider becoming a VISTA volunteer after graduation from college? Would you say you are

Very likely. 1
Somewhat likely. 2
Neither likely nor unlikely. 3
Somewhat unlikely. 4
Very unlikely. 5

I am going to read to you six statements about VISTA Volunteer service. For each please indicate whether you strongly agree, agree, disagree, or strongly disagree with the statement.

	STRONGLY DISAGREE	DISAGREE	NEUTRAL	AGREE	STRONGLY AGREE
Q-17 Becoming a VISTA volunteer would help me make contacts that would be important in my professional career					
Q-18 Becoming a VISTA volunteer would help me decide what career I want to pursue.					
Q-19 Becoming a VISTA volunteer would help me gain self-confidence					
Q-20 Becoming a VISTA volunteer would allow me to make an important contribution to my community					
Q-21 Becoming a VISTA volunteer would allow me to make an important contribution to my country					
Q-22 Becoming a VISTA volunteer is for someone else, not me.					

I am now going to read six facts about VISTA. After each one, please tell us if you already knew that about the VISTA program.

Q-23 Did you know that volunteers receive a stipend of about $7,000 per year?

YES 1
NO 2

Q-24 Did you know that volunteers only need to make a one year commitment to VISTA?

YES 1
NO 2

Q-25 Did you know that volunteer opportunities are with local sponsors, not national ones?

YES 1
NO 2

Q-26 Did you know that volunteer opportunities exist throughout the country? (Circle your answer)

YES 1
NO 2

Q-27 Did you know that VISTA means you can defer payment on some student loans? (Circle your answer)

YES 1
NO 2

Q-28 Did you know that volunteers receive training for their assignment? (Circle your answer)

YES 1
NO 2

Q-29 We would like to know if there are any other aspects of VISTA Volunteer service that hold meaning for you. Is there anything else about VISTA that is important to you?

YES 1
NO. . . . . 2 GO TO NEXT PAGE

Q-29A Tell me about it. PROBE: Is there anything you particularly like or dislike about (this/these)? RECORD ANSWER VERBATIM.

OTHER IMPORTANT FEATURES OF VISTA:

VOL 56 ISS 246 DEC 23 1991 UMI

BACKGROUND INFORMATION

To insure that a variety of students are among our respondents, we ask you to respond to the following demographic questions.

Q-30 What is your race? Are you?

American Indian or Alaskan Native. 1
Asian or Pacific Islander. 2
Black. 3
White. 4

Q-31 Are you of Hispanic origin?

YES 1
NO. 2

Q-32 (IF NOT APPARENT) What is your sex?

FEMALE. 1
MALE. 2

Q-33 What is your class? Junior or Senior?

JUNIOR. 1
SENIOR. 2

Q-34 How old are you?

_____ YEARS

Q-35 What college or university do you attend?

_____NAME OF INSTITUTION

Q-36 What is your major?

_____MAJOR

Q-37 In an average week during the current school year, how many hours do you spend volunteering for a non-profit organization? This could be either on your own, through a campus organization or through a national program.

_____NUMBER OF HOURS PER WEEK

Do you have any comments or questions about this survey? RECORD ANSWER VERBATIM.

That ends our interviews. Thanks. If you would like more information about VISTA, you may call our 800 number, 1-800-424-8867.

VISTA RECRUITMENT: A SURVEY OF RECENT APPLICANTS

This survey is part of a large research effort to help ACTION, the Federal domestic volunteer agency, better understand factors affecting VISTA recruitment. Please answer all the questions. Your answers are strictly confidential. All reporting will deal with summary data and contain no information that could identify you.

The information you furnish is voluntary. None of the information you provide will be used to evaluate your application for VISTA service.

You will note that a number appears in the bottom, right-hand corner on the back of the questionnaire. This number will be used to match your completed survey with your name on the sample roster. We are following this procedure for one reason only, to identify non-respondents, to whom follow-up letters will be sent.

If you wish to comment on any questions or qualify your answers , please use the space in the margins. We will read your comments and take them into account.

Thank you for applying to VISTA and for your help in completing our research.

BACKGROUND

We would like to know a little more about those applicants to VISTA responding to our survey. Your answers to the following questions will help us better recruit a variety of persons to VISTA.

Q-17 What is your race? (Circle one)

1 AMERICAN INDIAN OR ALASKAN NATIVE
2 ASIAN OR PACIFIC ISLANDER
3 BLACK
4 WHITE

Q-18 Are you of Hispanic origin? (Circle one)

1 YES
2 NO

Q-19 What is your sex? (Circle one)

1 FEMALE
2 MALE

Q-20 How old are you?

_____ YEARS

Q-21 What college or university do you (or did you most recently) attend?

_____NAME OF INSTITUTION

Q-22 What is (or was) your major?

_____MAJOR

Q-21 Were you a college graduate at the time you submitted your application to VISTA?

1 YES
2 NO

Q-23A What was your class status at the time you applied to VISTA? (Circle one)

1 JUNIOR
2 SENIOR

Q-24 In what year did (or will) you graduate from college?

_____ YEAR OF GRADUATION

Q-25 In an average week during the past school year, how many hours did you spend volunteering for a non-profit organization? This could have been either on your own, through a campus organization or through a national program?

_____NUMBER OF HOURS PER WEEK

Is there anything else you would like to tell us about the factors that influenced your decision to apply to VISTA? If so, please use this space for that purpose.

Also, we would appreciate any comments you wish to make that you think may help us in future efforts to recruit recent college graduates to VISTA. You write them here or in a separate letter.

Thank you for completing this questionnaire. Please return the completed questionnaire in the stamped, addressed envelope provided for this purpose.

VOL 56 ISS 246 DEC 23 1991 UMI

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

Correction of the List of Applicants for Designation in the Quincy (IL) Area, and Extension of the Comment Period

AGENCY: Federal Grain Inspection Service (FGIS).

ACTION: Notice Correction and Extension of Comment Period.

SUMMARY: The notice published in the December 2, 1991, **Federal Register** inadvertently omitted the name of one designation applicant for the geographic area presently assigned to Anthony L. Marquardt dba Quincy Grain Inspection & Weighing Service (Quincy). FGIS is correcting that notice by adding John H. Oliver, Inc., dba Keokuk Grain Inspection Service (Keokuk) to the list of applicants. FGIS also is extending the comment period to January 28, 1992, to provide interested persons sufficient time to submit comments on the two applicants.

DATES: Comments must be postmarked on or before January 28, 1992.

ADDRESSES: Comments must be submitted in writing to Homer E. Dunn, Chief, Review Branch, Compliance Division, FGIS, USDA, room 1647 South Building, P.O. Box 96454, Washington, DC 20090-6454. SprintMail users may respond to [A:ATTMAIL,O:USDA,ID:A36HDUNN]. ATTMAIL and FTS2000MAIL users may respond to !A36HDUNN. Telecopier users may send responses to the automatic telecopier machine at 202-720-1015, attention: Homer E. Dunn. All comments received will be made available for public inspection at the above address located at 1400 Independence Avenue, SW., during regular business hours.

FOR FURTHER INFORMATION CONTACT: Homer E. Dunn, telephone 202-720-8525.

SUPPLEMENTARY INFORMATION:

In the December 2, 1991, **Federal Register** (56 FR 61223), FGIS named and asked interested persons to submit comments on the applicant for designation in the Quincy area. Comments were to be postmarked on or before January 16, 1992. The December **Federal Register** listed Quincy as the only applicant. The name of the second applicant, Keokuk was inadvertently omitted. Keokuk applied for designation to service the entire Quincy area.

FGIS is publishing this notice to correct the omission and extend the comment period to provide interested persons the opportunity to present comments concerning both applicants for designation. Commenters are encouraged to submit reasons and pertinent data for support or objection to the designation of these applicants. All comments must be submitted to the Compliance Division at the above address.

Comments and other available information will be considered in making a final decision. FGIS will publish notice of the final decision in the **Federal Register**, and FGIS will send the applicants written notification of the decision.

FGIS is extending the comment period to January 28, 1992, to provide interested persons sufficient time to submit comments on the two applicants.

CORRECTION: In FR Doc. 91-28414, beginning on page 61223 (56 FR 61223) in the issue of Monday, December 2, 1991, make the following corrections:

1. On page 61223, in the second column, under "SUPPLEMENTARY INFORMATION," in the second paragraph, insert the following as the new third sentence. "Anthony L. Marquardt dba Quincy Grain Inspection & Weighing Service (Quincy), and John H. Oliver, Inc., dba Keokuk Grain Inspection Service (Keokuk), the only applicants, each applied for the entire available area."

2. On page 61223, in the second column, under "SUPPLEMENTARY INFORMATION:," in the third paragraph, in the first and second sentences, the word "applicant" should read "applicants"; and

3. On page 61223, in the second column, under "SUPPLEMENTARY INFORMATION:," in the third paragraph, in the second sentence, the word "this" should read "these."

Authority: Pub. L. 94-582, 90 Stat. 2867, as amended (7 U.S.C. 71 *et seq.*)

Dated: December 12, 1991

J. T. Abshier,

Director, Compliance Division

BILLING CODE 3410-EN-F

Forest Service

Shamrock Timber Sale Analysis; Stikine Area, Tongass National Forest, Petersburg Ranger District, Petersburg, AK; Intent To Prepare an Environmental Impact Statement

The United States Department of Agriculture, Forest Service will contract to prepare an Environmental Impact Statement (EIS) to evaluate a proposal to make available approximately 10 million board feet (MMBF) to 40 MMBF of National Forest timber to contribute towards meeting market demands for timber products in Southeast Alaska. The proposed action is road construction and timber harvest in Value Comparison Units (VCU's) 436, 438 and 429 of Management Areas S11 and S13, on Kupreanof Island in southeast Alaska. This area, encompassing approximately 108,000 acres, has been allocated by the Tongass Land Management Plan to Land Use Designation (LUD) IV, in which management emphasis is primarily on commodity or market resources.

Providing for a continuous flow of natural resources is the mission of the Forest Service. In addition to providing a sustained supply of wilderness, recreation, forage, wildlife, water and fish, providing wood products to local industry is a responsibility of the USDA Forest Service. To meet this, as well as additional commitments, in a timely and efficient manner, the Shamrock Implementation Analysis will be a contracted effort.

A reasonable range of alternatives will be developed by the contractor, including a No Action alternative. The Forest Service will select the preferred alternative. No road building or timber harvest would occur under the No Action alternative. Since the demand for timber is currently high in southeast Alaska, it is likely that these activities would occur in other locations on the Stikine Area if a No Action alternative were selected for this location.

The nature of the decision to be made is whether and how to make available timber to meet market demands in southeast Alaska, while also providing a combination of recreation, water, wildlife and fish for the needs of society, now and into the future. The Stikine Area Forest Supervisor will decide: (a) How much volume to make available; (b) the location and design of timber harvest units; (c) the location and design of associated mainline and local road corridors, and; (d) mitigation measures and enhancement opportunities for resources other than timber.

This Notice of Intent constitutes the beginning of the scoping process. Upon award of the contract, the contractor will become responsible for the scoping process, and will subsequently arrange meetings and issue scoping letters, etc. to provide opportunities for review and input throughout the National Environmental Policy Act process. At the time of contract award, the prime contractor's name and address will be published as part of a revision to this NOI to act as the contact for public input from that time forward.

A Draft EIS is projected for issuance approximately 14 months after award of the EIS contract. Award is expected to occur in February of 1992. Issuance of the Final EIS for the project area is projected to occur approximately 19 months after award of the contract.

The comment period on the Draft EIS will be 45 days from the date the Environmental Protection Agency's Notice of Availability appears in the **Federal Register**. It is very important that those interested in this proposed action participate at that time. To be the most helpful, comments on the Draft EIS should be as specific as possible and may address the adequacy of the statement or the merits of the alternatives discussed (see The Council on Environmental Quality regulations for implementing the procedural provisions of the National Environment Policy Act at 40 CFR 1503.3).

In addition, Federal court decisions have established that reviewers of Draft EIS' must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC*, 435 U.S. 519, 533 (1978). Environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the Final EIS. *City of Angoon* v. *Hodel*, (9th Circuit, 1986) and *Wisconsin Heritages, Inc.* v. *Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). The reason for this is to ensure that substantive comments and objections are made available to the Forest Service and the contractor at a time when they can meaningfully consider the comments and respond to them in the Final EIS.

The responsible official for the decision is the Stikine Area Forest Supervisor, Tongass National Forest, Alaska Region, Petersburg, Alaska.

Questions and written comments and suggestions concerning the analysis at this time should be sent to Carol Jensen, Team Leader, USDA Forest Service, P.O. Box 1328, Petersburg, AK 99833 (phone 907/772-3871).

Dated: December 10, 1991.

Laura Nelson,

Acting Forest Supervisor.

DEPARTMENT OF COMMERCE

Bureau of Export Administration

[Docket Nos. 0115-01 and 0115-02]

Correction of Action Affecting Export Privileges: Daniel Iturri, Individually and Doing Business as Sumisystem

Notice of Correction and Order

In the Matter of: Daniel Iturri, individually as doing business as Sumisystem, Respondent.

On September 4, 1991, I affirmed an August 8, 1991, recommended Decision and Order on Default of the Administrative Law Judge in the above-referenced cases of Daniel Iturri, individually and doing business as Sumisystem. That Action was published at 56 FR 46407 on September 12, 1991. Upon a review of the reprinted Decision and Order, Mr. Iturri's and Sumisystem's addresses in the caption entitled "Appearances for the Respondent" should read: Cullen 5375 (1431) Capital Federal, Republica Argentina, and Rodriquez Pena 453, P.B. "B" (1020), Capital Federal, Republica Argentina. These correct addresses did appear in the "Order" section of the Administrative Law Judge's Decision and Order on Default, which was published at 56 FR 46410.

The address which was inadvertently published in the "Appearances for the Respondent" caption, Centenera 886, 1424 Buenos Aires, Argentina, is the address of an Argentine company named Decware. The Agency dismissed all charges against Decware after determining that it was not involved in this matter. Decware is not, in any way, subject to the Agency's Final Order disposing of the above-referenced cases.

This correction shall be published in the **Federal Register.**

Dated: December 17, 1991.

Joan M. McEntee,

Acting Under Secretary for Export Administration.

International Trade Administration

Initiation of Antidumping and Countervailing Duty Administrative Reviews

AGENCY: International Trade Administration/Import Administration.

ACTION: Notice of initiation of antidumping and countervailing duty administrative reviews.

SUMMARY: The Department of Commerce has received requests to conduct administrative reviews of various antidumping and countervailing duty orders, findings and suspension agreements with November anniversary dates. In accordance with the Commerce Regulations, we are initiating those administrative reviews.

EFFECTIVE DATE: December 23, 1991.

FOR FURTHER INFORMATION CONTACT: Roland L. MacDonald, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230, telephone (202) 377-2104.

SUPPLEMENTARY INFORMATION:

Background

The Department of Commerce ("the Department") has received timely requests, in accordance with § 353.22(a)(1) of the Department's regulations, for administrative reviews of various antidumping and countervailing duty orders, findings, and suspension agreements, with November anniversary dates.

Initiation of Reviews

In accordance with §§ 353.22(c) and 355.22(c) of the Department's regulations, we are initiating administrative reviews of the following antidumping and countervailing duty orders, findings, and suspension agreements. We intend to issue the final results of these reviews not later than November 30, 1992.

Antidumping duty proceedings and firms	Periods to be reviewed
Germany:	
Drycleaning Machinery A428-037: Bowe Reinigungs-eng. Waschereitechnik GmbH	11/1/90-10/31/91
Japan:	
Light Scattering Instrument A-588-813: Otsuka Electronics	7/10/90-10/31/91
Titanium Sponge A-588-020: Toho Titanium, Showa Denko K.K., Osaka Titanium Company, Ltd	11/1/90-10/31/91
Bicycle Speedometers A588-036: Tsuyama Mfg. Co	11/1/90-10/31/91
People's Republic of China:	
Barium Chloride A-570-007: China National Chemical Import and Export Corporation Corporation (Sinochem)	10/1/90-9/30/91
Countervailing Duty Proceedings	
Peru:	
Deformed Steel Concrete, Reinforcing Bar C-333-502	1/1/90-12/31/90

VOL 56 ISS 246 DEC 23 1991 UMI

Antidumping duty proceedings and firms	Periods to be reviewed
Suspended Investigations	
Republic of Singapore:	
Refrigeration Compressors	
C-559-001	4/1/90-3/31/91

Interested parties must submit applications for administrative protective orders in accordance with §§ 353.34(b) and 355.34(b) of the Department's regulations.

These initiations and this notice are in accordance with section 751(a) of the Tariff Act of 1930 (19 U.S.C. 1675(a)) and 19 CFR 353.22(c) and 355.22(c) (1989).

Dated: December 9, 1991.

Roland L. MacDonald,

Acting Deputy Assistant Secretary for Compliance.

[FR Doc. 91-30537 Filed 12-20-91; 8:45 am]

BILLING CODE 3510-DS-M

[A-588-802]

Amendment to Final Results and Termination in Part of Antidumping Duty Administrative Review: 3.5" Microdisks and Coated Media Thereof From Japan

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

EFFECTIVE DATE: December 23, 1991.

FOR FURTHER INFORMATION CONTACT: Brian C. Smith, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-1766.

AMENDED FINAL RESULTS OF REVIEW: On November 15, 1991, the Department of Commerce published in the **Federal Register** (56 FR 58040) the final results of its administrative review of the antidumping finding (54 FR 13406) of 3.5 inch microdisks and coated media thereof from Japan. After publication of our final results, one respondent, Sony, alleged that the Department had made clerical errors when calculating the margin for its exporter sales price (ESP) transactions. Sony alleged that clerical errors had been made regarding the inclusion of a duplicative subtraction command in the home market price string, the changing of clipping levels for certain merchandise, and the omission of an execution command for inputing sales-specific data. Except for changing the clipping levels, we agree with Sony and have corrected the ministerial errors (see, Memorandum to Francis J. Sailer, Deputy Assistant Secretary for Investigations, dated December 2, 1991).

As a result of our correction of the clerical errors, we have determined that a weighted-average margin of 5.86 percent (not 6.68 percent as originally published) exists for Sony for the period September 29, 1988, through March 31, 1990.

The Department will instruct the Customers Service to assess antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentage stated above. The Department will issue appraisement instructions directly to the Customs Service.

A cash deposit requirement of 5.86 percent is effective for all shipments by Sony of the covered merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice and shall remain in effect until publication of the final results of the next administrative review.

This notice is published in accordance with 705(e) of the Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.28(c).

Dated: December 16, 1991.

Alan M. Dunn,

Assistant Secretary for Import Administration.

[A-508-802]

Preliminary Results of Antidumping Duty Administrative Reviews: Oil Country Tubular Goods From Israel

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

EFFECTIVE DATE: December 23, 1991.

FOR FURTHER INFORMATION CONTACT: Vincent P. Kane or Carole A. Showers, Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-2815 or (202) 377-3217, respectively.

PRELIMINARY RESULTS:

Background

On March 6, 1987, the Department published in the *Federal Register* (52 FR 7000) an antidumping duty order on oil country tubular goods from Israel. On March 28, 1990, and March 8, 1991, the sole respondent, Middle East Tube Company (METCO), requested that the Department conduct administrative reviews for the periods March 1, 1989, through February 28, 1990, and March 1, 1990, through February 28, 1991, in accordance with 19 CFR 353.22(a). We published notices of initiation of these antidumping duty administrative reviews on April 27, 1990 (55 FR 17792) and April 18, 1991 (56 FR 15856). The Department is conducting these administrative reviews in accordance with section 751 of the Tariff Act of 1930, as amended ("the Act"). We are publishing the preliminary results of both of these administrative reviews concurrently in this notice. If these reviews proceed as expected, we will issue final results on or before March 3, 1992.

On July 3, 1990, we issued a questionnaire to METCO. On August 23, 1990, METCO requests an extension to submit its response. The Department granted an extension until October 15, 1990. Meanwhile, on September 27, 1990, METCO requested another extension to submit its response. The Department granted another extension until November 13, 1990, at which time, METCO submitted its response. The Department issued a supplemental questionnaire to METCO on April 24, 1991. On June 5, 1991, METCO submitted its supplemental response.

Scope of Review

The products covered by this review are oil country tubular goods (OCTG) which are hollow steel products of circular cross section intended for use in the drilling for oil or gas. These products include oil well casing and tubing of carbon or alloy steel, whether welded or seamless, manufactured to either American Petroleum Institute (API) or non-API (such as proprietary) specifications.

OCTGs are included under Harmonized Tariff Schedule of the United States (HTS) subheadings 7304.20.20, 7304.20.40, 7304.20.50, 7304.20.60, 7304.20.70, 7304.20.80, 7304.39.00, 7304.59.60, 7304.59.80, 7305.31.40, 7306.20.20, 7306.20.30, 7306.20.60, 7306.20.80, and 7306.30.50. Since many of the HTSUS statistical reporting numbers applicable to OCTG changed during the two review period, we are also including, in addition to the subheadings, all of the statistical reporting numbers that applied to OCTG at any time during these review periods. During the review periods of March 1, 1989, to February 28, 1990, and March 1, 1990, to February 28, 1991, OCTG were included under HTS statistical reporting numbers 7304.20.2000, 7304.20.4000, 7304.20.5010, 7304.20.5050, 7304.20.6010, 7304.20.6050, 7304.20.7000, 7304.20.8000, 7304.39.0025, 7304.39.0040, 7304.39.0050, 7304.39.0060, 7304.39.0070, 7304.39.0075, 7304.39.0090, 7304.59.6000, 7304.59.8000, 7305.31.4000, 7306.20.2000, 7306.20.3060, 7306.20.6010, 7306.20.6050, 7306.20.8010, 7306.20.8050, 7306.30.5040, 7306.30.5050, 7306.30.5055, 7306.30.5060, 7306.30.5065, 7306.30.5070, 7306.30.5075, 7306.30.5080, 7306.30.5085, and 7306.30.5090. Although the HTS subheadings and statistical reporting numbers are provided for convenience and Customs purposes, our written description remains dispositive.

Products referred to as "drill pipe" are not included within the scope of these reviews. (See Oil Country Tubular Goods from Israel; Initiation of Antidumping Duty Investigation (51 FR 11963, April 8, 1986); Final Determination of Sales at Less than Fair Value; Oil Country Tubular Goods from Israel (52 FR 1511, January 17, 1987); and Amended Antidumping Duty Order; Oil Country Tubular Goods from Israel (53 FR 23370, April 8, 1988)). Drill pipe are lengths of heavy, seamless, round tubing with special threaded connectors called tool joints, conforming to API specification 5D for drill pipe. Individual pipe lengths are normally 30 feet or more in length.

Period of Reviews

These preliminary results cover the review periods March 1, 1989, to February 28, 1990, and March 1, 1990, to February 28, 1991. For the period March 1, 1989, to February 28, 1990, METCO made no shipments of the subject merchandise to the United States.

United States Price

For the review period March 1, 1990, to February 28, 1991, we based United States price on purchase price, in accordance with section 772(b) of the Act, because all sales made by METCO were made to an unrelated purchaser prior to importation into the United States and because exporter's sales price sales were not indicated by other circumstances. We used the date of the sales agreement between METCO and its purchasers as the date of sale for purposes of these reviews.

We calculated the purchase price based on the C&F, packed price. We made deductions, where appropriate, for foreign inland freight, ocean freight, and loading charges. We increased METCO's purchase price by the amount of any countervailing duties imposed on the merchandise pursuant to section 701 of the Act to offset export subsidies.

Foreign Market Value

In accordance with section 773(a) of the Act, we calculated foreign market value based on constructed value, since there were no sales of OCTG either in the home market or for export to third countries. We used the constructed value data submitted by METCO and made the following adjustments to reflect METCO's actual cost of production for OCTG: (1) We did not use METCO's financial expenses because these expenses were incurred on borrowings from the parent firm; instead, we allocated a proportional amount of the parent's net financial expenses (offset by financial income related to the general operations of the parent); (2) we disallowed a claim for a reduction in raw material costs based on credit terms extended by the supplier of the raw material; and (3) we used the actual raw material yield in producing the subject merchandise rather than the average yield for the production line used to produce the merchandise.

The constructed value includes the material and fabrication expenses incurred to produce the product sold for export to the United States. Since the selling, general, and administrative ("SG&A") expenses were greater than the statutory minimum of ten percent, we used actual SG&A expenses of the company. Because actual profit was less than eight percent, the statutory minimum profit of eight percent was added.

We made a circumstances of sale adjustment for credit expenses incurred on the sale for export to the United States by adding the per ton amount of these credit expenses to the constructed value and by deducting from constructed value the per ton amount of short-term interest expenses included in METCO's parent company's financial expenses. Short-term interest expenses were used as an estimate of the customer carrying costs included in the financial expenses.

Currency Conversion

We made currency conversions from new Israeli shekels to U.S. dollars in accordance with 19 CFR 353.60(a), using the end of quarter exchange rate from the International Monetary Fund's Statistical Yearbook, as certified rates from the Federal Reserve Bank of New York were not available.

Preliminary Results of the Reviews

We preliminarily determine that the following margins exist:

Manufacturer/ Exporter	Time period	Margin (percent)
METCO	3/1/89—2/28/90	[1] 11.96
All others	3/1/89—2/28/90	[1] 11.96
METCO	3/1/90—2/28/91	21.40
All others	3/1/90—2/28/91	21.40

[1] No shipments during the period of review; margin taken from the less than fair value investigation.

The Department will issue appraisement instructions concerning METCO directly to the U.S. Customs Service upon completion of this administrative review.

Furthermore, the following deposit requirements will be effective upon publication of the final results of these administrative reviews for all shipments of OCTG from Israel entered, or withdrawn from warehouse, for consumption on or after that publication date, as provided by section 751(a)(1) of the Act: (1) The cash deposit rate for METCO will be that established in the final results of the 1990/91 administrative review; (2) if the exporter is not a firm covered by these reviews or the original investigation, but the manufacturer is covered by these reviews or the original investigation, the cash deposit rate will be that established for the manufacturer in the final results of the 1990/91 review; and (3) the cash deposit rate for any future entries from all other manufacturers or exporters who are not covered in these reviews and who are unrelated to the reviewed firm will be the "All Others" rate established in the final results of the 1990/91 administrative review. This rate represents the rate for METCO determined in the 1990/91 administrative review. These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative review.

Public Comment

In accordance with 19 CFR 353.38, we will hold a public hearing, if requested, at 10 a.m. on January 30, 1992, at the U.S. Department of Commerce, Room 3708, to afford interested parties an opportunity to comment on these preliminary results. Interested parties who wish to request a hearing must submit a written request within ten days of the date of publication of this notice in the **Federal Register** to the Assistant Secretary for Import Administration, U.S. Department of Commerce, Room B-099, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Parties should confirm by telephone the time, date, and place of the hearing 48 hours before the scheduled time.

Requests should contain: (1) The party's name, address and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed.

In addition, ten copies of the business proprietary version and five copies of

VOL
56

the nonproprietary version of case briefs must be submitted to the Assistant Secretary no later than January 16, 1992. Ten copies of the business proprietary version and five copies of the nonproprietary version and five copies of the nonproprietary version of the rebuttal briefs must be submitted to the Assistant Secretary no later than January 23, 1992. At the hearing, an interested party may make a presentation only on arguments included in that party's briefs.

In no hearing is requested, interested parties still may comment on these preliminary results in the form of case and rebuttal briefs. Written arguments should be submitted in accordance with 19 CFR 353.38 and will be considered if submitted within the time limits specified in this notice.

This administrative review and notice are in accordance with section 751(a)(1) of the Act and 19 CFR 353.22(c)(5).

Dated: December 16, 1991.

Francis J. Sailer,

Acting Assistant Secretary for Import Administration.

[C-533-804]

Preliminary Affirmative Countervailing Duty Determination: Bulk Ibuprofen From India

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: December 23, 1991.

FOR FURTHER INFORMATION CONTACT: Paulo F. Mendes or Stephanie L. Hager, Office of Countervailing Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377-5050 or 377-5055 respectively.

PRELIMINARY DETERMINATION:

Case History

On August 26, 1991, the Department published its notice of initiation of the countervailing duty investigation on bulk ibuprofen (ibuprofen) from India (56 FR 42028). Since initiation of this investigation the following events have occurred. On August 30, 1991, we presented a questionnaire to the Government of India (GOI) and the Indian exporter of ibuprofen. On September 16, 1991, the United States International Trade Commission issued its preliminary determination that imports of ibuprofen from India materially injure or threaten material injury to, a U.S. industry. On October 7, 1991, and November 15, 1991, we received questionnaire responses from the GOI and Cheminor Drugs Limited (Cheminor), the only Indian exporter of ibuprofen to the United States.

Scope of the Investigation

The product covered by this investigation is bulk ibuprofen from India. Ibuprofen, a white powder, is a non-steroidal anti-inflammatory agent which also has analgesic and antipyretic activity. It is used in the symptomatic treatment of acute and chronic rheumatoid arthritis, osteoarthritis, primary dysmenorrhea and for the relief of mild to moderate pain. The chemical description of ibuprofen is 2-(4-isobutylphenyl) propionic acid, $C_{13}H_{18}O_2$. The product covered by this investigation does not include ibuprofen sold in tablet, capsule or similar forms for direct human consumption. Ibuprofen is provided for in the Harmonized Tariff Schedule (HTS) subheading 2916.39.15. Although the HTS subheading is provided for convenience and customs purposes, our written description of the scope of this proceeding is dispositive.

Analysis of the Programs

For purposes of this preliminary determination, the period for which we are measuring subsidies (the period of investigation) is April 1, 1990 through March 31, 1991, which corresponds to Cheminor's fiscal year.

A. Programs Preliminarily Determined to be Countervailable

We preliminarily determine that subsidies are being provided to manufacturers, producers, or exporters in India of ibuprofen under the following programs:

1. Preferential Export Financing Through Packing Credits

The Reserve Bank of India, through commercial banks, provides "packing" credits or pre-shipment loans to exporters. With these pre-shipment loans, exporters may purchase raw materials to produce goods for export based on the presentation of a confirmed purchase order. In general, the pre-shipment loans are granted for a period of up to 180 days. Because only exporters are eligible for these pre-shipment loans, we determine that they are countervailable to the extent that they are provided at preferential rates.

During the period of investigation, the interest rate on pre-shipment export loans was 7.5 percent per annum. According to the respondents, the average short-term interest rate in India during the period of investigation was 16.5 percent. We compared this benchmark to the interest rate charged on pre-shipment loans under the program and found that the interest rate charged was lower than the benchmark. Therefore, we determine that loans provided under this program are countervailable.

To calculate the benefit bestowed by these loans, we followed the short-term loan methodology which has been applied consistently in our past determinations and is described in more detail in the Subsidies Appendix attached to the notice of Cold-Rolled Carbon Steel Flat-Rolled Products From Argentina: Final Affirmative Countervailing Duty Determination and Countervailing Duty Order (49 FR 18006, April 26, 1984); see also, *Alhambra Foundry* v. *United States*, 626 F. Supp. 402 (CIT 1985).

We compared the amount of interest actually paid during the period of investigation to the amount that would have been paid at the benchmark rate. The difference between these amounts is the benefit, which we allocated to Cheminor's total exports. On this basis, we calculated an estimated net subsidy of 2.17 percent *ad valorem*.

2. Preferential Post-Shipment Financing

The Reserve Bank of India, through commercial banks, provides post-shipment financing loans to exporters. The purpose of post-shipment financing is to enable exporters to extend favorable payment terms such as deferred payment, to the foreign purchaser. Post-shipment financing loans may not exceed a period of 180 days. Because only exporters are eligible for the post-shipment loans, we determine that they are countervailable to the extent that they are provided at preferential interest rates.

The rate of interest for post-shipment financing was 8.65 percent per annum during the period of investigation. For the reasons stated in the section on pre-shipment loans, we are using 16.5 percent as our short-term interest rate benchmark. We compared this benchmark to the interest rate charged on post-shipment export loans and found that the interest rate charged under this program was lower than the benchmark. Therefore, we determine that loans provided under this program are countervailable.

To calculate the benefit, we followed the same short-term methodology discussed above. We divided the benefit by Cheminor's exports to the United States. On this basis, we calculated an estimated net subsidy of 1.69 percent *ad valorem*.

3. Import Tax Deduction for Exporters (Section 80HHC)

For tax returns filed during the period of investigation, the GOI allowed exporters to claim a tax deduction related to their export sales. This tax deduction was calculated by dividing export sales by total sales and then multiplying the resulting figure by the exporter's profit as shown in the tax return. This amount is then deducted from taxable profits.

Because this program is only available to exporters, we preliminarily determine it to be countervailable. To calculate the benefit, we multiplied the income tax deduction of Cheminor by its actual income tax rate and divided the result by its total exports. On this basis, we calculated an estimated net subsidy of 6.13 percent *ad valorem*

4. Cash Compensatory Support (CCS)

The GOI established the CCS program as a mechanism to rebate indirect taxes on exported merchandise. The rebate for "drug and drug intermediates," covering ibuprofen, was set at a maximum of 15 percent for the period of investigation, and was paid as a percentage of the FOB invoice price. This rate was based on the audited results of a 1989 survey of the members of the basic Chemicals, Pharmaceuticals & Cosmetics Export Promotion Council of India (CHEMEXCIL), administered by the Ministry of Commerce and the CHEMEXCIL. This survey is intended to be updated every three years. Although ibuprofen exporters were not specifically covered by the survey, CHEMEXCIL's members account for approximate 80 percent of total exports of "drug and drug intermediates."

To determine whether an indirect tax rebate system confers a subsidy, we apply for following analysis. (See, Preliminary Affirmative Countervailing Duty Determination: Textile Mill Products and Apparel From Indonesia, 49 FR 49672, December 21, 1984.) First, we examine whether the system is intended to operate as a rebate of both indirect taxes and import duties. Next, we analyze whether the government properly ascertained the level of the rebate. Finally, we review whether the rebate schedules are revised periodically in order to determine if the rebate amount reflects the amount of duty and indirect taxes paid.

Based on the Department's previous examination of the CCS program (See, e.g., Certain Iron Metal Castings From India: Final Results of Countervailing Duty Administrative Review, 55 FR 1976, January 16, 1991.), we preliminarily determine that the CCS confers a countervailable benefit only to the extent that it rebates duties and/or indirect taxes on non-physically incorporated items.

Upon examination of the inputs into ibuprofen, we preliminarily determine that only certain inputs are physically incorporated. Therefore, to determine the extent of the over-rebate to Cheminor, we first calculated a unit export price. Next, we calculated the indirect tax on physically incorporated inputs as a percentage of the unit export price to determine the allowable CCS rebate rate. Comparing the allowable rate to Cheminor's actual CCS rebate rate, we calculated an estimated net subsidy of 6.04 percent *ad valorem*.

On July 3, 1991, the Ministry of Commerce suspended the CCS program. Consistent with our policy of taking into account measurable program-wide changes that occur before the preliminary determination, we are taking into account the suspension of the CCS program. Therefore, for purposes of the preliminary determination, the cash deposit rate for this program is equal to zero.

5. Import Duty Exemptions Available Through Advance Licenses

Advance licenses are available to exporters, to enable them to import raw material inputs used in the production of exports duty-free. Recipients of advance licenses are obligated under the terms of the license to export the products produced with the duty-free imports. The amount of imports allowed under an advance license is closely linked to the amount of exports to be produced.

We consider the use of the advance licenses to be equivalent to a duty drawback program insofar as customs duties are not paid on physically incorporated, imported products used in the production of exports. However, where imported inputs are not physically incorporated into the exported product, we consider the duty savings afforded by the advance license to be a countervailable export subsidy.

Cheminor claims that certain imported chemicals, including catalysts and solvents, are used in the production process and are needed to produce ibuprofen. Therefore, Cheminor contends that the Department should not apply its physical incorporation test rigidly, and should find non-countervailable the duty-free treatment of these inputs.

The Department has previously addressed the issue of catalysts and solvents and found them not to be physically incorporated into the exported product (See, e.g., Oleoresins of Paprika From Spain: Preliminary Results of Administrative Review of Countervailing Duty Order, 46 FR 61684, December 18, 1981; Ferroalloys From Spain: Final Results of Administrative Review of Countervailing Duty Order, 48 FR 34493, July 29, 1983).

Consistent with these earlier cases, we preliminarily determine that catalysts and solvents are not physically incorporated in ibuprofen and duty-free treatment of these inputs confers a countervailable subsidy. To calculate the benefit attributable to the duty savings on imported inputs not physically incorporated into ibuprofen, we used the data from an advance license provided in Cheminor's response. First, we calculated the duty savings related to inputs not physically incorporated into ibuprofen. Next, we divided the duty savings by the volume of ibuprofen committed to be exported under the advance license, and multiplied this result by the total volume of ibuprofen exports. Finally, we divided this duty savings amount by the value of total exports of ibuprofen to all markets. On this basis, we calculated an estimated net subsidy of 33.72 percent *ad valorem*.

B. Programs Preliminarily Determined Not To Be Used

1. Import Replenishment License
2. Excessive Drawback of Import Duties
3. Grants Under the Market Development Assistance (MDA) Program
4. Diesel Oil Subsidies
5. Sales of Additional Licenses
6. Grants Under the Central Investment Subsidy Scheme (CISS)
7. Transportation Subsidies
8. Extension of Free Trade Zones
9. Import Duty Exemptions Available to 100 Percent Export Oriented Units
10. Preferential Waste Disposal Rates

Verification

In accordance with section 776(b) of the Act, we will verify the information used in making our final determination.

Suspension of Liquidation

In accordance with section 703(d) of the Act, we are directing the U.S. Customs Service to suspend liquidation of all entries of bulk ibuprofen from India which are entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice in the **Federal Register** and to require a cash deposit or bond for all entries of this merchandise equal to 43.71 percent *ad valorem* for bulk ibuprofen produced and exported by

VOL 56 ISS 246 DEC 23 1991 UMI

Cheminor and all other manufacturers, producers and exporters in India of bulk ibuprofen. This suspension will remain in effect until further notice.

ITC Notification

In accordance with section 703(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Deputy Assistant Secretary for Investigations, Import Administration.

Our final determination is scheduled for February 26, 1992. If our final determination is affirmative, the ITC will make its final determination within 45 days after the Department's final determination.

Public Comment

In accordance with 19 CFR 355.38, we will hold a public hearing, if requested, on February 20, 1992, at 2:15 p.m. in room 3708, to afford interested parties the opportunity to comment on this preliminary determination. Interested parties who wish to request or to participate in the hearing must submit a request within ten days of the publication of this notice in the **Federal Register** to the Assistant Secretary for Import Administration, U.S. Department of Commerce, room B-099, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of issues to be discussed. Parties should confirm by telephone the time, date, and place of the hearing 48 hours before the scheduled time.

In addition, ten copies of the business proprietary version and five copies of the non-proprietary version of case briefs must be submitted to the Assistant Secretary no later than February 10, 1992. Ten copies of the business proprietary version and five copies of the non-proprietary version of rebuttal briefs must be submitted to the Assistant Secretary no later than February 18, 1992. An interested party may make an affirmative presentation only on arguments included in that party's case or rebuttal brief. If no hearing is requested, interested parties still may comment on these preliminary results in the form of case and rebuttal briefs. Written arguments should be submitted in accordance with section 355.38 of the Commerce Department's regulations and will be considered if received within the time limits specified above.

This determination is published pursuant to section 703(f) of the Act (19 U.S.C. 1671b(f)) and 19 CFR 355.15.

Dated: December 13, 1991.

Alan M. Dunn,

Assistant Secretary for Import Administration.

Certain Cut Flowers From Costa Rica; Final results of Countervailing Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of final results of countervailing duty administrative review.

SUMMARY: On October 25, 1991, the Department of Commerce published the preliminary results of its administrative review of the agreement suspending the countervailing duty investigation on certain cut flowers from Costa Rica. We have now completed that review and have determined that the signatories have complied with the terms of the suspension agreement during the period January 1, 1990 through December 31, 1990.

EFFECTIVE DATE: December 23, 1991.

FOR FURTHER INFORMATION CONTACT: Millie Mack or Jeff Laxague, Office of Agreements Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC; telephone (202) 377-3793.

SUPPLEMENTARY INFORMATION:

Background

On October 25, 1991, the Department of Commerce (the Department) published in the **Federal Register** (56 FR 55285) the preliminary results of its administrative review of the agreement suspending the countervailing duty investigation regarding certain cut flowers from Costa Rica (52 FR 1356; January 13, 1987). We have now completed that administrative review in accordance with section 751 of the Tariff Act of 1930 (the Tariff Act).

Scope of Review

Imports covered by this review are shipments of Costa Rican miniature (spray) carnations, standard carnations and pompon chrysanthemums. This merchandise is currently classifiable under the Harmonized Tariff Schedule items 0603.10.30 and 0603.10.70. The HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The review covers 37 producers and exporters of the subject merchandise. These 37 producers and exporters, along with the Government of Costa Rica (GOCR) and the Association of Costa Rican Flower Growers (ACOFLOR), are the signatories to the suspension agreement (see appendix A of this notice for a listing of the 37 signatory producers and exporters).

The review covers the period January 1, 1990 through December 31, 1990, and six programs: (1) Tax Credit Certificates (CAT); (2) Certificates for Increasing Exports (CIEX); (3) Income Tax Exemptions for Export Earnings; (4) Exporter Credit for Sales Tax and Consumption Tax on Certain Domestic Purchases; (5) Exporter Exemptions for Taxes and Duties on Imports; and (6) Accelerated Depreciation.

Final Results of the Review

We gave interested parties an opportunity to comment on the preliminary results. We received no comments.

As a result of our review, we determine that the signatories have complied with the terms of the suspension agreement for the period January 1, 1990 through December 31, 1990.

The agreement can remain in force only as long as shipments from the signatories account for at least 85 percent of imports of the subject cut flowers into the United States. Our information indicates that the 37 signatory companies accounted for substantially all of the imports into the United States of this merchandise during the review period.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 355.22.

Alan M. Dunn,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

Marine Mammals

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Application for Scientific Research Permit (P283B).

Notice is hereby given that Ms. Janice M. Straley, P.O. Box 273, Sitka, Alaska 99835, has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), the Endangered Species Act of 1973 (16 U.S.C. 1531-1544), and the regulations governing endangered fish and wildlife permits (50 CFR parts 217-222).

Species and Type of Take: The applicant requests a Permit to harass annually, over a five year period, up to 500 humpback whales (*Megaptera novaeangliae*), some of which may be harassed more than one time, during observational/photo-identification studies, and feeding behavior/prey distribution studies using a remotely-operated vehicle (ROV); and up to 200 killer whales (*Orcinus orca*) and 20 minke whales (*Balaenoptera acutorostrata*) during opportunistic observation/photo-identification studies. The applicant also requests authorization to import and export, on an opportunistic basis, specimen material from dead, stranded or beached humpback, killer, and/or minke whales for biological, chemical, and/or genetic analysis. The purpose of the proposed research is to document individual humpback whales and associated feeding behaviors and prey distribution in Alaska waters, and to enhance the body of knowledge with respect to killer and minke whales.

Location of Activity: The proposed activities will be conducted year-round in southeastern Alaska waters.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application, should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, 1335 East-West Hwy., room 7324, Silver Spring, Maryland 20910, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review by interested persons in the following offices:

By appointment: Office of Protected Resources, Marine Fisheries Service, 1335 East-West Hwy., suite 7324, Silver Spring, Maryland 20910 (301/713-2289).

Director, Alaska Region, National Marine Fisheries Service, NOAA, 709 West 9th Street, Federal Bldg., Juneau, Alaska 99802.

Director, Northwest Region, National Marine Fisheries Service, NOAA, 7600 Sand Point Way, NE., BIN C15700, Seattle, Washington 98115.

Dated: December 17, 1991.

Nancy Foster,

Director, Office of protected Resources.

ACTION: Issuing a directive to the Commissioner of Customs establishing a limit.

EFFECTIVE DATE: December 27, 1991.

FOR FURTHER INFORMATION CONTACT: Jennifer Tallarico, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of this limit, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 535–9480. For information on embargoes and quota re-openings, call (202) 377–3715. For information on categories on which consultations have been requested, call (202) 377-3740.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

Inasmuch as no agreement has been reached on a mutually satisfactory solution on Category 443, the United States Government has decided to control imports in this category for the prorated period beginning on December 27, 1991 and extending through June 30, 1992.

The United States remains committed to finding a solution concerning this category. Should such a solution be reached in consultations with the Government of Indonesia, further notice will be published in the **Federal Register**.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 55 FR 50756, published on December 10, 1990; and 56 FR 60101, published on November 27, 1991). Also see 56 FR 56198, published on November 1, 1991.

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 18, 1991.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1991; pursuant to the Bilateral Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textile Agreement, effected by exchange of notes dated September 25 and October 3, 1985, as amended, between the Governments of the United States and Indonesia; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on December 27, 1991, entry into the United States for consumption and withdrawal from warehouse for consumption of wool textile products in Category 443, produced or manufactured in Indonesia and exported during the period beginning on December 27, 1991 and extending through June 30, 1992, in excess of 25,631 numbers.

Textile products in Category 443 which have been exported to the United States on and after July 1, 1991 shall remain subject to the Group II limit, and its subgroup, established for the period July 1, 1991 through June 30, 1992.

Imports charged to this category limit for the ninety-day period beginning on September 28, 1991 and extending through December 26, 1991, shall be charged against that level of restraint to the extent of any unfilled balance. In the event the limit established for that period has been exhausted by previous entries, such goods shall be subject to the level set forth in this directive.

For the import period September 28, 1991 through November 3, 1991, there are zero charges to be made to Category 443.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-F

DEPARTMENT OF EDUCATION

[CFDA No. 84.023]

Research in Education of Individuals With Disabilities Program; Applications for New Awards for Fiscal Year 1992

Purpose of Program: To advance and improve the knowledge base and improve the practice of professionals, parents, and others providing early intervention, special education, and related services, including professionals in regular education environments, to provide children with disabilities effective instruction and enable them to successfully learn.

Eligible Applicants: State and local educational agencies, institutions of higher education, and other public agencies and nonprofit private organizations.

Deadline for Transmittal of Applications: March 6, 1992.

Applications Available: December 31, 1991.

Available Funds: $750,000

Estimated Number of Awards: 10

Estmated Size of Awards: Up to $75,000

NOTE: The Department is not bound by any estimates in this notice.

Project Period: Up to 18 months

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR part 324, as amended on October 22, 1991 at 56 FR 54697–54698.

Priority: Under 34 CFR 75.105(c)(3) and 34 CFR 324.10 the Secretary gives an absolute preference to applications that meet the following priority. The Secretary funds under this program only applications that meet this absolute priority:

Absolute Priority: Advancing and Improving the Research Knowledge Base (CFDA 84.023A)

This priority supports a wide range of research and related activities that support innovation, development, exchange, and use of advancements in knowledge and practice designed to contribute to the improvement of instruction and learning of infants, toddlers, children, and youth with disabilities.

Invitational Priorities: Within this Absolute Priority, the Secretary is particularly interested in applications that meet one or more of the following invitational priorities. However, under 34 CFR 75.105(c)(1) an application that meets one or more of these invitational priorities does not receive competitive or absolute preference over other applications:

Pilot studies, projects that employ new methodologies, descriptive studies, projects to advance assessment, projects that synthesize state-of-the-art research and practice, projects for research dissemination and utilization, and projects that analyze extant data bases. The Secretary further encourages studies that use these approaches to address the needs of infants, toddlers, children and youth with disabilities from racial or ethnic minority groups.

This program complements AMERICA 2000, the President's strategy for helping the nation achieve the six National Education Goals, by improving our understanding of how to enable children with disabilities to reach the highest levels of educational performance envisioned by the goals.

FOR APPLICATIONS OR INFORMATION CONTACT: Linda Glidewell, U.S. Department of Education, 400 Maryland Avenue, SW., room 3524 Switzer Building, Washington, DC 20202–2641. Telephone: (202) 732–1099. Deaf and hearing impaired individuals may call (202) 732–6153.

Program Authority: 20 U.S.C. 1441–1443.

Dated: December 17, 1991.

Robert R. Davila,

Assistant Secretary, Office of Special Education and Rehabilitative Services.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. TM92-9-20-000]

Algonquin Gas Transmission Co.; Proposed Changes in FERC Gas Tariff

December 17, 1991.

Take notice that Algonquin Gas Transmission Company ("Algonquin") on December 13, 1991, tendered for filing proposed changes in its FERC Gas Tariff, as set forth in the revised tariff sheets:

Proposed to be Effective January 1, 1992

Volume No. 1
Substitute Third Revised Sheet No. 64
Volume No. 2
Sub 1 Rev Sheet No. 334

Algonquin states that these revised tariff sheets are being submitted to incorporate the Gas Research Institute Adjustment ("GRI Adjustment") for the calendar year 1992 into Rate Schedules FTP and X–35. The GRI Adjustment was approved by the Commission in Opinion No. 365 in Docket No. RP92–170–000, issued October 1, 1991 (57 FERC ¶ 61,010). The instant filing is being made pursuant to Section 28 of the General Terms and Conditions of Algonquin's FERC Gas Tariff, Third Revised Volume No. 1.

Algonquin also states that on November 13, 1991 in Docket No. CP88–185–011, as supplemented on November 20, 1991, Algonquin filed an application to amend a certificate of public convenience and necessity granted to Algonquin by Commission Letter Order issued on July 2, 1990 (52 FERC ¶ 61,001) for Rate Schedule FTP. Tariff sheets reflecting the amendment were accepted by Commission Letter Order dated November 27, 1991 (57 FERC ¶ 62,164). Also on November 27 in Docket No. TM92–8–20–000 ("Initial GRI filing"), Algonquin filed to incorporate the GRI Adjustment for the calendar year 1992 into all of its then-effective rate schedules. As Algonquin did not receive notice of the Commission's approval in Docket No. CP88–185–011 until after the GRI filing was made, Sheet No. 64 is being revised herein to incorporate the 1992 GRI adjustment.

Algonquin further states that also included herein is a revised tariff sheet No. 334 for Rate Schedule X–35 that incorporates the 1992 GRI Adjustment and technical modifications to the format of the rate sheet. These modifications were agreed upon during discussions with FERC Staff and had not been finalized at the time of the initial GRI filing.

Algonquin states that the proposed effective date of these tariff sheets is January 1, 1992.

Algonquin notes that copies of this filing were served upon each affected party and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before December 24, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP91-160-003]

Columbia Gulf Transmission Co.; Proposed Changes in FERC Gas Tariff

December 17, 1991.

Take notice that Columbia Gulf Transmission Company (Columbia Gulf) on November 27, 1991 tendered for filing revised changes in its FERC Gas Tariff, First Revised Volume No. 1 to become effective December 1, 1991.

Columbia Gulf states that it is filing the referenced tariff sheets in order to place into effect the rates and tariff provisions suspended by Commission Order issued June 28, 1991 in this proceeding.

The tariff sheets encompass Columbia Gulf's rate filing herein of May 31, 1991, with adjustments to its cost of service to (1) reflect only the costs of facilities which are projected to be in service by November 30, 1991; and (2) reflect the level of purchased gas costs in the most recent Purchased Gas Cost Adjustment filing of Columbia Gas Transmission Corporation (Columbia Transmission), filed in Docket No. TQ92–1–21–001 on October 25, 1991.

Columbia Gulf states that copies of the filing were served on Columbia Gulf's jurisdictional customers and interested state commissions and to each of the parties set forth on the official service list in the above-referenced proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capital Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedures, 18 CFR 385.211. All such protests should be filed on or before December 23, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary

BILLING CODE 6717–01–M

[Docket No. TM92–7–4–000]

Granite State Gas Transmission, Inc.; Proposed Changes in Rates

December 17, 1991.

Take notice that on December 10, 1991, Granite State Gas Transmission, Inc. (Granite State) 300 Friberg Parkway, Westborough, Massachusetts 01581 tendered for filing Ninth Revised Sheet No. 25 in its FERC Gas Tariff, Second Revised Volume No. 1, containing changes in rates for effectiveness on January 1, 1992.

According to Granite State, it provides a storage service for Bay State Gas Company under its Rate Schedule GSS with storage capacity provided in a facility operated by CNG Transmission Corporation (CNG). It is further stated that Granite State's Rate Schedule GSS tracks changes made by CNG under its Rate Schedule GSS pursuant to which Granite State obtains storage capacity from CNG.

Granite State further states that on November 27, 1991, in Docket No. TM92–22–000, CNG filed Tenth Revised Sheet No. 34 in its FERC Gas Tariff, First Revised Volume No. 1, revising the Injection Charge in its Rate Schedule GSS, effective November 1, 1991. According to Granite State, its filing tracks in its Rate Schedule GSS the change made by CNG in its rates for Rate Schedule GSS service.

Granite State states that copies of its filing were served on Bay State Gas Company and the regulatory commissions of the states of Maine, Massachusetts and New Hampshire.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 285.211 and 385.214). All such motions or protests should be filed on or before December 23, 1991. Protests will be considered by the Commission in determining the appropriate action to the taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 91–30514 Filed 12–20–91; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CP92–241–000]

Kern River Gas Transmission Co.; Application

December 16, 1991.

Take notice that on December 16, 1991, Kern River Gas Transmission Company (Applicant), P.O. Box 2511, Houston, Texas, 77252–2511, pursuant to section 7 of the Natural Gas Act, as amended, and part 157 of the Regulations of the Federal Energy Regulatory Commission (Commission), filed in Docket No. CP92–241–000, an application for a temporary certificate of public convenience and necessity authorizing the installation of, and a permanent certificate of public convenience and necessity authorizing the construction and operation of, certain tap and meter facilities on Kern River's interstate pipeline system as more fully described in the application which is on file at the Commission and available for public inspection.

Any person desiring to be heard or to make any protest with reference to said application should on or before December 23, 1991, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken on the request for a permanent certificate but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. Pursuant to section 7(c) of the Natural Gas Act, the Commission may act on the application for a temporary certificate without awaiting or considering any protests or intervention.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time requested herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. TM92–3–25–000]

Mississippi River Transmission Corp., Rate Change Filing

December 17, 1991

Take notice that on December 13, 1991 Mississippi River Transmission Corporation (MRT) tendered for filing Thirteenth Revised Sheet No. 4A.2 to be effective January 13, 1992 to its FERC Gas Tariff, First Revised Volume No. 1.

MRT states that the purpose of the instant filing is to reflect the flowthrough of take-or-pay cost reductions from Trunkline Gas Company (Trunkline) in their Docket No. RP91–54–000 *et al.* MRT states that the reductions have been allocated to MRT's customers in accordance with MRT's June 26, 1991 Stipulation and Agreement on the Allocation and Recovery of Transition Costs from Upstream Pipelines (Settlement) approved by Commission Order dated July 25, 1991. MRT states that Thirteenth Revised Sheet No. 4A.2 reflects a reconciliation of take-or-pay amounts paid to Trunkline by MRT compared to take-or-pay amounts collected by MRT from its jurisdictional customers.

MRT states that a copy of this filing has been mailed to each of MRT's jurisdictional customers and to the State Commissions of Arkansas, Illinois and Missouri.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 and 214 of the Commission's Rules of Practice and Procedure, 18 CFR § 385.214. All such protests should be filed on or before December 24, 1991. Protests will be considered by the Commission in determining the appropriation action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 91–30515 Filed 12–20–91; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. TQ92–4–25–001]

Mississippi River Transmission Corp.; Rate Change Filing

December 17, 1991.

Take notice that on November 21, 1991 Mississippi River Transmission Corporation (MRT) tendered for filing First Revised Sixty-Seventh Revised Sheet No. 4, and First Revised Twenty-Sixth Revised Sheet No. 4.1 to its FERC Gas Tariff, Second Revised Volume No. 1 to be effective November 13, 1991.

On November 12, 1991 MRT filed an out-of-cycle Purchased Gas Adjustment (PGA) proposed to be effective November 13, 1991 in Docket No. TQ92–4–25–000. MRT recently discovered that the November 12 filing contained an error in tariff sheet pagination and also a rounding error in the commodity cost of gas in rates reflected on the bottom of Sheet Nos. 4 and 4.1.

MRT states that the purpose of this filing is to resubmit its out-of-cycle tariff sheets to be effective November 13, 1991 with the correct tariff sheet pagination and to correct the commodity cost of gas in rates reflected at the bottom of the tariff sheets. MRT also states that the instant filing is identical in all other respects to the previous out-of-cycle PGA filing submitted in Docket No. TQ92–4–25–000. MRT requests that the Commission close the related Docket No. TQ92–4–25–000 and accept the tariff sheets proposed herein.

MRT also states that a copy of this filing has been served on all of MRT's jurisdictional sales customers and the State Commissions of Arkansas, Missouri, and Illinois.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before December 23, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 91–30516 Filed 12–20–91; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CP92–240–000]

Mojave Pipeline Co.; Application

December 16, 1991.

Take notice that on December 13, 1991, Mojave Pipeline Company (Mojave), P.O. Box 1188, Houston, Texas, 77001, filed in Docket No. CP92–240–000 pursuant to section 7(c) of the Natural Gas Act and subpart A of part 157 of the Commission's regulations, an application for a certificate of public convenience and necessity authorizing the construction and operation of certain tap and metering facilities on Mojave's interstate pipeline system, as more fully described in the application which is on file at the Commission and available for public inspection. As part of this filing, Mojave also has filed an application for a temporary certificate authorizing the construction of such facilities.

Mojave currently holds an optional expedited certificate that authorizes Mojave to construct and operate a pipeline system extending from Arizona to near Bakersfield in Kern County, California. Mojave also holds blanket certificates authorizing Mojave to construct and operate certain appurtenant facilities and to provide open access natural gas transportation services. See Mojave Pipeline Company., 47 FERC ¶ 61,200 (1989); *Mojave Pipeline Company.*, 50 FERC ¶ 61,089 *reh'g denied*, 51 FERC ¶ 61,195 (1990) (the "Certificate Orders").

Under the Certificate Orders, Mojave and Kern River Gas Transmission Company ("Kern River") were authorized to construct, operate, and obtain an undivided joint ownership interest in certain pipeline facilities (the "Common Facilities") to be located in Kern County, California.[1] Mojave owns a 1/11 interest in the Common Facilities and Kern River owns 7/11.

Of the 21 delivery points currently contemplated to be located on the Common Facilities, 11 will be constructed and operated either by solely by Mojave or jointly by Mojave and Kern River. These are the delivery points for which Mojave requests certificate authority. As projected on page 3 of Exhibit K to Mojave's Application to Amend Certificate of Public Convenience and Necessity, filed on August 30, 1991, in Docket No. CP89–1, the cost of these facilities will be approximately $5 million. The delivery points and the status of their construction are listed below.

Delivery point	Status of construction
1. Coolwater	Not commenced.
2. Boron	Not commenced.
3. Kern River	Partially complete.
4. Sycamore/KRCC	Partially complete.
5. Kern Front	Not commenced.
6. SoCal	Partially complete.
7. S. Midway	Partially complete.
8. Midway-Mideet	Partially complete.
9. Midway	Partially complete.
10. N. Midway	Partially complete.
11. 17–Z	Partially complete.

Any person desiring to be heard or to make any protest with reference to said application should on or before December 23, 1991, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken on the request for a permanent certificate but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. Pursuant to section 7 of the Natural Gas Act, the Commission may act on Mojave's request for temporary authorization

[1] Under the Construction, Operations and Maintenance Agreement dated August 29, 1989, among Mojave, Kern River and MPOC (the "CO&M Agreement"), the Common Facilities are being constructed and operated by MPOC as agent for Mojave and Kern River. The CO&M Agreement was submitted to the Commission as part of Exhibit M to its amended certificate application filed September 1, 1989, in Docket No. CP89–1.

VOL 56 ISS 246 DEC 23 1991 UMI

without awaiting or considering any intervention or protest.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time requested herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TQ92-4-59-001]

Northern Natural Gas Co.; Proposed Changes in FERC Gas Tariff

December 17, 1991.

Take notice that Northern Natural Gas Company (Northern), on December 12, 1991, tendered for filing changes in its FERC Gas Tariff, Third Revised Volume No. 1 (Volume No. 1 Tariff).

The calculation of the November 1991 Index Price shown on 1 Revised Twentieth Revised Sheet No. 4H of Northern's Volume No. 1 Tariff incorporated an incorrect price; as such, the November 1991 Index Price should be $1.6430 rather than $1.6470 as previously filed by Northern. Therefore, Tariff Sheet Sub. 1 Rev. Twentieth Revised Sheet No. 4H. filed by Northern on December 11, 1991, reflects such change to be effective December 1, 1991.

Northern states that copies of the filing were served on Northern's jurisdictional sales customers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedures, 18 CFR 385.211. All such protests should be filed on or before December 23, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[Docket No. RP87-103-011]

Panhandle Eastern Pipe Line Co.; Proposed Changes in FERC Gas Tariff

December 17, 1991.

Take notice that Panhandle Eastern Pipe Line Company (Panhandle) on December 11, 1991 tendered for filing the following revised tariff sheets to its FERC Gas Tariff, Original Volume No. 1:

Fourth Revised Sheet No. 32-AK
Second Revised Sheet No. 32-AL
Second Revised Sheet No. 32-BO
First Revised Sheet No. 32-BP

The subject tariff sheets bear a proposed effective date of December 11, 1991.

Panhandle states that on March 22, 1990 it submitted a Stipulation and Agreement in connection with the above-referenced proceedings. The Commission issued an order on November 26, 1991 which approved the Stipulation and Agreement. Pursuant to Ordering Paragraph (B) of the November 26, 1991 Order, Panhandle is submitting the revised tariff sheets referenced above to remove § 6.8(c) from Rate Schedules PT-Interruptible and PT-Firm.

Panhandle states that a copy of this filing has been sent to all affected sales and transportation customers, affected State Commissions and all parties on the service lists in the referenced proceedings.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capital Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before December 23, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 91-30519 Filed 12-20-91; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP91-203-000]

Tennessee Gas Pipeline Co.; Informal Settlement Conference

December 17, 1991.

Take notice that an informal settlement conference will be convened in this proceeding on January 6, 1992, at 1 p.m., at the offices of the Federal Energy Regulatory Commission, 810 First Street NE., Washington, DC, for the purpose of exploring a possible settlement of the above-referenced docket.

Any party, as defined by 18 CFR 385.102(c), or any participant, as defined by 18 CFR 385.102(b), is invited to attend. Persons wishing to become a party must move to intervene and receive intervenor status pursuant to the Commission's regulations (18 CFR 385.214).

For additional information, contact Donald Williams at (202) 208-0743 or Dennis H. Melvin at (202) 208-0042.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA90-1-11-006]

United Gas Pipe Line Co.; Filing of Revised Tariff Sheets

December 17, 1991.

Take Notice that on December 11, 1991, United Gas Pipe Line Company (United) tendered for filing the following corrected tariff sheet to be effective October 1, 1989:

First Revised Volume No. 1

First Substitute Ninetieth Revised Sheet No. 4

United states that the above referenced tariff sheet is being filed to correct an error in the preparation of Substitute Revised Tariff Sheet No. 4 as filed September 18, 1991 in Docket No. TA90-1-11-004.

United states that the substitute tariff sheet is being mailed to its jurisdictional sales customers and to interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before December 23, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Project No. 2357-003—Wisconsin/Michigan]

Wisconsin Electric Power Co.; Establishing Procedures for Relicensing and a Deadline for Submission of Final Amendments

December 17, 1991.

The license for the White Rapid Hydro Project No. 2357, located on the Menominee River in Marinette County, Wisconsin and Menominee County, Michigan, expires December 31, 1993. The statutory deadline for filing an application for new license was December 31, 1991. An application for new license has been filed as follows:

Project No.	Applicant	Contact
2357-003..	Wisconsin Electric Power Company, 231 West Michigan Street, P.O. Box 2046, Milwaukee, WI 53201.	Richard G. Fuller, Wisconsin Electric Power Company, 1401 South Carpenter Ave., Iron Mountain, MI 49801.

The following is an approximate schedule and procedures that will be followed in processing the application:

Date	Action
January 10, 1992	Commission notifies applicant that its application has been accepted and specifies the need for additional information and due date.
January 25, 1992	Commission issues public notice of the accepted application establishing dates for filing motions to intervene and protests.
April 15, 1992	Commission's deadline for applicant for filing a final amendment, if any, to its application.

Upon receipt of all additional information and the information filed in response to the public notice of the acceptance of the application, the Commission will evaluate the application in accordance with applicable statutory requirements and take appropriate action on the application.

Any questions concerning this notice should be directed to Robert Bell at (202) 219-2806.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

Office of Hearings and Appeals

Cases Filed During the Week of November 22 Through November 29, 1991

During the week of November 22 through November 29, 1991, the appeals and applications for other relief listed in the appendix to this notice were filed with the Office of Hearings and Appeals of the Department of Energy. Submissions inadvertently omitted from earlier lists have also been included.

Under DOE procedural regulations, 10 CFR part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this notice or the date of receipt of an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, DC 20585.

Dated: December 17, 1991.

George B. Breznay,

Director, Office of Hearings and Appeals.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS

[Week of November 22 through November 29, 1991]

Date	Name and location of applicant	Case No.	Type of Submission
11/21/91	Gulf/Lutherville Gulf Sparks, Maryland	RR300-115	Request for Modification/Rescission in the Gulf Refund Proceeding. If Granted: The October 25, 1991 Dismissal Letter (Case No. RF300-11528) issued to Lutherville Gulf would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
11/25/91	Foundation for Fair Contracting Sacramento, California	LFA-0166	Appeal of an Information Request Denial. If Granted: The November 5, 1991 Freedom of Information Request Denial issued by the Western Area Power Administration would be rescinded, and the Foundation for Fair Contracting would receive access to deleted names, home addresses and social security numbers contained in the certified payroll record.
Do	Harry S. Hardin, III New Orleans, Louisiana	LFA-0167	Appeal of an Information Request Denial. If Granted: The October 22, 1991 Freedom of Information Request Denial issued by the Strategic Petroleum Reserve Project Management Office would be rescinded, and Harry S. Hardin, III would receive access to DOE information.
Do	Leslie Vallie Golden, Colorado	LFA-0168	Appeal of an Information Request Denial. If Granted: The November 7, 1991 Freedom of Information Request Denial issued by the Western Area Power Administration would be rescinded, and Leslie Vallie would receive access to DOE information.
11/26/91	Gulf/Grammer's Gulf Atlantic Beach, Florida	RR300-116	Request for Modification/Rescission in the Gulf Refund Proceeding. If Granted: The November 6, 1990 Dismissal Letter (Case No. RF300-12170) issued to Grammer's Gulf would be modified regarding the firm's application for refund submitted in the Gulf refund processing.

VOL 56 ISS 246 DEC 23 1991 UMI

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS—Continued

[Week of November 22 through November 29, 1991]

Date	Name and location of applicant	Case No.	Type of Submission
Do	Gulf/Greive Oil Company Washington, DC	RR300-119	Request for Modification/Rescission in the Gulf Refund Proceeding. If Granted: The October 29, 1989 Decision and Order (Case No. RF300-6039) issued to Greive Oil company would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Huron Oil company, Inc. Washington, DC	RR300-118	Request for Modification/Rescission in the Gulf Refund Proceeding. If Granted: The January 25, 1991 Decision and Order (Case No. RF300-9303) issued to Huron Oil company, Inc. would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Gulf/Vlach's Gulf Woodbridge, Virginia	RR300-117	Request for Modification/Rescission in the Gulf Refund Proceeding. If Granted: The October 25, 1991 Dismissal Letter (Case No. RF300-11794) issued to Vlach's Gulf would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Do	Texaco/Albemarle Road Texaco Charlotte, North Carolina	RR321-91	Request for Modification/Rescission in the Texaco Refund Proceeding. If Granted: The September 5, 1991 Dismissal Letter (Case No. RF321-4133) issued to Albemarle Road Texaco would be modified regarding the firm's application for refund submitted in the Texaco refund proceeding.
Do	Texaco/Bob's Texaco Lincoln, Nebraska	RR321-90	Request for Modification/Rescission in the Texaco Refund Proceeding. If Granted: The September 24, 1991 Dismissal Letter (Case No. RF321-3561) issued to Bob's Texaco would be modified regarding the firm's application for refund submitted in the Texaco refund proceeding.
Do	Texaco/Christie's Texaco Austin, Texas	RR321-94	Request for Modification/Rescission in the Texaco Refund Proceeding. If Granted: The July 25, 1991 Dismissal Letter (Case No. RF321-5253) issued to Christie's Texaco would be modified regarding the firm's application for refund submitted in the Texaco refund proceeding.
Do	Texaco/Dow Chemical Company Washington, DC	RR321-96	Request for Modification/Rescission in the Texaco Refund Proceeding. If Granted: The October 22, 1991 Decision and Order (Case No. RF321-10745) issued to Dow Chemical Company would be modified regarding the firm's application for refund submitted in the Texaco refund proceeding.
Do	Texaco Kautz Texaco Pittsburgh, Pennsylvania	RR321-89	Request for Modification/Rescission in the Texaco Refund Proceeding. If Granted: The July 25, 1991 Dismissal Letter (Case No. RF321-3300) issued to Kautz Texaco would be modified regarding the firm's application for refund submitted in the Texaco refund proceeding.
11/28/91	Texaco/Port Malabar Texaco Palm Bay, Florida	RR321-87	Request for Modification/Rescission in the Texaco Refund Proceeding. If Granted: The September 6, 1991 Decision and Order (Case No. RF321-4500) issued to Port Malabar Texaco would be modified regarding the firm's application for refund submitted in the Texaco refund proceeding.
11/26/91	Texaco/Simpson's Texaco Charlotte, North Carolina	RR321-92	Request for Modification/Rescission in the Texaco Refund Proceeding. If Granted: The Dismissal Letter September 5, 1991 (Case No. RF321-4180) issued to Simpson's Texaco would be modified regarding the firm's application for refund submitted in the Texaco refund proceeding.
Do	Texaco/University Texaco Memphis, Tennessee	RR321-86	Request for Modification/Rescission in the Texaco Refund Proceeding. If Granted: The October 31, 1991 Decision and Order (Case No. RF321-11592 & RF321-17162) issued to University Texaco would be modified regarding the firm's application for refund submitted in the Texaco refund proceeding.
Do	Texaco/William Turner's Texaco Tulsa, Oklahoma	RR321-93	Request for Modification/Rescission in the Texaco Refund Proceeding. If Granted: The July 25, 1991 Dismissal Letter (Case No. RF321-3375) issued to William Turner's Texaco would be modified regarding the firm's application for refund submitted in the Texaco refund proceeding.
Do	Texaco/Ysleta Texaco El Paso, Texas	RR321-95	Request for Modification/Rescission in the Texaco Refund Proceeding. If Granted: The July 25, 1991 Dismissal Letter (Case No. RF321-5246) issued to Ysleta Texaco would be modified regarding the firm's application for refund submitted in the Texaco refund proceeding.
11/27/91	TexacoStark & Doolin Texaco Memphis, Tennessee	RR321-97	Request for Modification/Rescission in the Texaco Refund Proceeding. If Granted: The July 25, 1991 Dismissal Letter (Case No. RF321-3992) issued to Stark & Doolin Texaco would be modified regarding the firm's application for refund submitted in the Texaco refund proceeding.
Do	ARCO/Wilbanks Oil company Washington, DC	RR304-20	Request for Modification/Rescission in the ARCO Refund Proceeding. If Granted: The August 30, 1991 Decision and Order (Case No. RF304-6236) issued to Wilbanks Oil company would be modified regarding the firm's application for refund submitted in the ARCO refund proceeding.
11/29/91	Texaco/Emmett's Texaco San Antonio, Texas	RR321-98	Request for Modification/Rescission in the Texaco Refund Proceeding. If Granted: The June 17, 1991 Dismissal Letter (Case No. RF321-202) issued to Emmett's Texaco would be modified regarding the firm's application for refund submitted in the Texaco refund proceeding.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS—Continued

[Week of November 22 through November 29, 1991]

Date	Name and location of applicant	Case No.	Type of Submission
Do	Texaco/Portel Service Center Ormond Beach, Florida	RR321-100	Request for Modification/Rescission in the Texaco Refund Proceeding. If Granted: The April 24, 1990 Dismissal Letter (Case No. RF321-1204) issued to Portel Service Center would be modified regarding the firm's application for refund submitted in the Texaco refund proceeding.
Do	Texaco/Trusty's Texaco Memphis, Tennessee	RR321-99	Request for Modification/Rescission in the Texaco Refund Proceeding. If Granted: The April 20, 1991 Dismissal Letter (Case No. RF321-1862) issued to Trusty's Texaco would be modified regarding the firm's application for refund submitted in the Texaco refund proceeding.
Do	Texaco/Yeagy's Texaco Idaville, Pennsylvania	RR321-88	Request for Modification/Rescission in the Texaco Refund Proceeding. If Granted: The August 2, 1991 Dismissal Letter (Case No. RF321-3587) issued to Yeagy's Texaco would be modified regarding the firm's application for refund submitted in the Texaco refund proceeding.

REFUND APPLICATIONS RECEIVED

[Week of November 22 to November 29, 1991]

Date received	Name of refund proceeding/Name of refund application	Case No.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[FRL-4086]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paper work Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden.

DATES: Comments must be submitted on or before January 22, 1992.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA, (202) 260-2740.

SUPPLEMENTARY INFORMATION:

Office of Air and Radiation

Title: National Emission Standard for Hazardous Air Pollutants (NESHAP) for Beryllium (Subpart C)—Information Requirements (EPA No. 0193.04, OMB No. 2060-0092).

Abstract: This ICR is for an extension of an existing information collection in support of NESHAP requirements as established by the Clean Air Act. Specifically, under 40 CFR 61.07-61.10 and 40 CFR 61.30-61.34, owners or operators of sources subject to the NESHAP for beryllium must demonstrate compliance through either an initial test of stack emissions, or ambient air monitoring (unless a waiver of emission testing is obtained under 40 CFR 61.13). The information collected will be used by the EPA for monitoring, inspection, and enforcement efforts directed at ensuring source compliance with the NESHAP.

Prior to commencement of operations, owners or operators of new sources subject to this NESHAP must submit an application for approval of construction that includes: (1) The name and address of the applicant, (2) the location or proposed location of the source, and (3) technical information describing the source. Once approved, the owners or operators must notify EPA of the anticipated and actual start-up dates at the source.

While owners or operators of new sources must conduct an initial emission test, owners or operators of existing sources may, as an alternative, seek approval from the EPA to conduct continuous compliance monitoring. Owners and operators of new and existing sources conducting an initial emission test must: (1) Notify EPA at least 30 days prior to the date of the test, and (2) record and report the test results to EPA. Calculations estimating new emission levels must be reported whenever a change in plant operations might elevate emissions.

Owners or operators of existing sources seeking EPA approval to perform continuous ambient air monitoring must submit a report that includes: (1) A description of the locations and physical characteristics of the sampling area, (2) the design, methods, and techniques used in sampling and estimating emissions, (3) a description of the process used to design the air sampling network, and (4) three years of air quality monitoring data. If the request is granted, the owner or operator must submit a monthly report on beryllium concentrations measured at all sampling sites.

Presently, only about 24 sources, out of an estimated 236 subject to this NESHAP, conduct continuous compliance monitoring. The EPA does

VOL 56 ISS 246 DEC 23 1991 UMI

not anticipate any expansion in the regulated community over the next three years. Owners and operators of subject sources must maintain records related to compliance for a two year period.

Burden Statement: Public reporting burden for this collection of information is estimated to average 8 hours per response including time for reviewing instructions, searching existing data sources, gathering and maintaining data, and completing and reviewing the collection of information. Public recordkeeping burden is estimated to average 62.5 hours, annually.

Respondents: Businesses or other for-profit organizations.

Estimated Number of Respondents: 24.

Estimated Number of Responses Per Respondent: 12.

Estimated Total Annual Burden on Respondents: 3,741 hours.

Frequency of Collection: Monthly for ambient monitoring, on occasion for initial emission testing.

Send comments regarding the burden estimate, or any other aspect of this collection of information, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM–223Y), 401 M Street, SW., Washington, DC 20460.

and

Troy Hillier, Office of Management and Budget, Office of Information and Regulatory Affairs, 725 17th St., NW., Washington, DC 20503.

Dated: December 17, 1991.

Paul Lapsley,

Director, Regulatory Management Division.

BILLING CODE 6560–50–M

[AMS–FRL–4086–4]

Regulation of Fuels and Fuel Additives: Standards for Reformulated Gasoline

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of application for extension of the reformulated gasoline program to Connecticut, New Hampshire and Virginia.

SUMMARY: This notice published the application of the Governors of the States of Connecticut, New Hampshire, and Virginia to have the prohibition set forth in section 211(k)(5) of the Clean Air Act (the Act) applied in their respective states. Under section 211(k)(6) the Administrator of EPA shall apply the prohibition against the sale of gasoline which has not been reformulated to be less polluting in an ozone nonattainment area upon the application of the governor of the state in which the nonattainment area is located.

DATES: The effective date of the prohibition described herein is January 1, 1995 (see the Supplementary Information section of today's notice for a discussion of the possible delay of this date).

ADDRESSES: Materials relevant to this notice are contained in Public Docket No. A–91–02. This docket is located in room M–1500, Waterside Mall (ground floor), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC. 20460. The docket may be inspected from 8:30 a.m. until 12 noon and from 1:30 p.m. until 3 p.m. Monday through Friday. A reasonable fee may be charged by EPA for copying docket materials.

FOR FURTHER INFORMATION CONTACT:

Joanne I. Goldhand, U.S. EPA (SDSB–12), Motor Vehicle Emission Laboratory, 2565 Plymouth Road, Ann Arbor, MI 48105, Telephone: (313) 668–4504.

SUPPLEMENTARY INFORMATION:

I. Background

As part of the Clean Air Act Amendments of 1990, Congress added a new subsection (k) to section 211 of the Clean Air Act. Subsection (k) prohibits the sale of gasoline that EPA has not certified as reformulated ("conventional gasoline") in the nine worst ozone nonattainment areas beginning January 1, 1995. To be certified as reformulated a gasoline must comply with the following formula requirements: Oxygen content of at least 2.0 percent by weight benzene content of no more than 1.0 percent by volume; no heavy metals (with a possible waiver for metals other than lead); and the inclusion of deposit preventing additives. The gasoline must also achieve toxic and volatile organic compound emissions reductions equal to or exceeding the more stringent of a specified formula fuel or a performance standard.

Section 211(k)(10)(D) defines the areas covered by the reformulated gasoline program as the nine ozone nonattainment areas having a 1980 population in excess of 250,000 and having the highest ozone design values during the period 1987 through 1989. Applying those criteria, EPA has determined the nine covered areas to be the metropolitan areas including Los Angeles, Houston, New York City, Baltimore, Chicago, San Diego, Philadelphia, Hartford and Milwaukee. Under section 211(k)(10)(D) any area reclassified as a severe ozone nonattainment area under section 181(b) is also to be included in the reformulated gasoline program.

Any other ozone nonattainment area may be included in the program at the request of the governor of the state in which the area is located. Section 211(k)(6)(A) provides that upon the application of a governor, EPA shall apply the prohibition against selling conventional gasoline in any area in the governor's state which has been classified under subpart 2 of part D of title I of the Act as a Marginal, Moderate, Serious or Severe ozone nonattainment area.[1] Subparagraph 211(k)(6)(A) further provides that EPA is to apply the prohibition as of the date the "deems appropriate, not later than January 1, 1995, or 1 year after such application is received, whichever is later." In some cases the effective date may be extended for such an area as provided in section 211(k)(6)(B) based on a determination by EPA that there is "insufficient domestic capacity to produce" reformulated gasoline. Finally, EPA is to publish a governor's application in the **Federal Register**.

EPA has used the regulatory negotiation process on the requirements for reformulated gasoline. A notice of proposed rulemaking was published July 9, 1991 (56 FR 31176). Since that time the regulatory negotiation advisory committee reached consensus on an outline for the reformulated gasoline program. A supplemental notice of proposed rulemaking will be published shortly which describes the consensus of the advisory committee. This supplemental notice will also describe the certification program for reformulated gasoline, the credits program for exceeding certain requirements and the enforcement program, among other elements.

II. The Governors' Requests

EPA received an application from the Hon. Lowell P. Weicker, Jr., Governor of Connecticut, for that state to be included in the reformulated gasoline program. His application is set out in full below.

[State of Connecticut Letterhead]

October 28, 1991.

The Honorable William Reilly,
Administrator,
U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, DC 20460.

Dear Mr. Reilly: I am writing at this time to request that, in accordance with section 211(k)(6) of the Clean Air Act, you extend the reformulated gasoline requirements of section 211(k)(5) to the entire State of Connecticut.

All of Connecticut is nonattainment with respect to ozone. Statewide use of reformulated gasoline will contribute greatly to our ability to meet both our obligations under the Act for emission reductions by 1996 and our longer term attainment objectives.

In addition to supporting the use of this cleaner fuel throughout Connecticut, I believe that its widespread use across all of the Ozone Transport Region should be considered.

The responsibility for fulfilling any state role in the implementation of this and other air quality related fuel programs resides in our Bureau of Air Management. Your office should feel free to get in contact with Carl S. Pavetto, Chief, Bureau of Air Management at (203) 566–2506.

I look forward to working with you as we undertake the challenging task of achieving clean air and thank you in advance for your assistance on the important step represented by this request.

Sincerely,

s/Lowell P. Weicker, Jr.,

Governor.

EPA also received an application from the Hon. Judd Gregg, Governor of New Hampshire, for the nonattainment areas in that state to be included in the reformulated gasoline program. His application is set out in full below.

[State of New Hampshire Letterhead]

October 22, 1991.

William K. Reilly, Administrator,
U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460.

Dear Administrator Reilly: Pursuant to the provisions of section 211(k) of the Clean Air Act as amended, I am informing you that those areas of New Hampshire classified as Ozone Nonattainment Areas intend to participate in the reformulated gasoline program. In New Hampshire, these areas include the New Hampshire portion of the Boston-Lawrence-Salem MA/NH[2] CMSA, the New Hampshire potion of the Portsmouth-Dover-Rochester NH/ME MSA, and the Manchester, New Hampshire MSA plus the remainder of Hillsborough, Merrimack, and Rockingham Counties not included in the Boston or Portsmouth metropolitan areas. Presently New Hampshire portions of the Boston CMSA and the Portsmouth MSA are classified serious and the Manchester MSA plus the remainder of the three Counties are classified marginal.

Of the steps available to the State of New Hampshire to comply with the Clean Air Act, the reformulated gasoline option will enable our state to achieve the emission reductions mandated by the Clean Air Act while having the least negative impact on our industry, small businesses and consumers.

If you have any questions or would like to discuss these issues further, please call or have your staff contact Commissioner Robert W. Varney at (603) 271–3503.

Sincerely,

s/Judd Gregg

Governor.

EPA also received an application from the Hon. Lawrence Douglas Wilder, Governor of Virginia, for the nonattainment areas in that state to be included in the reformulated gasoline program. His application is set out in full below.

[Commonwealth of Virginia Letterhead]

Mr. William K. Reilly, Administrator,
U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460.

Dear Mr. Reilly: As you know, the Clean Air Act Amendments of 1990 impose significant air pollution control requirements on the states. After analyzing the benefits of various control measures and options, I am requesting that the U.S. Environmental Protection Agency require the sale of reformulated gasoline in Virginia's nonattainment areas as provided for under Section 211 (k) of the new Clean Air Act.

We have concluded that the benefits of the associated emissions reduction demonstrate this to be a cost effective control measure that will both improve air quality and provide a basis for maintaining air quality with future economic growth.

The reformulated gasoline program should be required in those ozone nonattainment areas which are located in the Metropolitan Statistical Areas, the Northern Virginia Nonattainment Area (serious), the Richmond Nonattainment Area (moderate), and the Hampton Roads Nonattainment Area (marginal)[3]

Wish best wishes, I am

Very truly yours,

s/Lawrence Douglas Wilder.

cc: The Honorable Elizabeth H. Haskell, Mr. Wallace N. Davis, Mr. Richard Rykowski, Mr. Edwin B. Erickson.

III. Action

Pursuant to the governors' letters and the provisions of section 211(k)(6), the prohibitions of subsection 211(k)(5) will be applied to the entire state of Connecticut and the nonattainment areas in New Hampshire and Virginia classified Marginal or worse (except Smyth County, Virginia) beginning January 1, 1995 (except as provided above). The application of the prohibitions to these areas cannot take effect any earlier than January 1, 1995 under section 211(k)(5) and cannot take effect any later than January 1, 1995, under section 211(k)(6)(A), unless the Administrator extends the effective date by rule under section 211(k)(6)(B).

Dated: December 13, 1991.

William K. Reilly,

Administrator.

[FR Doc. 91–30583 Filed 12–20–91; 8:45 am]

BILLING CODE 6560–50–M

[1] EPA recently promulgated such designations pursuant to section 107(d)(4) of the Act (56 FR 56694; November 6, 1991).

[2] This area is referred to as the Boston-Lawrence-Worcester nonattainment area in the Federal Register notice describing the areas (56 FR 56694). (Footnote added)

[3] These areas are designated in the November 6, 1991 notice the "Washington Area," the "Richmond-Petersburg Area" and the "Norfolk-Virginia Beach-Newport News Area," respectively (56 FR 56663–4). Therefore, the only nonattainment area in Virginia to which this request does not apply is Smyth County. (footnote added)

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

Proposal To Conduct a Pilot Survey of Americans With Disabilities in Private Industry

AGENCY: Equal Employment Opportunity Commission.

ACTION: Notice of proposal to conduct a sample survey of establishments in private industry to determine the disability status of their employees.

SUMMARY: As part of its new responsibility in administering title I of the Americans with Disabilities Act of 1990 (ADA), the Commission plans to conduct a pilot survey of the disability status of all employees working at a number of private establishments, randomly selected from the files of the Employer Information Report (EEO–1) survey. In the stage prior to enactment of ADA, it was noted that there were no precise or accurate data that the Commission could rely on to cite statistics on Americans with disabilities, and to estimate and project the number of those individuals with disabilities who were employed part-time or full-time. Better data were therefore needed and it was decided that a pilot survey would be a reliable and cost-effective way in which to establish a mechanism to collect such data. This pilot survey was thus designed to assess the extent to which individuals with disabilities are employed in private industry, the kinds of jobs they hold, and whether or not they work full-time or part-time. Such information will assist in policy evaluations and assessments with regard to employees with disabilities, not only for the Commission but for other agencies that have program responsibilities under ADA. The survey will also serve as the basis for future decisions about data collection under ADA and as a pilot test of the questionnaire, data collection procedures, and the validity and adequacy of the data collected.

DATES: Written comments must be submitted on or before February 21, 1992. A public hearing concerning these proposed changes will be held on a date

VOL
56
ISS
246
DEC
23
1991
UMI

and at a time and place to be announced.

ADDRESSES: Comments should be submitted to Frances M. Hart, Executive Officer, Executive Secretariat, Equal Employment Opportunity Commission, 10th Floor, 1801 L Street, NW., Washington, DC 20507. Copies of comments submitted by the public will be available for review at the Commission's library, room 6502, 1801 L Street, NW., Washington, DC between the hours of 9:30 a.m. and 5 p.m. Any comments should additionally be filed with the Office of Management and Budget (See "Paperwork Reduction Act" below).

As a convenience to commenters, the Executive Secretariat will accept public comments transmitted by facsimile ("FAX") machine. The telephone number of the FAX receiver is (202) 663–4114. (This is not a toll-free number.) Only public comments of six or fewer pages will be accepted via FAX transmittal. This limitation is necessary to assure access to the equipment. Comments sent by FAX in excess of six pages will not be accepted. Receipt of FAX transmittals will not be acknowledged, except that the sender may request confirmation of receipt by calling the Executive Secretariat Staff at (202) 663–4078. (This is not a toll-free number.)

Persons wishing to present their views orally should notify the Commission of their desire to do so, in writing, no later than January 22, 1992 with a request to Frances Hart, Executive Officer, Executive Secretariat, Equal Employment Opportunity Commission, 1801 L Street, NW., Washington, DC 20507. The request should include a written summary of the remarks to be offered.

FOR FURTHER INFORMATION CONTACT: Joachim Neckere, Director, Program Research and Surveys Division at (202) 663–4958 (voice) or (202) 708–9300 (TDD).

SUPPLEMENTARY INFORMATION: The authority for data collection is by reference in ADA to the authority contained in 709(c) of Title VII of the Civil Rights act of 1964, as amended. The pilot survey that is proposed does not initiate any recordkeeping or reporting requirements but is part of the pre-rule making process.

The questionnaire used in the survey is a one-page form, designed to collect data on limitations of common activities, use of aids, and medical history. Data will also be reported by job category and by full-time and part-time employment status. Employees rather than employers will complete the questionnaire and all responses will be voluntary and anonymous. Employers will be requested to distribute the questionnaires to their employees. Provide a drop-off location for receipt of completed questionnaires and return the completed questionnaires to the Commission.

Mailout for this survey is planned for August 1992 with a filing deadline on or about September 30, 1992. It is expected that approximately 1,500 establishments will be included in the probability sample and that these establishments will cover about 420,000 employees, to whom a questionnaire would be made available.

Paperwork Reduction Act

This proposed pilot survey contains information collection subject to review and approval by the Office of Management and Budget under the Paperwork Reduction Act. It is estimated that nationwide a one-time reporting burden would equal approximately 42,000 hours. The one-time processing cost to the government is estimated to equal $200,000. As required by the Paperwork Reduction Act, the Equal Employment Opportunity Commission is submitting a request to the Office of Management and Budget (OMB) that it approve this information collection. Organizations or individuals desiring to submit comments for consideration by OMB on this information collection should address them to the Office of Information and Regulatory Affairs, OMB, room 3002, New Executive Office Building, Washington, DC 20503; Attention: Joseph Lackey.

The Commission also certifies under 5 U.S.C. 605(b) enacted by the Regulatory Flexibility Act (Pub. L. No. 96–354), that this pilot survey will not result in significant impact on a substantial number of small employers, and that a regulatory flexibility analysis therefore is not required. Small employers are not affected because the EEO–1 is limited to employer with 100 or more employees and government contractors with 50 or more employees and contract amount of at least $50,000.00.

The Commission hereby publishes this proposal for public comment.

Signed at Washington, DC this 18th day of December, 1991.

For the Commission.

Evan J. Kemp, Jr.,

Chairman.

BILLING CODE 6750–06–M

FEDERAL MARITIME COMMISSION

Agreement(s) Filed; Port of Portland, et al.

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–200465–001.

Title: Port of Portland/Star Shipping Terminal Agreement.

Parties:

Port of Portland
Star Shipping, Inc.

Synopsis: This Agreement, filed December 13, 1991, provides for an extension through February 29, 1992, of the current terminal use agreement between the parties.

Agreement No.: 212–010386–021.

Title: Argentina/U.S. Atlantic Coast Ports Pool Agreement.

Parties:

American Transport Lines, Inc.
A. Bottacchi S.A. de Navegacion C.F.I.I.
Empresa Lineas Maritimas Argentinas S.A.
Columbus Line
Companhia de Navegacao Lloyd Brasileiro.

Synopsis: The proposed amendment (1) deletes A. Bottacchi S.A. de Navegacion C.F.I.I. as a party to the Agreement; (2) adds Companhia Maritima Nacional and Empresa de Navegacao Alianca S.A. as parties to the Agreement; (3) changes the name of the Agreement to Argentina/U.S. Atlantic & Gulf Ports Pool Agreement; (4) provides for share ceilings; (5) provides for two six month pool periods in 1992; and (6) makes other technical changes. The parties have requested a shortened review period.

Agreement No.: 212–010388–016.

Title: U.S. Atlantic Coast/Argentina Agreement

Parties:

Empresa Linesas Maritimas Argentinas S.A.
A. Bottacchi S.A. de Navegacion C.F.I.I.
American Transport Lines, Inc.

Synopsis: The proposed amendment deletes A. Bottacchi S.A. de Navegacion C.F.I.I. as a party to the Agreement; (2) adds Columbus Line, Empresa de Navegacao Alianca S.A., Companhia de Navegacao Lloyd Brasileiro and Companhia Maritima Nacional as parties to the Agreement; (3) changes the name of the Agreement to U.S. Atlantic and Gulf Ports/Argentina Pool Agreement; provides for share ceilings; (5) provides for two six month pool periods in 1992; and (6) makes other technical changes. The parties have requested a shortened review period.

Dated: December 17, 1991.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary

[FR Doc. 91–30501 Filed 12–20–91; 8:45 am]

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

Agency Forms Under Review

December 16, 1991.

Background

Notice is hereby given of the final approval of proposed information collection(s) by the Board of Governors of the Federal Reserve System (Board) under OMB delegated authority, as per 5 CFR 1320.9 (OMB Regulations on Controlling Paperwork Burdens on the Public)

FOR FURTHER INFORMATION CONTACT:

Federal Reserve Board Clearance Officer—Frederick J. Schroeder—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, DC 20551 (202–452–3829)

OMB Desk Officer—Gary Waxman—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, room 3208, Washington, DC 20503 (202–395–7340)

Final Approval Under OMB Delegated Authority of the Extension, With Revisions, of the Following Report(s)

Report Title: Report of Condition for Foreign Subsidiaries of U.S. Banking Organizations.

Agency form number: FR 2314a, b and c.

OMB Docket Number: 7100–0073.

Frequency: Quarterly and Annually.

Reporters: Foreign Subsidiaries of U.S. Banks, Bank Holding Companies, and Edge and Agreement Corporations.

Annual reporting hours: 4098.

Estimated average hours per response: 1.00 to 4.00.

Number of respondents: 1192. Small businesses are not affected.

General description of report: This information collection is mandatory (12 U.S.C. 324, 602, 625 and 1844(c)) and is given confidential treatment (5 U.S.C. 552(b)(8)).

The reports collect information on the assets, liabilities, off-balance sheet items, and earnings from all direct or indirect foreign subsidiaries of U.S. banking organizations. The data are used to monitor the growth and activities of the subsidiaries and to supervise the overall operation of the parent organization. The proposed revisions are designed to make the reports more consistent with the parent organizations' reports of condition and income and to improve the System's surveillance of overseas banking operations.

Board of Governors of the Federal Reserve System, December 16, 1991.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210–01–M

Chemical Banking Corporation, et al.; Notice of Applications to Engage de novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than January 13, 1992.

A. Federal Reserve Bank of New York (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. Chemical Banking Corporation, New York, New York; to engage *de novo* through its subsidiary, CBC Interim Federal Savings Bank 2, New York, New York, in operating a savings institution pursuant to § 225.25(b)(9) of the Board's Regulation Y.

Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. First Bancshares of Natchitoches, Inc., Natchitoches, Louisiana; to engage *de novo* in originating loans for itself or for others of the type made by a mortgage company pursuant to § 225.25(b)(1) of the Board's Regulation Y. These activities will be conducted in Natchitoches, Bienville, DeSoto, Grant, Rapides, Red River, Sabine, Vernon, Winn, and Jackson Parish, Louisiana.

Board of Governors of the Federal Reserve System, December 17, 1991.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210–01–F

First Central Bancshares, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

VOL 56 ISS 246 DEC 23 1991 UMI

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than January 13, 1992.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. First Central Bancshares, Inc., Lenoir City, Tennessee; to become a bank holding company by acquiring 100 percent of the voting shares of First Central Bank, Lenoir City, Tennessee.

B. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. Firstar Corporation, Milwaukee, Wisconsin, and Firstar Corporation of Illinois, Milwaukee, Wisconsin; to merge with First Geneva Banqueshares, Inc., Geneva, Illinois, and thereby indirectly acquire First National Bank of Geneva, Geneva, Illinois.

2. Old State Bank Corporation, Fremont, Michigan; to become a bank holding company by acquiring 100 percent of the voting shares of The Old State Bank of Fremont, Fremont, Michigan.

C. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. Galatia Bancorp, Inc., Galatia, Illinois; to acquire 100 percent of the voting shares of The First National Bank of Metropolis, Metropolis, Illinois.

D. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. Citizens Bank Group, Inc., Minneapolis, Minnesota; to become a bank holding company by acquiring 97.2 percent of the voting shares of Citizens State Bank of St. James, St. James, Minnesota.

Board of Governors of the Federal Reserve System, December 17, 1991.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

First Community Bancshares, Inc.; Formation of, Acquisition by, or Merger of Bank Holding Companies; and Acquisition of Nonbanking Company

The company listed in this notice has applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities of a bank or bank holding company. The listed company has also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted, these activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than January 13, 1992.

A. Federal Reserve Bank of Kansas City (John E. Yorke, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. First Community Bancshares, Inc., Knob Noster, Missouri; to become a bank holding company by acquiring 100 percent of the voting shares of Sweet Springs Bancshares, Inc., Sweet Springs, Missouri, and thereby indirectly acquire Chemical Bank, Sweet Springs, Missouri; Bancshares of Knob Noster, Knob Noster, Missouri, and thereby indirectly acquire The Bank of Knob Noster, Knob Noster, Missouri; and Ionia Bancshares, Inc., Windsor, Missouri, and thereby indirectly acquire First Community Bank, Windsor, Missouri.

In connection with this application, Applicant also proposes to engage in the sale of general insurance in a town of less than 5,000 in population purusant to § 225.25(b)(8)(iii)(A) of the Board's Regulation Y. This activity will be conducted in Knob Noster, Missouri.

Board of Governors of the Federal Reserve System, December 13, 1991.

Jennifer J. Johnson,

Associate Secretary of the Board.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Advisory Council; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory body scheduled to meet during the month of February 1992:

Name: National Advisory Committee on Rural Health.

Date and Time: February 10-12, 1992; 8:30 a.m.

Place: The Doubletree Hotel, 101 North Main Street, McAllen, Texas 78501.

The meeting is open to the public.

Purpose: The Committee provides advice and recommendations to the Secretary with respect to the delivery, financing, research, development and administration of health care services in rural areas.

Agenda: During this meeting, the Committee intends to address the theme, "Rural and Migrant Health Issues Along the Texas-United States/Mexican Border." The Committee will also be touring rural clinics and medical facilities in Starr County, Texas and will visit several colonias along the border in the Rio Grande Valley. Finally, the Committee will continue shaping its agenda for and developing recommendations to be included in the Fifth Report to the Secretary.

The meeting is open to the public, however, no transportation will be provided to the site visits.

Anyone requiring information regarding the subject Council should contact Mr. Jeffrey Human, Executive Secretary, National Advisory Committee on Rural Health, Health Resources and Services Administration, room 14-22, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443-0835.

Persons interested in attending any portion of the meeting should contact Ms. Arlene Granderson, Director of Operations, Office of Rural Health Policy, Health Resources and Services Administration, Telephone (301) 443-0835.

Agenda Items are subject to change as priorities dictate.

Dated: December 17, 1991.

Jackie E. Baum,

Advisory Committee Management Officer, HRSA
